ICE MAKER
USER MANUAL

PICEM75
Description

1. Viewing window
2. Front Cover
3. LCD Display
4. Control Panel
5. Ice cube dispenser shoot
6. Ice cube dispenser puncher
7. Water drip tray
8. Water Outlet
9. Fan Cover
10. Water reservoir access door
11. Side shell
12. Top cover
13. Back cover
14. Water inlet hole
15. Power cord hole
16. Drain pipe

Before/First Use of Your Ice Maker

1. During transportation, the incline angle of the cabinet should not be over 45°. Do not turn the ice maker upside down. As this may damage the compressor and sealed system.
2. Remove all packing material and carefully check your ice maker to ensure it is in good condition and that there is no damage to the ice maker or power cord and plug.
3. The ice maker should be placed horizontally on a level surface. To ensure proper ventilation for your ice maker, allow 150mm of space at the top, the back and on each side. Do not install the ice maker near an oven, radiator, or any other heat source.
4. Before using the ice maker for the first time, please wait 2 hours after positioning it, and keep the front lid open for at least 2 hours.
5. Ensure that the voltage indicated on the ice maker corresponds with the voltage in your home.
6. Pure water is not allowed to be used on this unit; spring water is recommended.
7. Please always keep the viewing window close during ice making.
### Control Panel Operation

#### Display | Explanation
--- | ---
![Symbol 1] | Water is not enough in water reservoir, need to add water
![Symbol 2] | Ice on making,
  - if S at right top hand of it, then means small size ice on making
  - if M at right bottom hand, then means middle size ice on making
  - if L at right bottom hand, then means large size ice on making
![Symbol 3] | Unit is on ice dropping process
![Symbol 4] | Ice is full

#### Button | Operation
--- | ---
SMALL or S | Press it to select small size ice
M | Press it to select middle size ice (for ZB-10A and ZB-10C only)
LARGE or L | Press it to select large size ice
WATER | Press it to release water (for ZB-10B only)
ON/OFF | Press it to turn on or off the unit
Operating Instructions

Step 1
Plug in the machine into the socket.

Step 2
Open the water reservoir access door and add water as sketch A.
If your unit is ZB-10B or ZB-10C, you can add water with both sketch A and sketch B.

<table>
<thead>
<tr>
<th>Sketch A</th>
<th>Sketch B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Add Water by Manual (All Three models)</td>
<td>Connect Unit to Water Faucet (ZB-10B &amp; ZB-10C only)</td>
</tr>
</tbody>
</table>

If the unit is on ice making, indicator is on, but want to make more ice, then add water to the water reservoir, but please take out the ice first, then add one full cup of water so as to avoid overflow of water when the ice melt.

Step 3
Press ON/OFF button to start the machine.

Step 4
Water will be pumped into the water tray from the water reservoir automatically, this takes about 30 seconds
Note: If no water is pumped to the water tray over two cycles but the water in reservoir is enough, then please open the drain cap, and let several drops water runs out. Then press ON/OFF button again to restart the unit

Step 5
Select the button S/SMALL, M, L/LARGE to choose the ice size you may need
Note: when temperature lower than 15 degrees, S/SMALL is recommended, when temperature over 30 degrees, L/LARGE ice is recommended.

Step 6
Ice making cycle begins, ice will be frozen onto the evaporator fingers.
Note: the ice making time depends on the ambient temperature
Step 7
Once ice making cycle is finished, the water tray will tilt forward; the remaining water flows back to the water reservoir and the ice cubes will drop from the fingers.

Step 8
In about 15-35 seconds, the water tray will tilt backward, ice in produced in previous cycle will be pushed to ice reservoir directly, unit back to work from step 4 to step 6 again

Step 9
Push the ice cube dispenser puncher button(sketch 6) to get ice, the indicator will be on
Note: Please put your cup below the ice cube dispenser shoot directly.
Notice: If the ice is stored in the unit for long time, the ice may freeze and stick together, then no ice will be dispensed even the ice is full, if so, please kindly use scoop included in the unit to break the ice first, then push the puncher button.

Step 10
Press ON/OFF button to stop the unit

Step 11( for ZB-10B only)
When you push the WATER button, you can get water
Note: if you need to get cold water, at least the ice making function should be turn on.
Please make sure your cup is below the cold water outlet, or water will be splashed every where

Caring
1. Clean the inner liner, ice collecting tray, water box, ice shovel and evaporator frequently. When cleaning, unplug the unit and remove the ice cubes. Use a diluted solution of water and vinegar to clean the inside and the outside surface of the ice maker. Do not spray ice maker with chemicals or diluted agents such as acids, gasoline or oil. Rinse thoroughly before starting.
2. Keep ventilation openings in the appliance enclosure, or in the built-in structure, clear of obstruction.
   Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
3. If the icemaker is reused after a long time, the water pump may not pump sufficient water due to an air block, the deficient water indicator turns on in this case. To correct this press the START button again, then the icemaker will work normally.
4. To ensure the cleanliness of the ice cubes, water in the water reservoir should be replaced every 24 hours.
5. If the compressor stops for any reason such as water shortage, too much Ice, power off, etc... Do not start the system right away, wait 3 minutes, and then re-start the Ice maker.
6. Always use fresh water before starting ice production either at initial installation or after a long shut-off period.
7. This unit is for home use only, not for outdoor use, if it is necessary for use outside, please make sure the view window is closed.
Safety Notice

In order to avoid any accidents, please refer to following operation:
1. Disconnect power before servicing.
2. Do not pull directly on wire when plugging or unplugging the unit.
3. If ice is abnormal, please call the seller.
4. It is normal for the compressor and condenser surface to reach temperatures between 70°C and 90°C during operation and surrounding areas may be hot. Please don't touch it.
5. Due to fast freezing, ice cubes may appear “Cloudy”. This is trapped air in the water and it will not affect quality or taste of ice.
6. When out of use, please open the drawer at least 2cm to allow for air circulation and avoid any metallic components becoming rusted.
7. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
8. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
9. Children shall not play with the appliance.
   Cleaning and user maintenance shall not be made by children without supervision
10. WARNING: fill with bottled or good quality tap water only. (Do not fill with fruit juices or other drink types).
11. WARNING – Keep the air vents on the sides of the machine unblocked at all times.
12. WARNING – Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
13. WARNING – Do not damage the refrigerant circuit.
14. WARNING – Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
**Troubleshooting**

1. Please note, if a power failure occurs due to disconnection of the power cord, or the off power button has been pushed off during an ice making cycle, small ice chips may formed and lodge in the automatic shovel causing it to jam. If this occurs, the ice chips may be removed by disconnecting the power cord and gently pushing the shovel to the rear of the cabinet and removing the ice chips, then restarting.

2. Please restart the ice maker by pressing Stop and then Start. If the Ice shovel does not push the Ice into the Ice collector after the formed Ice drops from the evaporator finger while at the same time the M light is on, check to see if the water tray is horizontal or balanced. If not then adjust by pressing the Ice shovel lightly with your finger. Then re-start the Ice maker.
