Safety Information

IMPORTANT: Please read, understand, and comply with all of the instructions provided in this manual before using the device. Failure to comply with the instructions given in this manual and/or using the device in ways other than the ones mentioned in this manual may result in serious injury and/or damage the product.

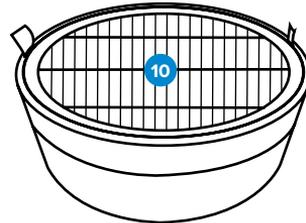

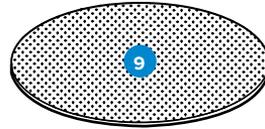

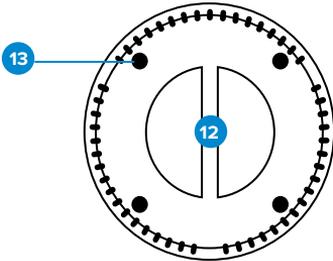

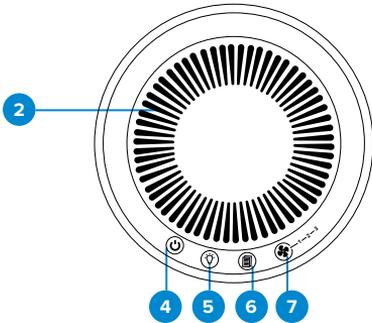

- **DO NOT** immerse air purifier in water or liquids, doing so may result in damage to the appliance, electric shock, or fire.
- **DO NOT** clean the appliance with water or any other liquid to avoid electric shock and/or a fire hazard.
- **DO NOT** use the appliance if the plug, the power cord, or the appliance itself is damaged.
- **DO NOT** allow children to play with or near this purifier. Keep this appliance away from children.
- **DO NOT** block the air outlet and inlet by placing items on the air outlet or in front of the air inlet.
- This air purifier should not be used as a substitute for kitchen or bathroom ventilation or vacuum cleaning.
- This appliance has a polarized plug, always make sure it is correctly plugged into a polarized electrical outlet.
- To avoid fire or electrical shock hazards, always make sure this appliance is plugged into a 120V AC electrical outlet.
- If the electrical outlet used to power the appliance has poor connections, the plug of the appliance becomes hot. Make sure you plug the appliance into a properly connected wall socket.
- **DO NOT** place this appliance on soft surfaces like sofas or beds; the air purifier may tip over and block either the air inlet or outlet.
- Always place and use the appliance on a flat, stable surface.
- Always allow 15 in. (38 cm) of clearance on all sides of the purifier.
- **DO NOT** sit or place anything on top of the purifier
- **DO NOT** place the purifier directly below an air conditioner to prevent any moisture from getting into the purifier.
- Make sure all filters are properly installed before you turn on the appliance; remove the packaging from the filters inside the air purifier before use.
- **DO NOT** use any other filters with this air purifier. Only use Levoit LV-H132-RF replacement filters for this unit.
- Avoid hitting the purifier with hard objects.
- Always unplug the appliance before lifting or moving it.
- **DO NOT** insert fingers or objects into the air outlet.
- **DO NOT** use this appliance with indoor smoke-type insect repellents or in places with oily residues, burning incense or chemical fumes.
- **DO NOT** use the appliance near gas appliances, heating devices or fireplaces.
- Always unplug the appliance after use and before cleaning it.
- **DO NOT** use the purifier in a room with major indoor temperature changes as this may cause condensation to build up inside the appliance.
- The appliance is only intended for indoor household use under normal operating conditions as stated in this manual.
- **DO NOT** use the air purifier in humid environments.
- The appliance does not remove carbon monoxide (CO) or radon (Rn). It cannot be used as a safety device to prevent or clean up accidents with combustion processes and hazardous chemicals.
- This appliance should be kept at least 6.5 feet (2 meters) away from electronics that use radio waves.
- This appliance should only be used in rooms with temperatures between 40°F and 110°F.

- **DO NOT** attempt to repair this device in any way or use any replacement components or parts to modify the air purifier. Doing so will void your warranty. Contact customer service immediately if your appliance is no longer working.
- **WARNING:** To reduce the risk of fire or electric shock, **DO NOT** use the appliance with any solid-state speed control device.

Main Functions

Top view of filter

Bottom view of filter

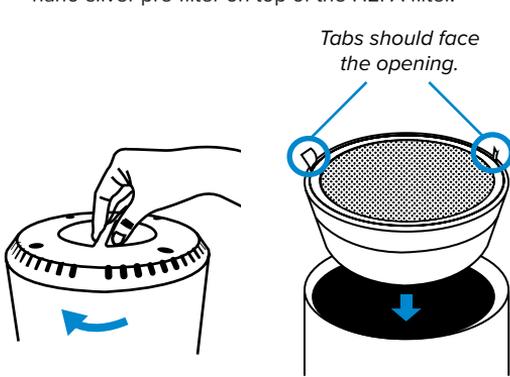

- | | |
|------------------------|-----------------------------|
| 1. Housing | 8. Power cord |
| 2. Air outlet | 9. Nano-silver pre-filter |
| 3. Air inlet | 10. HEPA filter |
| 4. Power button | 11. Activated carbon filter |
| 5. Night light button | 12. Filter cover |
| 6. Filter reset button | 13. Anti-skid pads |
| 7. Fan speed button | |

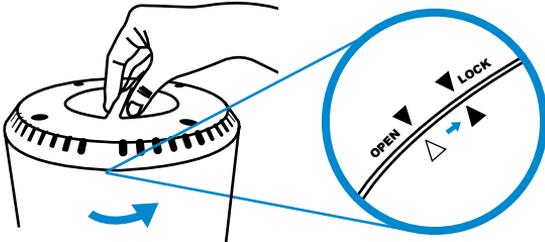

Set-Up

1. Flip over the purifier to reveal the filter cover. Turn the filter cover counterclockwise to the unlock position and remove the cover.
2. Remove the filter from its plastic packaging. Reinstall the filter with its pull tabs facing the opening. The HEPA filter should be facing the opening. Place the nano-silver pre-filter on top of the HEPA filter.

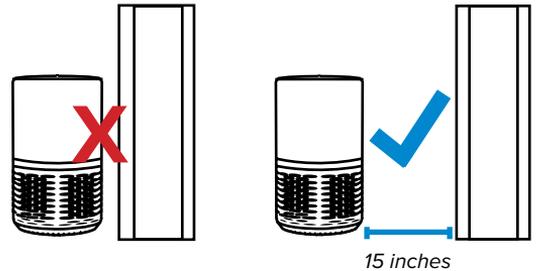

3. Replace the filter cover on the air purifier, making sure the arrows on the housing and filter cover align. Turn the filter cover clockwise to the lock position to secure the filters; the filter cover should snap shut on the purifier.

4. Place the air purifier on a flat, stable surface. Connect the purifier to an electrical outlet and the device will chime, indicating that it is connected to a power source.

NOTE:

- Always allow 15 inches of clearance on all sides of the purifier.
- Ensure the air filter is properly positioned in the purifier before use.

Operation

Button Controls

Press once to turn on or turn off the air purifier.

Press the Night Light button once to turn on the air purifier. Press the Night Light button once more to dim the light, and press the button again to turn off the light. Press and hold the Night Light button to turn off the button lights on the air purifier. To turn the lights back on, press any button except for the Power Button.

NOTE: The night light will remain off as a default setting when turning on the air purifier.

Lights up when the air filter needs to be checked or replaced. Press and hold the Filter Reset button for 3 seconds after checking or changing the air filter in the purifier. (See The Filter Reset Button.)

Press the Fan Speed button to cycle through the three fan speeds of the air purifier. Please note that the purifier will automatically default to level 2 when it is turned on.

Care & Maintenance

General Maintenance

- Wipe down the housing with a soft, clean cloth.
- **DO NOT** immerse the purifier in water or liquid detergents.
- If necessary, wipe the housing with a clean damp cloth, then immediately dry the housing with a separate clean cloth.

The Filter Reset Button

It is recommended to change the air filters about every 6 months—this is based on the average daily use as well as the average air quality in the U.S. The Filter Reset button will light up to remind you to check the air filters; this light will turn on sooner or later based on how often you use your air purifier.

If the Filter Reset button has illuminated, please remember to reset the air purifier after checking the filters by pressing and holding the Filter Reset button for 3 seconds (**See Resetting the Air Filter Lifetime**).

NOTE:

- When the Filter Reset button lights up, it does not necessarily mean that you must change your filters. However, it is important to watch out for the following signs of expired filters:
 - Increased operating noise
 - Decreased airflow
 - Clogged filters
 - Increased presence of odors
- The environment in which the air purifier is being used may also extend or shorten the lifetime of the air filter. Using your air purifier in an environment of relatively high pollution may mean you will need to change the air filter more often.
- If the air pollution in your environment is very high, there is a possibility that the filter may not be

completely effective and may need to be replaced before the Filter Reset button lights up.

- Please remember to reset the air purifier after changing the air filter.

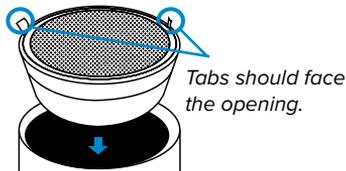

Replacing the Air Filter

If your air filters can no longer filter fresh air, they must be changed to ensure the lifetime of your air purifier. Follow the steps below to properly install new air filters in your unit. You can also scan the QR code to purchase new air filters.

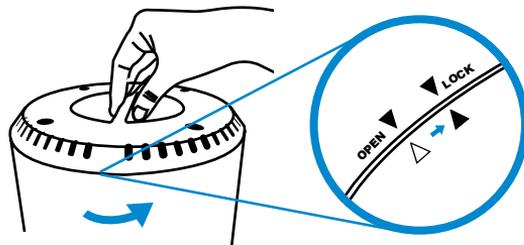

www.amazon.com/dp/B06XNPGNY9

1. Turn off and unplug the air purifier.
2. Flip over the purifier and remove the filter cover.
3. Remove the old filter.
4. Clean any remaining dust or hair inside the purifier using a vacuum hose. **DO NOT** use water or liquids to clean the purifier.

5. Remove the new filter from its packaging and place it into the purifier with the pull tabs facing the opening. The HEPA filter should be facing the opening.

6. Replace the filter cover onto the housing, making sure the arrows on the housing and filter cover align. Turn the filter cover clockwise to the lock position.
7. Follow the instructions in the Resetting the Air Filter Lifetime section to complete the filter replacement process.

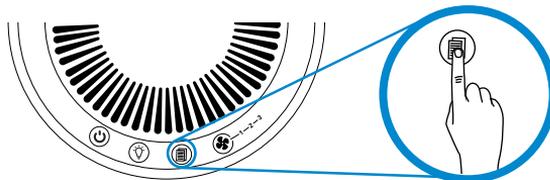

NOTE:

- **DO NOT** wash and reuse air filters. The air filters cannot be cleaned manually.
- Only use **Levoit LV-H132-RF True HEPA Filters** when changing the filter for this device.

Resetting the Air Filter Lifetime

NOTE: The air filter lifetime must be reset if the Filter Reset button lights up.

1. Plug in the air purifier and turn it on.

2. While the air purifier is on standby, press and hold the Filter Reset button for 3 seconds.
3. The Filter Reset button light will turn off, indicating that the reset is complete.

Force Resetting the Filter Lifetime

When using the air purifier in a heavily polluted environment, the lifetime of the air filter may be significantly reduced and the filter may stop filtering air properly. You can change the filters even if the Filter Reset button does not light up. Follow the steps below to force reset the filter.

1. Replace the air filters as mentioned in the Changing & Replacing the Filter section.
2. While the air purifier is on standby, press and hold the Filter Reset button for 3 seconds. The Filter Reset button will light up.
3. Press and hold the Filter Reset button again for 3 seconds; the Filter Reset button will now turn off. The reset is now complete.

Troubleshooting

Problem	Cause	Solution
Air purifier does not work.	Plug is not connected to an electrical outlet.	Connect the plug into a powered electrical outlet.
	Power button is not on.	Press the power button once to turn on the air purifier.
Significantly reduced airflow.	Filter packaging has not been removed	Remove filter packaging before use.
	Fan speed is low.	Press the fan speed button to adjust fan speed.
	Filter is dirty or has not been replaced.	Replace the filter.
	Not enough clearance on all sides of the purifier.	Ensure there is at least 15 in. (38 cm) of clearance on all sides of the purifier.
Poor air purification quality.	Room is too large for the air purifier's applicable area.	Ensure the room is smaller than 86.1 ft ² (8 m ²).
	Air inlet or outlet is blocked.	Remove objects blocking air inlet or outlet.
	Filter is not properly placed in housing.	Properly place filter as noted in the Set-Up and Changing & Replacing the Filter sections. (page 9)
Filter reset light is still on after replacing the air filter.	The air filter's lifetime has been incorrectly reset.	Press and hold the filter reset button for 3 seconds until the button lights up. Press and hold the filter reset button again until the light turns off.

Warranty Information

Product	LV-H132 Air Purifier
Default Warranty Period	2 Years
Order Number:	
Date of Purchase:	

Terms & Policy

Levoit warrants all products to be of the highest quality in material, craftsmanship, and service. effective starting from the date of purchase.

Levoit will replace any product found to be defective due to manufacturer flaws based on eligibility; refunds are available within the first 30 days of purchase. This warranty extends only to personal use and does not extend to any product that has been used for commercial, rental, or any other use in which the product is not intended for. There are no warranties other than the warranties expressly set forth with each product. This warranty is non-transferrable. Levoit is not responsible in any way for any damages, losses or inconveniences caused by equipment failure or by user negligence, abuse, or use noncompliant with the user manual or any additional safety, use, or warnings included in the product packaging and manual.

This warranty does not apply to the following:

- Damage due to abuse, accident, alteration, misuse, tampering or vandalism.
- Improper or inadequate maintenance.
- Damage in return transit.
- Unsupervised use by children under 18 years of age.

Levoit and its subsidiaries assume no liability for damage caused by the use of the product other than for its intended use or as instructed in the user manual.

Some states do not allow this exclusion or limitation of incidental or consequential losses so the foregoing disclaimer may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

ALL EXPRESSED AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.

Additional 1-Year Warranty

You can extend your one-year warranty by an additional year. Log onto www.levoit.com/warranty and enter your order number (i.e. Amazon or Houzz) to register your new product for the extended warranty.

If you are unable to provide the order number for your product, or if your product has been gifted to you, please type a short note in the order number field along with the date you received your product (i.e. "Gift received on dd/mm/yy").

Defective Products & Returns

Should your product prove defective within the specified warranty period, please contact Customer Support via support@levoit.com with your order number. Once our customer service team has approved your request, please return the unit with a copy of the invoice or your order number.
