**INSTALL CODE B**

Remove broken glass to install your Redi-Cuts®

**STEP 1: REMOVE BROKEN GLASS**
- Remove all existing broken glass and adhesive from the mirror’s plastic frame or backing plate with a putty knife.

**STEP 2: CLEAN & TEST FIT**
- Thoroughly clean backing plate with rubbing alcohol. Clean mirror with glass cleaner. Test fit your Redi-Cuts® before proceeding to the next step.

**STEP 3: APPLY ADHESIVE**
- Apply Burco Redi Stick™ adhesive patches to the backing plate or mirror replacement, if applicable.
  - TIP: Install in a warm/dry environment.
  - TIP: In addition to adhesive patches, you may use silicone or urethane for a secure hold.

**STEP 4: INSTALL**
- Align and press mirror replacement to the backing plate with firm yet gentle pressure.

**STEP 5: CLEAN UP**
- Clean your installed Redi-Cuts® mirror replacement with glass cleaner.

**INSTALL CODE C**

Remove broken glass to install your heated Redi-Cuts®

**STEP 1: REMOVE BROKEN GLASS**
- Remove all existing broken glass and adhesive from the mirror’s plastic frame or backing plate with a putty knife.

**STEP 2: CLEAN & TEST FIT**
- Thoroughly clean backing plate with rubbing alcohol. Clean mirror with glass cleaner. Test fit your heated Redi-Cuts® before proceeding to the next step.

**STEP 3: APPLY ADHESIVE**
- Install the gasket around the mirror. Be sure that the front of the mirror is facing out.
  - TIP: Burco part number can be read from the front.

**STEP 4: RECONNECT WIRES**
- Reconnect mirror head’s terminal leads to your heated Redi-Cuts®.

**STEP 5: INSTALL**
- Align and press your heated Redi-Cuts® to the backing plate with firm yet gentle pressure.

**STEP 6: CLEAN UP**
- Clean your installed heated Redi-Cuts® mirror replacement with glass cleaner.

**INSTALL CODE D**

Install your gasket fit Redi-Cuts®

**STEP 1: REMOVE BROKEN GLASS**
- Remove the broken glass and gasket from the mirror head with a small screwdriver or fiber stick. You may have to remove a framing screw.

**STEP 2: CLEAN GASKET**
- Remove paper backing from heating element or apply Burco Redi Stick™ adhesive patches to the backing plate or directly to Redi-Cuts®.
  - TIP: Install in a warm/dry environment.
  - TIP: In addition to adhesive patches, you may use silicone or urethane for a secure hold.

**STEP 3: INSTALL GASKET**
- Lubricate the edge of the gasket with glass cleaner or silicone for ease of installation into the mirror frame.

**STEP 4: PREP GASKET**
- Gently tap the mirror gasket assembly into the mirror head with a rubber mallet.
  - TIP: Tap the gasket edges, not the mirror, to reduce the risk of breakage.

**STEP 5: TAP INTO PLACE**
- Clean your installed Redi-Cuts® mirror replacement with glass cleaner.

**STEP 6: CLEAN UP**
- Clean your installed Redi-Cuts® mirror replacement with glass cleaner.

**INSTALL CODE A**

Fit your Burco Redi-Cuts® over your broken mirror.

**STEP 1: REMOVE LOOSE PIECES**
- The broken mirror is to remain in the backing plate. Remove loose or protruding pieces with a putty knife or screwdriver.

**STEP 2: TEST FIT**
- Dry fit (test fit) mirror replacement by placing over existing broken mirror to check proper fit.

**STEP 3: INSTALL GASKET**
- If possible, use your existing gasket. Remove broken glass from the gasket and clean with glass cleaner.

**STEP 4: PREP GASKET**
- Lubricate the edge of the gasket with glass cleaner or silicone for ease of installation into the mirror frame.

**STEP 5: INSTALL**
- Align and press your heated Redi-Cuts® to the backing plate with firm yet gentle pressure.

**STEP 6: CLEAN UP**
- Clean your installed heated Redi-Cuts® mirror replacement with glass cleaner.

Snap tab backing plate removal.

**STEP 1: REMOVE MIRROR AND BACKING PLATE**
Manually pivot mirror downward by applying pressure to the lower portion of your mirror. Insert a screwdriver below your mirror and backing plate to carefully pry lower hook lock backing plate off of the hook lock guides. TIP: Place a towel on edge of mirror head when prying off backing plate to prevent damage or scratching.

**STEP 2: DETACH WIRES**
If your mirror is a heated variant, disconnect terminal leads from your mirror’s heating element. If applicable, auto dimming or signal wires may have to be disconnected or clipped and capped.

NOTE: Burco mirror replacements do not auto dim.

**STEP 3: DISPOSAL**
Throw away your old backing plate and broken glass.

**STEP 4: RECONNECT WIRES & TEST**
If your mirror is a heated or signal variant, reconnect terminal wires to Redi-Set-Go™ mirror replacement. Test functionalities before proceeding to the next step.

**STEP 5: INSTALL**
Align motor mount snap tabs with motor. Apply gentle downward pressure and slide tab locks onto tab lock guides. Vertical alignment is not necessary.

**STEP 6: CLEAN UP**
Clean your installed Redi-Set-Go™ mirror replacement with glass cleaner.

---

Upper hook lock backing plate removal.

**STEP 1: REMOVE MIRROR AND BACKING PLATE**
Manually pivot mirror and backing plate upward by applying pressure to the upper portion of your mirror. Insert a screwdriver below your mirror and backing plate to carefully pry lower hook lock backing plate off of the hook lock guides. Once lower hook lock pops off, pull down/out to release the upper hook lock from the hook lock guides. TIP: Place a towel on edge of mirror head when prying off lower hook locks to prevent damage or scratching.

**STEP 2: DETACH WIRES**
If your mirror is a heated variant, disconnect terminal leads from your mirror’s heating element. If applicable, auto dimming or signal wires may have to be disconnected or clipped and capped.

NOTE: Burco mirror replacements do not auto dim.

**STEP 3: DISPOSAL**
Throw away your old backing plate and broken glass.

**STEP 4: RECONNECT WIRES & TEST**
If your mirror is a heated or signal variant, reconnect terminal wires to Redi-Set-Go™ mirror replacement. Test functionalities before proceeding to the next step.

**STEP 5: INSTALL**
Insert upper hook locks into the hook lock guides. Next, apply gentle pressure and snap lower hook locks into hook lock guides. TIP: Be sure upper hook locks are fully seated before snapping lower hook locks into place.

**STEP 6: CLEAN UP**
Clean your installed Redi-Set-Go™ mirror replacement with glass cleaner.

---

Lower hook lock backing plate removal.

**STEP 1: REMOVE MIRROR AND BACKING PLATE**
Manually pivot mirror and backing plate downward by applying pressure to the lower portion of your mirror. Insert a screwdriver below your mirror and backing plate to carefully pry upper hook lock backing plate off of the hook lock guides. Once upper hook lock pops off, pull up/in to release the lower hook lock from the hook lock guides. TIP: Place a towel on edge of mirror head when prying upper hook lock off to prevent damage or scratching.

**STEP 2: DETACH WIRES**
If your mirror is a heated variant, disconnect terminal leads from your mirror’s heating element. If applicable, auto dimming or signal wires may have to be disconnected or clipped and capped.

NOTE: Burco mirror replacements do not auto dim.

**STEP 3: DISPOSAL**
Throw away your old backing plate and broken glass.

**STEP 4: RECONNECT WIRES & TEST**
If your mirror is a heated or signal variant, reconnect terminal wires to Redi-Set-Go™ mirror replacement. Test functionalities before proceeding to the next step.

**STEP 5: INSTALL**
Insert lower hook locks into the hook lock guides. Next, apply gentle pressure and snap upper hook locks into hook lock guides. TIP: Be sure lower hook locks are fully seated before snapping upper hook locks into place.

**STEP 6: CLEAN UP**
Clean the installed Redi-Set-Go™ mirror replacement with glass cleaner.
