If print quality does not improve by standard print head cleaning, try print head deep cleaning, which is a more powerful process. Print head deep cleaning consumes ink, so perform this procedure only when necessary.

**Windows**

1. Ensure the printer is on.

2. Open the Printer Properties dialog box.
   
   See “Opening the Printer Properties dialog box directly from the Start menu” on page 20

3. Start Print Head Deep Cleaning.

   ![Diagram](image)

   (1) Click the **Maintenance** tab.

   (2) Click **Deep Cleaning**.

   (3) When the confirmation message is displayed, click **OK**.
1 Ensure the printer is on.

2 Open the Printer Utility dialog box.
   (1) Select Page Setup… in the File menu.
   (2) Click Utilities to open the Printer Utility dialog box.

3 Start Print Head Deep Cleaning.

   (1) Select Cleaning from the pull-down menu.
   (2) Click Deep Cleaning.

   (3) When the confirmation message is displayed, click OK.

Important  The process takes one or two minutes to complete, so simply wait until the POWER lamp stops flashing.

Note  After print head deep cleaning finishes, print the nozzle check pattern to verify that the print head nozzles are clean.

   See “Printing the Nozzle Check Pattern” on page 23
If the head is still not clean after the second deep cleaning, replace ink tank.

   See “Replacing an Ink Tank” on page 32
Ink tank replacement does not resolve the problem, the print head may be worn out. Contact the Customer Care Center.
Aligning Print Head

If ruled lines are printed misaligned, adjust the print head position.

Replacing an Ink Tank

When replacing an ink tank, check the model number very carefully. The printer will not print properly if the wrong ink tank is used, or installed in the incorrect position.

With this printer, ink tanks must be installed from the right in the order indicated below.

- Black: BCI-24 Black
- Color: BCI-24 Color

Replacing Ink Tanks

When ink tanks run out of ink, replace them using the following steps.

1. Ensure that the printer is on, and then open the front cover.
   The print head holder moves to the center.

2. Remove the empty ink tank.
   (1) Pull the tab on the ink tank towards you to release.
   Then lift it from its slot.
   Do not touch the lock lever; remove only the ink tank.

   **Important**
   - Handle ink tanks carefully to avoid staining clothing or the surrounding area.
   - Discard empty ink tanks according to the local laws and regulations regarding disposal of consumables.
3 Prepare a replacement tank

(1) Unpack a new ink tank and remove the orange protective cap.

**Important**
- Do not re-attach the protective cap once you have removed it.
- Once the protective cap is removed, do not touch the open ink port.

4 Insert the ink tank

(1) Insert the ink tank into a slot.

(2) Press on the tab until the ink tank snaps firmly into place.

5 Close the front cover.

The print head holder moves to the right.

**Note**
- Once an ink tank has been used, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out and the printer may not function properly if it is reinstalled.
- Color ink consumption may occur even when black-and-white or grayscale printing is specified. Color ink is consumed in the head cleaning and deep cleaning, which are necessary to maintain the printer’s capabilities.
Resetting the Ink Counter
When an ink tank is replaced, the ink counter must be reset. The low ink warning is only displayed properly if the ink counter is reset.

Message Prompting Confirmation of Ink Tank Replacement
When the front cover remains open for a certain period of time, the printer will output a message prompting you to confirm replacement of the ink tank at the start of the next print job.

Note
If a new user logs on using the Switch User feature in Windows XP, the printer will not output the message asking for confirmation of ink tank replacement. This is why it is important to open the printer driver's Properties dialog box and manually reset the ink tank counter in the Maintenance tab whenever an ink tank is replaced.

1. Check the message, and click Yes or OK

   - **When using Windows:**
     ![Image 1](image1.png)
     The printer's front cover was opened after the last printing. Have you replaced an ink tank with a new one?
     If you have replaced it, click Yes. If you have not replaced it or you are not sure, click No.

     ![Image 2](image2.png)
     When both black and color ink tanks have been replaced, select both Black and Color.

   - **When using a Macintosh:**
     ![Image 3](image3.png)
     The printer's front cover was opened after the last printing. Have you replaced an ink tank with a new one?
     If you have replaced it, click OK. If you have not replaced it or you are not sure, click Cancel.

2. Select the replaced ink tank, and click OK.

   - **When using Windows:**
     ![Image 4](image4.png)
     Select the newly replaced ink tank and click OK.

   - **When using a Macintosh:**
     ![Image 5](image5.png)
     Select the newly replaced ink tank and click the [OK] button. The ink counter will return to full.
Important  Mistakenly clicking **No** or **Cancel**, instead, will prevent the Ink Low alert from functioning properly. If this happens, manually reset the ink counter according to the following procedure.

**Resetting the Ink Counter in Printer Properties dialog box:**

- When using Windows:
  1. Open the **Printer Properties** dialog box and click the **Maintenance** Tab.
  2. Click **Ink Counter Reset**.
  3. Select the newly installed ink tank, then click **OK**.

- When using a Macintosh:
  1. Open the **Page Setup** dialog box.
  2. Click **Utilities** and select **Low Ink Warning Setting**.
  3. Click **Ink Counter Reset**.
  4. Select the newly installed ink tank, then click **OK**.
How Low Ink Warning Setting Works
The low ink warning notifies you of low ink levels during printing. The Low Ink Warning has been preset to be automatically displayed.

When you reset the ink counter, it will assume the ink tank is full regardless of how much ink actually remains. The reset is the only way to match the counter value with an actual ink volume. Reset the ink counter when installing a new ink tank.

Low Ink Warning Display
The '!' shows a low ink level in the ink tank.

BJ Status Monitor (Windows)
BJ Status Dialog (Macintosh)

How to Display Low Ink Warning Correctly
• Reset the ink counter every time you install a new ink tank
  The ink counter cannot work correctly unless you synchronize it with the actual ink level. The ink counter can only be adjusted when it is reset at the time a new ink tank is installed.

• Do not reset the ink counter of an ink tank in use.
  Synchronization of the counter and the actual ink level will not work properly.

Important  If you did not reset the counter when you installed the current ink tanks, the low ink warning may not function correctly, until the next time you replace the ink tanks. Also, ensure you treat both counters separately.
