One pre-measured pouch mixes with 50-lbs. of mineral to provide proven IGR control of horn flies, face flies, stable flies and houseflies.

EPA-approved for use in all pasture and confinement cattle and calves (including veal calves).

One-to-one mixing. Simple as pour, mix and feed.

Reduced animal-handling stress, no withdrawal period.

Approved for use in IPM Programs.

Contact your animal health product supplier or www.championanimalhealth.com.
Simply mix and feed to control horn flies, face flies, houseflies and stable flies.

From Shelf to Pasture ... 
A Horn Fly Killing Machine

Horn flies suck your profits dry. Face flies feed on and infect your cattle. Biting stable flies and houseflies are simply an economic nuisance no rancher needs.

JustiFLY™ Feedthrough ... 
Proven Performance

JustiFLY™ Feedthrough is an insecticide containing the proven Insect Growth Regulator (IGR) diflubenzuron. JustiFLY™ Feedthrough is EPA-approved for use in all pasture and confinement cattle and calves (including veal calves) for the control of horn flies, face flies, stable flies and houseflies.

JustiFLY™ Feedthrough Add-Pak ... 
Broad-Spectrum Fly Killing Machine

With a mineral/JustiFLY™ Feedthrough consumption rate of 3-4 ounces/head/day, one package of JustiFLY™ Feedthrough treats approximately 200 cow days*. Broad-spectrum fly control for just pennies per-head per-day.

Producer Benefits:

- Simple 1-to-1 mixing – Just add one pre-measured JustiFLY™ Feedthrough Add-Pak to 50-lbs. of mineral
- Broad Spectrum – Controls all four major fly species: horn flies, face flies, stable flies and houseflies
- Tested – EPA approved for BOTH pasture and confinement cattle and calves
- Confidence – Approved for use in lactating dairy and beef cattle; no milk residues or milk disposal issues
- Reliable – No known fly resistance; reduced animal handling stress
- Economical – Full season fly control, with continued use, for just pennies per head/per day
- Convenient – Just add to your preferred mineral for broad-spectrum, fly control

JustiFLY™ Add-Pak ... 
Simple and Economical

JustiFLY™ Feedthrough Add-Pak is a pre-measured dose of diflubenzuron IGR larvicide that can be mixed with 50-lbs. of mineral. Feed according to labeled rates.*

Simply start feeding JustiFLY™ Feedthrough prior to flies appearing and enjoy highly economical fly control.

*Based on 1,200+ lbs cattle

*(See label for complete feeding directions.)
