Package List	Car Mount ×1, Air Vent Clip ×1, Instruction Manual ×1

The parameters above are derived from the laboratory of VICSEED, the actual parameters would be different because of products or other factors. The images shown here are only for reference.

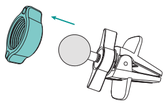

Product Overview

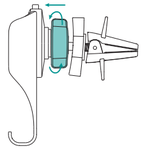

Installation Steps

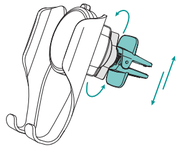

1. Unscrew the fixed nut on the back of the car mount.

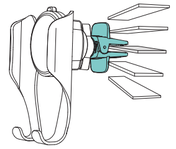

2. Pass the ball joint through the fixed nut.

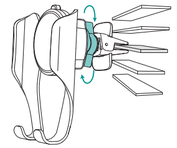

3. Push the ball joint into the groove hard until it falls into the socket, then tighten the fixed nut.

4. Counterclockwise twist the locking handle to adjust the opening size of the air vent clip.

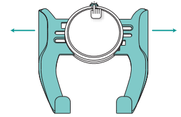

5. Adjust the angle of car air vent blades, keep them perpendicular to the supporting plates of the air vent clip. Then insert the clip into car air vent blades totally, so they will attach together securely.

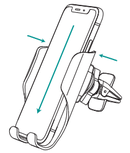

6. Clockwise twist the locking handle to secure the car mount on your air vent blades.

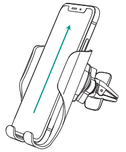

Using Steps

1. Press the release button to release clamp arms.

2. Slide in your cell phone then press the clamp arms with force to adjust the width.

3. Easy slide or press the release button to take out your cell phone.

⚠ Notes

1. We only recommend to use this car mount on horizontal or vertical vents.
2. Do not adjust the car mount when driving.
3. Do not install the mount in a place that obstructs the airbag action or obstructs driving.
