POWERED SUBWOOFER

### Brace yourself.

Powered by a dedicated class AB amplifier, YURI's custom designed, downward-firing woofer produces dramatic low-frequency effects for a truly immersive cinematic experience. Its specially tuned front port and internally braced, acoustic-grade MDF cabinet guarantee detailed bass response with every thunderous rumble and chest-thumping explosion. Along with a phase switch and a precision low-pass filter to ensure seamless integration with your preexisting system, a single RCA connection is all that is needed to add a whole new depth of sound to your home theater.
