**Introduction**

The CS3000 Series scanner captures and stores bar codes for a variety of uses, and transmits bar code data to a host via USB connection or Bluetooth.

This document provides basic instructions for setting up, programming, and using the CS3000 series scanners. The scanner is available in the following configurations:

- CS3000 - USB (batch), 0.5 GB Flash
- CS3070 - USB (batch) and Bluetooth, 0.5 GB Flash

Each scanner includes a USB host cable. A charging cradle is also available for mounting, charging, and host connection.
Charging

To charge the CS3000 series scanner, connect it to a host PC via the USB host cable or charging cradle. No power supply is necessary. Charge time is approximately three hours for a fully discharged battery.

Charging via USB Host Cable

1. Insert the mini-USB connector on the host cable in the interface port on the scanner.
2. Connect the other end of the host cable to a USB port on the host PC.
Charging via Charging Cradle

1. Insert the cradle’s USB connector into a USB port on the host PC.

2. Remove the protective cover from the scanner.

3. Place the scanner in the cradle, ensuring the mini-USB connector in the cradle inserts into the interface port on the scanner.
Connecting to a Host

Batch Connection

See *Charging on page 4* for instructions on connecting the scanner to a host PC via USB.

 ✓ Note To enter batch scanning mode, the scanner cannot be paired to a Bluetooth host (applies to CS3070 model only).

Bluetooth Connection

Pairing

For RF-enabled scanners, to pair to a Bluetooth-enabled host:

 ✓ Note If the host does not support Bluetooth communication, a third-party Bluetooth adapter is required.

1. Press the scan button (+) to wake the scanner.
2. Press and hold the Bluetooth button (round button) for five seconds. The scanner beeps and the Bluetooth button starts blinking quickly to indicate that the scanner is discoverable by the host.
3. On the host PC, launch the third party Bluetooth pairing application and place the application into discover Bluetooth device mode.
4. Select the CS3070 from the discovered device list. The Bluetooth application may prompt you to scan a passkey it generated, or for you to create and then scan a pin.
5. Scan *Numeric Bar Codes on page 8* corresponding to the passkey, then scan *Enter on page 9*.

The Bluetooth button blinks slowly to indicate that the scanner paired with the host.

✓ Note Bluetooth pairing suspends temporarily while charging via a USB cable. Disconnecting the cable re-establishes the Bluetooth pairing.

**Unpairing**

To unpair the scanner and host, press the Bluetooth button. Upon unpairing, the Bluetooth button stops blinking.

✓ Note To enter batch scanning mode, the scanner cannot be paired to a Bluetooth host (applies to CS3070 model only).

Bluetooth Communication Options

To set up the scanner for communication with a host using standard Bluetooth profiles, scan one of the following bar codes.

- **Serial Port Profile (SPP)** - The scanner connects to the host via Bluetooth and emulates a serial connection. The scanner accepts an incoming connection requested from a Bluetooth host.

- **Bluetooth Keyboard Emulation (HID)** - The scanner connects to the host via Bluetooth and emulates a keyboard. The scanner accepts an incoming connection requested from a Bluetooth host.

![Serial Port Profile (SPP) barcode]

Serial Port Profile (SPP)

![Bluetooth Keyboard Emulation (HID) barcode]

Bluetooth Keyboard Emulation (HID)
**Scanning**

To scan bar codes:

1. Aim the scanner at the bar code.
2. Press the scan (+) button.
3. Ensure the scan line crosses every bar and space of the symbol.

The scanner beeps and the LED turns green to indicate a successful decode. See *User Indications* for beeper and LED definitions.
Note The scanner cannot scan bar codes when it is connected to the host via the USB host cable.

**Deleting Bar Codes**

In batch mode, to delete a bar code aim the scanner at the bar code and press the delete (-) button.

Note Bar codes cannot be deleted in Bluetooth mode.

**User Indications**

<table>

</table>

- **Function**: The action to be performed on the scanner.
- **User Action**: The detailed action to be taken to execute the function.
- **LED**: The color and state of the LED indicating the scanner's status.
- **Beeper**: The sound emitted by the beeper as a confirmation of the action.
Transmitting Bar Code Data to Host

Transferring Data from a Batch Scanner

The BarcodeFile.txt file within the \Scanned Barcodes directory on the scanner stores scanned (batch) bar code data. Connect the scanner to the host PC via USB host cable or the charging cradle and use Windows Explorer to navigate to the scanner. Copy the bar code data file to the host.

Note  

The scanner also supports an autorun feature where the customer can build an autorun.inf file to automatically copy the data to the host upon connection.

To clear the bar code data, delete the BarcodeFile.txt file from the scanner, or scan the Clear Data bar code in the Product Reference Guide.

Transferring Data from an RF Scanner

When the scanner is paired to a host via Bluetooth, data transmits to the host after each scan and is not stored on the scanner unless the scanner moves out of range of the host. In this case, if the scanner does not re-pair with the host within the timeout period, it stores data in a batch file. This data must be manually copied to the host.
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Laser comes on, but scanner does not decode the bar code.</td>
<td>Ensure the scanner is programmed to read the type of bar code being scanned.</td>
</tr>
<tr>
<td></td>
<td>Ensure the symbol is not defaced. Scan other bar codes of the same bar code type.</td>
</tr>
<tr>
<td></td>
<td>Move scanner closer to or further from bar code.</td>
</tr>
<tr>
<td>Scanner LED turns solid red for a few seconds.</td>
<td>Charge the battery. See <em>Charging on page 4</em>.</td>
</tr>
<tr>
<td>Scanner does not fully charge.</td>
<td>Ensure the scanner is connected to a powered USB hub (5V, 500mA max).</td>
</tr>
<tr>
<td>Bluetooth LED turns off.</td>
<td>Scanner is out of range; move closer to the host and press any button to re-pair with the host.</td>
</tr>
<tr>
<td>Scanner emits long beeps for 5 seconds when scanning a bar code.</td>
<td>Memory is full; download bar code data to the host and clear the memory.</td>
</tr>
</tbody>
</table>
Regulatory Information

This guide applies to the following Model Numbers: CS3070, CS3000.
Wireless information applies to CS3070 only.
All Zebra devices are designed to be compliant with rules and regulations
in locations they are sold and will be labeled as required.
Local language translations are available at the following website:
http://www.zebra.com/support
Any changes or modifications to Zebra equipment, not expressly
approved by Zebra, could void the user's authority to operate the
equipment.

Bluetooth® Wireless Technology

This is an approved Bluetooth® product. For more information or to view
End Product Listing, please visit
https://www.bluetooth.org/tpg/listings.cfm

Wireless Device Country Approvals

Regulatory markings, subject to certification, are applied to the device
signifying the radio(s) is/are approved for use in the following countries:
United States, Canada, and Europe¹.
Please refer to the Zebra Declaration of Conformity (DoC) for details of
other country markings. This is available at http://www.zebra.com/doc.
Note¹: For 2.4GHz or 5GHz Products: Europe includes, Austria, Belgium,
Bulgaria, Czech Republic, Cyprus, Denmark, Estonia, Finland, France,
Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein,
Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal,
Romania, Slovak Republic, Slovenia, Spain, Sweden, Switzerland and
the United Kingdom.

Operation of the device without regulatory approval is illegal.

Health and Safety Recommendations

Ergonomic Recommendations

Caution: In order to avoid or minimize the potential risk of ergonomic
injury follow the recommendations below. Consult with your local Health
& Safety Manager to ensure that you are adhering to your company's
safety programs to prevent employee injury.

• Reduce or eliminate repetitive motion
• Maintain a natural position
• Reduce or eliminate excessive force
• Keep objects that are used frequently within easy reach
• Perform tasks at correct heights
• Reduce or eliminate vibration
• Reduce or eliminate direct pressure
• Provide adjustable workstations
• Provide adequate clearance
• Provide a suitable working environment
• Improve work procedures.
Note: The following section is only applicable for mobile computers.

Vehicle Installation
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles (including safety systems). Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Position your device within easy reach. Be able to access your device without removing your eyes from the road.
Note: Connection to an alert device that will cause a vehicle horn to sound or lights to flash, on receipt of a call on public roads, is not permitted.

Safety on the Road
Do not take notes or use the device while driving. Jotting down a "to do" list or flipping through your address book takes attention away from your primary responsibility, driving safely.

When driving a car, driving is your first responsibility - Give full attention to driving. Check the laws and regulations on the use of wireless devices in the areas where you drive. Always obey them.

"The wireless industry reminds you to use your device / phone safely when driving".

Warnings for Use of Wireless Devices
Please observe all warning notices with regard to the usage of wireless devices.

Potentially Hazardous Atmospheres - Vehicles Use
You are reminded of the need to observe restrictions on the use of radio devices in fuel depots, chemical plants etc. and areas where the air contains chemicals or particles (such as grain, dust, or metal powders) and any other area where you would normally be advised to turn off your vehicle engine.

Safety in Aircraft
Switch off your wireless device whenever you are instructed to do so by airport or airline staff. If your device offers a 'flight mode' or similar feature, consult airline staff as to its use in flight.

Safety in Hospitals
Wireless devices transmit radio frequency energy and may affect medical electrical equipment.
Wireless devices should be switched off wherever you are requested to do so in hospitals, clinics or healthcare facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

**Pacemakers**

Pacemaker manufacturers recommended that a minimum of 15cm (6 inches) be maintained between a handheld wireless device and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with independent research and recommendations by Wireless Technology Research.

Persons with Pacemakers:

- Should ALWAYS keep the device more than 15cm (6 inches) from their pacemaker when turned ON.
- Should not carry the device in a breast pocket.
- Should use the ear furthest from the pacemaker to minimise the potential for interference.
- If you have any reason to suspect that interference is taking place, turn OFF your device.

**Other Medical Devices**

Please consult your physician or the manufacturer of the medical device, to determine if the operation of your wireless product may interfere with the medical device.

⚠️ **RF Exposure Guidelines**

**Safety Information**

Reducing RF Exposure - Use Properly

Only operate the device in accordance with the instructions supplied.

**International**

The device complies with internationally recognized standards covering human exposure to electromagnetic fields from radio devices. For information on "International" human exposure to electromagnetic fields refer to the Zebra Declaration of Conformity (DoC) at [http://www.zebra.com/doc](http://www.zebra.com/doc).

**EU**

Handheld Devices

To comply with EU RF exposure requirements, this device must be operated in the hand with a minimum separation distance of 20cm or more from a person's body. Other operating configurations should be avoided.
**US and Canada**

Co-located statement
To comply with FCC RF exposure compliance requirement, the antenna used for this transmitter must not be co-located or operating in conjunction with any other transmitter/antenna except those already approved in this filling.

**Handheld Devices**

To comply with FCC RF exposure requirements, this device must be operated in the hand with a minimum separation distance of 20 cm or more from a person’s body. Other operating configurations should be avoided.

**Laser Devices**

The laser classification is marked on one of the labels on the device. Class 1 Laser devices are not considered to be hazardous when used for their intended purpose. The following statement is required to comply with US and international regulations:
Caution: Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous laser light exposure.

**Scanner Labeling**

**CS3000 Labeling**
**Power Supply**

Use ONLY a LISTED, Type no. 50-14000, or PWRS-14000, Direct Plug-In Power supply, marked Class 2 or LPS, or SELV, Rated 5 Vdc, 0.85 A Min. (IEC60950-1). Use of Alternative Power Supply will invalidate any approvals given to this unit and may be dangerous.

**Batteries**

**Taiwan - Recycling**

EPA (Environmental Protection Administration) requires dry battery producing or importing firms in accordance with Article 15 of the Waste Disposal Act are required to indicate the recycling marks on the batteries used in sales, giveaway or promotion. Contact a qualified Taiwanese recycler for proper battery disposal.

**Battery Information**

Zebra rechargeable battery packs are designed and constructed to the highest standards within the industry.

However, there are limitations to how long a battery can operate or be stored before needing replacement. Many factors affect the actual life cycle of a battery pack, such as heat, cold, harsh environmental conditions and severe drops.

When batteries are stored over six (6) months, some irreversible deterioration in overall battery quality may occur. Store batteries at half of full charge in a dry, cool place, removed from the equipment to prevent loss of capacity, rusting of metallic parts and electrolyte leakage. When
storing batteries for one year or longer, the charge level should be verified at least once a year and charged to half of full charge. Replace the battery when a significant loss of run time is detected. For more information on batteries, please visit: http://www.zebra.com/batterybasics

**Battery Safety Guidelines**

- The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non-commercial environment.
- Follow battery usage, storage, and charging guidelines found in the user’s guide.
- Improper battery use may result in a fire, explosion, or other hazard.

Note: Ensure the correct temperature range for product in the following bullet:

- To charge the mobile device battery, the battery and charger temperatures must be between +32 °F and +113 °F (0 °C and +45 °C)
- Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact Zebra support.
- For devices that utilize a USB port as a charging source, the device shall only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.
- Do not disassemble or open, crush, bend or deform, puncture, or shred.
- Severe impact from dropping any battery-operated device on a hard surface could cause the battery to overheat.
- Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
- Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.
- Battery usage by children should be supervised.
- Please follow local regulations to promptly dispose of used rechargeable batteries.
- Do not dispose of batteries in fire.
• Seek medical advice immediately if a battery has been swallowed.
• In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
• If you suspect damage to your equipment or battery, contact Zebra support to arrange for inspection.

Radio Frequency Interference Requirements- FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna
• Increase the separation between the equipment and receiver
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
• Consult the dealer or an experienced radio/TV technician for help.

Radio Transmitters (Part 15)
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Radio Frequency Interference Requirements- Canada
This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
Radio Transmitters

This device complies with RSS 210 of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

Label Marking: The Term "IC:" before the radio certification only signifies that Industry Canada technical specifications were met.

Marking and European Economic Area (EEA)

Bluetooth® Wireless Technology for use through the EEA has the following restrictions:

- Maximum radiated transmit power of 100mW EIRP in the frequency range 2.400 -2.4835 GHz

Statement of Compliance for CS3070 Wireless Devices

Statement of Compliance for CS3000

Zebra hereby declares that this device is in compliance with all applicable Directives, 2014/30/EU, 2014/35/EU and 2011/65/EU. The full text of the EU Declaration of Conformity is available at the following internet address: http://www.zebra.com/doc.
Japan (VCCI) - Voluntary Control Council for Interference

Class B ITE

This is a Class B product based on the standard of the Voluntary Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

Korea Warning Statement for Class B ITE

Class B (Broadcasting Communication Device for Home Use): This device obtained EMC registration mainly for home use (Class B) and may be used in all areas.

Other Countries

Brazil

Regulatory declarations for CS3070 - BRAZIL
Note: The certification mark applied to the CS3070 is for Restrict Radiation Equipment. This equipment operates on a secondary basis and does not have the right for protection against harmful interference from other users including same equipment types. Also this equipment must not cause interference to systems operating on primary basis.

For more information consult the website www.anatel.gov.br

Declarações Regulamentares para CS3070 - Brasil
Nota: "A marca de certificação se aplica ao Transceptor, modelo MC9090. Este equipamento opera em caráter secundário, isto é, não tem direito a proteção contra interferência prejudicial, mesmo de estações do mesmo tipo, e não pode causar interferência a sistemas operando em caráter primário."

Para maiores informações sobre ANATEL consulte o site: www.anatel.gov.br
CHILE

"Este equipo cumple con la Resolución No 403 de 2008, de la Subsecretaria de telecomunicaciones, relativa a radiaciones electromagnéticas.".

"This device complies with the Resolution Not 403 of 2008, of the Undersecretary of telecommunications, relating to electromagnetic radiation."

Mexico

Restrict Frequency Range to: 2.450 - 2.4835 GHz.

Taiwan

NOTICE!

According to: Administrative Regulations on Low Power Radio Waves Radiated Devices

Article 12

Without permission granted by the DGT, any company, enterprise, or user is not allowed to change frequency, enhance transmitting power or alter original characteristic as well as performance to an approved low power radio-frequency devices.

Article 14

The low power radio-frequency devices shall not influence aircraft security and interfere legal communications; If found, the user shall cease operating immediately until no interference is achieved.

The said legal communications means radio communications is operated in compliance with the Telecommunications Act.

The low power radio-frequency devices must be susceptible with the interference from legal communications or ISM radio wave radiated devices.

Korea

For a radio equipment using 2400~2483.5MHz or 5725~5825MHz, the following two expression should be displayed:

1. "This radio equipment can be interfered during operation."
2. "This radio equipment cannot provide a service relevant to the human life safety, as it can be crossed" through the user manual etc.

당해 무선설비는 운용 중 전파혼신 가능성이 있음

당해 무선설비는 전파혼신 가능성이 있으므로 인명안전과 관련된 서비스는 할 수 없습니다. 당해 무선설비는 전파혼신 가능성이 있으므로 인명안전과 관련된 서비스는 할 수 없습니다.
For EU Customers: All products at the end of their life must be returned to Zebra for recycling. For information on how to return product, please go to: http://www.zebra.com/weee.

Service Information

If you have a problem using the equipment, contact your facility’s Technical or Systems Support. If there is a problem with the equipment, they will contact Zebra Support at:
