**Product Overview**

The Indoor/Outdoor 4 MP PoE IR Network Camera, model TV-IP314PI, provides powerful 4-megapixel night vision in complete darkness for up to 30 meters (100 ft.). Even in extreme environments, this ultra-compact camera will function all year, thanks to an IP66 weather-rated housing. Use the included pro-grade software to manage up to 32 TRENDnet cameras or download the free iOS® or Android™ mobile app.

**Features**

- **Hardware**
  - **Adjustable Bracket**
    Fully adjustable integrated mounting bracket provides installation flexibility
  - **PoE**
    Save installation costs with Power over Ethernet (IEEE 802.3af)
  - **Outdoor Ready**
    Outdoor IP66 weather rated and an operating temperature range of -30 ~ 60 °C (-22 ~ 140 °F)

- **Performance**
  - **4 Megapixel**
    Record 2688 x 1520 pixel video at 20 fps in H.264+ compression
  - **Night Vision**
    Night vision up to 30m (100 ft.) in complete darkness
  - **Smart IR**
    Dynamic IR adjustment optimizes night visibility
  - **WDR**
    120dB Wide Dynamic Range improves video quality in high contrast lighting environments
**Camera Management**

**Multi-Language Interface**
Support for English, French, Spanish, German, and Russian

**Advanced Playback**
Advanced in-camera archived video review functionality

**Storage**
SMB/CIFS support with notification if storage drive is full

**Motion Detection**
Create motion detection windows with separate sensitivity settings and event triggers

**Recording Schedule**
Define a weekly recording schedule

**Tamper Detection**
Receive tamper detection video clips via email

**IPv6**
IPv6 support

**ONVIF / PSIA**
ONVIF 2.4 and PSIA compliant

**Free Apps**
See live video on a mobile device with free iOS® and Android® apps

**Complimentary Software**
Complimentary pro-grade software to manage up to TRENDnet 32 cameras

---

**Package Contents**

TV-IP314PI package includes:
- TV-IP314PI
- Quick Installation Guide
- CD-ROM (Utility and User’s Guide)
- Camera mounting hardware
- (Optional power adapter not included)

*If any package content is missing or damaged, please contact the retail store, online retailer, or reseller/distributor from which the product was purchased.*
**Front View**

- **Reset Button**: Push and hold the reset button then power on the camera. Keep holding the reset button for more than 10 seconds to reset configuration to factory default.
- **Grounding Screw**: Connects to electric ground.
- **Lock Ring**: Loosen to adjust the camera position. Tighten to hold the camera position.
- **Ambient Light Sensor**: Detects the brightness in the environment and enable day/night modes automatically.
- **IR LEDs**: Infra-red LEDs for night vision.

**Mounting**

- **Grounding Screw**
- **Lock Ring**
- **Reset Button**
- **Mounting Base**

**Connectors**

- **10/100 PoE Network Port**
- **DC Power 12V DC 1A (Optional)**
**Warnings**

Serious injury or death may be caused if any of these warnings are neglected. Follow these safety guards to prevent serious injury or death.

- If using the power adapter, please choose the power adapter that meets the safety extra low voltage (SELV) standard or IEC60950-1 and Limited Power Source standard.

- If the product does not work properly, please contact your dealer or the nearest service center. Never attempt to disassemble the camera yourself. Disassembling the product will void the warranty and may cause harm or injury.

- To reduce the risk of fire or electrical shock, do not expose this product to rain or water.

- The installation should be done by a qualified service person and should conform to all construction and electric regulations and other local codes.

**Cautions**

Injury or equipment damage may be caused if any of these cautions are neglected. Follow these precautions to prevent potential injury or material damage.

- Make sure the power supply voltage is correct before using the Camera.

- Do not drop the camera or subject to physical shock.

- Do not touch sensor modules with fingers. If cleaning is necessary, use a clean cloth with a bit of ethanol and wipe it gently. If the camera will not be used for an extended period of time, put on the lens cap to protect the sensor from dirt.

- Do not aim the camera lens at the strong light such as the Sun or an incandescent lamp. Strong light can damage the camera sensor.

- The sensor may be burned out by a laser beam, so when any laser equipment is being used, make sure that the surface of the sensor will not be exposed to the laser beam.

- Do not place the camera in extremely hot, cold temperatures (the operating temperature should be between -10°C to 60°C), dusty or damp environment, and do not expose it to high electromagnetic radiation.

- To avoid heat accumulation, good ventilation is required for a proper operating environment.

- Keep out of water and any liquid.

- While shipping, the camera should be packed in its original packing.
Plan for installation location

Viewing angle

The TV-IP314PI is a bullet camera with a focused viewing angle (83° horizontal) that provides non-distorted and detailed images. Choose the location where has good angle to shoot the image you expect to see. The motion detection area should also be considered when installing the camera.

Weather Conditions

The TV-IP314PI is a small bullet camera, which fits most installations indoor and outdoor. The camera can work under a wide range of weather conditions. For severe weather conditions, a camera housing with temperature and moisture control is recommended. Using the camera in milder weather conditions will help extend the camera’s product life and preserve the quality of the video image.

- **Moisture:** Avoid damp or moist environments whenever you can. The TV-IP314PI is an IP66 grade water proof camera, and it will work in moist environments. However, rain may affect the picture quality, especially at night, water may reflect the light from the infra-red illumination and degrade picture quality.

- **Temperature:** TV-IP314PI works within a specified temperature range. Areas with severe temperatures should be avoided when installing the camera. It’s recommended that you use an enclosure with a heater and blower if you plan on using this camera outside of the specified temperature range.

- **Sunlight:** Avoid direct sun light exposure. Direct sun light will damage the image sensor. If sunlight is necessary for your viewing purposes, provide protection for the image sensor.

- **Lighting:** Consider installing your camera faces the same direction of the light sources. Shooting images with top-down position outdoor or next to the existing light source are good choices. Avoid the light source if it creates a shade that darkens the viewing area.
Hardware Installation

Cabling

It’s recommended that the wiring the cable in your home or office by a professional. If you already have the cable deployed, make sure the cable and the connectors meet the category 5 Ethernet cable standards. At least 2 pairs of twisted lines are required for power and data. Poor cable quality may cause unexpected problems. Testing your cable or running a new cable is suggested for new camera installation.

Waterproof cap

The TV-IP314PI itself is IP66 grade water and dust proof. There is a set of network cable water proof caps that comes with the package as well. Run your cable going through the accessories, and then crimp the cable with an RJ45 module. Plug in the network cable and then tighten the waterproof cap to prevent water running into camera through the cable.

Mount your camera

Drill the screw holes and the cable hole if necessary with the drill template comes with the package.

Fix the mounting base on the ceiling or the wall with the screws that come with the package. Route the cables to the cable hole.
Loosen the lock ring and then adjust the camera position. Tighten the lock ring when you setup the camera position.
Setup Your Camera with CD

1. Insert the Installation CD-ROM into your computer’s CD-ROM drive to initiate the Auto-Run program. Choose your preferred language and then click the **Install Camera Utility**.

2. Install the Camera Utility as instructed

3. Last, click Next to finish the installation.

4. This will also require you to Install WinPcap program if you don’t have this installed before, please follow the on screen Instructions to Install It.
5. Restart the computer after the Installation.

6. After the computer has restarted, double click on the Camera Utility icon to launch the program.

7. Find the camera you would like to access and configure then double click on the IP address.

8. Continue to the next section **Access your Camera with the Web Browser** for detail configurations of the camera.
Access your Camera with the Web Browser

Logging-in to the Camera for the First Time (Windows)

1. Find the camera from the Utility and double click on the IP address to open the browser.

2. Activate the **admin** User Account by entering your desired password, and then click **OK**.

3. The camera management page will detect if you installed the camera video streaming plug-in or not. Click the link to download the plug-in from the camera.

4. Download the plug-in to your computer and then and close your browser. Launch the plug-in installation to install the plug-in.
5. Permission request may show up depends on the Internet security settings on your computer. Click Yes to install the plug-in.

6. Click Next to install the plug-in.

7. Click Finish to finish the installation.

8. Open the browser and login again, enter the user name admin and new password again to start secured session.
9. Refresh the browser and the Live View page will show up and begin streaming video.

Logging-in to the Camera for the First Time (OS X)

1. Open the web browser on your computer. In the address bar, enter the default IP address of the camera 192.168.10.30. If the camera is connected to a router/network, please use the Windows Camera Utility to find the exact IP address.

2. Activate the admin User Account by entering your desired password, and then click OK.
3. The camera management page will detect if you installed the camera webcomponent plug-in or not. Click the link to download the plug-in from the camera.

   *Note: Internet connection is required to download the plug-in. If you do not have Internet access, you can find the plug-in on the CD comes with the package under /Mac folder.*

4. Quit your browser completely by **command-Click** on the browser icon and then click **Quit** before installing the plug-in.

5. Go to the Finder and navigate to the Download folder. **Command-Click** the **WebComponents.pkg** and then click **Open**. (If you are installing the plug-in from the CD when you don’t have internet connection, just browse to /Mac folder and double click the **WebComponents.pkg** file.)

6. Click **Open with** → **Installer** to start installation.
7. Click **Continue** to install the plug-in.

8. Select a destination to install the plug-in. Then click **Continue**.

9. Use the default location and click **Install**.

10. Enter your password and click **Install Software**.
11. Installation will process automatically.

12. Click Close to exit the installation.

13. Open the browser and login again with the default IP 192.168.10.30 or the IP that was dynamically assigned by your router. Enter the user name, admin, and the default password, admin, and then click OK.

14. The Live View page shows up and the video starts to stream.
**Live View**

After you log in into the camera management page, you’ll see the Live View page.

**Snapshot**
Click this icon to take a video snapshot.

**Zoom**
Click once to enable zoom. When enabled, click and drag the area on the picture to zoom in. Right click to resume 100% zoom. Click the icon again to disable zoom. The zoom function works in full screen mode as well.

**Recording**
Click once to start recording. Click it again to stop recording. The status bar will indicate if it is in recording state or not.

**Video Stream**
TV-IP314PI has two video streams: H.264 and MJPEG. Switch to view the different video streams by clicking this icon.

**Full Screen Mode**
Click the picture to view in full screen mode. Double click again or press escape key on your keyboard to exit full screen mode.

**Status Bar**
The status bar shows the status you are at, including enabled the zoom, recording video, and successfully taking a snapshot.
**Playback**

You can playback the video recording on the network storage and download the video clip and snapshots to your local computer.

**Search for video recordings**

Click the date selection, and then choose a date as the date range of searching. Click **Search** to start searching.

**Time Line**

There is a play back head in the center of the time line represented in a yellow vertical line. To look for a specific video recording, move the time line by clicking and dragging it. If the recording is short, zoom in by clicking button. Click **+** to zoom out the time scale. If you know the exact time of the day you are looking for, click **←** then enter the time you want to playback.

Different types of recordings are identified differently. The scheduled recordings are marked in blue, and the recordings triggered by motion detection are marked in red.

Click and drag the time line to move your time manually.
Click this button to zoom in the scale
Click this button to zoom out of the scale
Click this button to specify a specific time of the day.

then click **←** to confirm selection and then click **X** to close this dialog box.
**Playback**
Use playback controls to play back the video recording.

- Click this button to play the video.
- Click this button to pause video playback.
- Click this button to stop playback.
- Click this button increase playback speed*.
- Click this button decrease playback speed*.
- Click to playback video frame by frame. Click again for the next frame.

*Note: There are 5 steps of playback speed you can choose from: 1/4, 1/2, 1, 2, and 4 times of original speed.

---

**Slice images from video playback**
You can take snapshots from playback video or make new video clips from the video you are playing back.

- Click this button to enable zoom. Then click and drag on the video to define the area you want to zoom in. Click again to get back to 100% zoom.
- Double click to show video in full screen and press ESC on keyboard to exit full screen mode.
- Click this button to disable zoom.
- Click this button to take a snapshot of current playback.
- Click this button to start clipping a video from playback.
- Click this button to stop clipping a video from playback.
**Download sections of video**
To save complete video sections or snapshots, you can download the files directly.

Click **Download** button to download video sections.

Check the time of the recording, select the videos you want to download, and then click **Download**.

---

**Download snapshots**

Click **button to list snapshots to download**

Select the type of event that triggered the snapshots. Choose the Start Time and End Time. Then, click **Search** to find the snapshot list. Check the time of the snapshot, and then select the snapshots you want to download, then click **Download**.
**Log**

The log of the TV-IP314PI will be saved on the network storage. You can search the relevant records and save to your local computer. (See Network Storage on page 47 to setup the storage.)

**Search for logs**

Click the type of log and then the Start Time and End Time. Click **Search** to start searching.

Click **First Page**, **Prev Page**, **Next Page**, and **Last Page** to show the logs. Click **Save Log** to save the logs to your computer.
**System Information**

System Information page shows the camera’s basic information.

<table>
<thead>
<tr>

System Configuration

Device Settings

Setup your camera name and location for easy identification. This camera name will also be recognized by other network camera software as the name of this camera. OSD, On Screen Display, camera name is referring to this setting as well.

<table>
<thead>
<tr>
<th><strong>Names</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Camera Name:</strong> Name of the camera. The camera name setup here can be discovered by other network camera software and OSD, On Screen Display. The default camera name is the model number: TV-IP314PI</td>
</tr>
<tr>
<td><strong>Location:</strong> Label where you installed this camera for reference</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Authentication</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>RTSP:</strong> TV-IP314PI’s video stream can be accessed with RTSP, Real Time Streaming Protocol. Only the administrator and users can view this video stream Un-checking this box will allow everyone access to this video stream without authentication. Default: Checked.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Service</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Enable Telnet:</strong> TV-IP314PI embedded Telnet service for multiple camera control for system developer. Default: disabled.</td>
</tr>
</tbody>
</table>
User Accounts

You can setup up to 16 user accounts to access the camera’s video stream with a web browser or real time video stream (RTSP). Only one administrator account can be setup to configure the TV-IP314PI and cannot be deleted.

Add:

Click Add button to add one user account

Modify:

To change a user’s name and password, highlight the user by clicking on it. Then, click Modify button. You can change the user’s name and password. You can also change the administrator’s password here. But, the administrator’s name is fixed, you cannot change that.

Click OK to save the changes.

Time Settings

The accuracy of the system clock is important for scheduling and accurate logging. You can synchronize the system time with your computer, or automatically check the time accuracy with a network time server (NTP server).

Automatic Update

NTP Server: Specify a time server (NTP server) to synchronize with. (e.g. pool.ntp.org)

Interval: The time interval that the TV-IP314PI will synchronize the time with NTP server. Default: 1440 minutes (24 hours)

Manual Time Sync

Device Time: The system time of this camera.

Set Time: Click the calendar icon and manually select the date. Check the Sync. with computer time to copy the time from your computer.

Click Save to save the changes
**Daylight Savings**

Set up daylight savings.

Automatic Update

- **Enable DST:** Check this box if your time zone has daylight savings.
- **Start Time:** Enter the date that daylight savings starts.
- **End Time:** Enter the date that daylight savings ends.
- **DST Bias:** Enter how much time the daylight saving adjusted by daylight savings.

*Click Save to save the changes*

**Live View Settings**

Set up the live view video quality, file size and file saving directories.

**Live View Parameters**

**Live View Buffer:** Configure the buffer size for live view video stream. With low buffer size setting, you can get real-time video stream, but the video may be stop and go if the network is congested. With high buffer setting, you can have smooth video streaming, but the video is delayed from the time happening. Medium size can have moderate video stream smoothness and time delay.
Record File Settings

Record file size: This size of live view video recording. You can choose 256MB, 512MB, or 1GB a file. Smaller file size is good for many short recordings.

Save record files to: Click Browse and then choose a new destination if you want to save the file somewhere else.

Save downloaded files to: Click Browse and then choose a new destination if you want to save the file somewhere else.

Picture and Clip Settings

Save snapshots in live view to: Click Browse and then choose a new destination if you want to save the file somewhere else.

Save snapshots when playback to: Click Browse and then choose a new destination if you want to save the file somewhere else.

Save clips to: Click Browse and then choose a new destination if you want to save the file somewhere else.

Click Save to save the changes

Maintenance

You can restart, load camera settings and upgrade the camera firmware on this page.

Reboot

Reboot: Click this button to reboot this camera.

Reset

Reset: Reset all camera parameters, except the IP parameters and user information.

Default: Load complete factory default to the camera.
Inport Config. File

**Config File:** To load previously saved settings, click **Browse** to find the configuration file and then click **Import.**

**Status:** Shows the status in loading configuration file.

Export Config. File

**Export:** Click Export to download configuration file. The file will be downloaded to the Download folder by default.

Remote Upgrade

**Firmware:** Click Browse to find the latest firmware and then click **Upgrade.**

**Status:** Shows the status in firmware upgrade.

Network Settings

**TCP/IP**

Setup your basic IPv4 and IPv6 network settings on this page.

TRENDnet may periodically release firmware upgrades that might add features or fix problems associated with your camera. To find out if there is a firmware upgrade available for your device, please check your TRENDnet model and version using the link.

http://www.trendnet.com/downloads/

1. If a firmware upgrade is available, download the firmware to your computer.
2. Unzip the file to a folder on your computer.
3. Read the firmware upgrade instruction for specific version update information.
4. Log into the TV-IP314PI.
5. Getting to this Maintenance page to upgrade firmware.

</tr>
</tbody>
</table>

## Port

You can change the service port numbers of TV-IP314PI and enable/disable RTSP or HTTPS services.

### Port Numbers

<table>
<thead>
<tr>
<th>Port Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>HTTP Port</strong></td>
<td>The default web access port. You can change the port number. However, you cannot disable the web service. The default port number is 80.</td>
</tr>
<tr>
<td><strong>RTSP Port</strong></td>
<td>The Real-Time Streaming Protocol port for video streaming. You can change the port number or disable the service by uncheck the box. The default port number is 554.</td>
</tr>
<tr>
<td><strong>HTTPS Port</strong></td>
<td>The secured web service port. You can change the port number, or you can disable the service by uncheck the box. The default port number is 443.</td>
</tr>
</tbody>
</table>

*Click Save to save the changes*

*Note: To view the camera remotely, please make sure the HTTP and RTSP ports are opened (port forwarded) on your network/router.*
**DDNS**

Dynamic Domain Name Service, DDNS, allows you to find your camera from the Internet with an easy to remember domain name.

**Enable DDNS:** Check this box to enable DDNS Service.

**DDNS Type:** Select a DDNS service provider.

- NO-IP
- DNS
- DynDNS
- DDNS

**Server Address:** Enter the DDNS server address.

**Domain:** Enter your registered domain/host name on selected DDNS service.

**User Name:** Enter the account name.

**Password:** Enter the password.

**Confirm:** Enter the password again.

*Click Save to save the changes*

---

**PPPoE**

Setup PPPoE (ADSL) connection to connect your camera with your ISP, Internet Service Provider.

**Enable PPPoE:** Check this box to enable PPPoE connection.

**Dynamic IP:** The IP address assigned by ISP

**User Name:** Enter the account name.

**Password:** Enter the password.

**Confirm:** Enter the password again.

*Click Save to save the changes*
SNMP

SNMP Settings allows you to assign the contact details, location, community name and trap settings of SNMP. This is a networking management protocol used to monitor network-attached devices. SNMP allows messages (called protocol data units) to be sent to various parts of a network. Upon receiving these messages, SNMP compatible devices (called agents) return data stored in their Management Information Bases.

### SNMP V1/V2

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable SNMPv1</td>
<td>Check this box to enable SNMP v1 management.</td>
</tr>
<tr>
<td>Enable SNMPv2c</td>
<td>Check this box to enable SNMP v2c management.</td>
</tr>
<tr>
<td>Read SNMP Community</td>
<td>Specify the password to access the SNMP community for read only access.</td>
</tr>
<tr>
<td>Write SNMP Community</td>
<td>Specify the password for access to the SNMP community with read/write access.</td>
</tr>
<tr>
<td>Trap Address</td>
<td>Specify the IP address for the SNMP trap community.</td>
</tr>
<tr>
<td>Trap Port</td>
<td>Specify the port number for the SNMP trap community.</td>
</tr>
<tr>
<td>Trap Community</td>
<td>Specify the name of SNMP trap community.</td>
</tr>
</tbody>
</table>

### SNMP V3

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable SNMPv3</td>
<td>Check this box to enable SNMP v3 management.</td>
</tr>

Quality of Service (QoS)

Setup traffic prioritization tags the video packets to go through network switches and routers with assigned priority. You can set the Differentiated Services Code Point (DSCP) bits on outgoing data streams. The QoS capable network device will forward different data in different priorities. The meaning of the value is different in different DiffServ domains. Consult your network manager for the setup details.

TV-IP314PI

Brightness: Use the slider or enter a number (0-100) to adjust the image brightness. Default: 50

Contrast: Use the slider or enter a number (0-100) to adjust the image contrast. Default: 50

Saturation: Use the slider or enter a number (0-100) to adjust the color saturation. The greater number means the color will be more saturated. Default: 50

Sharpness: Use the slider or enter a number (0-100) to adjust the image sharpness. Default: 50
Light sensitivities

**Smart IR:** Smart IR can adjust the strength of infrared lights at night depending on the distance of an object to maintain the maximum IR light distance and while maintaining a clear picture when object is close by. Default: On.

**Max. Exposure Time:** Adjust this value for exposure time for each picture. You can choose a value between 1/3 second to 1/100,000 second. The default value is 1/30 second exposure time for each picture.

**Video Standard:** This is the base frequency for the video refresh rate. It is recommended to set to the same frequency of your local video standard (NTSC: 60, PAL: 50). Default: 60Hz.

**Day/Night Switch:** Choose whether you want the camera to be set to the day mode (color video) or night mode (IR enhanced black/white video). You can manually set it to day mode or night mode, adjust by lighting (Auto), or pre-define schedule.

**Auto:**
**Sensitivity:** The light sensor sensitivity.
**Switch Time:** The time delayed to switch between modes. Longer switch time can prevent unnecessary mode flipping if an object is blocking the light source temporarily. Range: 5-120 seconds, default: 5 seconds.
**Schedule:**
Use quick selection or enter the time down below. Click **OK** to confirm the time you want to set.

<table>

</thead>
</table>

Choose horizontal, vertical or both to adapt to the physical position of installation.

**Image adjustments**

**Back Light Compensation and Wide-Dynamic-Range:**

**Back light compensation:** Setup a fixed light source position to compensate and adjust the image in the dark. Choose the area that you want to enhance (dark area, not light source).

*Note:* By default, the WDR is disabled. Please enable WDR to set up back light compensation.

**WDR:** Wide Dynamic Range compensates for the dark area dynamically.

- **WDR Level:** The level of compensation. Range: 0-100%, default: 20%.

**White Balance:**

Choose a color temperature as the white color and compensate the color on the whole image.

**Digital Noise Reduction:**

Choose the mode of noise reduction.

- **Normal Mode**
  - **Noise Reduction Level:** Adjust the effect of digital noise reduction. Range: 0-100%, default: 100%

- **Expert Mode**
  - **Space DNR Level:** Adjust the special digital noise reduction with adjacent pixels. Change the range (0-100%) to change the adjacency effect, default: 50%
  - **Time DNR Level:** Adjust the 3D digital noise reduction. Compare and reduce noise between video frames. Range: 0-100%, default: 100%

Click **Reset** to reset the display adjustments.
On Screen Display Settings

Display the camera name and the time the video is shooting on the screen.

| Display Name: | Check this box to display the product name that was setup in the device settings. |
| Display Date: | Check this box to display system time. |
| Display Week: | Check this box to display time of the week. |
| Time Format: | Select 12 or 24-hour time format. |
| Date Format: | Select the date format. |
| Display Mode: | Choose how the text will show on the screen. |
| OSD Size: | Select the text size from 16 to 64 or adjusted by screen size automatically. |

Move the red box to position the text. Click Save to save the changes.

Text Overlay

Display extra information on the screen over the image.

| Check Box: | Check this box to enable text overlay. |
| Text Field: | Enter the text you want to display. You can enter your local language if you want. The text field allows maximum 44 English letters or 20 non-English characters. |

Move the red box to position the text. Click Save to save the changes.
**Privacy Mask**

Create a masking area to keep your privacy. You can create up to four independent masking areas by clicking and dragging on the screen.

Enable Privacy Mask: Check this box to enable privacy masking.

Stop Drawing: Click this button to stop drawing.

Clear All: Click this button to clear all the masking areas.

*Click Save to save the changes*

**Video Recording**

- **Pre-record:** Recording time before trigger event.
- **Post-record:** Recording time after trigger event.
- **Overwrite:** Select Yes to allow older recordings to be overwritten.
- **Enable Record Schedule:** Check this box and then click Save to enable video recording.

*Click Save to save the changes*
Edit: Click Edit to edit the recording schedule. The Edit Schedule window will pop up.

1. Select day of the week you want to edit.
2. Select All Day or Customized schedule of the day.
3. Set the time period and the event you want to trigger the video recording continuous (always recording) or motion detection.
4. Click Select All or the weekday you want to have the same schedule on different day.
5. Click another day of the week by clicking on its tab to set the next schedule. Click OK when you have finished your settings.

Events

Motion Detection

Set up how the motion detection event will be triggered and what actions will be triggered.
Enable Motion Detection: Check this box to enable motion detection. Click **Save** to save the choice.

Enable Motion Tracking: Check this box to enable motion tracking. Motion tracking is a dynamic display that shows the current status of motion detection. The motion tracking is displayed with grids in green. The grid area represents the camera motion is happening. Click **Save** to save the choices.

**Draw Area:** Click **Draw Area** button to start drawing. Click and drag on the area you want to set up the motion detection. You can draw up to 8 different areas. Click **Stop Drawing** to stop drawing motion detection areas. The red grids represent the motion detection area.

**Sensitivity:** Move the slider to adjust detection sensitivity.

**Clear All:** Click this button to clear all the set up areas.

### Arming Schedule

**Edit:** Click **Edit** to edit the recording schedule. The Edit Schedule window will pop up.

1. Select day of the week you want to edit.
2. Select **All Day** or **Customized** schedule of the day.
3. Set the time period and the event you want to trigger the video recording **continuous** (always recording) or **motion detection**.
4. Click **Select All** or the weekday you want to have the same schedule on different day.
5. Click another day of the week by clicking on its tab to set the next schedule. Click **OK** when you have finished your settings.

### Video Tampering

This is to detect if the camera has been tampered with and surveillance is compromised. You can set up tamper proof notifications to alert the system manager to check the camera.

**Notification**

- **Send Email**: Check this box to send an e-mail notification when motion is detected.
- **Network Storage**: Check this box to record video to network storage when motion is detected.
- **Upload to FTP**: Check this box to send snapshots to an FTP server when motion is detected.

*Click **Save** to save the changes*
Enable Tamper Detection: Check this box to enable tamper detection. Click Save to save the settings.

Draw Area: Click Draw Area button to start drawing. Click and drag on the area you want to set up the tamper detection. You can setup only one area for tamper detection. Click Stop Drawing to stop drawing motion detection areas. The gray block represents the detection area.

Sensitivity: Move the slider to adjust detection sensitivity.

Clear All: Click this button to clear all the set up areas.

Arming Schedule

Edit: Click Edit to edit the recording schedule. The Edit Schedule window will pop up.

1. Select day of the week you want to edit.
2. Select All Day or Customized schedule of the day.
3. Set the time period and the event you want to trigger the video recording continuous (always recording) or motion detection.
4. Click Select All or the weekday you want to have the same schedule on different day.
5. Click another day of the week by clicking on its tab to set the next schedule. Click OK when you have finished your settings.

Notification

Send Email: Check this box to send an e-mail notification when motion is detected.

Click Save to save the changes
### Notification

Provide notifications for other system events, set up your notifications here.

**Notification**

- **Notification Type:** First, choose the exception type, and then choose the corresponding action.
- **Send Email:** Check this box to send an e-mail notification when motion is detected.

*Click Save to save the changes*

### Snapshot

You can set up your camera to continuously taking snapshots or taking snapshots only when events happening.

**Continuous**

- **Enable:** Check this box to take snapshots continuously.
- **Format:** Save snapshots in JPEG format
- **Resolution:** Uses the same resolution set in Video Format for the snapshot resolution.
- **Quality:** Choose a compression quality for snapshots.
- **Interval:** State the time interval between snapshots. The default interval is 10 seconds.
### Event triggered

**Receiver**

**Receiver 1:** The first receiver’s name.
**Receiver 1’s Address:** The first receiver’s email address.
**Receiver 2:** The second receiver’s name.
**Receiver 2’s Address:** The second receiver’s email address.
**Receiver 3:** The third receiver’s name.
**Receiver 3’s Address:** The third receiver’s email address.

Click Save to save the changes

*Note: Many ISPs does not allow service port 25 going through their network. Other popular ports are 587 and 465. Please consult your email service provider and ISP for detail.

---

**Network Storage**

**Network Storage**

Network Storage must be setup before it can be managed. For storage management, please refer to the next section.

The TV-IP314PI supports two formats of network storage file systems: NFS and CIFS. NFS, Network File System, is natively supported by Linux computers and most NAS, Network Attached Storage. CIFS, Common Internet File System, is natively supported by Windows® systems and now is generally supported by Linux. (OS X® file sharing is not standard SMB and not compatible as a network storage disk here.)

You can add up to 8 network storages for your camera. The recordings will subsequently be stored in these spaces. Save video from the first storage and then the next when the first one is full. Click on the entry to change the settings and click Save to save the settings.
| **No:** | The sequential number of the network storage. |
| **Type:** | The type of storage. |
| **Server Address:** | Enter the IP address of your network storage. |
| **File Path:** | Enter the shared folder as file path for network storage. You can create a folder under the shared folder and make it a network volume here. Just create the folder and enter the correct path name here. |
| **Capacity:** | Enter the size of the disk space you want to assign for this storage. The minimum disk space requirement is 8GB. If you do not want to limit the size and use the full physical disk space, put number 0 in this field. |
| **File System:** | Choose between NFS or CIFS for file system. If you assign the network storage on a Windows® computer, set it to CIFS. |
| **User Name:** | Enter the user name if the network storage requires user name and password. Enter any non-blank letters if no authentication is required. |

**Password:** Enter the password to access the network storage. Enter any non-blank letters if no authentication is required.

Click **Save** to save the changes. The camera may reboot to make the network storage available. Go to the next section to format and manage your network storage.

**Tip:** To create a network storage on your Windows® based system, create a shared folder and then test your set up with another computer. Enter the IP address of the computer here and enter the shared folder name with a leading forward slash. For example, if you have a shared folder named “SMB”, enter “/SMB” in the **File Path**.
Storage Management

Network Storage must be setup before it can be managed. To setup storage, please refer to the previous section.

Format:
Select a network storage volume and then click **Format** to format your network storage. This action will format the network volume (shared folder) for video recording. Placeholder files (formatting files) will be created to make sure disk allocation is appropriate and the file searching is optimized.

The volume format is a proprietary user space storage format. Meaning that you visit the shared folder and see some structured files. Please do not modify these files manually. Modifying these files may cause recording and playback problems. Access your recording and system log via the web management user interface to download the recording and snapshots.

**Capacity:** The total capacity this network storage can use.

**Free Space:** The free space left for video recording, snapshot and log.

**Status:** The connection status to the network storage.

**Property:** This network storage is read only or can be read and write.

**Progress:** The progress of ongoing task.

*Note: The formatting progress depends on the size of the storage and the network bandwidth. It takes a while if you are formatting a big volume or the network connection is not stable.*
FTP Server

Enable Snapshot to FTP: Check this box if you want to store snapshots on the FTP.

Server Address: Enter the FTP server IP address.

Port: Enter the service port number of the FTP server.

User Name/Anonymous: Check Anonymous if the FTP server does not require authentication. Enter the User Name if the FTP server requires authentication.

Password: Enter the password of the FTP account.

Confirm: Enter the password again to make sure the password was entered correctly.

Directory Structure:
- Save in root directory: You can choose to store all files in the same folder of FTP login.
- Save in directory: Structure your folders with camera name or IP address.

Directory:
- Use Camera Name: Use the camera name to organize the saved files.
- Use Camera IP: Use the camera IP address to organize the saved files.

Click Save to save the changes
Appendix

Direct video access - RTSP

To access the video directly through RTSP, just visit the camera IP address on port 554 by default. For example: 192.168.10.30:554 use the admin or user password the login.

Regulations

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The availability of some specific channels and/or operational frequency bands are country dependent and are firmware programmed at the factory to match the intended destination. The firmware setting is not accessible by the end user.

RoHS

This product is RoHS compliant.
Europe – EU Declaration of Conformity

This device complies with the essential requirements of the Directive 2004/108/EC and 2006/95/EC. The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the Directive 2004/108/EC and 2006/95/EC:

- **EMC**: EN 55022:2010 CLASS B
  - EN50130-4:2011
  - EN 61000-3-2:2014
  - EN 61000-3-3:2013

</table>
Limited Warranty

TRENDnet warrants its products against defects in material and workmanship, under normal use and service, for the following lengths of time from the date of purchase.

TV-IP314PI – 3 Years Warranty

If a product does not operate as warranted during the applicable warranty period, TRENDnet shall reserve the right, at its expense, to repair or replace the defective product or part and deliver an equivalent product or part to the customer. The repair/replacement unit’s warranty continues from the original date of purchase. All products that are replaced become the property of TRENDnet. Replacement products may be new or reconditioned. TRENDnet does not issue refunds or credit. Please contact the point-of-purchase for their return policies.

TRENDnet shall not be responsible for any software, firmware, information, or memory data of customer contained in, stored on, or integrated with any products returned to TRENDnet pursuant to any warranty.

There are no user serviceable parts inside the product. Do not remove or attempt to service the product by any unauthorized service center. This warranty is voided if (i) the product has been modified or repaired by any unauthorized service center, (ii) the product was subject to accident, abuse, or improper use (iii) the product was subject to conditions more severe than those specified in the manual.

Warranty service may be obtained by contacting TRENDnet within the applicable warranty period and providing a copy of the dated proof of the purchase. Upon proper submission of required documentation a Return Material Authorization (RMA) number will be issued. An RMA number is required in order to initiate warranty service support for all TRENDnet products. Products that are sent to TRENDnet for RMA service must have the RMA number marked on the outside of return packages and sent to TRENDnet prepaid, insured and packaged appropriately for safe shipment. Customers shipping from outside of the USA and Canada are responsible for return shipping fees. Customers shipping from outside of the USA are responsible for custom charges, including but not limited to, duty, tax, and other fees.

WARRANTIES EXCLUSIVE: IF THE TRENDNET PRODUCT DOES NOT OPERATE AS WARRANTED ABOVE, THE CUSTOMER’S SOLE REMEDY SHALL BE, AT TRENDNET’S OPTION, REPAIR OR REPLACE. THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE AND ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, EITHER IN FACT OR BY OPERATION OF LAW, STATUTORY OR OTHERWISE, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

TRENDNET NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME FOR IT ANY OTHER LIABILITY IN CONNECTION WITH THE SALE, INSTALLATION MAINTENANCE OR USE OF TRENDNET’S PRODUCTS.

TRENDNET SHALL NOT BE LIABLE UNDER THIS WARRANTY IF ITS TESTING AND EXAMINATION DISCLOSE THAT THE ALLEGED DEFECT IN THE PRODUCT DOES NOT EXIST OR WAS CAUSED BY CUSTOMER’S OR ANY THIRD PERSON’S MISUSE, NEGLECT, IMPROPER INSTALLATION OR TESTING, UNAUTHORIZED ATTEMPTS TO REPAIR OR MODIFY, OR ANY OTHER CAUSE BEYOND THE RANGE OF THE INTENDED USE, OR BY ACCIDENT, FIRE, LIGHTNING, OR OTHER HAZARD.

LIMITATION OF LIABILITY: TO THE FULL EXTENT ALLOWED BY LAW TRENDNET ALSO EXCLUDES FOR ITSELF AND ITS SUPPLIERS ANY LIABILITY, WHETHER BASED IN CONTRACT OR TORT (INCLUDING NEGLIGENCE), FOR INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY KIND, OR FOR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATE, OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE SALE, INSTALLATION, MAINTENANCE, USE, PERFORMANCE, FAILURE, OR INTERRUPTION OF THE POSSIBILITY OF SUCH DAMAGES, AND LIMITS ITS LIABILITY TO REPAIR, REPLACEMENT, OR REFUND OF THE PURCHASE PRICE PAID, AT TRENDNET’S OPTION. THIS DISCLAIMER OF LIABILITY FOR DAMAGES WILL NOT BE AFFECTED IF ANY REMEDY PROVIDED HEREIN SHALL FAIL OF ITS ESSENTIAL PURPOSE.

Governing Law: This Limited Warranty shall be governed by the laws of the state of California.

Some TRENDnet products include software code written by third party developers. These codes are subject to the GNU General Public License (“GPL”) or GNU Lesser General Public License (“LGPL”).

Go to http://www.trendnet.com/gpl or http://www.trendnet.com Download section and look for the desired TRENDnet product to access to the GPL Code or LGPL Code.
