

Q2 Projector USER MANUAL

Part 1

1-Projection Background

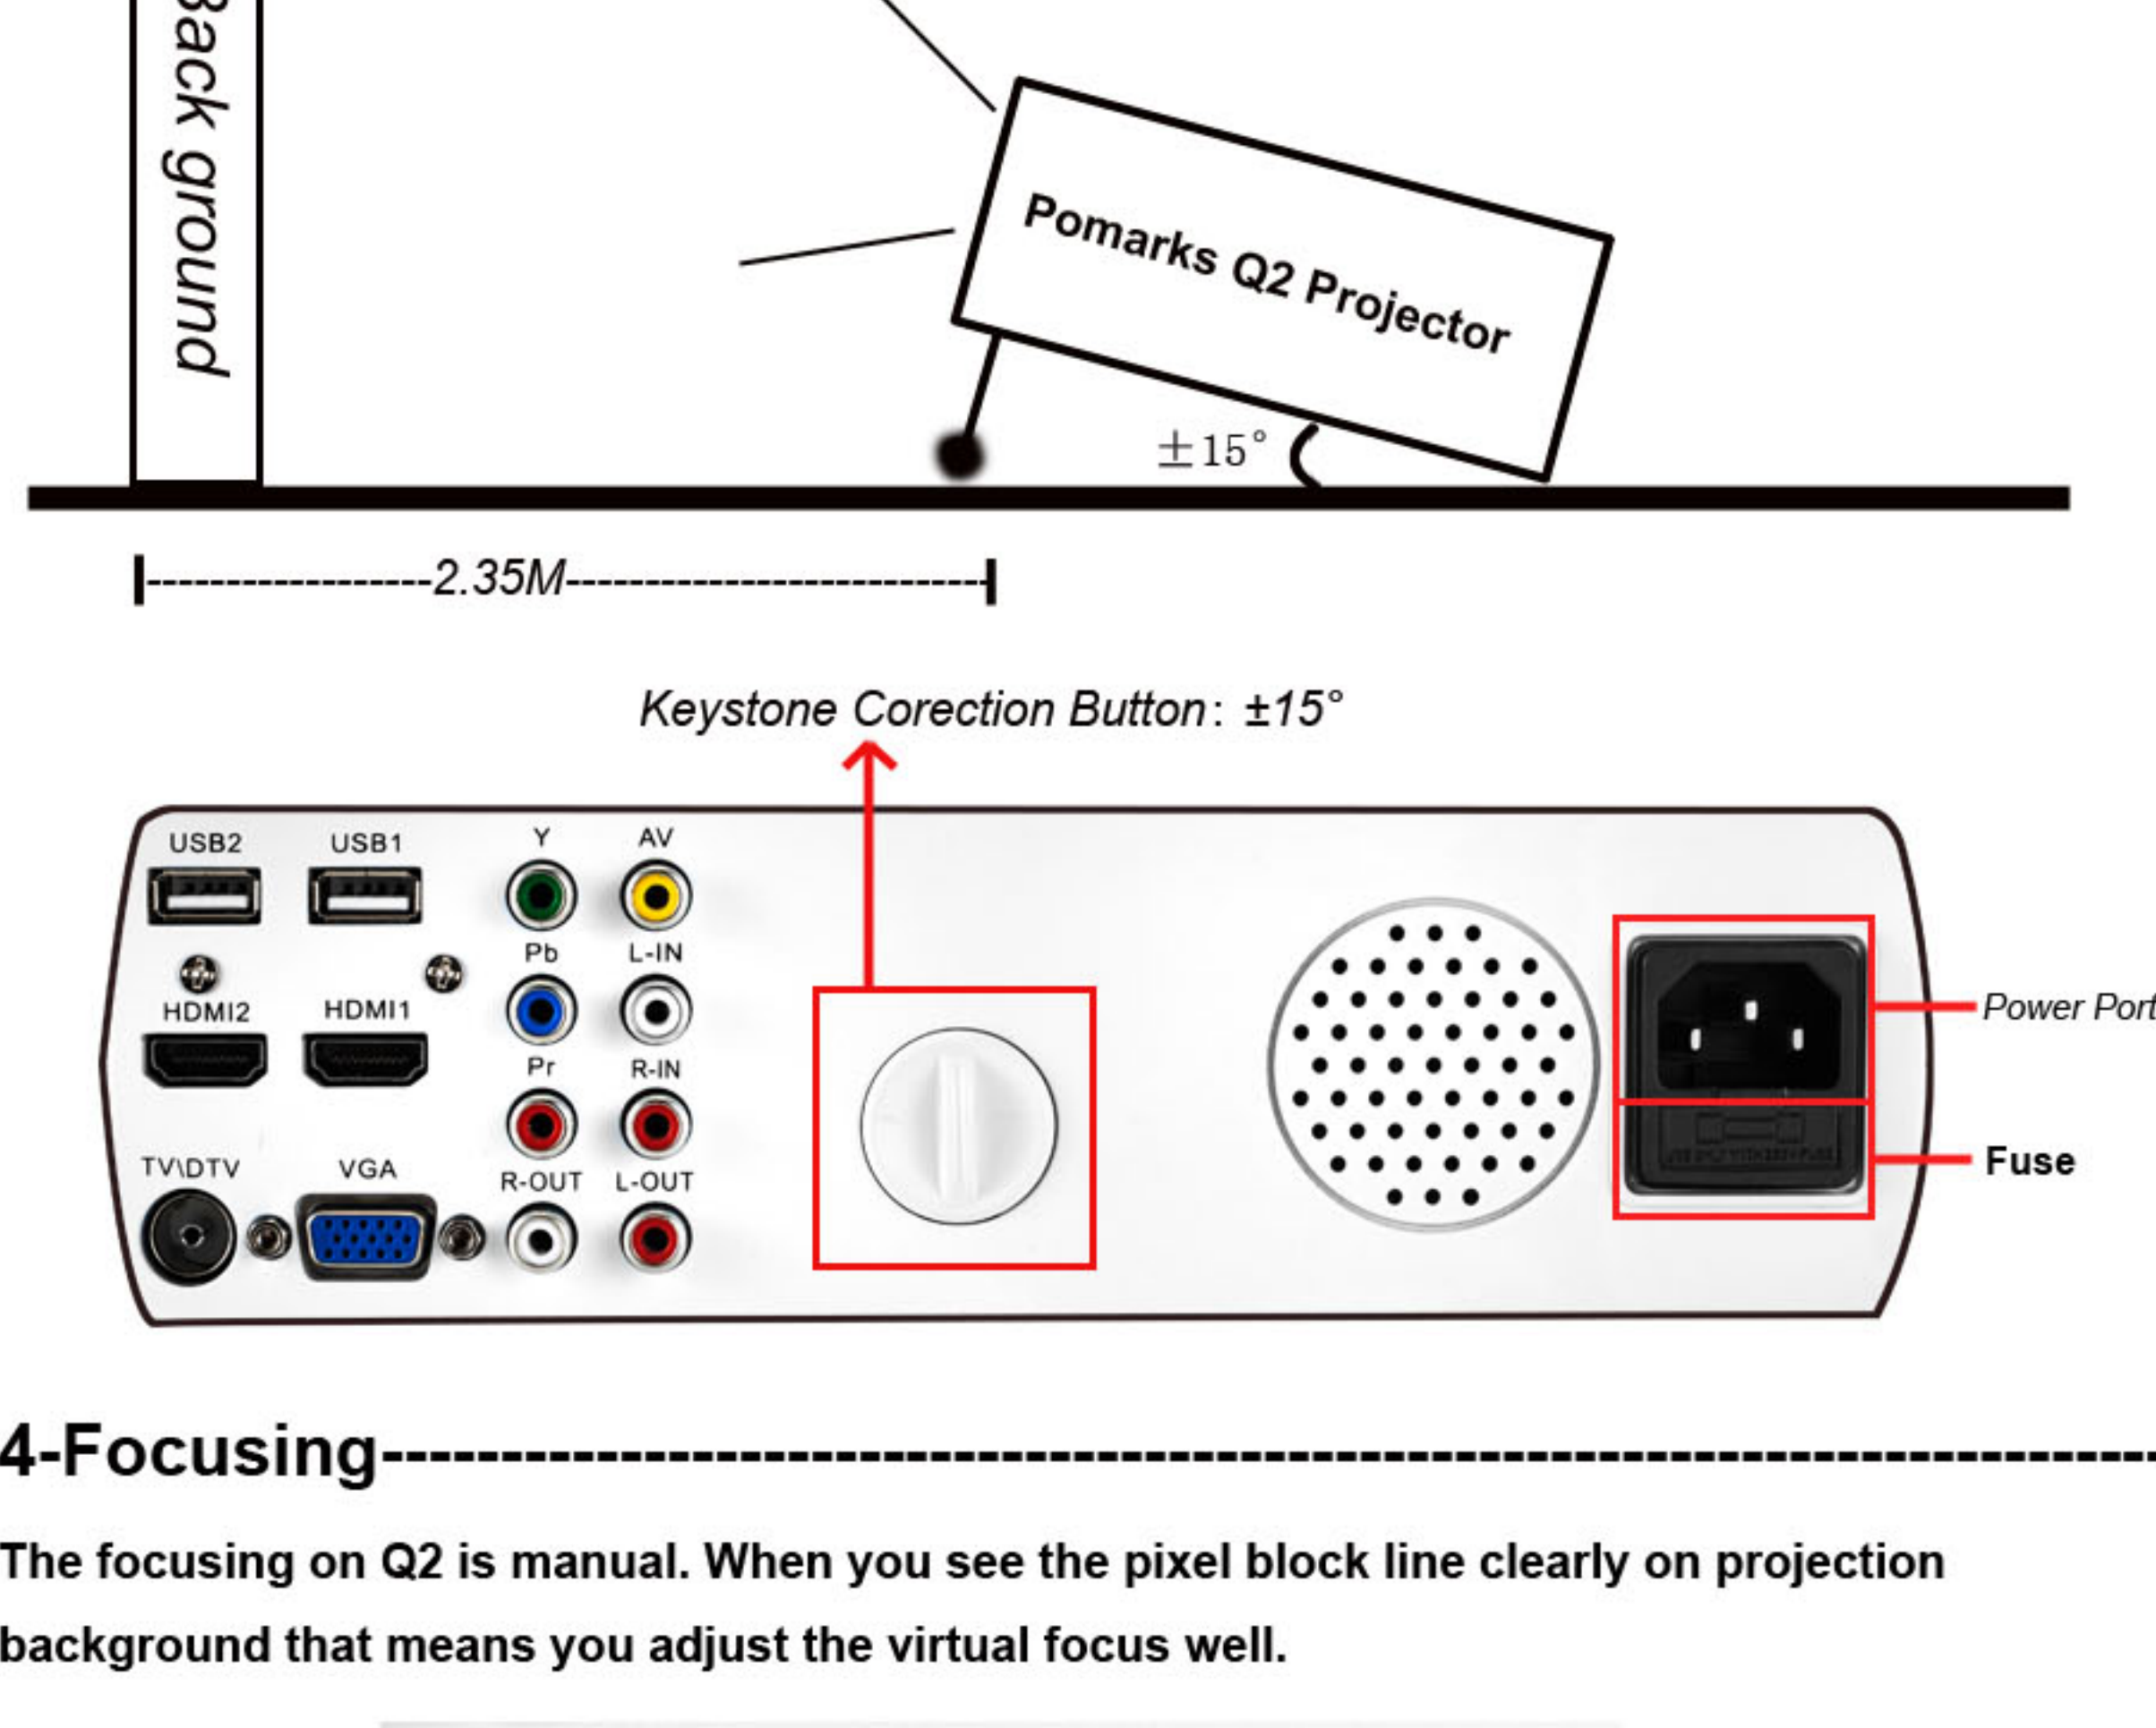

We recommend you to use a non-glare, mate, white board/curtain/wall at projection background

2-Projection Distance

Q2 projection size range from 32-200 Inch, but the best size is 80-100 inch. So we recommend you to place the projector 2.35 meters from the background.

3-Keystone correction

We suggest you to make the projector horizontal to ensure a better&clear performance.

4-Focusing

The focusing on Q2 is manual. When you see the pixel block line clearly on projection background that means you adjust the virtual focus well.

5-Ceiling

There are 4 screw holes on the projector base. If you want to hang the projector on ceiling, please peel off the rubber pots.

Part 2

1-Turn On

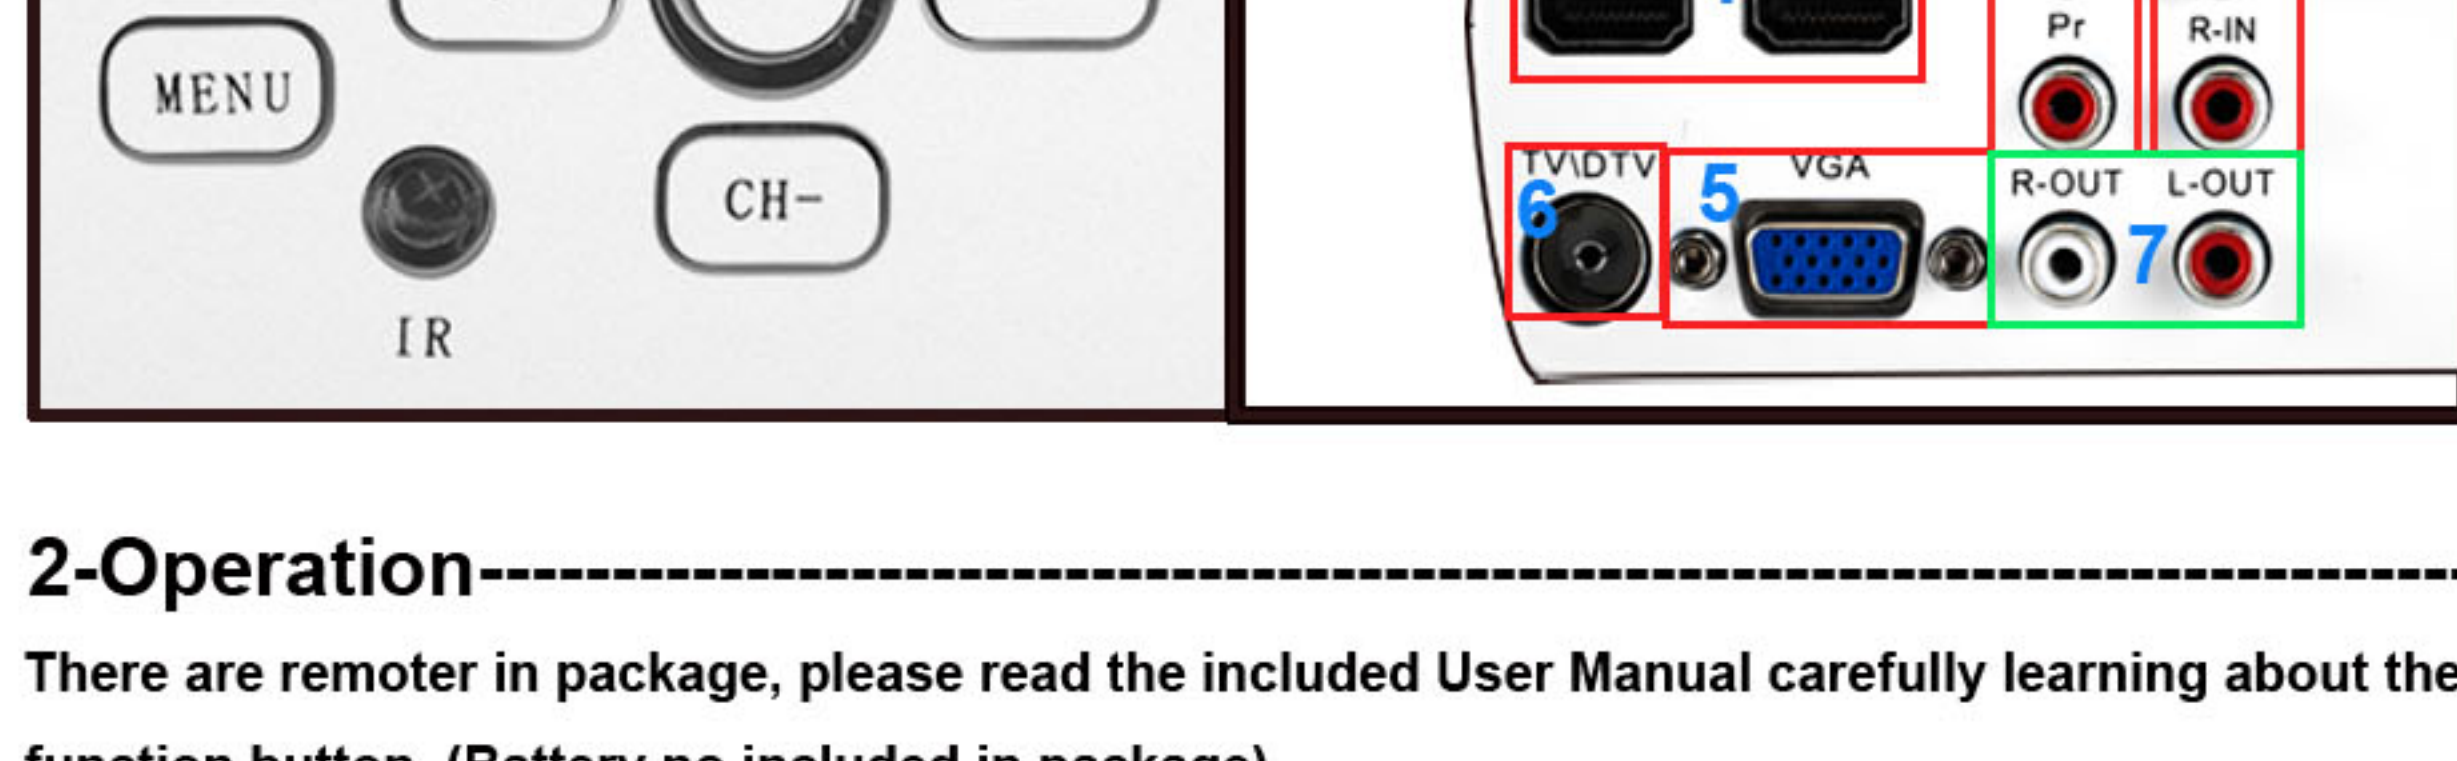

After power connected,the 'Power' button will get red, press it to will turn green.

Then press the 'SOURCE' button to select input source type.

Input SOURCE Type : 1 - AV Input (Cable Include) 2 - YPBPR Input 3 - USB Input

4 - HDMI Input 5 - VGA Input 6 TV/DTV Input

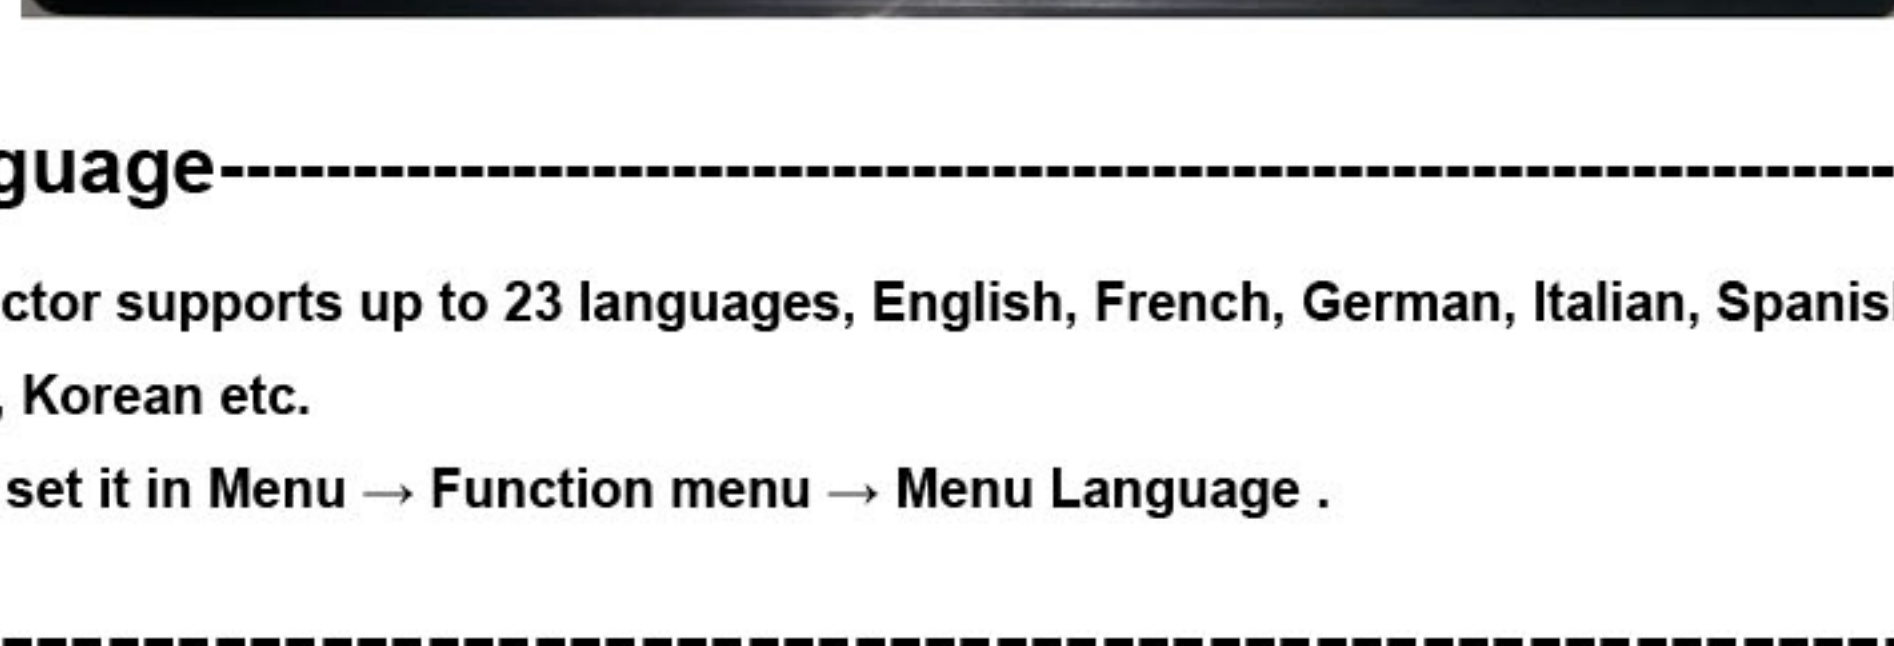

OutPut : 7 - Audio Out (Transfer cable included)

2-Operation

There are remoter in package, please read the included User Manual carefully learning about the function button. (Battery no included in package)

Also you can operate on the operation panel.

3-Language

Q2 projector supports up to 23 languages, English, French, German, Italian, Spanish, Japanese, Chinese, Korean etc.

You can set it in Menu → Function menu → Menu Language .

Part 3

1-Connecting PC/Laptop

Connect your PC and Q2 with VGA cable,please limite you input source under 1920*1080. You can edit this by right-click on desktop.

The laptop output source may be different, HDMI/VGA/DisplayPort/Thunderbolt , so you will need extra transfer cable/adaptor to make them fit.

Windows Surface po 4 , for example. To connecto it with Q2, we need a Mini Displayport to VGA cable. And after connected ,press 'Windows+P' button on surface 4 to start projection.

Other laptops may different, please find the fit one.

Lenovo/sony/thinkpad/ Hitachi: Fn+F7

Dell/apple/Asus: Fn+F8

HP/samsung: Fn+F4

Acer/sharp/toshiba: Fn+F5

Fujitsu: Fn+F10

Haier/nec/ Panasonic: FN+F3

2-Connecting Smartphone/Tablet

MHL function is needed on smartphone to support this work, Then use a micro-usb to VGA cable to connect them.(Not support iPhone)

Or you can use a Miracast Wirelless adapter to share your smarthone/tablet screen to large screen wirelessly.

3- USB Input

Select USB-1 or USB-2 when choose input source, Q2 projector suppot video/photograph/text playing. (Accept file tpye below)

Note: Please limite the file quantity les than 200, built more folders to avoidd your files can't be recognized.

File Type	Format
Video	MPG, MPE, VOB, DAT, BUK
	TSO, TRP, TS , TP , M2T
	RMO, RMV, RM , RMVB

4-TV Input

When use TV input as your resource, please set in 'Automatic channel searching' to search channels. Same operation as TV BOX.

5-Other Input Source

Please make sure the cable correctly connected while use AV/HDMI/YBPBR/VGA as input source. And to ensure bette projection, we suggest your to choose HD video/photograph to pojection.

6-Audio Output

When use AV/USB/HDMI/TV (which contain audio signal), you can use the build in 2x3W speaker directly. Or you can use a home speaker system enjoying, aslo we prepared a transfe cable to 3.5mm audio port to connect with mini speaker. Just enjoy at your best convenience.

Part 4

Notes

1: Q2 is a home projector for playing video and game, not recommended for business use . (PPT, PDF, Excel,Text files)

2: The projector resolution is 800*480,not 1920*1080.

3: The projector will heat up after hours work. Please keep the projector from heat to avoid overheat. (Not over 35°C)

4: Please clean the projector thermovent every half year to ensure heat dissipation.

FAQ

Q: Does this have bolt holes so it can be mounted?

A: Of course, it does have. Please peel off the protective plastic film on the four feet of the projector, then you could get the bolt holes.

Q: What is up with the integrated sound? no way to connect surround speakers?

A: This is a VIDEO DEVICE not a audio device.The integrated speakers are only 3W. If you input source contains audio signal. Surely can connect with surround speaker.

Q: Do the projectors have the cables to connet to the light and computer?

A: Sorry , there is only AV cable in the package.

Q: It says it's hoigh lumen is that true? If so you should be able to watch movies with the lights on. Does it have to be completely dark 2 see the picture

A: No, we have test presentation in a room with lots of light leaks, it works fine.

Q: Can you stream Netflix on your phone using this devise?

A: Haven't done it but if you have the proper HDMI adapter for the phone, it should work.

Q: Can you connect it with Apple TV?

A: You would need either an apple TV or a lightning to hdmi adapter. It works well with the apple TV, that's how i use it.

Q: Does this play dvd or does it have to be connected to dvd player

A: Q2 can be connected with DVD player to presentation with the YPBPR/AV input ports

Q: I am watching videos from my laptop through hdmi. how can i add the speaker? (connect the speaker through rca output) thanks for answering!!

A: RCA works great! Also you can use the RCA to 3.5m audion to connect it with mini speaker.

Q: How can you keep dust out of the inside of the Projector? Also is there any directions on how to clean it?

A: Me personally I would either take a blow gun or "air in a can" to clean the dust from the inside and a micro cloth to the Lens

Q: Can i connect a ps3 to this projector?

A: Yes, you can. That's what the HDMI port used for.

Q: How do you connect this wirelessly to Bluetooth speakers?

A: Sorry , our projector don't have a bluetooth modules. I will suggest you to connect with cable.

Q: Can I use it for ppt presentations?

A: Whatever you can do on your computer will show up through this projector...this (or any) projector is simply a way of adding a new screen that shows what you are doing on your computer...so yes. But we don't recommend you to do this a lot, cuz the business presentation, PPT/Word/Excel, needs very high resolution and luminance to ensure a clear presentation. This's mainly a home video/gaming projector.
