- Do not touch the plug with wet hands.
- Do not obstruct the air outlet/inlet.
- The unit is for DC 12V voltage only, please use the original adapter.
- Please do not use strong corrosive detergent to damage the surface and clean the unit carefully.
- Please unplug the unit when cleaning or not in use, otherwise, a fire disaster may occur due to short circuit.
- This unit is not suitable for the disabled, the mentally handicapped or the child. The exception is if the person responsible for safety is present and assists in the operation of the unit.
- Do not wash or reuse the HEPA filter.
- Do not place the unit in a place with heavy moisture or smoke.
- Clean the unit and remove the dust on the plug regularly.
- Please keep the unit away from places with flammable gas like heater or fireplace.
Please read the manual carefully before using and keep it well.

**Product Components**

- **Body**
- **Composite filter**
- **Composite filter**

**Product Features**

- **Compact Design**
- **One-button Start, Easy Operation**
- **LED Indicator, Differ From Others**

**Purification Functions**

- **Smoke**
- **Animal dander, Fibers**
- **Dust, Mites, Pollen**

Effectively filters and eliminates indoor PM2.5, smoke, dust and pollen; removes formaldehyde, VOC and creates a fresh environment.

- **Primary filter**: Intercepts hair, fiber, velvet, large particles, dander, etc.
- **HEPA filter**: Removes particulate pollutants such as PM2.5, fumes, catkins, dander, and pollen from the air. Filter bacteria such as *Staphylococcus aureus*.
- **Carbon sponge filter**: Effectively purifies harmful gaseous pollutants such as formaldehyde and VOC in the air.

**DC 12V AC Adapter**
Operation Tips

- Please make sure the adapter (DC 12V) of the air purifier is compatible with the socket.
- Please make sure the plug is plugged in and tightly connected to the power outlet.
- Do not use if the power, plug or unit is damaged, or the product is not working properly.
- Do not touch the power cord with wet hands.

Warnings

1. Firstly plug the output of the power adapter into the connector on the back of the purifier.
2. Plug the other end of the adapter into a suitable power outlet and the purifier goes into standby.
3. Tap the power button to turn on the purifier.
4. Purifier works normally.

Applications

Office Table  Reading Room  Hotel Room  Baby Room

Buttons Instruction

[POWER BUTTON]

a. When the power supply DC 12V is connected, the On/Off indicator lights red and the purifier enters the standby state.
b. In the standby state, touch the On/Off indicator lights white, the product enters the working state, and the fan runs at the default intermediate speed.
c. In the working state, touch the On/Off, the fan will cycle between medium speed, high speed, shutdown (shutdown can be delayed for 100ms), and low speed. The speed level indicator light is displayed accordingly.
d. When it is adjusted to the sleep level (low speed), the light is turned off after 5 seconds, and the key light is turned off to enter sleep mode. The fan runs at a low speed. After entering the sleep mode, touch the key to wake up the sleep mode, and continue to enter the sleep mode when there is no shift position within 5 seconds.

[FILTERS LIFESPAN]

a. High-speed 1 hour for 0.5 hour calculation, mid-speed 1 hour for 1 hour calculation, low-speed 2 hours for 1 hour calculation, when the filter life time limit is ≥95% hour, the power button lights in red and flash twice per second, until the lifespan reset. If not reset after the lifespan used up, the power button lights in blue and flash twice per second, until the lifespan reset.
b. Filter life reset: When the filter life reaches the limit of 95%, On/Off button flash in red after power on for 1 min (regardless of the speed). When reaches 100%, the red and white lights will be on for a long time 1 min after press the On/Off. Long press On/Off for more than 5 seconds in the power on state, red light flashes 6 times (twice per second) to complete reset.
c. If reset is required, press On/Off for more than 5 seconds in the first 5 seconds after power-on of standby state. The On/Off LED flashes for six times (twice one second), it is resetted.
