

The Most Powerful WiFi System to Protect Your Home's Network

Gryphon is a secure WiFi router system with an App that makes it easy for you to protect your kids and your privacy online. Manage your entire home network from anywhere. Some call it an intelligent network firewall, we call it sensible protection for your kids, your webcams, and all the "smart" devices invading our homes.

Advanced WiFi Technology

Tri-band AC3000

Three simultaneous Wi-Fi radios for more bandwidth to every device on the network.

4x4 MU-MIMO

Advanced WiFi with multiple streams of data for optimal throughput performance, eliminating bandwidth bottlenecks during concurrent device usage.

WiFi Mesh Whole-Home Coverage

2 Gryphon mesh routers cover up to 6000 sq. ft. to eliminate dead spots in the home.*

Optimize Network Health

Qualcomm's WiFi-SON technology that self-configures and self-organizes your WiFi to enhance overall performance of the network.

Prioritize Device Bandwidth

Bandwidth priority to a select device as needed for improved quality of service (QoS).

Featuring Built-in Malware Protection by ESET Technology.

Security

Malware and Ransomware Protection

Powered by ESET Technologies, Gryphon protects every single device in the home from a central location.

24/7 Intelligent Intrusion Detection

Gryphon uses machine learning to monitor all in-home devices – including smart home devices – to guard from potential hackers.

Block Phishing Links

Gryphon automatically blocks phishing scams to ensure you'll never accidentally click on a malicious link again.

*Requires service agreement. Gryphon comes with a free one-year monitoring program that can be extended for a modest fee on a monthly or annual basis.

Comprehensive Parental Controls

Control Content

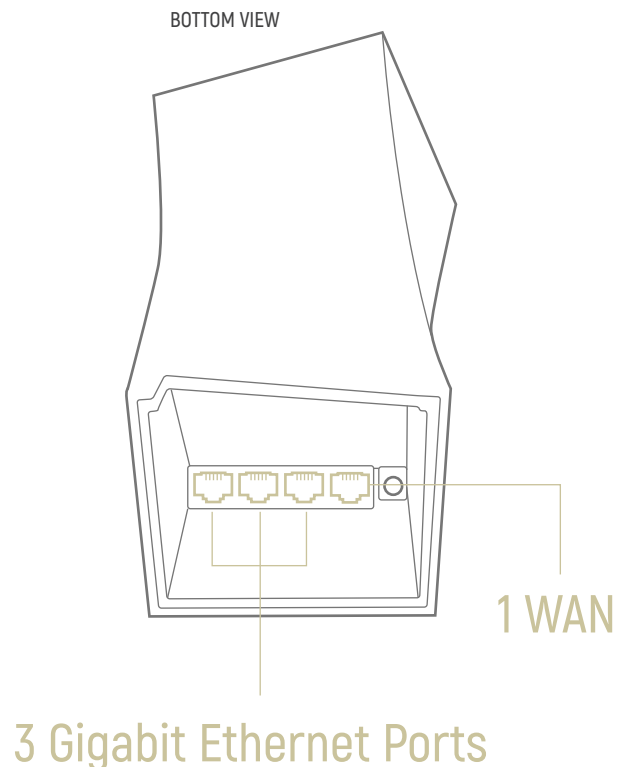

Enable or disable access to popular apps like YouTube, Facebook and Snapchat and execute real-time requests for website approvals instantly.

Regulate Usage Time

Schedule homework time, bedtime, or simply pause the internet at any moment with a single click.

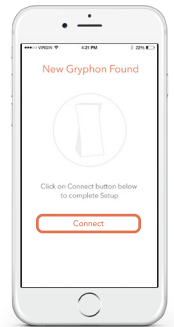

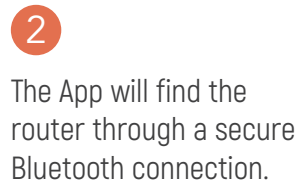

Filter Content Automatically

Gryphon automatically blocks inappropriate websites using our CrowdRanking™ algorithm.

Gryphon Hardware Setup is easy as 1, 2, 3...

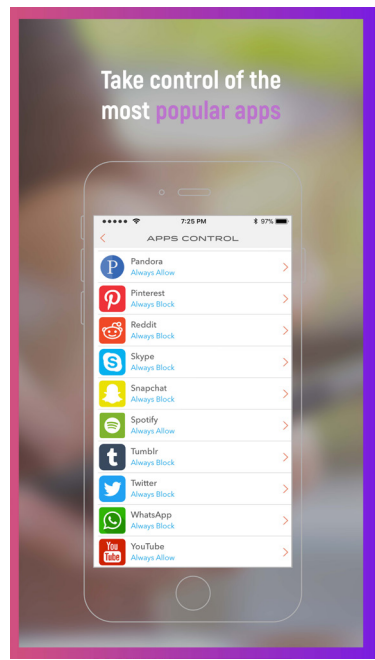

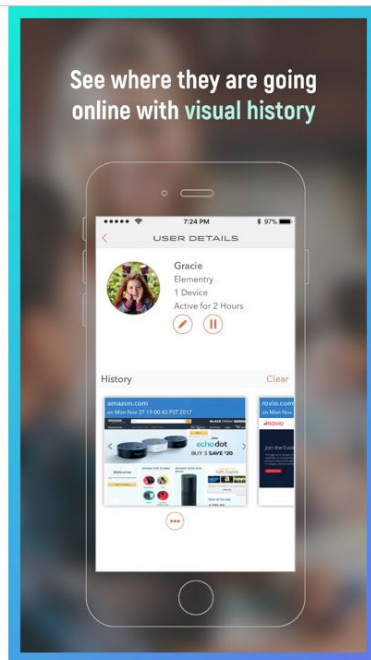

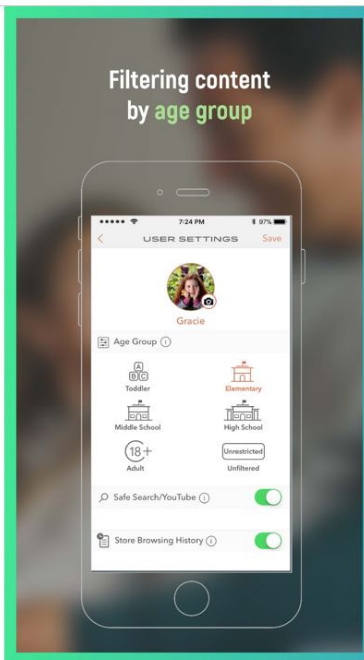

Initiating your Gryphon router couldn't be easier! Simply plugin hardware to power supply and ethernet and then connect securely to the mobile App via Bluetooth.

Easy To Use Gryphon Connect App

Plug and Play: Your secure WiFi network will be up and running in minutes with simple, step-by-step installation and automatic software updates via the Gryphon app.

Available for both iOS and Android devices.

Specifications

WiFi Features:

- 802.11bgn
- 802.11AC
- 3Gbps overall throughput
- Comprehensive WiFi security
- Simultaneous tri-band radios (one 2.4GHz, two 5GHz)
- 4x4 MU-MIMO
- Antenna beamforming
- Wireless mesh
- 6 high power internal antennas
- Guest WiFi

Power Supply:

- 12V DC

Ports

- 1 Gigabit Ethernet WAN
- 3 Gigabit Ethernet LAN

Memory

- 512MB RAM, 4GB Flash

This product comes with a limited warranty that is valid only if purchased from a Gryphon Online Safety authorized reseller.

90 Day technical support following purchase from a Gryphon Online Safety authorized reseller.

Intended for indoor use only in EU member states.
