Operator’s Manual

GTF 31
BCF 31

4-Cycle Trimmer
4-Cycle Brush Cutter

SAVE THESE INSTRUCTIONS

DO NOT RETURN THIS UNIT TO THE RETAILER. PROOF OF PURCHASE WILL BE REQUIRED FOR WARRANTY SERVICE.

For assistance regarding the assembly, operation or maintenance of the unit, please call 1-844-786-7335 (in the United States) or contact email box customerservice@sunseekertools.com.

Warranty service is available through an authorized service center. To locate a service center in your area, please write us email or call the number listed above. Service on this unit, both within and after the warranty period, should only be performed by an authorized and approved service center. When servicing, use only identical replacement parts.

All information, illustrations, and specifications in this manual are based on the latest product information available at the time of printing. We reserve the right to make changes at any time without notice.

The product may vary slightly from the illustrations contained in this manual.

IMPORTANT: Read this manual thoroughly before using this product. Follow all instructions.
The purpose of safety symbols is to attract your attention to possible dangers. The safety symbols, and their explanations, deserve your careful attention and understanding. The safety warnings do not by themselves eliminate any danger. The instructions or warnings they give are not substitutes for proper accident prevention measures.

**Symbol Meaning**

<table>
<thead>

</table>

**NOTE:** Advises you of information or instructions vital to the operation or maintenance of the equipment.

---

**SPARK ARRESTOR NOTE**

**NOTE:** For users on U.S. Forest Land and in the states of California, Maine, Oregon and Washington. All U.S. Forest Land and the state of California (Public Resources Codes 4442 and 4443), Oregon and Washington require, by law that certain internal combustion engines operated on forest brush and/or grass-covered areas be equipped with a spark arrestor, maintained in effective working order, or the engine be constructed, equipped and maintained for the prevention of fire. Check with your state or local authorities for regulations pertaining to these requirements. Failure to follow these requirements could subject you to liability or a fine. This unit is factory equipped with a spark arrestor. If it requires replacement, contact your local service dealer to install the appropriate muffler assembly.

---

**CALIFORNIA PROPOSITION 65**

**WARNING:** This product contains a chemical known to the state of California to cause cancer, birth defects or other reproductive harm.

---

Read the operator’s manual and follow all warnings and safety instructions. Failure to do so can result in serious injury to the operator and/or bystanders.

---

**IMPORTANT SAFETY INSTRUCTIONS**

**READ ALL INSTRUCTIONS BEFORE OPERATING**

**WARNING:** When using the unit, all safety instructions must be followed. Please read these instructions before operating the unit in order to ensure the safety of the operator and any bystanders. Please keep these instructions for later use.

- Read the instructions carefully. Be familiar with the controls and proper use of the unit.
- Do not operate this unit when tired, ill or under the influence of alcohol, drugs or medication.
- Never allow children to operate the unit. Teens must be trained, accompanied and supervised by an adult. Never allow adults to operate the unit without proper instruction.
- All guards and safety attachments must be installed properly before operating the unit.
- Inspect the unit before use. Replace damaged parts. Check for fuel leaks. Make sure all fasteners are in place and secure. Replace parts that are cracked, chipped, or damaged in any way. Do not operate the unit with loose or damaged parts.
- Only use the trimming line described in the Specifications section of this manual. Never use metal-reinforced line, wire, chain or rope. These can break off and become dangerous projectiles.
- Do not replace the cutting head with rigid or metal blades. Doing so could result in serious injury.
- Be aware of risk of injury to the head, hands and feet.
- Carefully inspect the area before starting the unit. Remove rocks, broken glass, nails, wire, string and other objects that may be thrown or become entangled with the unit.
- Clear the area of children, bystanders and pets; keep them outside a 50-foot (15 m) radius, at a minimum. Even then, they are still at risk from thrown objects. Encourage bystanders to wear eye protection. If you are approached, stop the unit immediately.
- Squeeze the throttle control and check that it returns automatically to the idle position. Make all adjustments or repairs before using the unit.
- Do not change the engine governor settings or overspeed the engine.
- This unit is intended for occasional, household use only.
SAVE THESE INSTRUCTIONS
This operator’s manual describes safety and international symbols and pictographs that may appear on this product. Read the operator's manual for complete safety, assembly, operating and maintenance and repair information.

### SAFETY ALERT SYMBOL
- Indicates danger, warning or caution. May be used in conjunction with other symbols or pictographs.

### READ OPERATOR’S MANUAL
- WARNING: Read the operator’s manual(s) and follow all warnings and safety instructions. Failure to do so can result in serious injury to the operator and/or bystanders.

### WEAR EYE AND HEARING PROTECTION
- WARNING: Thrown objects and loud noise can cause severe eye injury and hearing loss. Wear eye protection meeting current ANSI / ISEA Z87.1 standards and ear protection when operating this unit. Use a full face shield when needed.

### WEAR FOOT PROTECTION
- Always wear heavy-duty, non-slip footwear when operating this unit.

### WEAR HAND PROTECTION
- Always wear heavy-duty, non-slip gloves when handling this unit.

### HANDLE POSITION
- Make sure the handle is positioned beyond the end of the safety label.

### UNLEADED FUEL
- Always use clean, fresh unleaded fuel.

### OIL
- Refer to operator’s manual for the proper type of oil.

### DO NOT USE E85 FUEL IN THIS UNIT
- WARNING: It has been proven that fuel containing greater than 10% ethanol will likely damage this engine and void the warranty.
APPLICATIONS
As a trimmer / brush cutter:
• Cutting grass and light weeds.
• Edging
• Decorative trimming around trees, fences, etc.
Other optional attachments may be used with this unit.

**ASSEMBLY**

When assembling this machine, please follow the instructions for assembly steps.

1. **Mounting the rod:**
   - Pull out the stop pin (1) and push the lower part of the rod (2) right down until the stop pin (1) clicks into the hole (3) in the rod. This is easier to do if you rotate the bottom of the rod (2) slightly in both directions. The pin (1) is in place when it is completely lodged in the hole.
   - Once inserted, tighten the knob (4) securely.

2. **Assemble the handle on the machine.**
First put hex screws into the handle, second take handle on the shaft. Assemble the lower plate into the handle (bottom), and then tighten the nut knob enough. See the bellowing pictures

**D-shape handle**

**P-shape handle**
3.1 Fitting the guard for curved shaft grass deflector:
- Remove the guard plug (1) from the end of the bottom part of the rod (2).
- Secure the guard (3) to the support (4) using the supplied bolts (5).

3.2 Fitting the guard for straight shaft grass deflector
- Fix the transmission with hex key and wrench enclosed as standard accessories for tightening the nuts with the safe guard.
- The guard is fixed to the angle transmission by two screws.

Warning! Use only original manufacturer's replacement parts, accessories and attachments. Failure to do so can cause poor performance, possible injury and may void your warranty. Never use the machine without the guard assembled!

4. Assembly and disassembly of the cutting head
4.1 Assembly and disassembly of the cutting head:
   a) Assembly
      - Block rotation of the shaft (1) with a proper wrench.
      - Fit the cutting line head (2) screwing it clockwise.
   b) Disassembly
      - Block rotation of the shaft (1) with a proper wrench.
      - Remove the cutting line head (2) unscrewing it anticlockwise.

4.2 Assembly and disassembly of the cutting head:
   a) Release the nut. Line up the two holes of flange and shield, use one screw driver to hold the flange as below and turn the socket wrench clockwise, the nut will be released.

   b) Fit the Nylon cutting head. Remove another shield after release the nut. Still hold the flange, take the Nylon cutting head on the shaft and rotate counter-clockwise, the Nylon cutting head is fitted.
c) **Release the Nylon cutting head.** Use screw driver to hold flange and then rotate the Nylon cutting head clockwise, it will be replaced.

![Image of Nylon cutting head being rotated clockwise](image)

**Warning!**
Please make sure the cutting head has been assembled correctly before use!

**d) Fit the blade.** Take the outer flange off after release the nut, then put the blade, outer flange, shield and nut according to priority as below picture. Note the blade rotation direction needs be same as below picture. Use screw driver to hold flange and tighten nut counter-clockwise, ensure the nut is tightened enough.

![Image of blade being fitted](image)

**e) Release blade.** Use screw driver to hold flange and release nut, the blade can be took off.

![Image of blade being released](image)
5. Fit the bet. According to picture showing, fit the belt well.

OPERATION

When operating this machine, please follow the instructions for operations steps.

Before starting the equipment
Each time before use, check the following:
• That there are no leaks in the fuel system.
• That the equipment is in perfect condition and that
  the safety devices and cutting devices are complete.
• That all screws are securely fastened.
• That all moving parts move smoothly.

⚠️ CAUTION!
The engine does not come with oil in it. Therefore, ensure that you add 0.08 liters of oil
before starting it up. Use normal, multigrade oil (SAE30 / 10W30). The oil level in the
engine must be checked each time before mowing.
You will also need to fill in petrol, as this is also not supplied upon delivery

⚠️ Fuel
Recommended fuels.
Normal petrol / Lead free max. 5% bioethanol

Important: Only use containers designed and approved for the purpose to transport and
store fuel.
Filling with fuel

**Danger of injury!**
Fuel is explosive!
- Turn off and cool the motor down before filling the tank with fuel.
- You must observe all safety instructions relating to handling fuel.

**Risk of device damage!**
The device is supplied without motor or gearbox oil.
Before operating, you must fill it with fuel.

- Place the machine on a flat stable surface, with the fuel tank cap facing upwards.
- Clean the fuel tank cap and the surrounding area to avoid any dirt from entering the tank during refilling.
- Carefully open the fuel tank cap to allow the pressure inside to decrease gradually.
- Unscrew the tank cap and remove it.
- Pour in the fuel carefully, avoid spilling.
- Screw the tank cap on firmly by hand.

**WARNING!** Take care of the emission of exhaust gases. Always shut off engine before fueling. Never add fuel to a machine with a running or hot engine. Take care of fire!
**WARNING!** Never smoke whilst refueling and avoid inhaling the petrol fumes.
**WARNING!** Carefully open the tank top as pressure could have formed inside.

Draining fuel

- Hold a collection container beneath the fuel drain bolt.
- Unscrew the tank cap and remove it.

- Allow the fuel to run out completely.
- Screw the tank cap on firmly by hand.

**WARNING!** Always close the fuel tank cap firmly.
**WARNING!** Immediately clean all traces of fuel which may have dripped on the machine or the ground and do not start the engine until the petrol fumes have dissipated.
Start on the unit

Do not start the unit until it has been completely assembled. Before switching on the unit, always check the oil.

Check before use!

Danger of injury!
Do not operate the device unless you did not find any faults. If a part has become defective, make sure to replace it before you use the device again.

Check the safe condition of the device:
– Check the device for leaks.
– Check the device for visual defects.
– Check that all parts of the device have been securely fitted.
- Check that all safety devices are in proper condition.

Danger of injury!
Before starting work, always check the ground and remove all objects which could be thrown by the device.

Once the machine has been set up properly, start the engine as follow:

1. Press the fuel pump more than 10 times.

2. Turn the engine switch to the ON position.
3. Put the choke lever on the (OFF) position.

4. Pull the recoil starter handle 3-5 times to start the engine. Hold the machine firmly on the ground with one hand on the power unit, in order not to lose control of the machine during startup as following picture.

5. Pull the starter grip slowly for 10 - 15 cm until you feel some resistance, then tug it a few times until you hear the engine turn over. Then adjust the choke lever to (ON) position.
6. Pull the starter grip again until the engine starts as normal.

7. When the engine is running and idling, the throttle lever on handle is as below picture. First press the lock off lever and then switch the throttle lever on, the machine will be working.

8. Adjusting line length when working: This machine is fitted with a “Tap & Go” head. To release more line, tap the cutting line head against the round with engine at top speed: the line will be released automatically and the knife cut off the excess length.

9. If meet any problem occurs, press the engine switch, the machine will stop running. If need stop cutting head working, release the throttle lever.
10. If any problem occurs, pull the pin of safety belt, then release the brush cutter immediately.

11. If the machine is hot, the throttle level can be adjusted to ON position directly when restart the machine.

12. **WARNING!** Do not use the machine for sweeping, tilting the cutting line head. The power of the engine could throw objects and small stones 15 metres or more, causing damage or injuries to people.

**Note:**
1. Do not start the motor in tall grass
2. While mowing, lay the connection cable safely on footpaths and on areas which have already been mown.
3. When the engine has been switched off, the cutter continues running for several seconds therefore do not get close to the cutting head of the brush cutter until the cutter has come to a standstill!

**When the engine has been switched off, the cutter continues running for several seconds therefore do not close to cutting head of grass trimmer until the cutter has come to a standstill!**

---

**ROUTINE MAINTENANCE**

Correct maintenance is essential to maintain the original efficiency and safety of the machine over time.
Before performing any maintenance or cleaning work, always turn off the engine.

1. Do not spray the unit with water. Ingress of water may damage the engine and electrical connection.
2. Clean the unit with a cloth, hand brush, etc.

**WARNING!** During maintenance operations:
– Remove the spark plug cap.
– Wait until the engine is sufficiently cold.
– Never dispose of oils, fuel or other polluting materials in unauthorized places.

### Maintenance schedule

<table>
<thead>
<tr>
<th></th>
<th>12 hours of use</th>
<th>24 hours of use</th>
<th>36 hours of use</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air filter</td>
<td>clean</td>
<td>clean</td>
<td>replace</td>
</tr>
<tr>
<td>Spark plug</td>
<td>check</td>
<td>clean</td>
<td>replace</td>
</tr>
</tbody>
</table>

**Expert inspection is required:**
  a) If the grass trimmer strikes an object.
  b) If the motor stops suddenly
  c) If the nylon cutter is damaged
  d) If the gears are damaged.

Replacing and recleaning the nylon spool at the end of the trimming season. Always re-cleaned the nylon spool or, if required, replace the nylon spool with a new one. Always have the nylon spool re-cleaned or replaced by a customer service centre.

**STORAGE**

At the end of each working session, carefully clean the machine of dust and debris, and make sure that there are no damaged parts, replacing any faulty parts. The machine must be stored in a dry place away from the elements and with the cover correctly fitted.

**CLEANING THE ENGINE AND THE SILENCER**

To reduce fire risks, periodically clean the cylinder fins with compressed air and clear the silencer area to get rid of sawdust, branches, leaves or other debris.

**STARTING UNIT**

To avoid overheating and damage to the engine, always keep the cooling air vents clean and free of sawdust and debris. If you notice signs of wear on the starter cable, contact your Dealer for a replacement.

**NUTS AND SCREWS**

Periodically check that all the nuts and screws are securely tightened and the handgrips are tightly fastened.
Change and clean the spark plug
- Periodically remove and clean the spark plug using a metal brush to get rid of any deposits.
- Check and reset the correct distance between the electrodes.
- Replace the spark plug and fasten it firmly using the supplied wrench.
- The spark plug must be replaced with one with the same characteristics whenever the electrodes have burnt or the insulation has worn, and in any case every 100 working hours.

![Spark Plug Diagram]

Clean the air filter

**IMPORTANT** Cleaning the air filter is essential to guarantee the efficiency and duration of the machine. Do not work with a damaged filter or without a filter, as this could permanently damage the engine. It must be cleaned after every 12 working hours.

Clean the filter as follows:
- Loosen the knob, remove the cover and the filter element
- Wash the filter element with soap and water. Do not use petrol or other solvents.
- Leave the filter to dry in the open air.
- Fit the filter element and the cover back on, tightening the knob again

![Air Filter Cleaning]

**Warning!**
Never run the engine without the air filter element installed.
Head line replacement

SHARPENING THE LINE CUTTING KNIFE
- Remove the line cutting knife (1) from the guard (2) by unscrewing the screws (3).
- Fix the line cutting knife in a vice and sharpen it using a flat file, being careful to retain the original cutting angle.
- Refit the knife on the guard.

CLEANING AND STORAGE

CLEANING

Use a small brush to clean the outside of the unit. Do not use strong detergents. Household cleaners that contain aromatic oils such as pine and lemon, and solvents such as kerosene, can damage plastic. Wipe off any moisture with a soft cloth.

STORAGE
- Never store a fueled unit where fumes may reach an open flame or spark.
- Allow the engine to cool before storing.
- Lock up the unit to prevent unauthorized use or damage.
- Store the unit in a dry, well-ventilated area.
- Store the unit out of the reach of children.
- To suspend the attachment from a hook, install the hanger cap onto the attachment. Make sure the release button is securely locked into one of the holes on the hanger cap.

Short-term Storage (1-2 weeks)
1. Store the unit in a horizontal position. If this is not possible, store the unit vertically with the engine at the top.

Long-term Storage
1. Remove the fuel cap, tip the unit and drain the fuel into an approved container. Reinstall the fuel cap.
2. Start the engine and allow it to run until it stalls. This ensures that all fuel has been drained from the carburetor.
3. Allow the engine to cool. Remove the spark plug and put 5 drops of any high-quality motor oil or 2-cycle oil into the cylinder. Pull the starter rope slowly to distribute the oil. Reinstall the spark plug.
4. Thoroughly clean the unit and inspect it for any loose or damaged parts. Repair or replace damaged parts and tighten loose screws, nuts or bolts.

Preparing the Unit for Use after Long-term Storage
1. Remove the spark plug. Tip the unit and drain all of the oil from the cylinder into an approved container. Reinstall the spark plug.

NOTE: Do not use fuel that has been stored for more than 30 days. Dispose of old fuel and oil according to federal, state and local regulations.

MANUFACTURER’S LIMITED WARRANTY

The limited warranty set forth below is given by Sunseeker with respect to new merchandise purchased and used in the United States, its possessions and territories. Sunseeker warrants this product against defects in material and workmanship for a period of three (3) years commencing on the date of original purchase and will, at its option, repair or replace, free of charge, any part found to be defective in material or workmanship. This limited warranty shall only apply if this product has been operated and maintained in accordance with the Operator’s Manual furnished with the product, and has not been subject to misuse, abuse, commercial use, neglect, accident, improper maintenance, alteration, vandalism, theft, fire, water or damage because of other peril or natural disaster. Damage resulting from the installation or use of any accessory or attachment not approved by Sunseeker for use with the product(s) covered by this manual will void your warranty as to any resulting damage. This warranty is limited to ninety (90) days from the date of original retail purchase for any Sunseeker product that is used for rental or commercial purposes, or any other income-producing purpose.

HOW TO OBTAIN SERVICE: Warranty service is available, WITH PROOF OF PURCHASE THROUGH YOUR LOCAL AUTHORIZED SERVICE DEALER. To locate the dealer in your area, call 1-844-786-7335. No product returned directly to the factory will be accepted unless prior written permission has been extended by the Customer Service Department of Sunseeker.

This limited warranty does not provide coverage in the following cases:
A. Tune-ups - Spark Plugs, Carburetor Adjustments, Filters
C. Sunseeker does not extend any warranty for products sold or exported outside of the United States of America, its possessions and territories, except those sold through Sunseeker’s authorized channels of export distribution. Sunseeker reserves the right to change or improve the design of any Sunseeker Product without assuming any obligation to modify any product previously manufactured.

No implied warranty, including any implied warranty of merchantability or fitness for a particular purpose, applies after the applicable period of express written warranty above as to the parts as identified. No other express warranty or guaranty, whether written or oral, except as mentioned above, given by any person or entity, including a dealer or retailer, with respect to any product shall bind Sunseeker. During the period of the Warranty, the exclusive remedy is repair or replacement of the product as set forth above. (Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.)

The provisions as set forth in this Warranty provide the sole and exclusive remedy arising from the sales. Sunseeker shall not be liable for incidental or consequential loss or damages including, without limitation, expenses incurred for substitute or replacement lawn care services, for transportation or for related expenses, or for rental expenses to temporarily replace a warranted product. (Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.) In no event shall recovery of any kind be greater than the amount of the purchase price of the product sold. Alteration of the safety features of the product shall void this Warranty. You assume the risk and liability for loss, damage, or injury to you and your property and/or to others and their property arising out of the use or misuse or inability to use the product.

This limited warranty shall not extend to anyone other than the original purchaser, original lessee or the person for whom it was purchased as a gift.

How State Law Relates to this Warranty: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

To locate your nearest service dealer, dial 1-844-786-7335 in the United States.
