Registering ensures faster service if you need assistance from us in the future.

Cleaning Instructions
Please clean the product by only using a small amount of gentle soap. Do not soak the neck stash or put it in a washing machine, which can damage the RFID-blocking material inside the product.

Tips for Using Your Money Belt
The money belt can be worn either inside or outside your shirt. Keep in mind that how you wear your money belt can impact the level of safety that it provides. For maximum safety wear it under your shirt or tucked into your pants, which will reduce the risk of someone cutting the strap. Wearing the wallet in front of you, such as on your belly, will also keep your valuables in front of you to help prevent pickpocketing.

RFID Signal Blocking
Our product’s material is designed to block RFID signals at the 13.56Mhz frequency, which is the same frequency used for RFID tags in passports and credit cards. It may not block low frequency signals, commonly used for things like employee access cards and hotel key cards, and will not interfere with your cell phone’s reception.
