

TEMPLATES FOR DASHLEIGH PRINTABLES
AVAILABLE AT:
[DASHLEIGH.COM/TEMPLATES](https://dashleigh.com/templates)

before you start

1. Always test your design on a blank template. You can find .pdf files to print for a test page at dashleigh.com/templates.
2. All printers are a little different- be sure to check the alignment of your design within the blank template. You may need to adjust the placement of text and images depending on the printer.
3. Handle your labels and adhesives by the edges to avoid getting oils on the paper before printing.

downloading your template

All templates are available at dashleigh.com/templates.

If you are having trouble finding your template- type the UPC of this product in the search bar for the template.

There are two types of Microsoft Word documents to choose from. For more recent versions of Word, download **.docx**.

If you are using Photoshop or Illustrator, download the **.pdf verison**.

For help with downloading and other software- visit our **FAQ** page located at dashleigh.com/templates.

tips & tricks

To prevent smearing of inkjet papers, try a paper preservation spray (available at most craft stores).

Water resistant and vinyl papers may need a lower printer resolution to lock-in the water resistant properties.

For any questions or concerns, contact us at dashleigh.com/contact.
