Before Use

- People who are prone to motion sickness in the real world also have a heightened risk of experiencing discomfort while using the VR device. Such individuals should take extra care to read and follow these warnings carefully.
- We recommend consulting with a doctor before using the VR device if you are pregnant, elderly, have psychiatric disorders, suffer from a heart condition, have pre-existing binocular vision abnormalities or suffer from a heart condition or other serious medical condition.
- Do not use VR if you have symptoms of squint, amblyopia, or anisometropia. Using the VR may aggravate these symptoms.
- Do not use the VR device when it is hot as this may cause mild burns. To prevent any injuries, take frequent breaks when using the VR.
- Make sure the VR is level and secured comfortably on your head, and that you see a single, clear image. If you wear VR tilted to one side, you may feel discomfort.
- Just as with the symptoms people can experience after they disembark a cruise ship, symptoms of virtual reality exposure can persist and become more apparent hours after use.
- These post-use symptoms can include the symptoms above, as well as excessive drowsiness and decreased ability to multi-task. These symptoms may put you at an increased risk of injury when engaging in normal activities in the real world.

1. OVERVIEW

	POWER	Hold 3 seconds to turn on/off, quick click to sleep/restart. Hold 10 seconds to shutdown.
	VOLUME	Press keys + or - to adjust the volume.
	MENU	A. Hold the menu button 3 seconds to recall home screen and on-screen pointer in front of you if they are rifting; B. press the menu button to adjust brightness, exit application, switch on-screen pointer, switch VR mode during playing.
	OK	Press OK button to enter menu, video, APP and confirm the operation.

2. WHAT'S INSIDE

VR all-in-one

Earphone

USB2.0 Cable

BT controller (optional)

Adapter

Manual

Cleaning Cloth

HMDI cable (optional)

3.1 Attention

- Remove the lens protector to get clear visibility.
- Keep the lenses clean and protect them from getting scratched. If the lenses get dirty or steam up, clean them with the lens cleaning cloth.
- The foam cushioning may get dirty if your face is sweating while wearing the VR. Doing so may deteriorate the quality of the foam cushioning. Ensure that you keep your face clean and dry when wearing the VR.
- When you are not wearing the VR, do not place objects before VR's proximity sensor. Doing so may cause the proximity sensor to remain on and drain the battery.
- We suggest you to use original power adapter and cables.
- Put the device in cool and dry place for safe storage.
- If VR get stuck or software problem appears, please poke the reset hole for 2 seconds to force shutdown and then press power button to restart after 10 seconds.
- Please check if the top sponge block the Proximity Sensor when you come across the black screen or sleep mode during the using process of the VR device. Please move the sponge as Picture 1 suggest until the sponge doesn't block the Sensor at all.

- There is an extra pair of high degree of myopia lens with the device. We suggest you don't have to replace the lens if you are lower than 300 degrees; please change the lens as the picture 2 suggests if you are higher than 300 degrees and found the screen is blurry or can't see it clearly. Please remove the protective film inside and outside the lens before you change them. Move over, you may feel a little bit dizzy after you change into high degree of myopia lens and it's a normal situation. Your eyes need to get used to them.

3.2 Charge the Device

Please use the original power adapter and cable.

Power off the device before you charge it. The red indicator lights will up while charging; the green indicator lights will up if fully charged.

Please charge the device before battery lower than 4%. If battery is used up, keep charging at least 10 minutes before start again.

3.3 Connect with Computer

Connect computer and VR by USB cable we offered, find the disk in My Computer---Removable Device, then transfer the data freely.

3.4 TF Card Backup (Micro SD)

Insert the TF card to the slot with teeth side facing foam cushioning, the VR will read the card automatically, it could be found in file Management—Storage.
