ARE DETECTORS LEGAL?

In Most States YES. Laser-detector devices are legal in every state except Virginia and Washington, D.C., which have local regulations restricting the use of laser detectors. In those states, it is legal to use a laser detector in a vehicle that is parked or within a building. In Most States NO. Laser-detector devices are illegal in some states, including those that have local regulations restricting the use of laser detectors.

The Federal Highway Administration (FHWA) issued a regulation, effective January 1994, which requires a radar and laser detector device used in any vehicle to be marked with a label explaining the frequency shift, which must be visible to the driver. If the label is not visible, the vehicle cannot be operated on a public road.

For more information on speed monitoring devices, please visit the Whistler Consumer Education website at www.whistlergroup.com.

NOTE:

- Do not follow closely behind any vehicle you cannot see through. If you cannot see a police car ahead of you, chances are your detector cannot either.
- The range of your laser detector will not be the same as a radar laser. Laser detectors are used to detect speed cameras, which are far less common than radar detectors.

When returning a unit for warranty service, please follow these instructions:

1. Send your unit with a copy of your sales receipt. If you ordered directly from Whistler by calling 1-800-531-0004, please include your order number. When returning a unit for warranty work, it will be returned to you along with a copy of your dated store receipt. You may register your unit online at www.whistlergroup.com.

2. Include with your unit the following clearly printed information:
   - Your name and address
   - A telephone number if you wish to be contacted
   - A description of the problem
   - The model number
   - The serial number
   - The date the Whistler Products Representative ordered it
   - The date the Whistler Products Representative received it

3. Be certain your unit is returned with its serial number. The serial number is on the spine of the manual. The serial number is also on the bottom of your unit. If your unit is returned without a serial number, it will not be repaired.

TROUBLESHOOTING GUIDE

WARNING:

- Do not follow closely behind any vehicle you cannot see through. If you cannot see a police car ahead of you, chances are your detector cannot either.
- The range of your laser detector will not be the same as a radar laser. Laser detectors are used to detect speed cameras, which are far less common than radar detectors.

Dear Whistler Customer,

If you have questions concerning the operation of this Whistler product please call:

CUSTOMER SERVICE 1-800-531-0004
Monday - Friday 8:00 am - 5:00 pm CT or visit our website
www.whistlergroup.com

Please keep the receipt in a safe place.
You may register your product online at www.whistlergroup.com. For warranty verification purposes, a copy of your dated store receipt must still accompany any unit sent in for warranty service work. If the unit is returned without a dated store receipt, an out of warranty service charge applies.

Whistler's ergonomic and user-friendly design provides a new level of operating convenience. Special features include:

1. Bracket Release Button - Provides quick and easy release of the mounting bracket.
3. Mounting Bracket Location - Slot holds mounting bracket firmly.
5. Flasher for Laser - High gain optical lens provides increased sensitivity and field of view for edge laser detection.
7. City Button - Reduces the annunciation of laser alert events typically encountered in urban areas.
8. Power On / Volume Control - Turns unit on (see pg. 15).
9. Icon Display - Offers easy-to-read display to indicate power mode, system information, and signal strength.
10. Quiet Button - Pressing QUIET before a signal is detected engages Auto Quiet Mode which automatically reduces the audio level after the initial warning to a low audio level setting. Pressing QUIET during a radar/laser encounter silences audio alerts, while allowing visual alerts to keep you informed.

Vehicle's owner's manual or ask your dealer.

IMPORTANT:

1. Make sure the unit is level.
2. Please drive safely.
3. Enjoy your Whistler detector and please use it.

Sincerely,
The Whistler Group, Inc.
