**Section 6: Warranty information**
SECTION 1: GENERAL INFORMATION

Before operating this vehicle, please read all instructions. This User Manual will guide you through the functions, usage, and proper care of your Swagger. If you have any questions or cannot find the information you need in the manual, please contact your place of purchase or our customer service immediately. Before contacting customer service, please have your model number and purchase information ready as these may be needed during the call. For your convenience, we recommend you to record this information on the front of this manual.

It is important that you follow all safety warnings that appear throughout this manual and exercise good judgment when using your Swagger scooter. Consult this manual before you attempt to use your Swagger. If you have questions not answered by this manual, contact SWAGTRON customer service.

1.1 WHAT’S IN THE BOX?
■ 1x Swagger E-Scooter
■ 2x Handles
■ 1x Charger
■ 4x Allen Keys
■ 1x Kickstand
■ 1x User Manual

1.2 SAFETY WARNINGS AND IMPORTANT INFORMATION

Within this manual, “the Swagger”, “your Swagger”, “your scooter” and “the scooter” refer to the Swagger E-Scooter. The Swagger is a personal scooter that uses electrical power. Please note: This technology cannot
prevent injury if you do not use the product as indicated in this manual. By riding our Swagger, the user acknowledges and accepts responsibility of all risks associated with the use of the Swagger E-Scooter which may include, but are not limited to, muscle injuries, broken bones, lacerations, serious injury, and possible death, which may be sustained while using the Swagger.

To better insure your safety, **ALWAYS USE APPROPRIATE PROTECTIVE GEAR**, read and follow all instructions and warnings in the User Manual.

**NOTE**  
Appropriate protective gear should include an ASTM F1492, F1447, F18981, F1492, Snell B-90A, B-95, N-942, or CPSC approved helmet and other gear including knee and elbow pads.

**NOTE**  
Use the Swagger at your own risk. We are not responsible for mishaps due to lack of common sense.

**DECLARATION OF CONFORMITY:**

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.
FCC RELATED INFORMATION:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
■ Reorient or relocate the receiving antenna.
■ Increase the separation between the equipment and receiver.
■ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
■ Consult the dealer or an experienced radio/TV technician for help.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

1.3 DISPOSAL AT END OF LIFE

This product must not be disposed of by incineration, landfilling, or mixing with household trash. Improper disposal of the battery contained within this product may result in the battery heating up, rupturing, or igniting which may cause serious injury. The substances contained inside the battery present chemical risks to the environment. The recommended disposal for any Swagger at its end-of-life is to dispose of the entire unit at or through an e-Waste recycling center, program, or facility. Local regulations and laws pertaining to the recycling
and disposal of lithium ion batteries and/or products containing them will vary according to country, state, and local governments. You must check laws and regulations corresponding to where you live in order to properly dispose of the battery and/or unit. It is the user’s responsibility to dispose of their waste equipment properly in accordance with local regulations and laws.

For additional information on where you should drop off your batteries and electrical or electronic waste, please contact your local or regional waste-management office, your household waste disposal service, or your point-of-sale.
SECTION 2: FEATURES

Please read the user manual in its entirety before using the Swagger so that you may fully understand its parts and functions and be able to operate it safely.

2.1 ASSEMBLY

Ensure the Swagger is off before assembling the unit. The Swagger comes mostly assembled within the package. Some minor assembly is required. For initial assembly, required parts and tools are included. Assembly is as shown below.
Step 1. Remove the cap and screws at the top of the Swagger's handlebar stem.
Step 2. Center the handle bar connector into the handle bar stem.
Step 3. Position the cap back to the connector bar, then insert and tighten the screws using the appropriate Allen key.
   **Note:** When placed correctly, the display will sit partially over the middle connector bar.
Step 4. Screw each handle into each side of the middle connector bar.

Do not perform assembly when the power is on or the battery is charging. Be extra caution during assembly, otherwise the carbon fiber stem of the Swagger may be scratched.

To install the kickstand, see the image below and follow the steps.

Step 1. Locate the part of the Swagger where the kickstand will be attached.
Step 2. Using the bottom row, press the kickstand onto the peg.
Step 3. Using the appropriate screw and its corresponding Allen key, secure the kickstand.

Do not perform additional assembly unless instructed to do so by a customer service representative.

14. Throttle
2.3 DISPLAY OVERVIEW

The Swagger display features many different options and elements. Be sure you understand these before attempting to ride. See the following images and information for details related to each option. Note, these areas are related to features noted in the next section.

Press and hold the **POWER** button to turn on the display.

The display is made up of these parts:
1. Screen  
2. Up Arrow  
3. Power  
4. Down Arrow

**DO NOT** expose the display to direct sunlight or high heat for extended periods of time.

**DO NOT** store the Swagger inside a vehicle or other location subject to high heat. Any of these conditions may damage the display’s interface.

2.4 DISPLAY INDICATORS

To navigate through the display use the **UP ARROW** and **DOWN ARROW** buttons.

**NOTE**  
After 3 minutes of non-use, the display will turn itself off which will also prompt the Swagger to turn off.
1. Setting: This icon will appear when modifying program settings. Please see DISPLAY MODE INDICATORS for more information on these settings.

2. Magnetic Settings: This icon is related to magnetic settings. It should not appear under normal circumstances.

3. Wheel Diameter: This icon is related to wheel diameter and the Swagger’s motor. It should not appear under normal circumstances.

4. Speed: These numbers indicate current speed readings and will change as the Swagger is in use.

5. Miles per Hour (MPH or Mp/h): This icon indicates odometer readings and will appear if you have selected speed to display with this unit of measurement.

6. Kilometers per Hour (KPH or Kp/h): This icon indicates odometer readings and will appear if you have selected speed to display with this unit of measurement.

7. Battery Level: This icon indicates battery power level. As power goes down, the icon will indicate different levels.

   When the battery level is low, stop riding, turn off the Swagger, and fully recharge it before riding again.

8. Gear Position: This icon indicates current gear. There are 3 gears. Gear 1 has an approx. speed range of 0-9mph (0-14kph). Gear 2 has an approx. speed range of 0-13mph (1-20kph). Gear 3 has an approx. speed range of 0-16mph (1-25kph). Use the UP ARROW and DOWN ARROW buttons to adjust gears as desired.
Fault Indicators:

There are four icons which will appear under abnormal circumstances and/or if the internal system or parts inside the Swagger encounter some type of issue. Read the information below to understand what each icon relates to.

In the event that any of these icons appears, attempt to turn the Swagger off and back on again.

If turning the Swagger off and back on again doesn’t resolve the issue, please contact customer service.

1. **Motor Failure**: The icon indicates motor activity and will appear if an element of the motor fails to function properly. If the issue is resolved and/or there are no issues with any element of the motor, the icon will not appear.

2. **Handle Failure**: The icon indicates handling activity and will appear if an element of the steering fails to function properly. If the issue is resolved and/or there are no issues with any element of the scooter’s handling, the icon will not appear.

3. **Control Failure**: This icon indicates a serious internal issue with the Swagger’s components. If this icon appears, immediately stop using the Swagger and contact customer service.

4. **Brake Failure**: This icon indicates abnormal brake activity and will appear if an element of the brakes fails to function properly. If the issue is resolved and/or there are no issues with any element of the brakes, the icon will not appear.
Different modes and their related settings may be shown on the display as desired. To switch between modes and display different information, briefly press the POWER button.

1. **Distance**: When this mode is selected, the distance icon and the corresponding value will appear on the highlighted area on the display. This icon is related to tracking the distance you travel per trip. To reset, turn the Swagger off and/or press and hold the UP ARROW BUTTON.

2. **Odometer**: When this mode is selected, the odometer icon and the corresponding value will appear on the highlighted area on the display.

3. **Rotation Speed**: When this mode is selected, the RPM icon and the corresponding value will appear on the highlighted area on the display.

4. **Time**: When this mode is selected, the time icon and the corresponding value will appear on the highlighted area on the display. This icon is related to tracking the time you travel per trip. To reset, turn the Swagger off.

5. **Voltage**: When this mode is selected, the voltage icon and the corresponding value will appear on the highlighted area on the display.

### 2.5 DISPLAY PROGRAM SETTINGS

The display features 5 program settings which are not readily indicated on the screen by default. To access settings, press and hold the **UP ARROW** and **DOWN ARROW** buttons simultaneously then press the **POWER**
button to cycle between settings. For each setting, use the **UP ARROW** and **DOWN ARROW** buttons to adjust options or levels according to which setting you are modifying. To exit settings, simply press and hold the **UP ARROW** and **DOWN ARROW** buttons simultaneously or refrain from pressing any button and the display will time out and return to the main interface on its own. See the following information for details related to each setting.

**P 00: Low Voltage Battery Setting**

This setting is related to voltage. Voltage may be changed between 24v, 36v, and 48v. By default, this setting is at 21.5v. DO NOT change this setting from its default value. Changing it may cause the Swagger to malfunction.

**P 01: Wheel Diameter Setting**

This setting is related to wheel size. By default, this setting is at 05, with the number indicating wheel size.

⚠️ **Leave this setting at its default value. Changing it may cause the Swagger to malfunction.**

**P 02: Factory Setting**

By default, this setting is at 009. It is strongly recommended to leave this setting at its default value. Changing it may cause the Swagger to malfunction.

**P 03: Speed Display Setting**

By default, this setting is at 001. Levels may be set to 000 or 001. Selecting 000, the numbers on the display will not show speed even while the Swagger is in use. Selecting 001, the numbers on the display will show
speed as normal while the Swagger is in use.

**Leave this setting at it’s default value. Changing it may cause the scooter to malfunction.**

**P 04: Measurement Setting**

This setting determines the unit of measurement in which your current speed is displayed. Speed may be displayed in either miles per hour (MPH or Mp/h) or kilometers per hour (KPH or Kp/h). By default, this setting is at 0, with the measurement being kilometers per hour (KPH or Kp/h). This setting may be changed as desired. If changed, the display will show the related icon.

**P 05: Powered Acceleration Start Setting**

This setting is related to voltage and affects acceleration. Levels may be set to 0 or 1. By default, this setting is at 0.

Selecting 0 will turn this feature on, meaning voltage build up is not necessary and the throttle may be used immediately for powered acceleration.

Selecting 1 will turn this feature off, meaning you will need to manually accelerate the scooter (to build up voltage) before the throttle may be used for powered acceleration. This setting may be changed as desired.

**Note**

Selecting 1 (powered acceleration off) may improve battery life as manual acceleration helps conserves power.
P 06: Cruise Control Setting

This setting is for the Cruise Control feature. Levels may be set to 0 or 1. By default, this setting is at 0. Selecting 0 turns the feature off. Selecting 1 turns the feature on. This setting may be changed as desired. If changed, the display will show the related number.

P 07: Factory Setting

By default, this setting is at 1. It is strongly recommended to leave this setting at its default value. Changing it may cause the scooter to malfunction.

P 08: Gear Speed Capacity Setting

This setting is related to gearing. The capacity may be set to any number between 1 and 100. By default, this setting is at 100, which means the selected gear will be allowed to operate at 100% capacity and reach its top speed. To change capacity, first elect the desired gear position (1-3), and then adjust.

This setting may be changed as desired.

2.6 CHARGING

Charge the Swagger before using it.
The charge cycle is complete when the battery icon on the display is full and/or the charger’s light is green. After this initial charge, use the scooter until battery level reaches approximately 10% (Battery Level indicator will show one bar) before recharging.

Each charge cycle from zero to full charge will take approximately 1.5 hrs. When the backlit display on the handlebars indicates battery power is low, recharge the Swagger. To recharge the Swagger, use the included charging cable and its adapter.

Step 1. Ensure the scooter is turned off before charging and remains off while charging.
Step 2. Remove the cap covering the charger port.
Step 3. Insert the appropriate end into the scooter’s stand and then insert other end into a wall outlet.
Step 4. While the scooter is charging, the charger light will be red.
Step 5. When the scooter is fully recharged, the charger light will turn green. You may then disconnect the scooter from the charger.

**DO NOT** under any circumstances use the scooter while it is charging or connected to the charger.

**NOTE**

The charging time is approximately 1.5 hours. Charging longer than that may affect battery life and/or performance. If the charger’s light doesn’t turn on, it may not be fully connected. Please assure it is securely connected to the wall and to the scooter.
2.7 SAFETY WARNING

When Using the Battery

1. Misusing the battery may cause the battery to get hot, rupture, or ignite and cause serious injury. Be sure to follow the safety rules listed below:
   ■ Do not place the battery in fire or direct contact with heat.
   ■ Do not pierce the battery with sharp objects, strike the battery with a hammer, step on the battery, or otherwise subject it to strong impacts or shocks.
   ■ Do not expose the battery to water or any liquids, or allow the battery to get wet.

2. Do not disassemble or modify the battery. The battery contains safety and protection devices which, if damaged, may cause the battery to generate heat, rupture or ignite.

3. Do not place the battery on or near fires, stoves, or other high-temperature locations. Do not place the battery in direct sunlight, or use or store the battery inside cars in hot weather. Using the battery in this manner may also result in a loss of performance and a shortened life expectancy.

1. If the device is to be used by children, the caregiver should explain the contents of the user manual to the children. The caregiver should provide adequate supervision to ensure that the device is being used as explained in the user manual.

2. Immediately discontinue use of the battery if, while using, charging, or storing the battery, the battery emits an unusual smell, feels hot, changes color, changes shape, or appears abnormal in any other way.

3. Do not place the batteries in microwave ovens, high-pressure containers, or on induction cookware.
4. In the event that the battery leaks and the fluid gets into one’s eye, do not rub the eye. Rinse well with water and immediately seek medical care. If left untreated, the battery fluid could cause damage to the eye.

**While Charging**

(1) Be sure to follow the rules listed below while charging the battery. Failure to do so may cause the battery to become hot, rupture or ignite and cause serious injury. When charging the battery, use a specified battery charger provided in the package. Do not place the battery in or near fire, or under direct sunlight.

(2) Do not continue charging the battery if it does not recharge within the specified charging time. Doing so may cause the battery to become hot, rupture or ignite.

The temperature range within which the battery can be charged is 32°F ~ 104°F (0°C to 40°C). Charging the battery at temperatures outside of this range may cause the battery to become hot or to break, also harm the performance of the battery or reduce the battery’s life expectancy.

**When Discharging the Battery**

Do not discharge the battery using any device except for the specified device. When the battery is used in devices aside from the specified device it may damage the performance of the battery or reduce its life expectancy, and if the device causes an abnormal current to flow, it may cause the battery to become hot, rupture or ignite and cause serious injury.
SECTION 3: USAGE

We sincerely hope every operator can ride the Swagger safely. Think back to when you first learned to ride a bike, a car or skateboard. Note the following information before attempting to ride your Swagger.

- Protective gear including a ASTM F1492-approved helmet must be worn at all times
- The Swagger supports up to 250 lbs. (113 kg)
- Only operate the Swagger where permitted. Local laws may restrict where you may ride.

The Swagger contains a motor and may be classified as a motor vehicle under your local law. It is your responsibility to understand and abide by any local laws restricting how or where you may ride.

3.1 GETTING STARTED

Assuming you have equipped suitable protective gear and that the Swagger has been placed on a level surface, is well charged, and does not have any issues, follow the steps below. For your safety, please carefully read this entire section before attempting to ride.

The Powered Acceleration Start feature is on by default which means you may use the throttle immediately for powered acceleration. If it is off, you will need to step and kick off the ground to begin Manual Acceleration Start before the throttle may be used.

Regardless of start type, Cruise Control may be used any time after you've started using the throttle. See the instructions below.
**Powered Acceleration Start**
This is the default start setting. Follow the instructions below.

Step 1. Press the **POWER** key for 2 seconds to turn the scooter on.

Step 2. Carefully step on with one foot and stand upright but relaxed.

Step 3. Balance with both feet on the scooter and use the throttle to start powered acceleration.

Step 4. To stop riding, release the throttle and use the handbrake, footbrake, or both to gradually coast to a stop then step off the scooter one foot at a time. Be extra cautious when dismounting for the first time.

**Manual Acceleration Start**
To use this start setting, please refer to P 05 on page 14 then follow the instructions below.

Step 1. Press the **POWER** key for 2 seconds to turn the scooter on.

Step 2. Carefully step on with one foot and stand upright but relaxed.

Step 3. Keep one foot on the ground and kick off to begin accelerating manually.

Step 4. Once the Swagger reaches approximately 4 mph (6km/h), press the throttle to start powered acceleration.

Step 5. To stop, release the throttle and use the handbrake, footbrake, or both to gradually coast to a stop then step off the scooter one foot at a time. Be extra cautious when dismounting for the first time.
Cruise Control

Step 1. Accelerate to reach the desired speed.

Step 2. Hold the throttle for approximately 6 seconds to turn on Cruise Control and maintain speed.

Step 3. Use the throttle or the handbrake to turn off Cruise Control.

While riding, you can use the front headlight to improve visibility if needed. To use the light, simply press the button just above the light to turn it on or off. Note: Using the headlight for extended periods of time may affect scooter's overall battery life.

3.2 PRACTICING GUIDELINES

Practice until you are comfortable with using all of the Swagger scooter’s functions. See the following tips below.

- Wear casual clothing and flat shoes to maintain your flexibility and stability.
- Practice until you can easily get on, move forward, turn, stop, and dismount with ease.
- Make sure the pavement is even. Do not operate on a slope until you are experienced.
- The Swagger is designed for relatively smooth, flat terrain. When driving on uneven terrain, the user should slow down.
- Until you are comfortable using the scooter, avoid operating in places with pedestrians or obstacles.

NOTE: The Swagger weights approximately 15 lbs (7 kg). If you are unsure of your ability to lift it with one hand, please lift it with both hands or have second person help.
3.3 DIAGRAM OF STANDING AND FOLDING

The scooter includes a kickstand. Before using the kickstand, bring the scooter to a complete stop and turn it off. Before riding the scooter again, lean the scooter off the kickstand and push the kickstand up.

**Standing**

1. Locate the kickstand on the side of the scooter’s deck.

2. Push the kickstand down and away from the scooter. Then carefully lean the weight of the scooter onto the kickstand.

**Folding**

a. Locate the latch at the base of the scooter’s stand.

b. Holding the latch open, grasp the handlebar stem firmly and pull it down until it is parallel with the deck.

Before moving, lifting, or otherwise transporting the scooter, please make sure you have turned it off. Fold the scooter and grasp it firmly before lifting and/or moving it.
SECTION 4: MAINTENANCE

4.1 CLEANING

The Swagger may need cleaning after riding for extended periods of time. See the following tips below.

■ Completely power off the scooter before cleaning.
■ Use dry, non-abrasive cloth to gently remove debris or dust.
■ The Swagger may not come in contact with any type of liquid.
■ Never use alcohol or ammonia-based cleaning solutions.
■ Never spray liquid directly onto any part of the scooter.

4.2 STORAGE

The Swagger may be stored easily when not in use. See the following information below.

■ Before storing, fully charge the Swagger to prevent battery over-discharge due to non-use.
■ Cover the Swagger to protect it from dust. Do not store in a dusty environment as, with all electronic devices, this may cause damage over time.
■ Store the Swagger indoors at suitable temperatures between -10°F to 113°F (-23°C to 45°C).
■ If storing for more than one month, discharge and recharge the battery every three months.
■ DO NOT store in an unheated garage, shed, or other location with extreme temperature fluctuations or ranges.

Do not perform any maintenance when the power is on or the battery is charging. Do not let water or liquids get into the Swagger. It may cause permanent damage to the internal electronic components.

SECTION 6: WARRANTY INFORMATION

SWAGTRON® offers a ONE YEAR limited warranty covering the hardware of SWAGTRON® Swagger E-Scooter ("Product"), limited to those residing in the 50 US States and Canada. This warranty gives you specific legal rights and you may also have other rights which vary from state to state. SWAGTRON® warrants the Product to be free from defects in materials and workmanship under normal use for one (1) year, as sold to the original purchaser, from the date of retail purchase by the original end-user purchaser. If a hardware defect arises and a valid claim is received within the warranty period, at its option and to the extent permitted by law, SWAGTRON® will: (1) repair the hardware defect by using new or refurbished parts that are equivalent to new in performance and reliability; or (2) exchange the product with a product that is new or refurbished, that is substantially equivalent to the original product. This warranty is for replacement for like-items only and does not cover items out of production if the company no longer stocks them. This warranty is not assignable or transferable. The original purchaser may call the SWAGTRON® toll-free number at 1-844-299-0625 for service request. Upon SWAGTRON®’s replacement or repair of a Product under warranty, the original end-user purchaser will have the remaining warranty under the original warranty period (without any postponement during repair or replacement). When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes SWAGTRON®’s property. Important: DO NOT disassemble the Product. Disassembling the Product will void this warranty. Only SWAGTRON® or a party expressly authorized by SWAGTRON® should perform service on this product.

This warranty only covers technical hardware defectiveness during the warranty period and under normal use conditions. SWAGTRON® does not warrant uninterrupted or error-free operation of this Product. This Warranty does not apply to damages or circumstances, such as, but not limited to: (a) Damage that is caused by conditions, malfunctions, or damage not resulting in from defects in material or workmanship. These conditions include, but are not limited to, road hazard, accidents, and improper operation or maintenance;(b)
Product has been tampered with, repaired and/or modified by non-authorized personnel; (c) Obsolescence; (d) Damage (accidental or other) to the Product that is cosmetic, meaning damage that does not impact the operation and functioning of the Product, such as without limitation to rust, change in color, texture or finish, wear and tear, scrapes, scratches, dents, cracks, or gradual deterioration; (e) Damage to the Product caused by war, terrorism, fire, accident, natural disaster, intentional or accidental misuse, abuse, neglect or improper maintenance, use under abnormal conditions, accidental drops, abuse or fire; (f) Damage to the Product caused by an external electrical fault, surge, or any electrical anomaly; (g) Any contamination, condition or other circumstance, which SWAGTRON®, in its sole discretion, considers a danger to health and safety, including, but not limited to any contact between the Product and a biohazard, bodily fluids, infectious materials/substance, chemicals, hazardous substances, diseases, radiation, or other; (h) Fraud, theft, misplacement, unexplained disappearance, or willful acts.

Limitation of Liability

In no event shall SWAGTRON® be liable for any incidental, indirect, special or consequential damages or liabilities (including but not limited to incidental or consequential damages for loss of time, inconvenience, loss of use of product, or any other consequential or incidental loss) in connection with the purchase, use, or operation of the product. SWAGTRON® is not liable for property damage, personal injury, or death.

TO THE EXTENT PERMITTED BY LAW, THIS WARRANTY AND THE REMEDIES SET FORTH ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, REMEDIES AND CONDITIONS, WHETHER ORAL, WRITTEN, STATUTORY, EXPRESS OR IMPLIED. AS PERMITTED BY APPLICABLE LAW, SWAGTRON® SPECIFICALLY DISCLAIMS ANY AND ALL STATUTORY OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND WARRANTIES AGAINST HIDDEN OR LATENT DEFECTS. IF SWAGTRON® CANNOT LAWFULLY DISCLAIM STATUTORY OR IMPLIED WARRANTIES THEN TO THE EXTENT PERMITTED BY LAW, ALL SUCH WARRANTIES SHALL BE LIMITED IN DURATION TO THE DURATION OF THE EXPRESS WARRANTY AND TO THE REPAIR OR REPLACEMENT SERVICE AS DETERMINED BY SWAGTRON® IN ITS SOLE DISCRETION. NO RESELLER, AGENT, OR EMPLOYEE IS AUTHORIZED TO MAKE ANY MODIFICATION, EXTENSION, OR ADDITION TO THIS WARRANTY. IF ANY TERM(S) IS HELD ILLEGAL OR UNENFORCEABLE, THE LEGALITY AND ENFORCEABILITY OF THE REMAINING TERMS SHALL NOT BE AFFECTED OR IMPAIRED. EXCEPT AS PROVIDED IN THIS WARRANTY AND TO THE MAXIMUM EXTENT PERMITTED BY LAW, SWAGTRON® IS NOT RESPONSIBLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM ANY BREACH
OF WARRANTY OR CONDITION OR PERFORMANCE OF THE PRODUCT, OR UNDER ANY OTHER LEGAL THEORY, INCLUDING BUT NOT LIMITED TO LOSS OF USE; LOSS OF REVENUE; LOSS OF ACTUAL OR ANTICIPATED PROFITS (INCLUDING LOSS OF PROFITS ON CONTRACTS); LOSS OF THE USE OF MONEY; LOSS OF ANTICIPATED SAVINGS; LOSS OF BUSINESS; LOSS OF OPPORTUNITY; LOSS OF GOODWILL; LOSS OF REPUTATION; LOSS OF, DAMAGE TO, COMPROMISE, OR CORRUPTION OF DATA; OR ANY INDIRECT OR CONSEQUENTIAL LOSS OR DAMAGE HOWSOEVER CAUSED INCLUDING THE REPLACEMENT OF EQUIPMENT AND PROPERTY, ANY COSTS OF RECOVERING, PROGRAMMING OR REPRODUCING ANY PROGRAM OR DATA STORED IN OR USED WITH THE PRODUCT AND ANY FAILURE TO MAINTAIN THE CONFIDENTIALITY OF DATA STORED ON THE PRODUCT. THE FOREGOING LIMITATION SHALL NOT APPLY TO DEATH OR PERSONAL INJURY CLAIMS, OR ANY STATUTORY LIABILITY FOR INTENTIONAL AND GROSS NEGLIGENT ACTS AND/OR OMISSIONS. SWAGGER DISCLAIMS ANY REPRESENTATION THAT IT WILL BE ABLE TO REPAIR ANY PRODUCT UNDER THIS WARRANTY OR MAKE A PRODUCT EXCHANGE, AND IS UNABLE TO RECOVER ANY USER SOFTWARE OR DATA ON THE DEVICE.
