Quick Start Guide

Package Contents
- CPE
- PoE Injector
- Power Adapter
- Quick Start Guide
- Wall Mount Screw Set
- Pole Mounting Strap
- Waterproof Set

Minimum Requirements
- Broadband Internet Service (Cable or DSL Modem)
- Internet Browser (Internet Explorer, Safari, Firefox, Chrome)

1 Connecting the CPE
A) Remove the rear bottom panel.
B) Connect one end of the Ethernet cable into the LAN(PoE) port of the CPE and the other end to the PoE Ethernet port of the PoE Injector.
C) Connect the Power Adapter to the DC-IN port of the CPE and plug the other end into an electrical outlet.
D) Connect the second Ethernet cable into the LAN port of the PoE injector and the other end to the Ethernet port on the computer.
E) Place the panel removed from step A back into the device.

Note: The CPE should only be powered via Ethernet cable connected to the included PoE injector.

2 IP Address Configuration
A) Once your computer is on, ensure that your TCP/IP is set to Obtain an IP address automatically.
B) If your computer is already on a network, ensure that you have set it to a Static IP Address on the interface.
(Example: 192.168.1.10 and the Subnet Mask address as 255.255.255.0)

3 CPE Setup
A) To configure the CPE, open a web browser. In the address bar of the web browser, enter 192.168.1.1 and hit enter.
B) A login screen will appear. By default, the username of the CPE is admin and the password is admin. Enter the current username and password of the CPE and then click Login.

4 Switching Modes
A) This device can operate in the following modes: Access Point, Client Bridge, WDS and Client Router.
B) Click on the Operation Mode tab under the System Properties.
