© 2016 Baccus Global LLC
Boca Raton, FL 33432
(877) 571-2391
FEATURES

1. Dual pivoting laser beams
2. Motion sensor / AC power LED indicator
3. DC power port (for use with the AC adapter)
4. Battery compartment cover and battery compartment (holds 3 AA alkaline dry cell batteries [not included])
5. Battery compartment cover latch
6. Locking slots for locking the tabs of the mounting bracket (total of 4)
7. Mounting bracket
8. Screw holes for mounting the bracket (total of 3)
9. Tabs (lock into the locking slots on the unit base – total of 4)
10. Screws and wall anchors (total of 3 each)
11. AC adapter

SAFETY GUIDELINES / DEFINITIONS

DANGER: Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.
WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.
CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.
CAUTION: Used without the safety alert symbol indicates potentially hazardous situation which, if not avoided, may result in property damage.

RISK OF UNSAFE OPERATION. When using tools or equipment, basic safety precautions should always be followed to reduce the risk of personal injury. Improper operation, maintenance or modification of tools or equipment could result in serious injury and property damage. There are certain applications for which tools and equipment are designed. Manufacturer strongly recommends that this product NOT be modified and/or used for any application other than for which it was designed. Read and understand all warnings and operating instructions before using any tool or equipment.

IMPORTANT SAFETY INSTRUCTIONS

READ ALL INSTRUCTIONS
WARNING: Read all instructions before operating the device. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

GENERAL SAFETY WARNINGS AND INSTRUCTIONS
WARNING: This product or its power cord contains lead, a chemical known to the State of California to cause cancer and birth defect or other reproductive harm. Wash hands after handling.

INSTRUCTIONS PERTAINING TO RISK OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS
WARNING - WHEN USING ELECTRICAL APPLIANCES, BASIC PRECAUTIONS SHOULD ALWAYS BE FOLLOWED, INCLUDING THE FOLLOWING:
• To reduce the risk of injury, close supervision is necessary when the unit is used near children.
• Use only attachments recommended or sold by the manufacturer.

WARNING: TO REDUCE THE RISK OF ELECTRIC SHOCK:
• For indoor use only. Do not expose the device or the AC adapter to water or any other liquid.
• Do not install this device where it can fall or be pulled into water or become wet.
• Do not clean this device with a water spray or the like.
• Use only the AC adapter supplied with this device.
• When an extension cord is used:
  – The marked rating of the detachable power supply cord or extension cord should be at least as great as the electrical rating of this appliance.
  – The cord should be arranged so that it will not drape over the countertop or tabletop where it can be tripped over, snagged, or pulled on unintentionally (especially by children).
  – The extension cord should be kept dry and off the ground.
2. Insert the batteries correctly according to the polarity symbols shown inside the battery compartment, observing the cautions that follow.

Installing the backup batteries

1. Push the battery compartment cover latch to remove the battery compartment cover from the battery compartment.
2. Insert the batteries correctly according to the polarity symbols shown inside the battery compartment, observing the cautions that follow.
3. Replace and snap the battery compartment cover into the Garage Laser Parking Assist through the Battery Compartment Cover Latch.

CAUTION: TO REDUCE THE RISK OF INJURY OR PROPERTY DAMAGE:
- Never look directly into the laser beam or shine the laser beam into another person’s eyes.
- Do not expose this unit to extremely high temperatures.
- Do not drop or throw the unit.
- Use only with AC adapter provided with the unit. Plug in the adapter at the unit first, then plug into the power source.
- Do not attempt to power the unit if the AC adapter is damaged – return the AC adapter to manufacturer for repair or replacement.
- To reduce risk of damage to electric plug and cord, pull by plug rather than cord when disconnecting.
- Do not crush, cut, pull or expose the AC adapter cord to extreme heat.
- Position the AC adapter cord so it does not become entangled or become a safety hazard. Keep the AC adapter cord away from sharp edges.
- Install in a location inaccessible to children or pets.
- When not in use, the unit should be stored in a dry, well ventilated place out of the reach of children or pets.

ALKALINE BATTERY SAFETY INSTRUCTIONS

WARNING: Batteries can explode, or leak, and can cause injury or fire. To reduce this risk:
- Use only AA alkaline dry cell batteries in this unit.
- Carefully follow all instructions and warnings on the battery label and package.
- Always insert batteries correctly with regard to polarity (+ and –), marked on the battery and the equipment. Failure to insert batteries in the correct polarity, as indicated in the battery compartment, may shorten the life of the batteries or cause batteries to leak. There is a danger of explosion if batteries are incorrectly replaced.
- Do not short battery terminals.
- Do not charge batteries.
- Do not mix old and new or alkaline, standard (carbon-zinc) and rechargeable (nickel cadmium or nickel metal hydride) batteries. Replace all of them at the same time with new batteries of the same brand and type.
- Do not dispose of batteries immediately and dispose of per local codes.
- Do not dispose of batteries in fire.
- Keep batteries out of reach of children.
- Remove batteries if the device will not be used for several months.

"Transporting batteries can possibly cause fires if the battery terminals inadvertently come in contact with conductive materials such as keys, coins, hand tools and the like. The US Department of Transportation Hazardous Material Regulations (HMR) actually prohibit "Transporting batteries can possibly cause fires if the battery terminals inadvertently come in contact with conductive materials such as keys, coins, hand tools and the like. The US Department of Transportation Hazardous Material Regulations (HMR) actually prohibit..."
• Make sure the mounting bracket is mounted on a flat, level and stable ceiling or wall surface, assuring that all screws are tightened securely and observing all cautions and recommendations regarding mounting found in this manual.

• Only use the screws and wall anchors provided with this unit.

OPERATION
1. Once you have installed the batteries, mounted the unit and connected the AC adapter as described in the previous sections, plug it into a functioning AC outlet. The AC power LED indicator inside the motion sensor will light red to indicate the unit is properly connected and ready to use.

2. Park your vehicle(s) in the desired position(s). Adjust each laser beam to point to a prominent spot on the front of each car, preferably on the dashboard or in the space between the hood and the windshield. Make sure the spot is visible to the driver when parking.

3. The motion sensor will automatically turn on when either of vehicle pulls into the garage. Drive your vehicle until the laser beam aligns to the predetermined spot on your vehicle, indicating it is parked in the correct position. Both laser beams will automatically turn off after 15 seconds if no motion is detected from the motion sensor.

TROUBLESHOOTING
The dual laser beams do not light, even when the motion sensor is triggered

1. Check the connection to the DC power port and to the AC power source. Confirm there is a functioning AC current (the AC Power LED indicator inside the motion sensor will light red).

2. Check that the three AA alkaline batteries have been installed properly. Check that they are not completely discharged. If discharged, replace the batteries following the directions given in this instruction manual.

3. If the laser beams do not light after the AC adapter is properly connected into a functional AC outlet or after checking and, if necessary, replacing the backup batteries, contact manufacturer at (877) 571-2391.

The dual laser beams stay on permanently and seem to never turn off

1. The laser beams may appear to stay on because the motion sensor continuously detects motion, such as the opening or closing of a door or window, or movement of an animal or person. Make sure the environment surrounding the motion sensor is stationary. Adjust the unit's mounting location until the laser beams turn off after 15 seconds when no further motion is detected under the motion sensor.

2. If the laser beams still remain lit after you have assured there is no motion under the motion sensor, contact manufacturer at (877) 571-2391.

CARE AND MAINTENANCE
Never submerge the unit in liquids of any kind. If the unit gets dirty, gently clean the outer surfaces of the closed body casing with a soft cloth moistened with a mild solution of water and detergent.

Except for the batteries, there are no user-serviceable parts inside. Contact the manufacturer if any components have become worn or broken.

Safe Battery Disposal
Refer to the Safety Warnings in the front of this instruction manual when selecting and replacing batteries. Always dispose of used batteries properly.

WARNING: TO REDUCE THE RISK OF INJURY/EXPLOSION:
• Do not dispose of batteries in fire as this may result in an explosion.
• Do not expose the unit containing batteries to fire or intense heat as it may explode.
Using a 6mm diameter bit, drill one hole for each of the center screw hole circles to a depth of approximately 30-35mm.
