Please note: all functions in this User Guide apply to Bit models S1, S1C & S1 PLUS unless noted otherwise.
SMART PHONE COMPATIBILITY

Bit Watch is designed to work with either iPhone or Android phones.

iPhone - S1 Smart Watch will interface with iOS 7.1 or higher and model 5S or newer. To determine your phone’s software version, go to Settings > General > About.

Android phones - S1 will interface with Android 4.4 or higher. To check you Android version go to Settings > About Device.

WHAT’S INCLUDED

Charge Cradle

USB Cable

S1 Smart Watch

AC Charger
POWER & SLEEP FUNCTIONS

Turn Watch ON - Press and hold the Power / function button on the side of the watch until the bit logo appears on screen.
Turn Watch OFF - Press and hold the Power / Function button until the bit logo disappears. The watch will now shut down.
Turn Screen ON or OFF - If the screen is dark, tap the power / Function button to turn it on. Likewise if the screen is on, press the Power / Function button to turn it off.

NAVIGATING S1

Apps on the S1 Smart Watch are arranged by category into a series of screens. Each Apps screen contains 3-4 Apps. While viewing clock, Swipe left or right, or up or down to access Apps screens. Swipe left or right to change Apps screens. Within Apps, swipe to the directions of arrows to access different levels.
To return to clock, swipe up or down. Exit apps back to Apps screens by swiping right to left.

IMPORTANT - SYNC PROCEDURE

1. Connect S1 Smart Watch with your smart phone via Bluetooth. On the watch go to Settings > BT Settings and turn Power & Visibility both ON. Then turn the bluetooth on your phone to ON. Now pair the devices.
2. Download App – Please go to the app store on your phone and search for “Bit Watch”. Download it to your smartphone. The app is available in both the Apple App store and the Google Play store.
3. Register and Log in on the Bit Watch app - Click the “Register” tab and follow the instructions. Then Sync the app using the following procedure.

STEP 3

ANDROID

Tap to enable notifications.

Tap here.
Tap Ok to enable notifications.

Tap here to start Bluetooth sync.
Tap Pair

Tap Yes
IMPORTANT NOTES:
1. In most instances the default setting on your phone will block emails to come through to the watch. You will need to go to phone settings and allow for notifications in the general email app and you will also need to enter each email account and select “Show in Notification Center” and adjust related settings on this screen to your desire. While in the email account notification center, we recommend you also allow for each of the additional notification functions.

2. Typically text messages occur immediately to the watch upon syncing the app as this is the default setting on most phones. If you do not receive texts on the watch after syncing, try first to go to phone settings and allow notifications in the general messaging app.

3. Your watch will immediately issue notification alerts upon syncing. This may be a good time to set your alert sound and volume preference. Enter Settings app on the watch and go to Sound. Select from vibrate to other audible alert sounds. Then go to Volume and adjust to your preference.

CHARGING S1 WATCH

To charge, placed the watch into the cradle and make sure the contacts on the back of the watch align with the contacts in the cradle. Connect the Large end of the USB charging cable to the AC Adapter, and the small end into the port on the cradle. Plug the AC adapter into an AC outlet.
Note: for portable convenience, S1 Watch can charge from a powered USB port without the use of the AC Adapter.

MANAGING AUDIO W/ PHONE CALLS

When making or receiving phone calls you may choose to direct the audio to your phone or to S1. Answer and place phone calls from S1 Watch.

ANDROID

To receive the call on watch:
1. Go to bluetooth settings in your phone for the S1 watch and turn Call Audio and Media Audio both on.

To receive calls on the phone:
1. Option one is to turn off bluetooth on the phone.
2. Option two is to enter bluetooth settings in your phone for S1 and turn Call Audio off.

IPHONE

For iPhone, you may select where to take each call from the caller ID screen. Make selection in the audio tab on caller ID screen.
Then select where you want the audio to go through. You can perform this action with each call.

You can also select for permanent call direction as follows:

Swipe up from the bottom edge of the screen to reveal quick access menu. Then swipe the menu left to reveal the Music Control menu.
Select iPhone or S1. Note if you select iPhone you may choose from speaker or connected devices such as headphones from the call screen during a call.

On the Music Control menu, tap the down arrow at the bottom of the menu to open choices for audio direction.

Swipe the menus off the screen when finished.
OPERATION W/ BLUETOOTH SPEAKERS (FOR S1 PLUS ONLY)

S1 PLUS Smart Watch can interface through bluetooth headphones / speakers giving added convenience and benefit. S1 PLUS can connect from the watch directly to an external bluetooth device such as bluetooth speakers or headphones. This allows you to play music loaded on the watch while away from your phone. S1 PLUS can also play music loaded on your phone through bluetooth speakers / headphones. Follow the following procedure to connect to bluetooth speaker / headphone.

Connect to Bluetooth device directly from S1 PLUS
1. Insure S1 PLUS is not connected to the phone.

2. On the watch go to Settings > BT settings and make sure Power and Visibility are both turned On.

3. Put your bluetooth speaker or headphones into pairing mode.

4. On the watch, enter the BT connection app.
5. Now pair the bluetooth speakers / headphones to the phone.
This allows you to direct audio from all phone connected applications to the wireless speaker / headphones. With this connection you can direct the audio for functions such as making phone calls or listening to music loaded on your phone through the wireless bluetooth speakers / headphones.

1. IMPORTANT: Make sure watch is connected to phone first.
2. Now pair the Bluetooth speakers / headphones to the phone. If they are already paired, be sure to connect the watch to the phone first.
3. Then connect bluetooth speaker / headphones. Important: be sure the headphones connect to phone last or you will not be able to interact with the watch correctly.

FAQ

1. S1 smart watch will not turn ON.
   Check the connection when charging. Please check for secure connections. Also insure the watch is fully seated in to the charging cradle.

2. How to change the clock style?
   Go to Settings > Clock > Clock type; swipe left or right to view available styles, then select OK for your choice.

3. How to change background theme?
   Go to Theme App, Select Theme 1, Theme 2 or Theme 3.
4. Having trouble pairing Bluetooth with smart phone. Be sure Bluetooth power is ON in S1 smart watch. Go to Settings > BT Settings >. If Power shows OFF, tap to turn to ON. Make sure Bluetooth is ON in smart phone.

5. How to change ringtone and alert types? Go to Settings > Sound, then select desired function and make your choice.

6. How to change audio volume of S1 smart watch? Go to Settings > Volume > Multimedia, then either increase or decrease.

7. How to turn S1 display ON by moving your wrist? Go to Settings > Motion, then select from available options.

8. How to sync time on S1 smart watch? Go to Bit Watch App on smart phone. Make sure Bluetooth is connected from the S1 to the App. From the App Home Page, tap sync data icon in upper right corner.

9. The time is not correct. This indicates the app is not correctly paired as the time syncs from the app. Follow this procedure:
   1. Delete the app.
   2. Unpair all S1 devices from phone.
   3. Reset watch (Settings > Reset).
   4. Follow Sync procedure. Be sure to allow notifications and access to contacts. Register under a new email and password.
10. I’m not getting texts or notifications.
   If you use an iPhone, all notifications, including text messages and emails will come to the watch into the Remote Notifier app. The messaging app is only for Android phones receiving texts. If you use an Android phone, text messages will appear in the Messaging app on the watch. Email and notifications will appear in the Remote notifier app on the watch.

11. I get texts and notifications but not email.
   Most phone manufacturers set their phones default settings to allow notifications on text messages but not to allow on email. Please refer to important notes on page 14 of this User Guide.

12. I’m getting too many notifications to the watch.
   The watch will receive all notifications the phone receives. You may choose to edit how many notifications your phone sends to the watch. For iPhone, go to Settings > Notifications then review the list of all apps in the phone that can send you notifications and edit to your desired status. In Android phone go to Apps first then adjust their notification status.

13. How to change time format from 12 hour to 24 hour.
   On the watch, go to Settings > Clock and turn Time sync off by tapping Time sync > Off. Then scroll down to Time Format (also under Clock) and change from 12 hour format to 24 hour format by tapping Time format, then making your selection.
