IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic precautions should always be observed, especially when children are present. Read all instructions before using this appliance.

DANGER

Do not allow children to touch this product. Do not let children touch or play with this appliance.

Unplug this appliance before cleaning it.

Do not use while bathing or in the shower.

Do not reach for an appliance that has fallen into water. Unplug it immediately.

Do not place or store this appliance where it can fall or be pulled into a tub or sink.

Do not place or store this appliance where it can fall into or be dropped into water or other liquid.

Do not use outdoors or operate where aerosol (spray) products are being used, or near any appliance that generates an electrical charge. Keep the cord away from heated surfaces.

Never drop or insert any object into any of the appliance's openings.

The appliance should never be left unattended when it's plugged in, except when charging a rechargeable appliance.

This appliance is for household use only.

Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or if it has been dropped into water.

Make sure the cord is disconnected from the charger while storing this appliance out in a moisture-free area. Do not store it in temperatures exceeding 140°F (60°C).

Never operate this appliance if it has been dropped or damaged, or if it has been dropped into water. If any of these things happen, return the appliance to the nearest Remington Authorized Service Center for examination and repair.

WARNING

Proper home disposal is the responsibility of the owner. When disposing of batteries, always follow all local regulations.

Do not wrap in metal or aluminum foil. Wrap in newspaper before discarding. It is suggested that you contact local battery redemption site(s) whenever possible to ensure proper disposal of your used batteries.

Do not wrap the cord around the appliance.

Do not use an extension cord or a voltage converter with this appliance.

Always attach plug to appliance and then the adapter to the outlet. To disconnect, turn all controls to OFF, then remove adapter from outlet, then detach power cord from appliance.

Product Features

Remington® Beard & Hair clippers provide a quick and easy way to maintain professional-looking haircuts and facial hair at home. Developed to combine precision and power, our new HC5550 & HC5750 clippers enable you to achieve customized, modern looks and traditional hairstyles.

To help you create those styles, and to extend the life of your hair clipper, please review the tips below and the chart on page 2 for tips on attaching adjustable comb sets.

Make sure the clip cord is disconnected from the charger when cleaning this appliance out in a moisture-free area. Do not store it in temperatures exceeding 140°F (60°C).

See the chart on page 2 for tips on attaching adjustable comb sets. For proper home disposal, please refer to the Battery Care & Recycling Guide on page 3.

To avoid accidental cuts and/or scratches to your skin while performing haircuts, etc., be sure to check your hair clipper’s blades and combs regularly for any nicks or damage. If any of these things happen, return the appliance to the nearest Remington Authorized Service Center for examination and repair.

To avoid scratching your skin while using your hair clipper, always use the lowest speed setting. If your skin feels warm, immediately stop using the appliance and turn it off. This appliance is not intended for use in a bathtub or shower.

ATTACHING ADJUSTABLE GUIDE COMBS

To attach comb to clipper, align both comb slots with the comb tracks on both sides of the clipper and slide into place. If any of these things happen, return the appliance to the nearest Remington Authorized Service Center for examination and repair.

The table below lists the length settings and other important characteristics.
How to Use
Nickel-Metal Hydride batteries included. See battery removal section for proper disposal of batteries.

To preserve the life of the batteries, discharge them by running the clipper until the blades move slowly. Switch off and fully recharge. Do this every six months.

If the clipper has not been used for a month or longer, it is advisable to recharge it for 14-16 hours.

If the clipper is set to Boost, it will run at maximum power at all times.

The batteries cannot be overcharged, but we recommend that charging be discontinued if the amber light is glowing for 24 hours.

■ Clipper must be turned off.

■ Always store this appliance and cord in a moisture-free area.

■ Unplug the charge adaptor from the power outlet when not in use and when charging is completed.

■ Do not use liquid cleaners on the cutters or harsh or corrosive chemicals on the cutter casing.

■ Do not use small flat head screw driver.

■ Remove blade for ease of disassembly and safety by using a phillips screw driver.

■ The batteries will not charge faster than 14 hours.

■ The battery pack is not rechargeable.

■ The clipper does not work when turned on:
  - Check the charging adaptor is plugged into a live outlet.
  - Check if the master plug on the charging cord is loose or damaged.
  - Check that the battery is inserted correctly and the battery pack is seated properly.
  - Check the battery pack is fully charged and it has not been damaged.

■ The clipper does not hold charge:
  - Check that the battery is inserted correctly and the battery pack is seated properly.
  - Check the battery pack is fully charged and it has not been damaged.
  - Remove the battery pack from the device.
  - Remove battery pack from the device.

Cleaning & Maintaining
Cleaning & Maintaining Your Clipper
