3M™ Headlight Lens Restoration System | 39008

Plastic lenses can yellow with age, reducing headlight brightness, and new lenses can be expensive. The 3M™ Headlight Lens Restoration System lets you shine and restore plastic lenses, including headlights, taillights, fog and directional lights. Now you can produce professional results with the 3M™ Headlight Lens Restoration System and a household drill (1200-1600 rpm).

DIRECTIONS FOR USE:

- Detailed instructions for use available as a separate document on 3Mcarcare.com

PRODUCT FEATURES

A. Easy to use with a household drill
B. Sands away the outer layer to restore clarity to headlight lenses that have become yellowed, cloudy, or hazed over time
C. Refines and reduces scratches
D. Polishes lenses for clarity and shine

BENEFITS TO USERS

A. By restoring clarity to the lens, the performance of the headlight is improved and the appearance of the vehicle is enhanced
B. More cost effective than paying for a professional service
C. Kit includes all items necessary to perform the task except for the drill, tape and clean cloth
