## Preset Audio Profiles

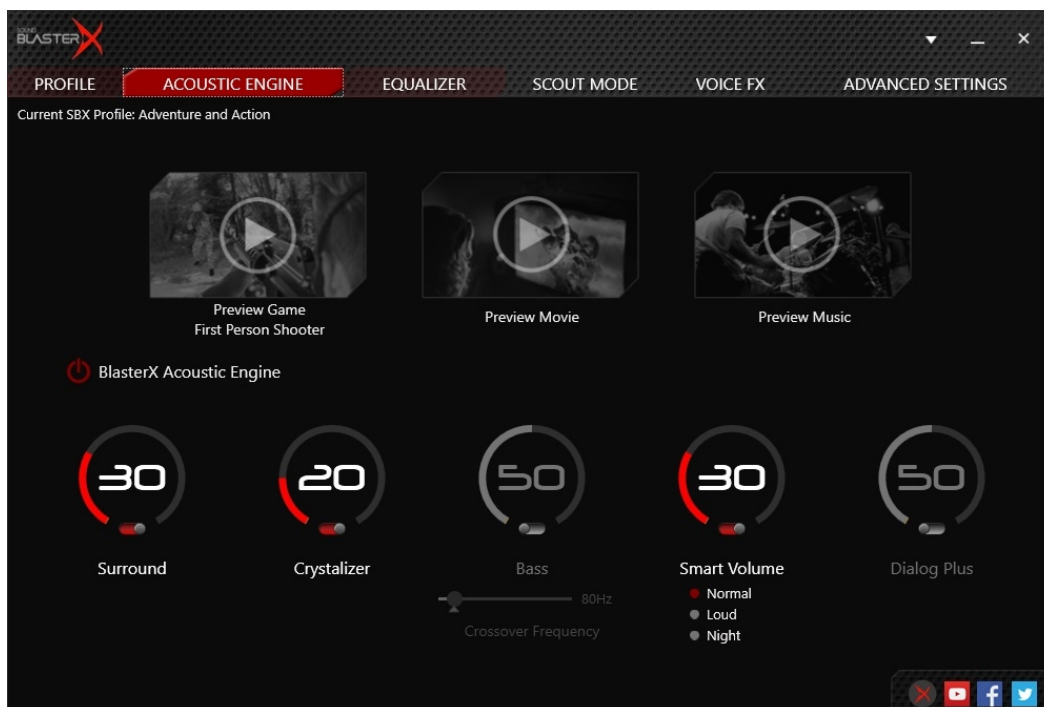

Select from 6 preset profiles to enhance essential audio details in your game, movie or music.

- **Adventure and Action** enhances clarity of audio details for a cinematic experience and a gaming edge, allowing you to hear your enemies to evade capture or set-up an ambush.
- **Driving Simulation** magnifies details such as tire noises as the car races along — enabling you to hear subtle differences and cues you in on how your car is behaving on the road while racing.
- **First Person Shooter** increases spatial reality and perception with virtual surround for enhanced situational awareness — important in close-quarter firefights.
- **Movies** adds more immersion and depth to make movies come alive while boosting the clarity of voices in movies for clearer dialog over explosive sounds.
- **Music** restores the dynamic range that is lost in compressed music files and adds warmth for long hours of music listening without fatigue.
- **Real Time Strategy** boosts audio clarity of elements that are key in allowing gamers to pickup points while reducing distractions — letting you stay focused when pitched against time.

Enjoy an unbelievably true-to-life audio experience, whether it's over stereo speakers or headphones.
- **Crystalizer** restores the dynamic range that is lost when iTunes and MP3 music gets compressed. This makes the music sound as good as the artist originally intended, and adds an enhanced level of realism for movies and games.
- **Bass** fills in the low frequency tones and gives the extra impact for a better entertainment experience. It dramatically improves the sound experience without a subwoofer.  
**Crossover Frequency** determines the frequencies to be redirected to the subwoofer.
- **Smart Volume** addresses the problem of abrupt volume level changes during playback and between songs by automatically and continuously measuring volume, and intelligently applying gain and attenuation to compensate for those changes.

## Additional guide for Mobile Users

Generally a 4-pole stereo cable bundle allows you to connect your headset to your iPhone / Android phone / tablet. However, some phone / tablet's 4-pole female jack has different configuration and this cable is unable to support if the configuration is different from the jack (bundled) as illustrated below:

Should you be keen to connect your headset to an MP3 Player, you will need to check if the configuration of its 4-pole female jack is compatible.

# Safety Information

---

Refer to the following information to use your product safely, and to reduce the chance of electric shock, short-circuiting, damage, fire, hearing impairment or other hazards. Improper handling may void the warranty for your product. For more information, read the warranty available with your product.

- Do not dismantle or attempt to repair your product.  
**Refer all servicing to authorized repair agents.**
- Do not expose your product to temperatures outside the range of 0°C to 45°C (32°F to 113°F).
- Do not pierce, crush or set fire to your product.
- Keep your product away from strong magnetic objects.
- Do not subject your product to excessive force or impact.
- Do not expose your product to water or moisture.  
If your product is moisture-resistant, take care not to immerse your product in water or expose it to rain.

## Earphones

- Do not listen to audio on your earbuds or headphones at high volume for prolonged periods of time as hearing loss may result. For users in the United States, go to [www.hei.org](http://www.hei.org) for more information.
- Do not listen to your audio device at high volume when driving, cycling or crossing the road, especially in heavy traffic or any other traffic condition where such use will hinder safe travel on the roads. We recommend that consumers be extremely cautious when using this device on the road.

## Avoid Hearing Damage

Permanent hearing loss may occur if the headphone is used at high volume. Set the volume to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use the headphone at high volume.
- Avoid turning up the volume to block out noisy surroundings.
- Turn the volume down if you can't hear people speaking near you.

## **IMPORTANT — A LIRE AVEC ATTENTION**

Ecouter de manière prolongée, à un très haut volume sonore de la musique (au dessus de 80 decibels), aumoyen d'un casque ou d'écouteurs, peut entraîner une détérioration irréversible et définitive de vos facultés auditives. L'utilisateur sera tenté d'augmenter, petit à petit, son réglage habituel, risquant ainsi d'atteindre un niveau dangereux pour ses oreilles. Afin de protéger votre santé, et vos oreilles, veillez à maintenir le volume de la sortie casque de votre appareil à un niveau adapté et à interrompre son utilisation régulièrement et particulièrement si des symptômes, comme des troubles de l'ouïe, se manifestent.

N'utilisez pas le casque ou les écouteurs pendant la conduite d'une voiture, d'une bicyclette ou de tout autre véhicule motorisé, afin d'éviter tout accident de la circulation. En outre, il est interdit dans certains pays d'utiliser un casque ou des écouteurs en conduisant. Il peut être également dangereux d'écouter à volume élevé tout en marchant, spécialement aux passages piétons. Soyez toujours extrêmement prudent et cessez d'utiliser cet appareil dans les situations présentant des risques d'accident.

Evitez d'utiliser le casque ou les écouteurs à volume élevé. Les médecins spécialistes de l'audition déconseillent une écoute continue à volume trop élevé. Si vous percevez un sifflement dans les oreilles, réduisez le volume ou cessez l'écoute.

Maintenez un volume d'écoute modéré. Vous pourrez ainsi entendre les sons extérieurs et être attentif aux gens qui vous entourent.
