CARE & MAINTENANCE

General Cleaning
We recommend cleaning the kettle after each use.

1. Unplug the power base from the electrical outlet.
2. Allow the kettle to completely cool, then pour out any remaining water.
3. Wash the kettle with warm, soapy water. Dry it thoroughly with a soft, clean cloth.

Descaling the Kettle
You should descale the kettle at least once a week if it is being used frequently. Descaling removes any mineral deposits that have built up inside the kettle. Always descale the kettle after it has been stored or before storing it for long periods of time.

1. Unplug the power base from the electrical outlet.
2. Allow the kettle to completely cool, then pour out any remaining water.
3. Wipe the interior of the kettle with a soft cloth to remove any excess moisture.
4. Fill the kettle with 4 cups of distilled vinegar and 2 cups of water.
5. Place the kettle onto the power base, then plug the power base into an electrical outlet.
6. Boil the solution in the kettle 2-3 times.
7. Pour out the solution, rinse the kettle with clean water, and dry with a soft, clean cloth.
