

Musik Pillow

Falling asleep or relaxing while listening to your favorite compilation, and without disturbing those already asleep or sitting next to you, is now a dream come true. The Musik pillow is a great healing assist tool for patients in hospitals, nursing homes, or even patients receiving care at their own homes. It allows better sleep, easy long term care, and a better relaxation. The pillow has mini-speakers perfectly integrated into the padding and a universal 3.5 mm audio/stereo jack lead (M) for connection to mp3 devices, computers, mobile telephones, radio, or TV. The sound pillow has a cord that can be removed when not in use and is compliant with safety standards.

Materials:

The padding is a chemical free visco-elastic Memory Foam. The open cell structure, promotes circulation of the air, and low thermal conductivity, offering a pleasant sensation of freshness. The pillowcase is a 100% cool, strong, 3D Polyester, which makes it suitable for use on the sand or around the swimming pool.

Dimensions:

19" x 12" x 4.75"

Shapes and functionality:

The sound pillow has an ergonomic design, thus assuring total comfort in every position of rest.
