ABOUT THE SIGHTMARK CRL LASER SIGHT

The Sightmark series of Triple Duty tactical laser sights are multifunctional weapon sights inspired by military and law enforcement applications. They feature intense, accurate laser beams that are nearly flawless in their quickness of target acquisition.

As with every Sightmark Triple Duty product, the CRL Laser Sight is a quality shooting accessory for any tactical, hunting, or competition shooting function.

BATTERY INSTALLATION

The Sightmark CRL Red Laser Sight uses (2) AG13 batteries.

To insert, remove or replace the battery:
1) Find the battery door located on the underside of the laser housing (see diagram).
2) Remove the battery door by firmly pressing down on the door, twisting the battery door lock, and lifting.
3) Inside you will see two battery compartments. Place each battery into a compartment making sure the polarity is facing the correct direction. A (+) or (-) printed on the bottom of each compartment will show you which way to place the battery.
4) After inserting the batteries, replace the battery door and twist the battery door lock until it is firmly in place.

MOUNTING

Before mounting the laser designator onto your firearm, be sure sure it is UNLOADED and safe to handle. DO NOT attempt to mount the laser on a loaded weapon.
1) Using the hex wrench, loosen the clamping bolt that is located on the side of the laser and slide the laser onto the mounting rail.
2) Align the mounting clamp with the rail’s recoil groove.
3) When the laser is in position, tighten the clamping bolt until the laser is secure on the weapon. DO NOT overtighten, as this may cause damage to the laser.

ZEROING

After the laser sight is mounted to your weapon, you will need to zero in the laser.

1) While following necessary firearm safety precautions, fire five rounds at a target to determine the point of impact.
2) Using the provided screwdriver, adjust the laser to the bullet’s point of impact.
3) Continue to readjust the windage and elevation until the laser is zeroed.

STORAGE

Make sure your Sightmark laser sight is securely attached to your firearm before storing, and be sure the unit is turned off. Remove the laser sight, and the batteries, if it will be stored for an extended period of time.

MAINTENANCE

This laser designator may be cleaned using a soft cloth and water, or a gun cleaning solvent, when exposed to dirt, dust, or other residue. To clean residue from contacts, use a cotton swab dipped in alcohol.
WARNING

Before handling the laser sight, read and understand the contents of your firearm’s manual, and the Sightmark laser sight manual. Follow all standard safety precautions and procedures during firearm operation, even when the laser sight is not in use.

• NEVER point the laser sight directly at, or into, an eye. This may cause damage to the eye, or blindness.
• Avoid looking directly into the laser.
• Avoid shining the laser into mirrors or other reflective surfaces.
• Avoid hitting or dropping the unit.
• ALWAYS check that the chamber of your weapon is clear before mounting or dismounting the laser sight.
• ALWAYS remove the laser sight when cleaning, or performing other maintenance, on your firearm.
• The laser sight should be tested during periods of non-use to make sure it is still operating properly.

Failure to follow standard firearm safety precautions and procedures, as well as the above warnings, is dangerous and may result in serious injury, damage to property, or death.
SIGHTMARK LIMITED WARRANTY

Your product is warranted free of defects in materials and workmanship. In the event of a defect under this warranty, we will, at our option, repair or replace the product. For night vision products, the image intensifier tube that enables night vision capability is warranted to be free from defects for a period of 3 years, as are other electronic components and light emitting devices such as lasers, red dots, and holographic imaging devices. However, light bulbs, batteries and other consumable components are not applicable to this warranty. This warranty does not cover damages caused by misuse or improper handling. Also, this warranty is null and void if modification or maintenance is provided by someone other than the manufacturer.

If you are sending in a product for a warranty repair, you will be required to fill out a RA request form, which can be found at the brand’s website. Once the form has been received and processed, you will receive a confirmation email containing your RA number and a PDF Return Form. The Return Form must be filled out completely, and mailed in, with your product. In order for your repair to be successfully fulfilled, be sure to closely follow all instructions outlined by the Return Form. If any of the aforementioned instructions are not properly followed, your request cannot be processed and the product will be held until you are contacted, and proper documentation is received.

To receive a RA number for warranty service or out-of-warranty repair, or need further information regarding warranty details and information, visit www.sightmark.com.

This warranty is non-transferable and is only valid if the product is registered within 30 days after the product has been purchased. To register your product, go to the brand’s website. Warranty details and updates, including specific warranty coverage outside the United States, are located online, along with information regarding any shipping costs and/or handling fees. Registering online may also provide additional coverage and faster warranty service.

*Warranty varies by country. See website for details.*
