

Your Double Hooks come in two parts:

- 1. The Suction cup:

- 2. The Hooks:

1 Clean

Use rubbing alcohol or white vinegar to wash:

- the Suction cup's Rubber base
- the Mounting Surface* where you intend to use this product

Then, wipe them both DRY.

*The Mounting Surface **MUST** be even, smooth and non-porous!

Works best on Glass, Windows, Mirrors, Porcelain tiles, Acrylic/plastic shower inserts, Metal, PVC, Quartz, etc...

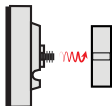

Never position over grout lines or edges.

DO NOT use on uneven, textured, or porous surfaces, such as GRANITE, MARBLE, CERAMIC, Fiberglass, Paint, Wallpaper, Plaster, Wood, Travertine, rustic, nano or mosaic tiles, etc...

2 Loosen

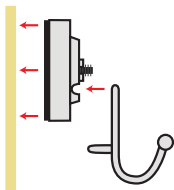

Fully unscrew the Knob from the Suction cup by twisting it counter-clockwise.

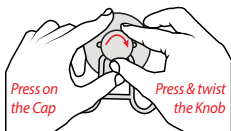

3 Mount

Firmly place the Rubber base against the Mounting Surface.

Then, insert the Hooks into the Cap's groove.

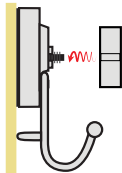

4 Twist

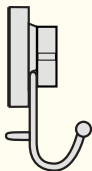

Use one hand to keep pressing the Cap against the Mounting Surface, so the air does not escape.

Use your other hand to press and twist the Knob clockwise, all the way until fully tight.

Enjoy your Double Hooks!

- In the next 2 days following installation, continue to tighten the Knob every few hours to fully secure the suction vacuum.
