

Quick Start

Nighthawk X6

AC3000 Tri-Band WiFi Router

Model R7900

NETGEAR[®]

Package Contents

1. Position the Antennas

For the best WiFi performance, position the antennas as shown.

2. Restart Your Modem and Plug In Your Router

Unplug your modem, remove and replace the backup battery if it uses one, and then plug the modem back in. Use the Ethernet cable to connect the modem to the yellow Internet port on the router.

Note: If your Internet connection does not require a modem, connect your main Ethernet cable to the yellow Internet port on the router.

Connect the router to a power source. The router's Power LED lights amber and then turns white when the router is ready.

3. Connect to the Internet

Make sure that the router's WiFi LED is lit. Find the router's preassigned WiFi network name and password on the label on the router.

Open the WiFi connection manager on your WiFi-enabled computer or mobile device, find the router's WiFi network name, and use the router's password to connect.

Launch a web browser. If the NETGEAR installation assistant does not display, visit www.routerlogin.net. If a login window displays, enter **admin** for the user name and **password** for the password.

Follow the NETGEAR installation assistant.

All Set Up!

For more information about your router, see the Do More booklet.
