

Evenflo Advanced Double Electric Breast Pump...

For those times when you can't be there

Introducing, the **Evenflo Advanced Double Electric Breast Pump**, our frequent-use pump ideal for home, on-the-go, or when going back to work. This pump delivers premium features and benefits like:

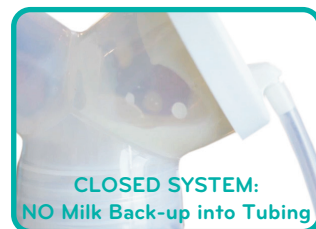

- **PerfectlyPure™** closed system designed to prevent milk back up
- **AdvancedControl™** -- 32 personalized settings
- **AdvancedFit™** flange system -- 3 sizes
- **PerfectPosition™** for slouch free pumping

For the best pumping experience, the **Advanced Double Electric Pump** also offers convenience features and benefits like:

- **Integrated bottle holders** give you an extra "hand" and protect your precious milk from spills
- **Letdown setting** can be adjusted immediately for your personalized pumping needs
- **AC Adapter or battery option** lets you pump anytime, anywhere
- **Compact Design** for easy, on-the-go pumping

Comfort & Confidence for Both Mom & Baby

- The hygienic **PerfectlyPure™** closed system is designed to prevent milk back-up into the tubes while pumping. The secondary diaphragm, or "closed" system, creates a barrier between the pump unit and milk flow, keeping the tubes clean and dry. Other pumps utilize an "open" system that can allow milk to back up into the tubing and may require cleaning after each use.

- **AdvancedControl™** provides 32 speed and suction combinations so you choose your perfect setting.

- Slouch-free pumping with **PerfectPosition™** flange design, which includes a shorter nipple tunnel and comfortable flange angle to allow for a more relaxed position when pumping.
- **AdvancedFit™** flange system provides 3 different sizes to help ensure the best fit.

Evenflo Feeding is dedicated to providing moms with a comfortable, positive breastfeeding experience.

We understand mom's personal breastfeeding goals can be met with real-life challenges. Evenflo is proud to share our **Advanced Double Electric Breast Pump** -delivering on our promise to provide mom with the features and benefits of an ultra-premium pump at an accessible price.

Evenflo Feeding strives to enable every mom to breastfeed longer and provide healthy, natural nourishment for their babies.

**Every Baby's Advocate
& Every Parent's Ally™**

Education for Mom

Access to expert resources can help ensure a successful breastfeeding experience. Evenflo Feeding is excited to include the ultimate breastfeeding education with the purchase of your pump.

Developed by our partner, Breastfeeding Expert Shari Criso, (IBCLC, CNM, RN) mom receives digital access to two practical and proven programs!

Simply Breastfeeding™ - helps mom outline her personal breastfeeding goals, highlights the numerous benefits of breastfeeding, and reviews potential challenges mom may face, such as obtaining a good latch, and proper positioning.

Breast Pumps & Briefcases™ - helps mom with the challenges she may encounter when returning to work and attempting to continue to breastfeed, including: maintaining milk supply, creating a pumping schedule, storing milk, and more.

More Pumping Solutions

Evenflo Feeding's occasional use pumps are excellent alternatives for mom when she is away from baby for a few hours or even for the night.

The Single Electric is compact, lightweight and ideal for travel. The Manual Pump is quick to assemble and provides a quiet pumping alternative.

Testimonials

Ultimate Customization

"Its best (and my favorite) feature is the 32 varied settings it has for suction strength and speed that allows me to quickly drain my breast resulting in me having more time to focus on baby."

~Lindsay T., July 2014

Personalized Pumping

"The speed and suction dials on the Evenflo allowed me to get a second letdown. There was a different setting for this on [my other pump] but it was impossible to control the speed and suction independently on that pump. I can actually make the Evenflo pump feel like my baby."

~Lori H., April 2014

Advanced Control

"... Multiple settings help you get the right power. I have used 4 different types of pumps in the past couple years and I would recommend this pump to any mama! Thanks Evenflo for a great product."

~Lindsay B., May 2014

Comfort

"I couldn't wait to use the soft flange, so I wouldn't have hard plastic digging into my breast. I like that there are different sizes for me to try to see what works best."

~Mary Ann S., April 2014

Convenience

"I like that the Evenflo pump has the ability to operate on batteries. I was so mad when I realized that my [old] pump didn't have that option. I need to be mobile a lot with my kids and work."

~ Lisa S., April 2014
