

Quick Start

Nighthawk X8

AC5300 Tri-Band WiFi Router

Model R8500

Package Contents

1. Position the Antennas

For the best WiFi performance, position the antennas as shown.

2. Restart Your Modem and Plug In Your Router

Unplug your modem, remove and replace the backup battery if it uses one, and then plug the modem back in. Use the Ethernet cable to connect the modem to the yellow Internet port on the router.

Note: If your Internet connection does not require a modem, connect your main Ethernet cable to the yellow Internet port on the router.

Connect the router to a power source. The router's Power LED  lights amber and then turns white when the router is ready.

3. Connect to the Internet

Make sure that the router's WiFi LED on the WiFi button is lit. Find the router's preassigned WiFi network name and password on the label on the router.

Open the WiFi connection manager on your computer or other WiFi-enabled device, find the router's WiFi network name, and use the router's password to connect.

Launch a web browser. If the NETGEAR installation assistant does not display, visit www.routerlogin.net. If a login window displays, enter **admin** for the user name and **password** for the password.

Follow the NETGEAR installation assistant.

NETGEAR[®]

All Set Up!

For more information about your router, see the Do More booklet.

Get Free Apps

Start enjoying your new router right away with free apps that make management simple. Visit support.netgear.com/product/R8500 to download the apps.
