Thank you very much for purchasing the jHub Power Bank Charger by Modern Portable. You are going to LOVE IT!

Table Of Content:

- 1) What's included?
- 2) Tech Specs
- 3) How to charge your jHub
- 4) How to charge your device with your jHub
- 5) Important Notes and More Information

1)What's Included?

- * The jHub Power Bank Charger by Modern Portable
- * A Micro USB charging cable to charge your jHub power bank
- * The jHub by Modern Portable User Manual (What you are reading now).

2)Tech Specs:

Input – DC 5V / 0.8A
Charging Port OutPut – DC 5V/1A
Capacity – 4000mAh
Size – 120mm X 36mm X 11mm
Weight – 2.9oz

3)How to Charge Your jHub:

A steady red light indicated your jHub is charging. Charging normally takes approximately 3-4 hours. The red light will turn off when your jHub is fully charged and ready to use.

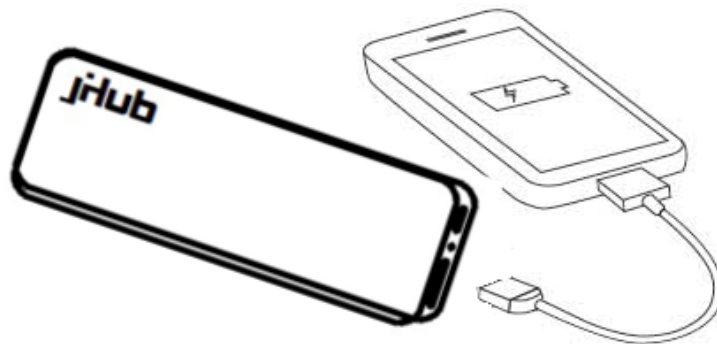

- * Plug the Micro USB cable into the jHub micro USB input port
- * Insert the other end of the USB cable into either an AC wall adaptor plugged into a wall socket (Not Include but same adaptor you would use for a smart phone) or a USB Port on you laptop or computer. (Please view image below)

4) How to Charge Your Device With Your jHub

The jHub is engineered to charge all USB devices (current input must be higher than 50mA). Once your device is plugged into the jHub it will instantly begin charging your device properly. Once the jHub has stopped charging your device it is time to recharge the jHub (Please follow the instructions for charging the jHub in Section 3).

- 1) Plug your USB cable into the jHub USB Charging Port
- 2) Connect the other end of your cable into your device

5) Important Notes and More Information:

- When charging your jHub do not charge other devices from the unit. Charging and discharging your jHub may reduce the internal battery's lifespan.
- Keep your jHub out of extreme heat/cold, damp places, water and flammable items.
- Avoid hitting, throwing or dropping your jHub.
- When Charging your jHub, approximately 20% of the external battery's capacity will be consumed (including power lost from circuit heat, voltage conversion and the charging cable).
