IMPORTANT SAFETY INSTRUCTIONS

- 1. Read all instructions** – All the safety and operating instructions should be read carefully before this Hover Hockey table can be operated or played.
- 2. Caution** – This is not a toy and is intended for use by or under the supervision of adults. Adults should review safety guidelines with children to avoid possible risk of electric shock or other injuries.
- 3. Power Sources** – This Hover Hockey game should be operated only from 100-125V A.C., 50/60 cycle current as indicated on the identification label. If you are not sure of the type of power supply to your home, consult your appliance dealer or local power company.
- 4. Power Cord Protection** – Power cord should be routed so that it is not likely to be walked on or pinched by items placed upon or against it. Pay particular attention to cords at plugs, convenience receptacles, and the point of exit from the game.
- 5. Overloading** – Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.
- 6. Object and Liquid Entry** – Never push objects of any kind into this game through openings as they may touch dangerous voltage points or short-out parts which could result in a fire or electric shock. Never spill liquid of any kind on the game. If cleaning the surface, follow the recommended manufacturer instructions or call technical support for guidance.
- 7. Ventilation** – Openings in the game are provided for the exhaust air to create a cushion/floating effect. The openings on the air blower are for the intake air. Keep clear of the air blower during operation. Do not allow hand, hair, or any other objects near the intake openings. To ensure reliable operation of the game and protect it from overheating, these openings must not be blocked or covered.
- 8. Damage Requiring Service** – Unplug the game from the wall outlet/receptacle. Do not attempt to service the blower yourself as while opening and/or removing covers may expose you/others to dangerous voltage or other hazards. Refer servicing to qualified service personnel under the following conditions:
 - a. When the power supply cord is damaged.
 - b. If liquid has spilled, or objects have fallen into the blower.
 - c. When the air blower exhibits a distinct change in performance – i.e. abnormal noise, too much/too little air flow, this indicates a need for service
- 9. Grounding or Polarization** – This game is equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. DO NOT defeat the safety purpose of the polarized plug.
- 10. CAUTION – ELECTRICALLY OPERATED PRODUCT** – Not recommended for children under 8 years of age. As with all electrical products, precautions should be observed during handling and use to reduce the risk of electric shock.
- 11. We recommend** – that the game be periodically examined for conditions that may result in the risk of fire, electrical shock, or injury to persons. In the event such conditions exist, the game should not be used until properly repaired.
- 12. Storage Conditions** – This product is made from wood based components and is sensitive to extreme temperatures and moisture / humidity. Subject to these conditions will effect game play, cosmetics and longevity.
