Quality construction and design!

- Rugged all-steel construction
- Heat tempered work edge
- Lightweight and versatile
- Comfortable vinyl grip handle
- Four Models to match most roof pitched
- Recognized for its versatility and ease of use
- Ergonomically designed to reduce worker fatigue and increase productivity.
- Available in four sizes to accommodate most roof pitches and angles

22" Short Handle

Model # 2563

- For flashing, siding and tight areas
- 22 1/2" long handle with 4 teeth

For Those Hard To Reach Areas:

The Model #2563 shingle remover is ideal for those small, hard to reach areas around chimney flashing, roof valleys, and for siding removal. Also great for removing the starter row from along the roof's edge making it easier to begin using the larger model tools on the roof's surface.

38" Long Handle

Model # 2562

- For steep and hard to work areas
- 38" long handle with 7 teeth

47" Long Handle

Model # 2561

- For steeper pitch roofs
- 47" long handle with 10 teeth.

54" Long Handle

Model # 2560

General Purpose Shingle Remover:

Rugged all steel construction makes this the perfect tool for removing asphalt roof shingles. Ergonomically designed to reduce worker fatigue. This model is ideal for most roof pitches. No fiberglass or wood handle to break. The leverage applied by the offset steel handle's design reduces the force needed to lift and remove shingles.

SHORTER HANDLE TOOLS FOR USE ON STEEPER PITCH ROOFS:

When the longer handle tools can't do the work efficiently, choose the handle length that maximizes the amount of leverage needed to get the job done. Using the right tool can save both time and energy. The Model #2561 is recommended for steeper pitched roofs.

The Model #2562 is recommended for steep and hard to work areas.

FOR THOSE HARD TO REACH AREAS:

The Model #2563 Shingle Remover is ideal for those small, hard to reach areas around chimney flashing, roof valleys, and for siding removal. Also great for removing the starter row from along the roof's edge making it easier to begin using the larger model tools on the roof's surface.

THE MODEL #2560 GENERAL PURPOSE SHINGLE REMOVER

Rugged all steel construction makes this the perfect tool for removing asphalt roof shingles. Ergonomically designed to reduce worker fatigue. This model is ideal for most roof pitches. No fiberglass or wood handle to break. The leverage applied by the offset steel handle's design reduces the force needed to lift and remove shingles.
