**2 STAGE Electric Knife Sharpener**

**Instruction Manual**

When using electrical appliances, especially when children are present, basic safety precautions should always be followed. Safety precautions include the following:

1- Read all instructions prior to using the Edgekeeper® Electric Knife Sharpener

2- **WARNING:** This Edgekeeper® Electric Knife Sharpener operates on an electric current and could pose a risk of electric shock if used contrary to these instructions

3- **WARNING:** Knives can cause serious injury if not handled properly and carefully

4- **WARNING:** NEVER insert the tip of the knife into the sharpener as it could cause damage to the knife and/or sharpener and serious injury

5- For home use only. Do NOT use outdoors.

6- To protect against electrical shock, do NOT immerse in water or any other liquid

7- Close supervision is necessary when using the Edgekeeper® Electric Knife Sharpener near children

8- ALWAYS check that the knife sharpener is turned OFF before plugging the cord into the outlet, and then turn the knife sharpener ON. To disconnect, turn the knife sharpener OFF before removing the cord from the outlet.

9- ALWAYS unplug the knife sharpener from the outlet after use and before cleaning

10- Do NOT operate with a damaged cord or plug

11- Do NOT let cord hang over countertop or tabletop

12- Do NOT let cord touch a hot surface

13- Carefully route the cord to avoid damage from knife blades while sharpening

14- This Edgekeeper® Electric Knife Sharpener has a polarized plug. To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not modify the plug in any way.

15- Do NOT place knife sharpener near or on a hot surface

16- Do NOT touch any moving parts inside the Edgekeeper® Electric Knife Sharpener

17- If Edgekeeper® Electric Knife Sharpener becomes hot while in use, unplug it from the outlet

18- If Edgekeeper® Electric Knife Sharpener malfunctions or becomes damaged in any way, return it to the manufacturer

19- Do NOT use device for anything other than its intended use

20- SAVE THESE INSTRUCTIONS FOR FUTURE USE

**SAFEGUARD INFORMATION**

- For sharpening fine-edge blades only

- Ideal for most carbon steel or stainless steel American/ European style kitchen knives

- Do NOT attempt to sharpen sporting knives, serrated knives, ceramic knives, electric knives, scissors, or any blade that does not properly fit in the sharpening slot

- 55 Watts/120 Volts

**TWO-STAGE ELECTRIC KNIFE SHARPENER**

- Durable, Easy-Clean Housing

- Diamond-Coated Sharpening Wheels

- On/Off Switch

- Nonslip Silicone Feet

- Access Panel To Remove Metal Filings

Dimensions:

8.3" L x 3.6" W x 4" H

(21 CM x 9.1 CM x 10.1 CM)
Caution:
- To avoid injury, do not run your finger along the blade to check if the blade is sharp. To check if the blade is sharp, begin cutting or slicing through food. If the blade is sharp, it will cut through food easily with minimal pressure.
- Should cutting or slicing through food not feel like an easy task, you may need to repeat the sharpening process.
- Carbon steel knives may spark when in contact with sharpening wheels; this is normal. If a large amount of sparking occurs, unplug the sharpener.
- Stalling may occur if too much downward pressure is applied while drawing the knife through. If this occurs, stop sharpening, use less pressure, and begin again.

Care:
- Make sure the sharpener is unplugged before cleaning.
- The exterior of the Edgekeeper® Electric Knife Sharpener can be wiped clean with a damp cloth.
- NEVER use abrasive cleansers on any part of the Edgekeeper® Electric Knife Sharpener.
- NEVER immerse the sharpener in water or any other liquid.

HOW TO USE:
1. Slowly draw the knife towards you, from the heel to the tip of the blade, applying light pressure to ensure the blade contacts the sharpening wheel.
2. Draw the knife through each stage several times, alternating sides (Sharpening each side of the blade should take 5-10 seconds per side depending on blade length).
3. For a finishing touch, make a 1-second pass through Stage 2.
*If you feel the knife could be sharper, return to Stage 1 and repeat the process. After completing both stages, your knife should be razor sharp.

PRIOR TO USE:
Each stage has two slots, one for either side of the blade.
Stage 1 is designed to remove any dull or misaligned metal from the blade edge.
Stage 2 completes the knife sharpening process by creating a sharp, precision edge.
- Blade should be clean and dry before sharpening. ALWAYS clean the knife blade and remove any metal filings before and after use. Wipe the blade with a clean, dry cloth.
- Place the unit on a dry, clean, and stable tabletop or countertop.
- Before first-time use, slowly draw the knife through each sharpening slot to learn the contact point of the blade and sharpening wheel.
- Plug in the sharpener, and then turn the power switch on.
- ALWAYS turn on the sharpener before starting the sharpening process. Failure to do so could cause damage to the knife, sharpener, or you.
- Δ WARNING: NEVER insert the tip of the knife into the sharpener, as it could cause damage to the knife and/or sharpener and serious injury.

WARRANTY INFORMATION
One Year Limited Warranty:
This quality Lifetime Brands product is designed and built to provide several years of satisfactory performance under normal household use.
Lifetime Brands pledges to the original owner that should there be any defects in the material or workmanship within the first year of purchase, we will replace it with the same or a similar product, without charge, if the product is returned to us with prepaid postage and a dated proof of purchase. Our pledge does not apply to damage caused by shipping, commercial use, or product abuse. Failure to follow the product instructions, damage caused by improper replacement parts, or product misuse will result in the warranty becoming void.
You may have other rights, which vary from state to state.
