

1 Find a Location for Onyx Plus and Mount it

Select either the **Dash Mount** method or the **Vent Mount** method for your Onyx Plus. You will need a phillips-head screwdriver to complete the installation.

IMPORTANT! To make the cable connections easier, wait until after you have connected all the cables to the dock before you attach the dock to the dash or to a vent.

Dash Mount Method:

IMPORTANT! The air temperature needs to be at least 60°F to install the Dash Mount. If needed, turn on the heater in your vehicle.

A. Select a flat surface for the Dash Mount with ample room for Onyx Plus. Avoid mounting on leather surfaces. Choose a location that doesn't interfere with the driver's vision or access to driving controls, one that won't interfere with the deployment of airbags or other safety equipment, and makes Onyx Plus easily accessible for operation. (Airbag locations are typically marked with "SRS" logos.)

B. Orient the adhesive foot so that Onyx Plus is easily accessible. Loosen the knob and adjust the adhesive foot to position **1, 2, or 3**, and then tighten it.

C. Attach the Dash Mount to the *PowerConnect* Vehicle Dock using the 4 provided screws.

D. Before you attach the Dash Mount to the dash, skip ahead and finish the remainder of the vehicle installation so that the cables are attached to the dock.

E. Once the cables have been attached to the dock, clean the mounting surface in the vehicle with the alcohol preparation pad and let it dry thoroughly.

F. Once the surface is dry, remove the adhesive liner. Press and hold the Dash Mount in place for 30 seconds. Allow the adhesive to cure for 2-4 hours.

G. You can tilt the dock mounting plate in your preferred direction.

Vent Mount Method:

A. Select a vent with ample room for Onyx Plus, one that won't interfere with the deployment of airbags or other safety equipment, and makes Onyx Plus easily accessible for operation. (Airbag locations are typically marked with "SRS" logos.)

B. Some vents have recessed louvers. If yours are recessed, remove the regular vent clamps and install the extended vent clamps.

Vent Mount Rear View

C. Attach the Vent Mount to the *PowerConnect* Vehicle Dock using the 4 provided screws.

D. Before you attach the Vent Mount to the vent, skip ahead and finish the remainder of the vehicle installation so that the cables are attached to the dock.

E. Once the cables have been attached to the dock, install the Vent Mount onto the vehicle vent. (Note that for clarity the illustrations below do not show the Vehicle Dock attached to the Vent Mount.)

- i.** Insert the vent mount into the vent opening.
- ii.** Push until hooked on the rear of the vent louver. Rest the foot against the bottom of the vent.
- iii.** If necessary, adjust the tilt of the Vent Mount by repositioning the foot to a different tilt adjustment hole.

2 Mount the Magnetic Mount Antenna

A. Mount the Magnetic Mount Antenna outside your vehicle, on a clean and dry horizontal surface that will always face the sky.

B. Choose the location for the antenna according to your type of vehicle. Center it between the left and right sides, and away from other antennas.

TIP: Use the Alcohol Prep Pad to clean the surface.

4 Connect the PowerConnect Power Adapter

A. Insert the *PowerConnect* Power Adapter into your vehicle's cigarette lighter or power adapter socket. Plug the other end into the **red PWR** connector at the rear of the *PowerConnect* Vehicle Dock.

B. Use the wire guide on the top of the dock to organize the wires connected to the dock.

C. Place Onyx Plus into the dock and press the **Power** button.

3 Route the Antenna Cable

NOTE: These instructions are for a sedan or coupe where the antenna is mounted above the front windshield. The Onyx Plus User Guide (with Vehicle Kit) has detailed antenna cable routing instructions for all types of vehicles. Go to www.siriusxm.com/guides for the User Guide.

A. Tuck the antenna cable under the windshield rubber molding and run it to the nearest corner.

B. Route the cable out of the molding and into the rubber weather stripping around the door opening.

C. Lift the weather stripping. Tuck and run the cable inside it to the bottom of the door opening. Replace the weather stripping.

D. Pull the cable out and route it to Onyx Plus.

E. Plug the Magnetic Mount Antenna connector into the **silver ANT** connector at the rear the *PowerConnect* Vehicle Dock.

TIP: Include enough slack in your routing to accommodate open doors or the hood lid. Coil any excess cable in a hidden location and keep it away from any vehicle pedals or controls.

5 Verify Signal Reception

A. Be sure the vehicle is outside and the antenna has a clear view of the sky.

B. Verify that you are receiving the XM signal. The Onyx Plus Radio should be tuned to XM channel 1, the XM Preview channel. There should be at least two bars on the lower left corner of the screen that denotes antenna signal strength. If not, be sure that you have mounted the antenna on the outside of the vehicle, as shown in step 2, and that the vehicle is parked outdoors with a clear view of the sky. Move the vehicle away from any obstructed area, for example, if you are parked in a garage, or parked near a large structure.

C. You can also press **menu** and then press **down** to scroll to and highlight **Signal Indicator**. Press the **Select** button. The Satellite and Terrestrial bars show the strength of the signal being received. If the signal reception is good, press and hold **menu** to return to XM channel 1, the XM Preview channel.

6 Connect the Audio

Decide on one of the following in-box audio connection options. You can also refer to "Connect the Audio" in the Onyx Plus User Guide (with Vehicle Kit) for additional audio connection options, such as a cassette adapter or the FM Direct Adapter (FMDA) (both sold separately). Go to www.siriusxm.com/guides for the User Guide.

Option 1: Best: Use the provided **Aux In Cable**, if your vehicle's stereo system has an auxiliary input jack.

A. Plug one end of the cable into the **green AUDIO** connector at the rear of the **PowerConnect Vehicle Dock** and the other end into the auxiliary input jack on the vehicle's stereo system.

B. Turn on your vehicle's stereo system and set it to play from the auxiliary input source.

C. You should hear XM channel 1 through your vehicle's stereo system.

D. Go back to Step 1 "Find a Location for Onyx Plus and Mount It" on the opposite side and finish installing the Dash or Vent Mount. Then the installation is complete.

TIP! Refer to your vehicle's owner's manual to find the location of the auxiliary input jack, or consult the vehicle dealer.

Option 2: Good: Use the **PowerConnect** feature of Onyx Plus. **PowerConnect** plays the XM audio through your vehicle's FM radio.

A. Use the SiriusXM FM Channel Finder at www.siriusxm.com/fmchannel. Go to the website and enter your zip code. The Channel Finder will suggest a list of available FM channels in your area. For convenience, write down or print out the list.

B. Pick the first FM channel on your list. Tune your vehicle's FM radio to this FM channel. You should only hear static or silence. If not, try the next FM channel on your list.

NOTE! If you are using the Vehicle Dock from the Universal Xpress Car Kit instead of the **PowerConnect Vehicle Dock** which came with your Onyx Plus, you will have to disable AUX Detect. Refer to "Using the Vehicle Dock From the Universal Xpress Car Kit" of the Onyx Plus User Guide (with Vehicle Kit), and complete the additional instructions before continuing with the next step. Go to www.siriusxm.com/guides. The audio connection will be through your vehicle's FM radio, but it is not **PowerConnect**.

C. Set your Onyx Plus to transmit on the same FM channel that you have selected on your vehicle's FM radio:

i. Press **menu** and then press **down** ↓ to scroll to and highlight **FM Settings**. Press the **Select button**.

ii. **FM Channels** will be highlighted. If it is not highlighted, press down ↓ to scroll to and highlight **FM Channels**. Press the **Select button**.

iii. Press **down** ↓ to scroll to and highlight **FM2**. Press the **Select button**.

iv. Press **left** ← or **right** → to tune in steps of .2, or press **up** ↑ or **down** ↓ to tune in steps of 1 to select the available FM channel you have chosen. Press the **Select button** to select the FM channel.

v. **Start Using** will be highlighted. Press the **Select button**.

vi. The selected FM channel will be confirmed on the display screen. Press and hold **menu** to return to the main display screen.

D. You should now hear XM channel 1 through your vehicle's FM radio. If you are not satisfied with the audio quality, move to the next FM channel on your list and repeat the process. Continue until you have found an FM channel with which you are satisfied.

MATCH FM CHANNELS

E. If you are satisfied with the audio quality, go back to Step 1 "Find a Location for Onyx Plus and Mount It" on the opposite side and finish installing the Dash or Vent Mount. Then the installation is complete.

TIP! You may find an FM channel with static or silence on your vehicle's FM radio that does not work with your Onyx Plus. It is possible that some type of inaudible interference is present that prevents reception of the SiriusXM broadcast. Your only options are to use another FM channel or a different audio connection method.

7 Subscribe

You can follow either the general activation and subscription process or use the on-board activation guide to activate your Onyx Plus and subscribe to the XM service.

General activation and subscription process:

A. Make sure your Onyx Plus is turned on, receiving the XM signal, and tuned to XM channel 1 so that you can hear XM audio.

B. Make a note of your XM Radio ID. You can find it by selecting **Radio ID** in menu items, by tuning to channel 0, on a label on the bottom of the gift box, and on the label on the back of your Onyx Plus.

NOTE! The XM Radio ID does not use the letters I, O, S, or F.

C. To subscribe:

- Online: Go to www.siriusxm.com/activatenow to access or set up an online account, subscribe to the service, and activate your Radio.
- OR
- By phone: Call **1-866-635-2349**.

*The phone number shown above may differ from the one shown on your Onyx Plus. All numbers are valid.

Activation usually takes 10 to 15 minutes after you have completed the subscription process, but may take up to an hour. We recommend that your Radio remain on until subscribed. Once subscribed, the Radio will receive and you can tune to the channels in your subscription plan.

Press **up** ↑ or **down** ↓ to tune to other channels, and **left** ← or **right** → to browse the different categories of channels. Learn what all the buttons do in the panel below.

Activation guide:

For your convenience, Onyx Plus has an on-board activation guide. You can activate your radio and subscribe to the XM service by using this guide, where you will be guided step-by-step through the subscription process. To access and use the guide, simply follow these steps:

A. Turn Onyx Plus on and press the **menu button**.

B. **Activate Radio** will be highlighted. Press the **Select button**.

C. Follow the directions on each successive screen until you complete the subscription process.

Onyx Plus Button Functions

Up and Down Buttons

Press to preview and tune to channels through the channel lineup; also press to scroll through lists and highlight items in lists.

Left and Right Buttons

Press to search for channels by category.

Power/FM Button

Press to turn Radio on and off; Press and hold to quickly access FM channel presets.

Select Button

When in a menu or list, press to confirm selection of highlighted item; when in TuneMix or TuneScan, press to end TuneMix/Scan and continue playing the currently tuned channel, or press and hold to end Tune Mix/Scan and return to the previously tuned channel.

Menu/Alerts Button

Press to access advanced features and configuration options; when in configuration options, press and hold to return to main display screen; Press and hold to save a Song, Artist, or Game alert.

TuneMix/TuneScan Button

Press to begin TuneMix; Press and hold to begin TuneScan.

Jump/Traffic Weather Button

Press to go back to the previous channel to which you were listening.

Banks/Direct Button

Press to switch between favorite channel banks (A/B); Press and hold to enter a channel number using the number buttons and directly tune to the channel.

Number Buttons 0-9

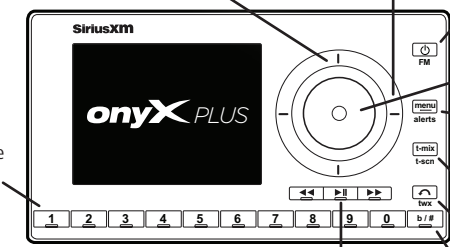

Press to tune to a stored favorite channel; Press and hold to store a favorite channel. Also used to enter channel numbers when the Direct button is pressed.

Channels stored in buttons 1-9 in banks A & B are smart favorites used for enhanced pause and replay, and for advanced music features TuneStart, TuneMix, and TuneScan.

Channels stored in button 0 in banks A & B are regular favorites.

Pause and Replay Buttons

Pause, rewind, and replay live radio and smart favorite channels.

Onyx Plus Main Display

When listening to a channel, information about the channel and what is currently playing is displayed.

The Onyx Plus User Guide is available at www.siriusxm.com/guides.

Specifications

System

Power Requirements: 9-16 V DC, 500 mA (max)
Operating Temperature: -4°F to +140°F (-20°C to +60°C)
Audio Output: 1.0 V_{rms} (max)

Onyx Plus Radio

Dimensions: 4.5 in (W) x 2.4 in (H) x 0.7 in (D)
115 mm (W) x 63 mm (H) x 17 mm (D)
Weight: 3.4 oz (96 g)

PowerConnect Vehicle Dock

Dimensions: 4.0 in (W) x 2.4 in (H) x 1.2 in (D)
102 mm (W) x 61 mm (H) x 31 mm (D)
Weight: 1.6 oz (46 g)
Audio Connector: 1/8 in (3.5 mm) female
Antenna Connector: SMB male

PowerConnect Power Adapter

Dimensions: 3.7 in (W) x 1.7 in (H) x 1.3 in (D)
94 mm (W) x 43 mm (H) x 34 mm (D)
Weight: 2.4 oz (69 g)
Input / Output: 9-16 V DC / 5 V DC, 1.5 A
Cable Length: Approximately 4.6 ft (1.4 m)

Vehicle Antenna

Type: SiriusXM Magnetic Mount
Connector: SMB female, right angle
Cable Length: Approximately 23 ft (7.0 m)

Aux In Cable

Connectors: 1/8 in (3.5 mm) stereo male to 1/8 in (3.5 mm) stereo male
Cable Length: Approximately 4 ft (1.2 m)

FCC Statement: The user is cautioned that changes or modifications not expressly approved by Sirius XM Radio Inc. can void the user's authority to operate this device. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1. This device may not cause harmful interference. 2. This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the installation instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: •Reorient or relocate the receiving antenna of the affected receiver. •Increase the separation between the SiriusXM equipment and the affected receiver. •Connect the SiriusXM equipment into an outlet on a circuit different from that to which the affected receiver is connected. •Consult the dealer or an experienced radio/TV technician for help. WARNING! The FCC and FAA have not certified this Satellite Radio Receiver for use in any aircraft (neither portable nor permanent installation). Therefore, Sirius XM Radio Inc. cannot support this type of application or installation.

What's in the Box?

CAUTION: Do not attempt to install, activate, or adjust any of the setting options described in this Quick Start Guide unless your vehicle is parked in a safe location.
