Included

- Silencer BT electronic earbuds
- Small / medium / large (Sure-Lock™ sizing fins (6 total)
- Small / medium / large foam ear tips (6 total)
- Cleaning Brush
- Charging Case with Detachable Lanyard
- Micro USB cable
- FREE WALKER’S CONNECT APP available on Apple App Store & Google Play

Quick Start Guide

1. Select the properly sized foam tips and fins that best fit your ears. Follow the Earbud Tip and Fin Selection procedure below before proceeding.
2. Turn on the right earbud by pressing and holding the Power button for 2 seconds.
3. Press and hold the BT Multifunction button (MFB) on the left ear for 2 seconds to turn on your left earbud. A beep in both ears indicates the left and right earbuds are now connected.
4. Environmental Hearing Mode adjustments can now be made by pressing the Power/Mode button on the right ear. Increasing or decreasing ambient sound volume can be adjusted by pressing the Volume Up or Volume Down button on the corresponding earbud.

Connecting to Bluetooth Device and APP

1. Download the WALKER’S CONNECT APP on either the Apple App Store or Google Play.
2. With earbuds off, press and hold the BT Multifunction button on the left earbud for 5 seconds. The earbud will say “Pairing” when ready to pair with your device.
3. Enter Bluetooth menu under settings on your mobile device and select Silencer BT. The earbuds will say “Connected” when a successful pairing has been made.
4. Open Walker’s Connect APP.

Android: Connections to both media and data should occur automatically. If the APP is not functioning as expected turn off the earbuds and reconnect device.

Apple: May require connecting Bluetooth media and data separately in the Bluetooth settings menu. Please ensure both are enabled to enjoy the full features of the Silencer BT and Walker Connect APP.

Earbud Tip and Fin Selection

While fitting the earbuds, ensure that they are powered off. Slide the Sure-Lock™ sizing fins over the housing, and install the foam tips to the ear canal post on the device. If you are unsure of which size fins and foam tips to use, begin with the medium size.

Roll and compress the foam tip between your fingers. Insert into your ear and hold in place for 10-15 seconds to allow the foam to expand and seal within your ear.

A properly sealed Silencer BT earbud will significantly reduce outside noise, muffling the ambient sound. When fitting, be sure the earbuds are powered off when testing how well the foam tips seat your ears.

Try different combinations of the included sizing fins and foam tips to obtain a good seal and secure fit. If the foam tip or sizing fin causes pain while worn, try a smaller size that still created a good seal with your ear.
Charging
The earbuds automatically begin charging when placed into the charging case. Red LED will illuminate to indicate charging is in progress. The red LED will turn off once the earbuds are fully charged. The earbuds will need to be recharged after approximately 14 hours of general use or after 4 hours of Bluetooth streaming.

The charging case will charge the earbuds a full 6 times before needing to be recharged. Connect the provided micro USB cable to the charging case and USB power adapter (not included) to charge the case. Red LED will illuminate to indicate charging is in progress. The LED will turn blue once the case is fully charged. With most adapters, the case should be fully charged within 2½ hours.

Walker’s Connect APP
FREE on Apple App Store and Google Play
All settings including, volume, volume link, environmental hearing modes, and sleep timer can be adjusted from the Walker’s Connect APP.

To connect the earbuds to the app, simply open the app while the earbuds are powered on and connected via Bluetooth to your mobile phone. The app will automatically synchronize with the earbuds and reflect the current settings.

Earbud Ambient sound control and Bluetooth volume are controlled separately for a unique listening experience. The Walker’s Connect APP will control the Ambient volumes while Bluetooth volume is controlled using the volume buttons on your mobile device.

Ambient Sound Control: Controls the physical volume that can also found on the earbuds.
Earbud Volume Link: By default, the ambient volume control of both earbuds are un-linked, meaning that pressing a volume button on one earbud will adjust only that earbud by one level. The volume controls can be linked by pressing the link button between the two control sliders.

Environmental Hearing Modes: Four ambient audio profiles are available to create a custom listening experience. Universal, Clear Voice, High Frequency Boost, and Power Boost can all be adjusted from both the earbud and APP.

Inactivity Sleep Timer: To conserve battery life when the earbuds are not in use, the earbuds can be configured to power off after a set time (2, 4, 6, 8 hours). The earbuds will power off when no button has been pressed for the designated time AND when they are not connected to a device via Bluetooth.

Earbud Functions and Features

Power On: On each earbud, hold the MFB / power button down for 2 seconds.
- The left earbud will automatically enter Bluetooth pairing mode when powered on for the first time and await pairing with a mobile phone. Subsequent power ups will have the device attempt to reconnect to the previously connected device.
- Both earbuds will recall their previous volume and hearing mode settings when powering on.
- The earbuds will power down after a period of inactivity (default 2 hours). To power down, the earbuds must have no input for the given period of time AND not be actively streaming Bluetooth audio.

Power Off: On either earbud, press and hold the MFB / power button for 2 seconds and both earbuds will power down.

Silencer Features
In addition to functioning as highly effective hearing ear protection, the Silencer BT earbuds have several additional features to enhance your hearing protection and safety.

Ambient Sound Control: Press the volume up or down button on either earbud to adjust the ambient volume for that earbud. Earbud volume controls are un-linked by default, pressing a volume control button on either earbud will affect only that earbud. For a customized hearing solutions, the volume of each earbud can be set together from the Walker’s Connect APP.

Environmental Hearing Modes: Four ambient audio profiles are available to create a custom listening experience: Press the power/hearing mode button on the right earbud to cycle the hearing mode.

- Universal: Standard audio profile, no adjustments are made to incoming audio
- Clear Voice: Advanced profile designed to better isolate human voices.
- High Frequency Boost: Hearing profile designed to boost frequencies above 1kHz.
- Power Boost: Incoming audio is boosted to be twice as loud as Universal mode.

Automatic High Volume Suppression: The earbuds will automatically suppress loud sounds, both transient and sustained, limiting the maximum possible output level to 97dB in Universal hearing mode and 103dB in Power Boost hearing mode.

Bluetooth Media and Phone Call Controls
- Media and Call Volume Control: The volume controls on the earbuds are limited to ambient audio adjustment. For media and call volume adjustment, please use the built-in volume control on your mobile phone.
- Play/Pause Music: Press the MFB while music is playing to pause playback. Press the MFB again to resume playback.
- Next Track: Press the MFB twice while music is playing to advance to the next track.
- Answer and End Calls: Press the MFB to answer an incoming call. Pressing the MFB again during a call will end it.
- Reject Calls: Press either the + or - volume button on the left earbud to reject a call.
## Troubleshooting Guide:

</table>

### NRR Information:

Although hearing protectors can be recommended for protection against the harmful effects of impulsive noise, the Noise Reduction Rating (NRR) is based on the attenuation of continuous noise and may not be an accurate indicator of the protection attainable against impulsive noise such as gunfire.

The level of noise entering a person’s ear, when hearing protector is worn as directed, is closely approximated by the difference between the A-weighted environmental noise level and the NRR.

LIMITED WARRANTY

Walker’s warrants this product to the original purchaser to be free from defects in materials and workmanship, under normal use and conditions for a period of One Year from the date of the original purchase. Under this warranty, this unit will be replaced or repaired at our option, without charge for parts or labor, excluding batteries, for this period.

This warranty is void if any of the following occur:
1. The warranty card was not sent in at the time of purchase
2. The unit is not owned by the original purchaser at the time of the warranty claim
3. The unit has been tampered with, opened or punctured
4. The unit has been immersed in water or other liquids, allowed to be filled with dirt or dust, or otherwise physically abused

This shall be the exclusive written warranty of the original purchaser and neither this warranty or any other warranty, expressed or implied, shall extend beyond the 12-month period listed above. In no event shall Walker’s be liable for consequential damages, consequential property damage, or consequential personal injury. (Some states do not allow limitations on implied warranties or exclusions of consequential damages, so that these restrictions may not apply to you). This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.

FCC statement:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC NOTE
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Shielded interference cable must be used with the equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

Specifications and designs are subject to change without any notice or obligation on the part of the manufacturer.

IC NOTE
This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada’s licence-exempt RSS(s). Operation is subject to the following two conditions:
1. This device may not cause interference.
2. This device must accept any interference, including interference that may cause undesired operation of the device.

L’émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d’Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes :
1. L’appareil ne doit pas produire de brouillage;
2. L’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.
