User Guide
About This Guide

This guide provides information on monitor features, setting up the monitor, using the software and technical specifications.

⚠️ **WARNING!**  Text set off in this manner indicates that failure to follow directions could result in bodily harm or loss of life.

⚠️ **CAUTION:**  Text set off in this manner indicates that failure to follow directions could result in damage to equipment or loss of information.

📝 **NOTE:**  Text set off in this manner provides important supplemental information.

🌟 **TIP:**  Text set off in this manner provides helpful hints.

This product incorporates HDMI technology.

1 Getting Started

Important safety information

A power cord is included with the monitor. If another cord is used, use only a power source and connection appropriate for this monitor. For information on the correct power cord set to use with the monitor, refer to the Product Notices provided on your optical disc, if one is included, or in your documentation kit.

⚠️ WARNING! To reduce the risk of electric shock or damage to the equipment:

- Plug the power cord into an AC outlet that is easily accessible at all times.
- Disconnect power from the computer by unplugging the power cord from the AC outlet.
- If provided with a 3-pin attachment plug on the power cord, plug the cord into a grounded (earthed) 3-pin outlet. Do not disable the power cord grounding pin, for example, by attaching a 2-pin adapter. The grounding pin is an important safety feature.

For your safety, do not place anything on power cords or cables. Arrange them so that no one may accidentally step on or trip over them. Do not pull on a cord or cable. When unplugging from the AC outlet, grasp the cord by the plug.

To reduce the risk of serious injury, read the Safety and Comfort Guide. It describes proper workstation, setup, posture, and health and work habits for computer users, and provides important electrical and mechanical safety information. This guide is located on the Web at http://www.hp.com/ergo.

⚠️ CAUTION: For the protection of the monitor, as well as the computer, connect all power cords for the computer and its peripheral devices (such as a monitor, printer, scanner) to some form of surge protection device such as a power strip or Uninterruptible Power Supply (UPS). Not all power strips provide surge protection; the power strips must be specifically labeled as having this ability. Use a power strip whose manufacturer offers a Damage Replacement Policy so you can replace the equipment, if surge protection fails.

Use the appropriate and correctly sized furniture designed to properly support your HP LCD monitor.

⚠️ WARNING! LCD monitors that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, or carts may fall over and cause personal injury.

Care should be taken to route all cords and cables connected to the LCD monitor so that they cannot be pulled, grabbed, or tripped over.

⚠️ NOTE: This product is suitable for entertainment purposes. Consider placing the monitor in a controlled luminous environment to avoid interference from surrounding light and bright surfaces that may cause disturbing reflections from the screen.
Product features and components

Features

This product is an AMD FreeSync™-qualified display, which allows you to enjoy PC gaming with smooth, responsive, tear-free performance whenever a picture changes on the screen. The external source connected to your display must have the FreeSync driver installed.

AMD FreeSync technology is designed to eliminate stuttering and tearing in games and videos by locking a display’s refresh rate to the frame rate of the graphics card. Check with the manufacturer of your component or system for specific capabilities.

**IMPORTANT:** AMD Radeon™ Graphics and/or AMD A-Series APU-compliant displays with DisplayPort/HDMI Adaptive-Sync required. AMD 15.11 Crimson driver (or newer) required to support FreeSync over HDMI.

**NOTE:** Adaptive refresh rates vary by display. More information is available at [www.amd.com/freesync](http://www.amd.com/freesync).

To enable FreeSync on the display, press the Menu button on the monitor to open the on-screen display menu. Select **Color Control > Viewing Modes > Gaming**.

The light-emitting diode (LED) backlit display has an active matrix, AMVA+ panel. The display features include the following:

- 68.47 cm (27-inch) diagonal viewable area with 3840 × 2160 UHD resolution, plus full-screen support for lower resolutions
- Tilt capability and easy viewing from sitting or standing position, or while moving from one side of the monitor to the other
- USB Type-C power delivery and DisplayPort (select products only)
- HDMI (High-Definition Multimedia Interface) video input
- DisplayPort video input
- Plug and Play capability if supported by your operating system
- On-screen display (OSD) adjustments in 10 languages for easy setup and screen optimization
- My Display software for adjusting monitor settings through Windows
- HDCP (High-bandwidth Digital Content Protection) used on digital inputs
- Software and documentation disc that includes monitor drivers and product documentation
- VESA mounting bracket for attaching the display to a wall mount device or swing arm

**NOTE:** For safety and regulatory information, refer to the Product Notices provided on your media disc, if one is included, or in your documentation kit. To access the latest user guides or manuals for your product, go to [http://www.hp.com/support](http://www.hp.com/support). Select **Find your product**, and then follow the on-screen instructions.

* Function buttons 2–4 may be used to navigate through the OSD menu based on the indicators above the buttons that are activated while the OSD menu is open.

**NOTE:** You can reconfigure the Function buttons by using the Assign Button function in the OSD menu to quickly select the most commonly used operations.
Setting up the monitor

Use caution when setting up the monitor

To prevent damage to the monitor, do not touch the surface of the LCD panel. Pressure on the panel may cause nonuniformity of color or disorientation of the liquid crystals. If this occurs the screen will not recover to its normal condition.

If installing a stand, lay the monitor facedown on a flat surface covered with protective sheet foam or a nonabrasive cloth. This prevents the screen from getting scratched, defaced, or broken.

**NOTE:** Your monitor may look different from the monitor in this illustration.
Attaching the monitor stand

⚠️ **CAUTION:** The screen is fragile. Avoid touching or applying pressure to the screen; doing so can cause damage.

🌟 **TIP:** Consider the placement of the display, because the bezel might cause interfering reflections from surrounding light and bright surfaces.

1. Lift the monitor from its box and place it facedown on a flat surface covered by a clean, dry cloth.
2. Attach the stand to the monitor by inserting the pedestal (1) into the stand (2), and then into the monitor panel (3) until it clicks securely into place.
Connecting the cables

NOTE: The monitor ships with select cables. Not all cables shown in this section are included with the monitor.

1. Place the monitor in a convenient, well-ventilated location near the computer.

2. Connect a video cable.

NOTE: The monitor will automatically determine which inputs have valid video signals. The inputs can be selected by pressing the Minus button or through the on-screen display by pressing the Menu button and selecting Input Control.

- Connect one end of an HDMI cable to the HDMI port on the back of the monitor and the other end to the source device.

NOTE: The bottom HDMI port supports a maximum graphic resolution of 2560 × 1440 (60 Hz).
- Connect one end of a DisplayPort cable to the DisplayPort on the rear of the monitor and the other end to the DisplayPort on the source device.

The Auto-Switch Input function switches between the HDMI input and the DisplayPort input.

**NOTE:** The monitor’s USB Type-C port can also function as a DisplayPort audio/video input when connected to a USB Type-C source device. To switch to the USB Type-C input, press one of the OSD bezel buttons to open the OSD menu, and then select **Input Control > USB-C Video.**

3. Connect one end of a USB Type-C cable to the USB Type-C port on the rear of the monitor and the other end to a USB Type-C port on the source device. Use only the HP-approved USB Type-C cable provided with the monitor. (select products only)
4. Connect one end of the power cord to the AC adapter (1) and the other end to a grounded AC outlet (2), and then connect the round end of the AC adapter to the monitor (3).

⚠️ **WARNING!** To reduce the risk of electric shock or damage to the equipment:

Do not disable the power cord grounding plug. The grounding plug is an important safety feature.

Plug the power cord into a grounded (earthed) AC outlet that is easily accessible at all times.

Disconnect power from the equipment by unplugging the power cord from the AC outlet.

For your safety, do not place anything on power cords or cables. Arrange them so that no one may accidentally step on or trip over them. Do not pull on a cord or cable. When unplugging the power cord from the AC outlet, grasp the cord by the plug.
Adjusting the monitor

Tilt the monitor panel forward or backward to set it to a comfortable eye level.

Turning on the monitor

1. Press the power button on the source device to turn it on.
2. Press the power button on the rear of the monitor to turn it on.

**CAUTION:** Burn-in image damage may occur on monitors that display the same static image on the screen for 12 consecutive hours of non-use. To avoid burn-in image damage on the monitor screen, you should always activate a screen saver application or turn off the monitor when it is not in use for a prolonged period of time. Image retention is a condition that may occur on all LCD screens. Monitors with a “burned-in image” are not covered under the HP warranty.

**NOTE:** If pressing the power button has no effect, the Power Button Lockout feature may be enabled. To disable this feature, press and hold the monitor power button for 10 seconds.

**NOTE:** You can disable the power LED in the OSD menu. Press the Menu button on the monitor, and then select **Power Control > Power LED > Off**.

When the monitor is powered on, a Monitor Status message is displayed for five seconds. The message shows which input is the current active signal, the status of the auto-switch source setting (On or Off; factory default is On), the current preset resolution, and the recommended preset resolution.
The monitor automatically scans the signal inputs for an active input and uses that input for the screen.

**HP Watermark and Image Retention Policy**

The IPS monitor models are designed with IPS (In-Plane Switching) display technology which provides ultra-wide viewing angles and advanced image quality. IPS monitors are suitable for a wide variety of advanced image quality applications. This panel technology, however, is not suitable for applications that exhibit static, stationary, or fixed images for long periods of time without the use of screen savers. These types of applications may include camera surveillance, video games, marketing logos, and templates that are displayed on the screen for a prolonged period of time. Static images may cause image retention damage that could look like stains or watermarks on the monitor's screen.

Monitors in use for 24 hours per day that result in image retention damage are not covered under the HP warranty. To avoid image retention damage, always turn off the monitor when it is not in use or use the power management setting, if supported on your system, to turn off the display when the system is idle.

**Mounting the monitor**

The monitor panel can be attached to a wall, swing arm, or other mounting fixture.

**NOTE:** This apparatus is intended to be supported by a UL or CSA Listed wall-mount bracket.

**CAUTION:** This monitor supports the VESA industry standard 100 mm mounting holes. To attach a third-party mounting solution to the monitor, four 4 mm, 0.7 pitch screws are required. Longer screws must not be used because they may damage the monitor. It is important to verify that the manufacturer's mounting solution is compliant with the VESA standard and is rated to support the weight of the monitor display panel. For best performance, it is important to use the power and video cables provided with the monitor.

**Removing the monitor stand**

**CAUTION:** Before beginning to disassemble the monitor, be sure the monitor is turned off and all cables are disconnected.

1. Tilt the monitor backward, and disconnect and remove all cables from the monitor.
2. Lay the monitor facedown on a flat surface covered by a clean, dry cloth.
3. Press in on the release latch (1) and remove the stand from the monitor panel (2).
Attaching the VESA mounting bracket

A VESA mounting bracket is included with the monitor for use when attaching the monitor panel to a wall, swing arm, or other mounting fixture.

**NOTE:** With the VESA bracket installed, the monitor can be viewed only in the Landscape mode. The Portrait mode is not supported.

1. Remove the monitor stand. Refer to Removing the monitor stand on page 10.

2. Remove and retain the screw from the center of the rear of the monitor panel.

3. Insert the tab of the VESA bracket into the slots on the back of the monitor panel until the bracket clicks into place (1), and then secure the top of the bracket with the screw that you removed in the second step (2).

4. To attach the monitor to a swing arm or other mounting device, insert four mounting screws through the holes on the mounting device and into the screw holes on the VESA bracket.
2 Using the monitor

Software and utilities

The optical disc, if one is included with the monitor, contains files that you can install on the computer. If you do not have an optical drive, you can download the files from http://www.hp.com/support.

- INF (Information) file
- ICM (Image Color Matching) files (one for each calibrated color space)
- My Display software

The Information file

The INF file defines monitor resources used by Windows® operating systems to ensure monitor compatibility with the computer’s graphics adapter.

This monitor is Windows Plug and Play–compatible and the monitor will work correctly without installing the INF file. Monitor Plug and Play compatibility requires that the computer’s graphic card is VESA DDC2-compliant and that the monitor connects directly to the graphics card. Plug and Play does not work through separate BNC-type connectors or through distribution buffers/boxes.

The Image Color Matching file

The ICM files are data files that are used in conjunction with graphics programs to provide consistent color matching from monitor screen to printer, or from scanner to monitor screen. This file is activated from within graphics programs that support this feature.

NOTE: The ICM color profile is written in accordance with the International Color Consortium (ICC) Profile Format specification.

Installing the INF and ICM files

After you determine that you need to update, use one of the following methods to install the files.

Installing from the optical disc (available in select regions)

To install the INF and ICM files on the computer from the optical disc:

1. Insert the optical disc in the computer optical drive. The optical disc menu is displayed.
2. View the HP Monitor Software Information file.
3. Select Install Monitor Driver Software.
4. Follow the on-screen instructions.
5. Ensure that the proper resolution and refresh rates appear in the Windows Display control panel.

Downloading from the Web

If you do not have a computer or a source device with an optical drive, you can download the latest version of INF and ICM files from the HP monitors support Web site.
2. Select **Get software and drivers**.
3. Follow the on-screen instructions to select your monitor and download the software.

**Using My Display software**

Use My Display software to choose preferences for optimum viewing. You can select settings for gaming, movies, photo editing, or just working on documents and spreadsheets. You can also easily adjust settings such as brightness, color, and contrast using My Display software.

**Downloading the software**

To download the My Display software:

1. Go to [http://www.hp.com/support](http://www.hp.com/support) and select the appropriate country and language.
2. Select **Get software and drivers**, and then follow the on-screen instructions to select your monitor and download the software.

**Using the software**

To open the My Display software:

1. Click the **HP My Display** icon on the taskbar.
   - or –
   2. Select **Start**.
2. Select **All Apps**.
3. Select **HP My Display**.
4. Select **HP My Display**.

For additional information, see the HP My Display software Help.

**Using the on-screen display (OSD) menu**

Use the on-screen display (OSD) menu to adjust the screen image based on your viewing preferences. You can access and make adjustments in the OSD menu using the buttons on the rear of the display.

To access the OSD menu and make adjustments, do the following:

1. If the monitor is not already on, press the power button to turn on the monitor.
2. To access the OSD menu, press the **Menu** button on the monitor.
3. To navigate through the OSD menu, press the + (Plus) button on the monitor to scroll up, or the – (Minus) button to scroll down.
4. To select an item from the OSD menu, use the + or – buttons to scroll to and highlight your selection, then press the **Menu** button to select that function.
5. Adjust the item using the + and – buttons to adjust the scale.
6. After adjusting the function, select **Save and Return** to save your settings, or **Cancel** if you don’t want to save the setting. Then select **Exit** from the Main menu.
Using Auto-Sleep Mode

The display supports an OSD option called Auto-Sleep Mode that allows you to enable or disable a reduced power state for the display. When Auto-Sleep Mode is enabled (enabled by default), the monitor will enter a reduced power state when the host PC signals low power mode (absence of either horizontal or vertical sync signal).

Upon entering this reduced power state (sleep mode), the monitor screen is blanked, the backlight is turned off, and the power LED indicator turns amber. The monitor draws less than 0.5 W of power when in this reduced power state. The monitor will wake from sleep mode when the host PC sends an active signal to the monitor (for example, if you activate the mouse or keyboard).

You can disable Auto-Sleep Mode in the OSD. Press the Menu button to open the OSD. In the OSD select Power Control > Auto-Sleep Mode > Off.

Adjusting Low Blue Light Mode

Decreasing the blue light emitted by the display reduces the blue light exposure to your eyes. HP monitors provide a setting to reduce blue light output and create a more relaxing and less stimulating image while reading content on the screen. To adjust your monitor to a comfortable viewing light, follow the steps below.

1. Press the – (Minus) button on the monitor to open to the Viewing Modes menu.
2. Choose one of the following light settings:
   - Low Blue Light—Reduces blue light for improved eye comfort
   - Night—Adjusts to the monitor to the lowest blue light output and reduces the impact on sleep
   - Reading—Optimizes both blue light and brightness for indoor viewing
3. Select Save and Return to save your settings and close the Color Control menu.
## Support and troubleshooting

### Solving common problems

The following table lists possible problems, the possible cause of each problem, and the recommended solutions.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screen is blank or video is flashing.</td>
<td>Power cord is disconnected.</td>
<td>Connect the power cord.</td>
</tr>
<tr>
<td></td>
<td>Power button is turned off.</td>
<td>Press the power button.</td>
</tr>
<tr>
<td></td>
<td></td>
<td><strong>NOTE:</strong> If pressing the power button has no effect, press and hold the power button for 10 seconds to disable the Power Button Lockout feature.</td>
</tr>
<tr>
<td></td>
<td>Video cable is improperly connected.</td>
<td>Connect the video cable properly. Refer to Connecting the cables on page 6 for more information.</td>
</tr>
<tr>
<td></td>
<td>System is in sleep mode.</td>
<td>Press any key on the keyboard or move the mouse to inactivate the screen blanking utility.</td>
</tr>
<tr>
<td></td>
<td>Video card is incompatible.</td>
<td>Open the OSD menu and select the Input Control menu. Set Auto-Switch Input to Off and manually select the input.</td>
</tr>
<tr>
<td></td>
<td>Image appears blurred, indistinct, or too dark.</td>
<td>Open the OSD menu and select Brightness to adjust the brightness scale as needed.</td>
</tr>
<tr>
<td>Check Video Cable is displayed on the screen.</td>
<td>Monitor video cable is disconnected.</td>
<td>Connect the appropriate video signal cable between the computer and monitor. Be sure that the computer power is off while connecting the video cable.</td>
</tr>
<tr>
<td>Input Signal Out of Range is displayed on screen.</td>
<td>Video resolution and/or refresh rate are set higher than what the monitor supports.</td>
<td>Change the settings to a supported setting (see Preset display resolutions on page 20).</td>
</tr>
<tr>
<td>The monitor is off but it did not seem to enter into a low-power sleep mode.</td>
<td>The monitor's power saving control is disabled.</td>
<td>Open the OSD menu and select Power Control &gt; Auto-Sleep Mode and set auto-sleep to On.</td>
</tr>
<tr>
<td>OSD Lockout is displayed.</td>
<td>The monitor’s OSD Lockout function is enabled.</td>
<td>Press and hold the Menu button for 10 seconds to disable the OSD Lockout function.</td>
</tr>
<tr>
<td>Power Button Lockout is displayed.</td>
<td>The monitor’s Power Button Lockout feature is enabled.</td>
<td>Press and hold the power button for 10 seconds to unlock the power button function.</td>
</tr>
</tbody>
</table>

### Button lockouts

Holding down the power button or Menu button for ten seconds will lock out the functionality of the buttons. You can restore the functionality by holding the buttons down again for ten seconds. This functionality is only available when the display is powered on, displaying an active signal, and the OSD menu is not open.
Product support

For additional information on using your monitor, go to http://www.hp.com/support. Select the appropriate support category, and then follow the on-screen instructions.

NOTE: The monitor user guide, reference material, and drivers are available at http://www.hp.com/support.

Here you can:

- Chat online with an HP technician

NOTE: When support chat is not available in a particular language, it is available in English.

- Locate an HP service center

Preparing to call technical support

If you cannot solve a problem using the troubleshooting tips in this section, you may need to call technical support. Have the following information available when you call:

- Monitor model number
- Monitor serial number
- Purchase date on invoice
- Conditions under which the problem occurred
- Error messages received
- Hardware configuration
- Name and version of the hardware and software you are using

Locating the rating label

The rating label on the monitor provides the product number and serial number. You may need these numbers when contacting HP about the monitor model. The rating label is located on the bottom of the monitor panel.
4 Maintaining the monitor

Maintenance guidelines

To enhance the performance and extend the life of the monitor:

- Do not open the monitor cabinet or attempt to service this product yourself. Adjust only those controls that are covered in the operating instructions. If the monitor is not operating properly or has been dropped or damaged, contact an authorized HP dealer, reseller, or service provider.

- Use only a power source and connection appropriate for this monitor, as indicated on the label/back plate of the monitor.

- Be sure the total ampere rating of the products connected to the outlet does not exceed the current rating of the AC outlet, and the total ampere rating of the products connected to the cord does not exceed the rating of the cord. Look on the power label to determine the ampere rating (AMPS or A) for each device.

- Install the monitor near an outlet that you can easily reach. Disconnect the monitor by grasping the plug firmly and pulling it from the outlet. Never disconnect the monitor by pulling the cord.

- Turn the monitor off when not in use. You can substantially increase the life expectancy of the monitor by using a screen saver program and turning off the monitor when not in use.

**NOTE:** Monitors with a “burned-in image” are not covered under the HP warranty.

- Slots and openings in the cabinet are provided for ventilation. These openings must not be blocked or covered. Never push objects of any kind into cabinet slots or other openings.

- Do not drop the monitor or place it on an unstable surface.

- Do not allow anything to rest on the power cord. Do not walk on the cord.

- Keep the monitor in a well-ventilated area, away from excessive light, heat, or moisture.

- When removing the monitor stand, you must lay the monitor facedown on a soft area to prevent it from getting scratched, defaced, or broken.
Cleaning the monitor

1. Turn off the monitor and unplug the power cord from the back of the unit.
2. Dust the monitor by wiping the screen and the cabinet with a soft, clean antistatic cloth.
3. For more difficult cleaning situations, use a 50/50 mix of water and Isopropyl alcohol.

⚠️ **CAUTION:** Spray the cleaner onto a cloth and use the damp cloth to gently wipe the screen surface. Never spray the cleaner directly on the screen surface. It may run behind the bezel and damage the electronics.

⚠️ **CAUTION:** Do not use cleaners that contain any petroleum based materials such as benzene, thinner, or any volatile substance to clean the monitor screen or cabinet. These chemicals may damage the monitor.

Shipping the monitor

Keep the original packing box in a storage area. You may need it later if you move or ship the monitor.
# Technical specifications

**NOTE:** All specifications represent the typical specifications provided by HP's component manufacturers; actual performance may vary either higher or lower.

For the latest specifications or additional specifications on this product, go to [http://www.hp.com/go/quickspecs](http://www.hp.com/go/quickspecs) and search for your specific display model to find the model-specific QuickSpecs.

Input terminal

- Two HDMI connectors, one DisplayPort connector
- Additional DisplayPort connector (models with USB Type-C only)

## Preset display resolutions

The display resolutions listed below are the most commonly used modes and are set as factory defaults. This monitor automatically recognizes these preset modes and they will appear properly sized and centered on the screen.

<table>
<thead>
<tr>

</table>
### Entering user modes

The video controller signal may occasionally call for a mode that is not preset if:

- You are not using a standard graphics adapter.
- You are not using a preset mode.

If this occurs, you may need to readjust the parameters of the monitor screen by using the on-screen display. Your changes can be made to any or all of these modes and saved in memory. The monitor automatically stores the new setting, and then recognizes the new mode just as it does a preset mode. In addition to the factory preset modes, there are at least 10 user modes that can be entered and stored.

### Power adapter

<table>
<thead>
<tr>
<th>Manufacturer</th>
<th>Model number</th>
<th>Power supply rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>AcBel</td>
<td>TPC-AA501</td>
<td>19.5 V dc @ 9.23 A – 180 W (with USB Type-C port)</td>
</tr>
<tr>
<td>Delta</td>
<td>TPC-DA58</td>
<td>19.5 V dc @ 3.33 A – 65 W (without USB Type-C port)</td>
</tr>
<tr>
<td>Chicony</td>
<td>TPC-CA58</td>
<td>19.5 V dc @ 3.33 A – 65 W (without USB Type-C port)</td>
</tr>
</tbody>
</table>

### Energy saver feature

The monitor supports a reduced power state. The reduced power state will be entered into if the monitor detects the absence of either the horizontal sync signal or the vertical sync signal. Upon detecting the absence of these signals, the monitor screen is blanked, the backlight is turned off, and the power light turns amber. When the monitor is in the reduced power state, the monitor will utilize <0.5 watts of power. There is a brief warm-up period before the monitor will return to its normal operating state.

Refer to the computer manual for instructions on setting the energy saver mode (sometimes called power management feature).

**NOTE:** The above power saver feature only works when the monitor is connected to a computer that has energy saver features.

By selecting the settings in the monitor’s Sleep Timer utility, you can also program the monitor to enter into the reduced power state at a predetermined time. When the monitor’s Sleep Timer utility causes the monitor to enter the reduced power state, the power light blinks amber.
B   Accessibility

HP designs, produces, and markets products and services that can be used by everyone, including people with disabilities, either on a stand-alone basis or with appropriate assistive devices.

Supported assistive technologies

HP products support a wide variety of operating system assistive technologies and can be configured to work with additional assistive technologies. Use the Search feature on your source device that is connected to the monitor to locate more information about assistive features.

NOTE: For additional information about a particular assistive technology product, contact customer support for that product.

Contacting support

We are constantly refining the accessibility of our products and services and welcome feedback from users. If you have an issue with a product or would like to tell us about accessibility features that have helped you, please contact us at (888) 259-5707, Monday through Friday, 6 a.m. to 9 p.m. Mountain Time. If you are deaf or hard-of-hearing and use TRS/VRS/WebCapTel, contact us if you require technical support or have accessibility questions by calling (877) 656-7058, Monday through Friday, 6 a.m. to 9 p.m. Mountain Time.
