**NOTE:**

- Buttons design is based on typical model and might be slightly different from the actual one you purchased, the actual shape shall prevail.
- All the functions described are accomplished by the unit. If the unit has no this feature, there is no corresponding operation happened when press the relative button on the remote controller.
- When there are wide differences between "Remote controller Illustration" and "USER'S MANUAL" on function description, the description of “USER'S MANUAL” shall prevail.

**Function Buttons**

Before you begin using your new air conditioner, make sure to familiarize yourself with its remote control. The following is a brief introduction to the remote control itself. For instructions on how to operate your air conditioner, refer to the How to Use The Basic/Advance Functions section of this manual.

**NOTE:** Please do not select HEAT mode if the machine you purchased is cooling only type. Heat mode is not supported by the cooling only appliance.

**Model:** RG66A2/BGEFU1
NOTE: Holding this button down for 2 seconds will activate Silence feature.

FAN
Selects fan speeds in the following order:
AUTO → LOW → MED → HIGH

NOTE: Holding this button down for 2 seconds will activate Silence feature.

TEMP +
Increases temperature in 1°F(1°C) increments. Max. temperature is 86°F(30°C).

TEMP -
Decreases temperature in 1°F(1°C) increments. Min. temperature is 62°F(17°C).

NOTE: Press and hold + and - buttons together for 3 seconds will alternate the temperature display between the °C & °F scale.

FOLLOW ME Button
Used to stop or start horizontal louver movement or set the desired up/down air flow direction. The louver changes 6 degree in angle for each press. If keep pushing more than 2 seconds, the louver will swing up and down automatically.

SWING Button
Used to stop or start vertical louver movement and set the desired left/right air flow direction. The vertical louver changes 6 degree in angle for each press. If keep pushing more than 2 seconds, the vertical louver auto swing feature is activated.

SELF CLEAN
Starts and stops the unit self clean feature.

Model: RG66A1/BGEFU1
Remote LCD Screen Indicators

Information are displayed when the remote controller is powered up.

Transmission Indicator
Lights up when remote sends signal to indoor unit

ON/OFF display
Appears when the unit is turned on, and disappears when the it is turned off.

MODE display
Displays the current mode, including:
- AUTO
- COOL
- DRY
- HEAT
- FAN

Temperature/Timer display
Displays the set temperature by default, or timer setting when using TIMER ON/OFF functions
- Temperature range: 62-86°F (17-30°C)
- Timer setting range: 0-24 hours

This display is blank when operating in FAN mode.

Fan speed display
Displays selected fan speed:
- ✗ Low speed
- M M M M Medium speed
- H H H H High speed
- AUTO Auto fan speed

Not available for this unit

Silence feature display

Follow me feature display

LOCK feature display

Sleep mode display

Note:
All indicators shown in the figure are for the purpose of clear presentation. But during the actual operation only the relative functional signs are shown on the display window.
How To Use The Basic Functions

SETTING TEMPERATURE
The operating temperature range for units is 62-86°F (17-30°C). You can increase or decrease the set temperature in 1°F (1°C) increments.

AUTO operation
In AUTO mode, the unit will automatically select the COOL, FAN, HEAT or DRY mode based on the set temperature.
1. Press the MODE button to select AUTO mode.
2. Set your desired temperature using the Temp+ or Temp- button.
3. Press the ON/OFF button to start the unit.

NOTE: FAN SPEED can’t be set in AUTO mode.

COOL operation
1. Press the MODE button to select COOL mode.
2. Set your desired temperature using the Temp+ or Temp- button.
3. Press the FAN button to select the fan speed.
4. Press the ON/OFF button to start the unit.

DRY operation (dehumidifying)
1. Press the MODE button to select DRY mode.
2. Set your desired temperature using the Temp+ or Temp- button.
3. Press the ON/OFF button to start the unit.

NOTE: FAN SPEED can’t be changed in DRY mode.

FAN operation
1. Press the MODE button to select FAN mode.
2. Press the FAN button to select the fan speed.
3. Press the ON/OFF button to start the unit.

NOTE: You can’t set temperature in FAN mode. As a result, your remote control’s LCD screen will not display temperature.
NOTE: When setting the TIMER ON or TIMER OFF functions, up to 10 hours, the time will increase in 30 minute increments with each press. After 10 hours and up to 24, it will increase in 1 hour increments. The timer will revert to zero after 24 hours. You can turn off either function by setting its timer to 0.0h.

HEAT operation
1. Press the MODE button to select HEAT mode.
2. Set your desired temperature using the Temp + or Temp – button.
3. Press the FAN button to select the fan speed.
4. Press the ON/OFF button to start the unit.

NOTE: As outdoor temperature drops, the performance of your unit’s HEAT function may be affected. In such instances, we recommend using this air conditioner in conjunction with other heating appliance.

Setting the TIMER function
Your air conditioning unit has two timer-related functions:
- TIMER ON- sets the amount of time after which the unit will automatically turn on.
- TIMER OFF- sets the amount of time after which the unit will automatically turn off.

TIMER ON function
The TIMER ON function allows you to set a period of time after which the unit will automatically turn on.
1. Press the Timer button, the Timer on indicator “ ” and time display.
   Note: This number indicates the amount of time after the current time that you want the unit to turn on.
   For example, if you set TIMER ON for 2.5 hours, “ 2.5h ” will appear on the screen, and the unit will turn on after 2.5 hours.
2. Press the Temp + or Temp – button repeatedly to set the time when you want the unit to turn on.
3. Wait 3 seconds, then the TIMER ON function will be activated. The digital display on your remote control will then return to the temperature display. The “ ” indicator remains on and this function is activated.

TIMER OFF function
The TIMER OFF function allows you to set a period of time after which the unit will automatically turn off.
1. Press the Timer button, the Timer off indicator “ ” and time display.
   Note: This number indicates the amount of time after the current time that you want the unit to turn off.
   For example, if you set TIMER OFF for 5 hours, “ 5.0h ” will appear on the screen, and the unit will turn off after 5 hours.
2. Press the Temp + or Temp – button repeatedly to set the time when you want the unit to turn off.
3. Wait 3 seconds, then the TIMER OFF function will be activated. The digital display on your remote control will then return to the temperature display. The “ ” indicator remains on and this function is activated.

Example: Setting unit to turn on after 2.5 hours.
Example: Setting unit to turn off after 5 hours.
Setting both TIMER ON and TIMER OFF at the same time

Keep in mind that the time periods you set for both functions refer to hours after the current time. For example, say that the current time is 1:00 PM, and you want the unit to turn on automatically at 7:00 PM. You want it to operate for 2 hours, then automatically turn off at 9:00 PM.

Do the following:

Example: Setting the unit to turn on after 6 hours, operate for 2 hours, then turn off (see the figure below)

Your remote display

NOTE:

The device could comply with the local national regulations.

- In Canada, it should comply with CAN ICES-3(B)/NMB-3(B).
- In USA, this device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
  1. This device may not cause harmful interference, and
  2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not approved by the party responsible for compliance could void users authority to operate the equipment.
The Follow me function enables the remote control to measure the temperature at its current location and adjust the remote controller will adjust the temperature automatically to 24°C, fan speed of Auto to save energy. If the set temperature is less than 24°C, fan speed will change to Auto. The temperature will remain unchanged.

**NOTE:**
- Pressing the ECO button, or modifying the mode to adjust the set temperature to less than 24°C will stop ECO operation.
- Under ECO operation, the set temperature should be 24°C or more, it may result in insufficient cooling. If you feel uncomfortable, just press the ECO button again to stop it.

**SLEEP Function**
The SLEEP function is used to decrease energy use while you sleep (and don’t need the same temperature settings to stay comfortable). This function can only be activated via remote control. For the detail, see "sleep operation" in "USER’S MANUAL".

**Note:** The SLEEP function is not available in FAN or DRY mode.

**Follow me function**
The Follow me function enables the remote control to measure the temperature at its current location and send this signal to the air conditioner every 3 minutes interval. When using AUTO, COOL, or HEAT modes, measuring ambient temperature from the remote control (instead of from the indoor unit itself) will enable the air conditioner to optimize the temperature around you and ensure maximum comfort.

**ECO function**
**NOTE:** This function is only available under COOL mode.
- Used to enter the energy efficient mode.
- Under cooling mode, press this button, the remote controller will adjust the temperature automatically to 24°C, fan speed of Auto to save energy (but only if the set temperature is less than 24°C).
- If the set temperature is above 24°C, press the ECO button, the fan speed will change to Auto, the set temperature will remain unchanged.

**SILENCE Function**
When using AUTO, COOL, or HEAT modes, measuring ambient temperature from the remote control (instead of from the indoor unit itself) will enable the air conditioner to optimize the temperature around you and ensure maximum comfort.

**8°C Heating Function**
When the air conditioner operates under heating mode with the set temperature of 17°C, press Temp “—” button twice in one second to activate 8 Degree heating function. The unit will operate at a setting temperature of 8°C. Indoor unit display shows "FP".

**Self clean function**
Airborne bacteria can grow in the moisture that condenses around heat exchanger in the unit. With regular use, most of this moisture is evaporated from the unit. When the self clean feature is activated, your unit will clean itself automatically. After cleaning, unit will turn off automatically.

**Note:** You can only activate this function in COOL or DRY mode.
