Blue Devil Head Gasket Sealer | #38386

Blue Devil Head Gasket Sealer will repair and seal leaks in blown head gaskets, warped or cracked heads, heater cores, and freeze plugs. Blue Devil contains no solid or particulate matter, and will not clog or harm your engine. It bonds to metal, aluminum, cast, alloy, or plastic, and it’s safe and easy to use. Blue Devil Head Gasket Sealer is compatible in gasoline and diesel engines. It stops leaks permanently.

- Good for Head Gaskets, Warped or Cracked Heads, Heater Cores and Freeze Plugs
- Contains no solid or particulate matter that can harm a vehicle’s engine
- Alternative solution for costly and time consuming repairs
- Safe and easy to use, Permanent Repair

Directions

1. Cooling system must be clean and free flowing before applying Blue Devil Engine Sealer.
2. REMOVE THERMOSTAT and flush cooling system through bottom radiator hose using Blue Devil Radiator Flush (or comparable flushing agent) and then flush with water.
3. Fill cooling system with WATER. Leave enough room for the recommended amount of Blue Devil. (See Table Below)
4. IMPORTANT: ENGINE MUST BE COLD BEFORE YOU BEGIN. Remove the radiator cap and start the engine while cold, then turn heater to Max.
5. IMPORTANT: POUR SLOWLY! With the engine idling, SLOWLY POUR Blue Devil into the radiator (take 1 minute pour time for entire bottle - 30 seconds for 1/2 bottle). After pouring Blue Devil slowly, let vehicle idle with CAP ON for 50 minutes. You do not need to flush the system a second time after process is complete (Blue Devil can stay in the system)
6. After test drive, let engine cool before installing new thermostat. Refill with compatible anti-freeze.

CAUTION! KEEP OUT OF REACH OF CHILDREN. AVOID EYE OR SKIN CONTACT. IF EYES OR SKIN BECOME IRRITATED, RINSE WITH COLD WATER IMMEDIATELY. IF SWALLOWED, DRINK LARGE VOLUMES OF WATER. CONSULT A PHYSICIAN IF DISCOMFORT OCCURS.
