Installing a memory card

A memory card must be inserted to record videos or take photos.

Pull out the memory card tray and gently press the memory card into the tray to secure it.

⚠ Be careful not to damage your fingernails when you remove the memory card tray.

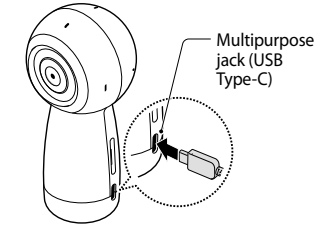

Memory cards are sold separately.

Charging the battery

Charge the battery before using the Gear 360 for the first time.

- 1 Plug the small end of the charger into the multipurpose jack of the Gear 360, and plug the large end of the charger into an electric socket.

- Chargers are sold separately.
- The charger should remain close to the electric socket and easily accessible while charging.

- 2 After fully charging, disconnect the Gear 360 from the charger. First unplug the charger from the Gear 360, and then unplug it from the electric socket.

- Some content may differ from your device depending on the region, manufacturer, or software version, and is subject to change without prior notice.
- This product includes certain free/open source software. To see the instructions for viewing the open source licence, go to the Samsung website (opensource.samsung.com).

FCC Warning Statement

FCC Part 15.19

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Part 15.21

Any changes or modifications (including the antennas) made to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.

Part 15.105 (B)

Note : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation This equipment generates, uses and can radiate radio frequency energy

19

and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications not expressly approved by the manufacturer could void the user's authority to operated the equipment under FCC rules.
