Charging your power bank

⚠️ WARNING: To avoid injury and damaging your device, only use the power adapter of your Dell computer.

Before first use, charge the power bank using the Dell power adapter.

⚠️ NOTE: It takes approximately 3 hours to fully charge the power bank.

⚠️ NOTE: You can charge your devices through the power bank while the power bank is being charged.

⚠️ NOTE: The power adapter is not shipped with the power bank.

1. Connect one end of the Dell power adapter to the power input port on the power bank.
2. Connect the power adapter of your Dell computer to an electrical outlet.

   - The battery-status light flashes white indicating the battery is being charged. Refer to “Checking battery charge status” section for details.
   - The battery-status lights turn off when the battery is fully charged or when the power adapter is disconnected.

⚠️ NOTE: For more information on battery-status lights, see “Checking battery charge status”.

Checking battery health

Battery health is a measurement reflecting the general condition of the battery. It indicates how much battery life remains before the power bank must be replaced.

**NOTE: The units of SOH (State Of Health) are percentage (%) points.**

A battery’s SOH is 100% at the time of manufacture and will deteriorate gradually with usage.

Press and hold the **power** button for 5 seconds to turn on the power bank and check the battery health status.
