OPERATION

Precautions

1. Do not use the purifier in an area where large amounts of smoke may be present. (e.g. in a room where someone is smoking.)
2. Do not use near the heat of a hair dryer, hair iron, or other appliances, or near a heater.
3. Do not use near chemical fumes or in any other area where chemical gas may be present.
4. When using the purifier, make sure to keep it away from children and pets.
5. When using, make sure to plug it into a properly grounded outlet.

Installation

1. The purifier should be placed on a flat, stable surface away from direct sunlight.
2. Ensure that the purifier is at least 12 inches away from the wall to allow proper airflow.
3. Make sure there are no obstacles blocking the air intake and outlet of the purifier.

TROUBLESHOOTING

When to replace the filters:

- If the air quality display lights up in red, indicating poor air quality.
- If the air quality display fades in color, indicating the filter has collected many particles.
- If the filter becomes dirty and needs cleaning.

Change the filters every 6 months.

Unplug the power cord after use, when not in operation, or when cleaning.

Electrical components.
