

RADMO FOR MINI TABLET / GPS

Comes with metal base

1. Adjust the Radmo arms to brace your device

2. Connect the arms to the base with the provided screws

* The second screw is optional

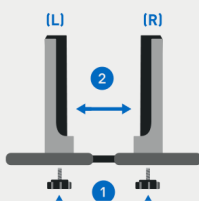

RADMO DUAL

For smartphone (A) or small GPS / smartphone with thick protective cover (B)

Comes with metal/polymer base

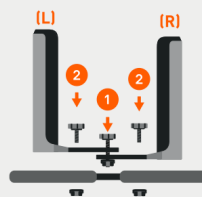

A

1. Gently connect the provided screws to the Radmo arms

2. Adjust the Radmo arms to brace your device and tighten the screws

B

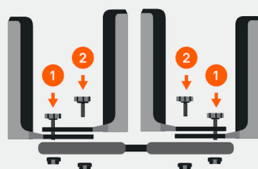

1. Connect both arms to each other to brace your device and tighten the screw

2. Connect the arms to the base and tighten the screw

RADMO TWIN

For two smartphones

Comes with metal base

1. Connect both arms to each other to brace your device and tighten the screw

2. Connect the arms to the base and tighten the screw

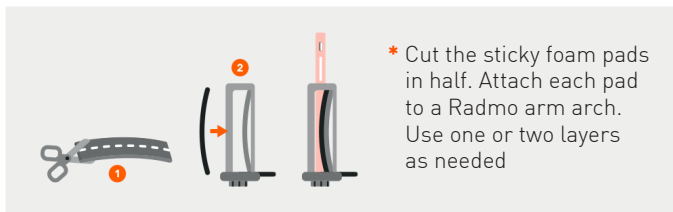

*METAL BASE

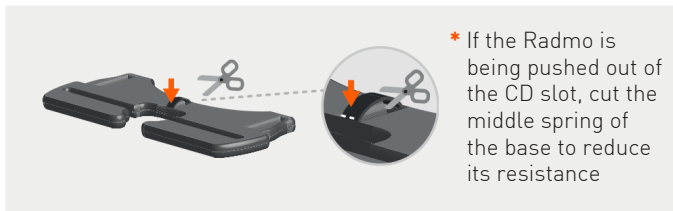

* If the Radmo metal base fits loosely in the CD slot, screw the provided oval washers (one or more) to the bottom of the base

*FOR THIN DEVICES

* Cut the sticky foam pads in half. Attach each pad to a Radmo arm arch. Use one or two layers as needed

*FOR NARROW CD SLOT

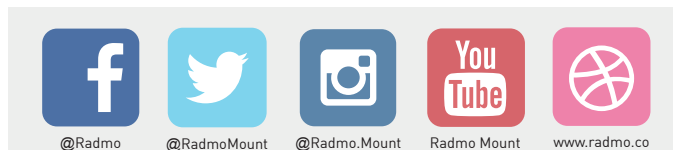

* If the Radmo is being pushed out of the CD slot, cut the middle spring of the base to reduce its resistance

*FOR WIDE CD SLOT

* In order to stabilize Radmo in the CD slot, paste the sticky foam on the base
