Quick Start Guide

POINT 2 VIEW

Your Point 2 View product package should contain these items:

- Point 2 View USB Camera
- Weighted stand with adjustable arm
- Quick-start guide (this document)

2. INSTALLING IPEVO PRESENTER SOFTWARE

You may wish to use Point 2 View with IPEVO Presenter software. You may download it at: **http://support.ipevo.com/presenter**

STEP 1:

Double-click the downloaded file and follow the prompts to install Presenter.

Note: By installing the latest version of Presenter, the older version of Presenter on your computer will be removed or replaced.

STEP 2:

Connect Point 2 View's USB cord to any open USB port on your computer.

STEP 3:

Launch the Presenter software. A window containing a live video image from your Point 2 View should appear. Point 2 View is now ready to use.

3. THE SOFTWARE INTERFACE AT A GLANCE

Free Presenter software features a range of useful image customizations and functions, including snapshots, video recording, image rotation and more. Here are some highlights:
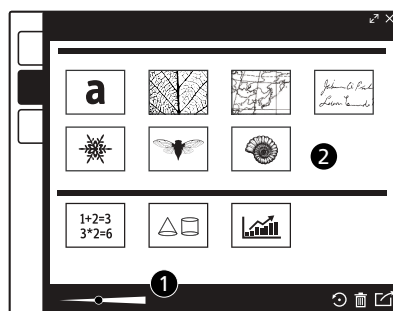

CAMERA MODE (DEFAULT)

Provides a window with the live video image from the camera.

① Use menus to adjust view: mirror, resolution, etc.
② A focus frame at the center guides you when bringing Point 2 View into focus.
③ Click on-screen icons to focus and take snapshots.
④ Click the top-right arrows to enter Full Screen mode.

REVIEW MODE

Review snapshots and video you have taken.

① Use menus to adjust view or edit photos.
② Use thumbnails for quick overview of your library.

FULL SCREEN

Point 2 View's image will take up the entire screen. This is particularly useful for projecting the image in classroom or conference settings.

① Click the top-right arrows again to return to a smaller window.
② Click on the screen to hide the icons and provide an unobstructed image. Click again to bring the icons back.
③ Focus/Snapshot icons are available in this mode also.

4. Taking Snapshots

Follow these steps to learn how to bring Point 2 View into focus and take a snapshot.

Overview of controls

(Hardware)

Snapshot key:

Takes snapshot

Focus key:

Brings Point 2 View into focus

AF Switch:

Selects Autofocus mode Continuous (C) or Single (S)

Shows current AF status

(Software – Camera mode)

Step 1: Bring Point 2 View into focus

Before taking a snapshot, make certain that you are in Camera mode and the image is in focus. Toggle the AF switch or press the Focus key to bring Point 2 View into focus, if necessary.

Step 2: Take snapshot

Press the Snapshot key. A shutter sound will be generated and the screen will freeze for a moment, giving you an instant preview.
Step 3: Review the photo

Go to Review mode. Your new photo will appear on the screen. You can also view previous snapshots using the thumbnails at the bottom.
5. Positioning Point 2 View

Attach Point 2 View to the stand and bend, rotate, or extend the stand to achieve the best position for an optimum view. You can also use your hand to point the camera.
## Show what you see

Attach Point 2 View to the stand...

...Or hold Point 2 View in your hand. You can get as close as 2″ (5cm) away.

Show yourself

Share with others

Use one of the side connectors on the head of the stand to position Point 2 View for documents.
