⑤ ELECTROSTIMULATION

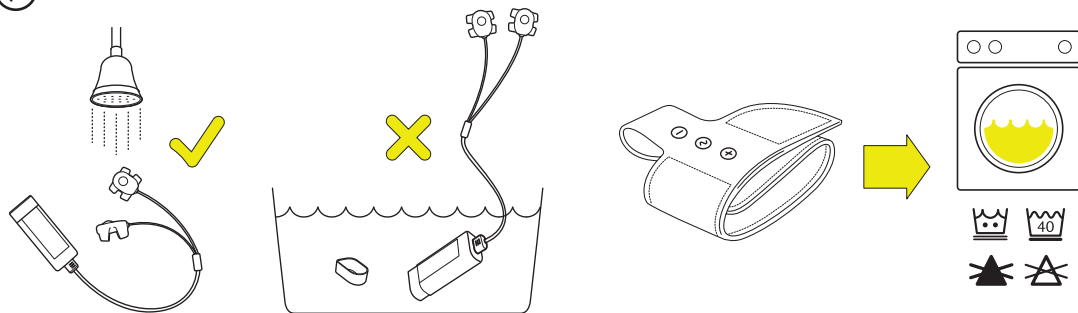

WARNING: While electrostimulation is safe, always be cautious when dealing with electricity. People with any of the following conditions should not use the electrostimulation feature: heart disease, pacemaker, epilepsy or other neurological disease. Pregnant women should not use electrostimulation. Do not use near any metal objects or piercings or if you have an IUD that may contain metal. People under medical care should consult their physician before using. Under the environment of electrostatic discharge the product may malfunction and need to be reset to restart.

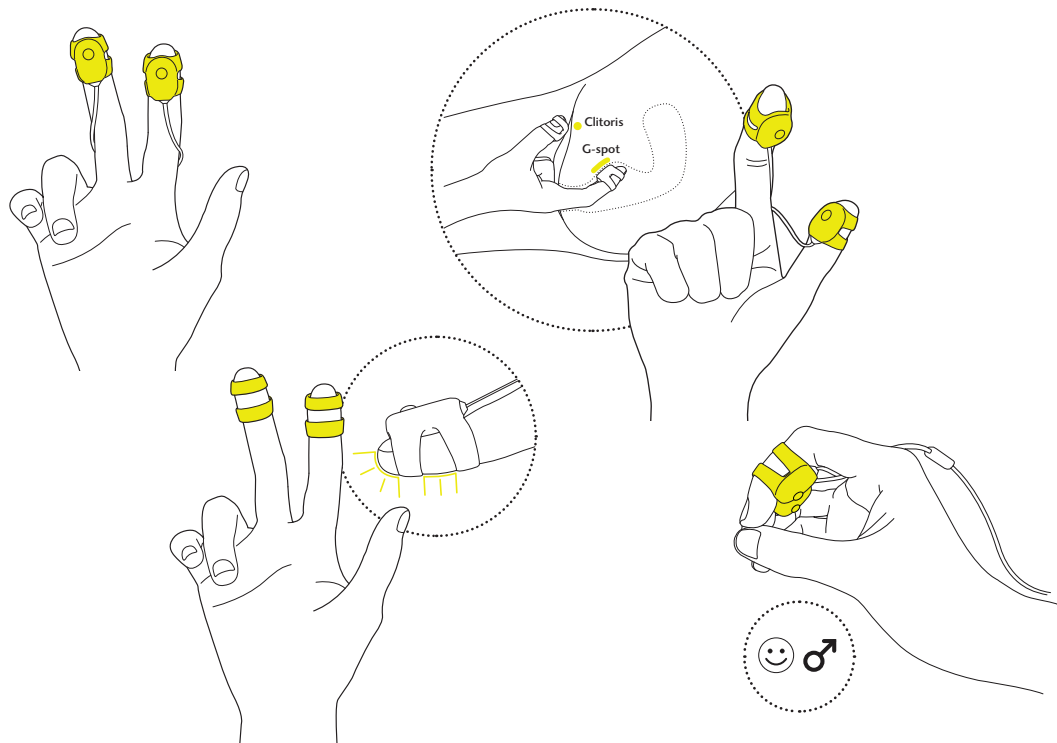

⑥ ELECTROSTIMULATION CONTACT

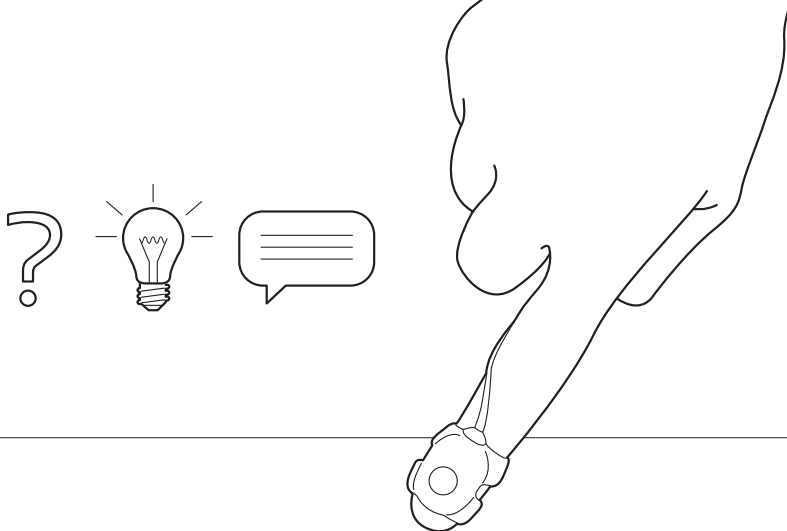

Both E-Stim Pods must be in contact with skin to work.
