Mirror Defoggers

Mirror Defogger Simplifies Your Morning

Let the clarity of your bathroom design be reflected with the Clearly You™ Mirror Defogger.

Eliminate Mirror Fogging

Clearly You™ electric defogging systems transmit gentle warmth across a mirror's surface to prevent reflection distorting moisture from forming during bathing or showering.

Homeowners can shave, apply makeup or add finishing touches to their wardrobe while enjoying the perfect reflective quality of their mirrors.

Let WarmlyYours bring out the true beauty and clarity of your bathroom design while eliminating a major source of homeowner frustration.

Wafer-Thin System Installs Discreetly Behind Mirror

Previously available only in spas and luxury hotels, homeowners can now enjoy the self-pampering luxury of steam-free mirrors in their master bath with this affordable new system from WarmlyYours.

Self-adhesive backing allows direct application to the back of any wall hung mirror in just minutes. Ease of installation and quality construction make Clearly You™ systems a welcome upgrade to new home construction and remodeling projects.

18" x 24" System Comes Ready To Install

WarmlyYours mirror defogging systems come ready to install, with pre-attached power leads and easy to follow directions.

To install, simply position the 18" x 24" warming film behind any wall hung mirror, remove the protective sheet from the self-adhesive backing and press firmly into place.

Power leads can be conveniently connected to a mirror's 120-volt lighting fixture or separately wired to a common 2" x 4" junction box installed behind the mirror. Once installed, only the homeowner will know that it's there.

104° Operating Temperature Safe For All Mirrors

WarmlyYours mirror defogging systems draw only a minimal amount of energy and operate at a constant, regulated temperature of 104° to provide a safe, economical way to keep mirrors fog-free.

The defogging system's gentle warming will not affect a mirror's reflective coating and can be wired for continuous operation at a cost of just pennies per month.

Additionally, our mirror defogging systems are backed by a 1-year warranty and WarmlyYours highly recognized lifetime 24/7 technical and customer service support.

Other Home Comfort Solutions From WarmlyYours

WarmlyYours offers a variety of luxury and comfort management products designed for both home and commercial use. For additional information call (800) 875-5285, or visit www.WarmlyYours.com.
