Other	
Input	3.5mm audio jack, line-level
Charging	USB Cord, 5V

Attached Cords

- Attached USB Charging Cable
- Attached Audio Input Cord

Frequently Asked Questions

How durable is it?

The ROCKOUT 2 is impact and weather resistant. It can handle a hit, but take care to protect your audio equipment if stored inside.

Does it need to be plugged in for power?

Nope. The ROCKOUT 2 has a built-in battery that will last up to 20+ hours depending on how loud you crank the volume. Recharge from any USB power source.

Can multiple speakers be chained together?

Yes. Chain any number in close proximity together with the built-in cable, or use a 3.5mm audio extension cable for larger spaces. Each speaker in the chain must be recharged separately.

Is the internal battery replaceable?

No, but it will last for hundreds of cycles, or several years of use.

Why does my Android phone make a phone call when I use the external controls?

Although we really wanted the external controls of the Rock Out 2 to work with all phones and operating systems, the vast combinations of Android phones and software make it difficult to ensure full functionality for all devices. The Rockout 2 external controls are optimized for Windows and iPhone phones currently. Stay tuned for exciting updates that we have in the works...

Compatible With

Audio devices, like:

Smartphone
MP3 player
Laptop
Anything with a 3.5mm connector

GOAL ZERO products:

NOMAD solar panels
GOAL ZERO SWITCH 8 recharger
