Glossary
Antenna Connection

If you are not connecting your TV to a cable or satellite box, you must connect an antenna or a cable outlet to the TV to receive broadcast signals.

Connect a cable from an antenna or cable outlet to the ANT IN connector as shown in the diagram below.

An antenna connection is not necessary when a cable box or satellite receiver is used.

Video Device Connections

Your TV has a variety of connectors for video input from external devices such as cable boxes, satellite receivers, Blu-ray players, DVD players, camcorders, and gaming consoles. Below is a list of featured connectors shown in descending order of picture quality.

- HDMI
- Component
- Composite (A/V)

Connect a video device to the TV via an HDMI connector for the best picture quality. If the device does not have an HDMI connector, try a component connector to get the next best picture quality.

The number of connectors and their names and locations may vary depending on the model.

Refer to the external device's operating manual when connecting it to the TV. The number of external device connectors and their names and locations may vary depending on the manufacturer,
HDMI Connection

The following types of HDMI cables are recommended:

- High-Speed HDMI Cable
- High-Speed HDMI Cable with Ethernet

Use an HDMI cable with a thickness of 0.55 inches (14mm) or less.

Using a non-certified HDMI cable may result in a blank screen or a connection error.

Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

This TV does not support HDMI Ethernet Channel, Ethernet is a LAN (Local Area Network) built with coaxial cables standardized by the IEEE.

Refer to the diagram and connect the HDMI cable to the video device’s HDMI output connector and the TV’s HDMI input connector.

The number of connectors and their names and locations may vary depending on the model.

Once the connection has been made, press the **SOURCE** button to select the connected external device.
Component Connection

Refer to the diagram and connect the Component cable to the TV’s component input connectors and the device’s component output connectors.
Make sure the cable colors match the connector colors.

Once the connection has been made, press the **SOURCE** button to select the connected external device.
Composite (A/V) Connection

Refer to the diagram and connect the AV cable to the TV’s AV input connectors and the device’s AV output connectors.

If you are using the TV’s AV input connectors, connect the device's audio output to the TV using a Y connector.

Once the connection has been made, press the SOURCE button to select the connected external device.
Audio Input and Output Connections

Your TV has a variety of connections for audio input from devices such as Blu-ray players and DVD players and for audio output to such devices as amplifiers. The connections are listed below.

- Digital Audio (Optical)
- Audio (Analog)

For better audio quality, it is a good idea to use an AV receiver.

The number of connectors and their names and locations may vary depending on the model.

Refer to the external device’s operating manual when connecting it to the TV. The number of external device connectors and their names and locations may vary depending on the manufacturer.

When connecting the external device to the external speaker, be sure to connect the external speaker to the TV first, and then connect the external device. Sync problems may develop if the connection order is reversed.

Digital Audio (Optical) Connection

Connecting an AV receiver to the TV via a digital audio (optical) connector lets you listen to digital audio.

- Connecting a device using an optical cable does not automatically turn off the TV speakers. To turn off the TV’s speakers, set TV Sound Output (Sound > Speaker Settings > TV Sound Output) to something other than TV Speaker.
- Adjust the audio device’s volume using its remote control.
- An unusual noise coming from the audio device while you are using it may indicate a problem with the audio device itself. If this occurs, ask for assistance from the audio device’s manufacturer.
- Digital audio is only available with 5.1-channel broadcasts.

Refer to the diagram and connect the optical cable to the TV’s digital audio output connector and the device’s digital audio input connector.
Audio Output Connection

Refer to the diagram and connect an audio cable to the TV’s audio output connector and the device’s audio input connector.

Once the connection has been made, press the **SOURCE** button to select the connected external device.

Connecting to a Computer

You can connect a computer directly to the TV using an HDMI or DVI to HDMI cable and use the TV as a monitor. You can also connect the TV to a computer via your home network and access media files saved on the computer on the TV screen. The kinds of connections you can make are listed below.

**To use the TV as a Computer Monitor**

- Connect through the HDMI Port using an HDMI cable.
  
  You can connect the computer to the TV using an HDMI cable and display the computer screen on the TV.

- Connect though the HDMI (DVI) port using a DVI to HDMI cable.
  
  You can connect a computer to the TV by connecting the computer’s DVI port to the TV’s HDMI (DVI) port with a DVI to HDMI cable and display the computer screen on the TV.

**To Access Media Files on a Computer and View or Play Them on the TV**

- Connect Through Samsung Link.
  
  Quickly access photo, video, and music files saved on a computer on which Samsung Link software is installed, even if you do not connect the TV directly to the computer.

- Connect Through DLNA Using Your Home Network.
  
  Quickly access photo, video, and music files saved on a computer by connecting the TV and the computer to the same router or AP.
Connecting Through the HDMI Port

For an HDMI connection, we recommend one of the following HDMI cable types:

- High-Speed HDMI Cable
- High-Speed HDMI Cable with Ethernet

⚠️ Use an HDMI cable with a thickness of 0.55 inches (14mm) or less. Using a non-certified HDMI cable may result in a blank screen or a connection error.

⚠️ Some HDMI cables and devices may not be compatible with the TV due to different HDMI specifications.

⚠️ This TV does not support HDMI Ethernet Channel. Ethernet is a LAN (Local Area Network) built on coaxial cables standardized by the IEEE.

⚠️ Many computer graphics adaptors do not have HDMI ports, but have DVI ports instead. If your computer graphics adaptor has a DVI port, use a DVI to HDMI cable to connect the computer to the TV. For more information, refer to “Connecting With a DVI to HDMI Cable”.

Refer to the diagram and connect an HDMI cable to the computer's HDMI output connector and the TV’s HDMI input connector.

⚠️ The number of ports, and their names and locations may vary depending on the model.

Once the connection has been made, press the **SOURCE** button to select the connected external device.
Connecting With a DVI to HDMI Cable

If the graphics adapter of your computer does not support the HDMI interface, connect the computer to the TV with a DVI (Digital Visual Interactive) to HDMI cable. Note that the DVI to HDMI connection is only supported by the HDMI (DVI) port and does not support audio signal transmission. To listen to the computer sound, connect external speakers to the computer’s audio output connector.

For the resolutions supported by the TV, refer to “Read Before Connecting a Computer (Supported Resolutions)".

Refer to the diagram and connect the DVI to HDMI cable to the TV’s HDMI (DVI) port and the computer’s DVI output port.

Once the connection has been made, press the SOURCE button to select the connected external device.
Connecting Through Samsung Link

Quickly access photo, video, and music files saved on a computer on which Samsung Link software is installed. In addition, using Samsung Link, you can view or play the content of a computer which is registered with Samsung Link through your Samsung account, even if the computer and the TV are not connected to the same router or AP.

1. On a computer, navigate to the Samsung content and service portal (http://link.samsung.com), and then sign into your Samsung account.

   ✍️ To install the Samsung Link desktop software, you need to sign into your Samsung account. If you don’t have a Samsung account, create one first.

2. Install the Samsung Link desktop software. When the installation is complete, the computer will be registered with Samsung Link.

3. Specify a folder on the computer to connect to the TV. You can view or play the photo, video, and music files in the specified folder on the TV.

   ✍️ For more information about using the Samsung Link desktop software, refer to the Help section of the Samsung Link software.

Connecting Through DLNA Using Your Home Network

Quickly access and play photo, video, and music files stored on a computer on the TV.

1. Connect the TV and the computer to the same router or AP. Once you connect them to the same router or AP, a home network is configured.

   ✍️ DLNA is the technology that lets TV’s, computers, and mobile devices connected to one wired or wireless router share content.

2. On the computer, select [Control Panel] > [Network and Internet] > [Network and Sharing Center] > [Change advanced sharing settings], and then select [Choose media streaming options...] to activate media streaming.

3. From the list, set the TV to [Allowed].

4. Launch Windows Media Player on a computer. Select [Settings] > [Library Management], and then add the location where photo, video, and music files are saved to play them on the TV.

   ✍️ Alternatively, you can move the files to the default folder specified by Windows Media Player, and then play or view them on the TV.

   ✍️ As long as File Sharing is activated, unauthorized access may occur. When you do not need to access data, disable File Sharing.
Connecting To a Mobile Device

You can connect a mobile device such as a smartphone or tablet directly to the TV, or connect it to the network and display the mobile device’s screen or play its content on the TV. The kinds of connections you can make are listed below:

- **Connect by Mirroring the Mobile Device’s Screen on the TV (Screen Mirroring)**
  
  Wirelessly connect the TV and the mobile device with the mirroring function. You can view the mobile device’s screen on the TV screen.

  
  📩 This option is available only on a mobile device that supports the mirroring function.

- **Connect Mobile Devices without a Wireless Router (Wi-Fi Direct)**
  
  Wi-Fi Direct enables you to connect the TV and the mobile device without a router or AP. Quickly access and play photo, video, and music files in the connected mobile device on the TV.

  
  📩 This option is available only on a mobile device that supports the Wi-Fi Direct function.

- **Connect Through Samsung Link**
  
  Samsung Link enables you to play photo, video, and music files saved on a Samsung Link-enabled mobile device easily, without the need for a connection to the TV.

- **Connect Through DLNA Using Your Home Network**
  
  You can conveniently play photo, video, and music files saved on a mobile device by connecting the mobile device and the TV to the same router or AP.
Screen Mirroring

MENU > Network > Screen Mirroring Try Now

Wirelessly connect a mirroring-enabled mobile device to the TV and play the video and audio files stored on the device on the TV. Mirroring refers to the function that plays the video and audio files located on a mobile device on a TV and on the mobile device simultaneously.

💡 To use the Screen Mirroring function, the mobile device must support a mirroring function such as AllShare Cast or Screen Mirroring. To check whether your mobile device supports the mirroring function, please visit the mobile device manufacturer’s website.

💡 The video or audio may intermittently stop depending on network conditions.

Connecting via a mobile device

1. On the mobile device, run Screen Mirroring. The mobile device searches for available devices to connect to.

2. In the search result list, select the TV. The TV displays a pop-up at the top of the screen.

3. In the pop-up, select Allow to connect the mobile device.

💡 All previously allowed mobile devices will automatically connect without needing approval.

💡 If you select Deny, the device cannot connect. In addition, you are setting the device’s connection status to Deny and it will not be able to connect in the future unless you change its connection status. To change the connection status of a denied device, Navigate to Network > Screen Mirroring > Device Manager, select the device, and then select Allow.
Connecting by Automatically Allowing the Connection

1. Navigate to Network > Screen Mirroring, and then select Screen Mirroring. The Screen Mirroring function starts. You can also start screen mirroring by pressing the SOURCE button on your remote, and then selecting Screen Mirroring from the list at the top of the screen.

2. Launch Screen Mirroring on your mobile device. The device searches for available devices.

3. Select the TV from the list. The TV automatically allows the connection and the device connects.

   If the mobile device cannot connect, try turning the TV off and on.

Managing the Connection Status of Previously Connected Mobile Devices

   This function is only available if devices have previously connected to the TV or have previously attempted to connect and been denied.

1. Navigate to Network > Screen Mirroring > Device Manager. The TV displays a list of devices that have previously connected to the TV or have tried to connect to the TV and been denied. The status of the connection (Allow/Deny) is also displayed.

2. Select a device. A pop-up appears.

3. In the pop-up, you can select Allow connection, Deny connection, or Delete the device from the list.
Connecting Mobile Devices without a Wireless Router (Wi-Fi Direct)

Navigate to **MENU > Network > Wi-Fi Direct**

You can connect a mobile device with the Wi-Fi Direct feature directly to the TV without using a wireless router or AP. By connecting a mobile device to the TV through **Wi-Fi Direct**, you can play photo, video, and music files saved on the mobile device on the TV.

- This option is available only on a mobile device that supports the Wi-Fi Direct function. Please check if your mobile device supports Wi-Fi Direct.
- The video or audio may intermittently stop depending on network conditions.

1. Enable Wi-Fi Direct on the mobile device, and then navigate to **Network** and select **Wi-Fi Direct** on the TV. The TV automatically scans for and displays a list of available devices. The TV’s name also appears on the mobile device.
2. Select the device from the list to initiate a connection. If a connection request is made by the TV, a permission message appears on the mobile device and vice versa.
3. Allow the connection. The TV and mobile device connect.

Connecting Through Samsung Link

Samsung Link lets you play the photo, video, and music files saved on a Samsung Link–enabled mobile device. In addition, using Samsung Link, you can play the content of a mobile device, which is registered to Samsung Link through your Samsung account, even if the mobile device and the TV are not connected to the same router or AP.

1. Run the Samsung Link app on the mobile device, and then sign in to your Samsung account.
   - To use Samsung Link, you have to sign in to your Samsung account. If you don’t have a Samsung account, create one first.
2. Access and play photo, video, and music files saved on the mobile device.
   - For more information about using the Samsung Link mobile software, refer to the Help section of the software.
Connecting Through DLNA Using Your Home Network

Quickly access and play photo, video, and music files stored on a mobile device on the TV.

1. Connect both the TV and the mobile device to the same router or AP. Once you connect them to a single router or AP, a home network is configured.

   - DLNA is the technology that lets TV’s, computers, and mobile devices connected to one wired or wireless router share content.

2. Enable File Sharing on the mobile device. You can play the content shared on the mobile device on the TV.

   - As long as File Sharing is active, unauthorized access can occur. When you do not need to access data, disable File Sharing.

Specifying the Name of the TV on a Network

MENU > Network > Device Name   Try Now

Choose or specify a name for the TV that will appear on mobile devices and laptop computers.

1. Select Device Name from the Network menu, and then choose a name from the list that appears. Alternatively, select User Input to enter a name manually.

2. Check the name from a mobile device or laptop computer.
Switching Between Video Sources

Press the **SOURCE** button to switch between external devices connected to the TV. For example, to switch to a game console connected to the second HDMI connector, press the **SOURCE** button. The **Source List** appears across the top of the screen. From the **Source List**, select HDMI2.

The connector names may vary depending on the product.

Other Functions Available When You Display the Source List

A number of functions are available in the pop-up **Options** menu when the TV displays the Source List. The functions that appear in the **Options** menu vary, depending on the source you selected in the Source List and the external device connected to the source.

To view the **Options** menu, press the **TOOLS** button or press and hold the ® button.

The functions that appear in the **Options** menu can include any of the following:

- **Edit Name**: Lets you assign a device name to an input source, for example, Blu-ray to HDMI1. To assign a device name to an input source, follow these steps:
  1. Open the **Source List**, The list appears in a horizontal line across the top of the TV. Using your remote, highlight the source you want to assign a device name to.
  2. Select **Edit Name** in the **Options** menu. The on-screen keyboard appears.
  3. Using the keyboard, enter a new name. You can enter up to 15 characters.
  4. When finished, select **DONE** on the keyboard, and then press the ® button.

- **Information**: View information about the connected devices.

- **Remove USB**: Use to safely remove a USB device connected to the TV. This option is only available when a USB device has been selected.

- **Delete**: Use to delete an external device from a source. When you delete an external device from a source, you erase the information the TV has stored about the device and you delete the association the device has with the source.

The Universal Remote Function

This function may not be available depending on the country or model.

When you display the Source List, the **Universal Remote Setup** button is displayed in the upper right corner of the screen. Select this button to start the Universal Remote function. The Universal Remote function lets you control cable boxes, Blu-ray players, home theaters, and other external devices using your TV remote control. Refer to the "Controlling External Devices with the TV Remote - Using the Universal Remote" section for more information on using the Universal Remote function,
Displaying and Using the On-Screen Remote

The KEYPAD button may not be available depending on the model or area.

Press the KEYPAD button on the remote to display the On-Screen Remote on the TV’s screen. Use the On-Screen Remote to enter numbers, control content playback, and use the features and functions of the TV, just like a real remote.

The On-Screen Remote buttons may vary, depending on the TV model and the TV functions you are using.

Controlling External Devices with the TV Remote - Using the Universal Remote

**MENU > System > Universal Remote Setup**

This function may not be available depending on the model or region.

The universal remote control feature lets you control cable boxes, Blu-ray players, home theaters, and other third-party external devices connected to the TV using the TV’s remote control. For each external device you want to control, you must run the universal remote set up process. The first step in the process is connecting the IR extender cable (included) to the TV and positioning the transmitter end of the cable in front of the device you want to control.

CLUDING A

Certain external devices connected to the TV may not support the universal remote feature.

Connecting the IR Extender Cable

The color and design of the IR extender cable may vary depending on the model.

To begin the universal remote set up process, connect the IR extender cable (included) to the TV’s IR output connector as shown in the diagram. Then, position the transmitter end within 4 inches (10 cm) of the external device’s remote control sensor, pointing in the direction of the sensor.

There can be no obstacles between the transmitter end of the IR extender cable and the external device. Any obstacles will interfere with the transmission of the remote control signals.
Setting Up the Universal Remote Control

1. Turn on the external device you want to control with the universal remote function.
2. Press the **SOURCE** button on your remote to bring up the **Source** screen.
   - You can also start Universal Remote Setup through the TV's menu. Navigate to **System > Universal Remote Setup**.
4. The TV checks if the IR Extender cable is connected. If it confirms the connection, press the 🗣️ button.
5. Select the type of device you want to control - set-top-box, Blu-ray player, or home theater.
6. Follow the directions on the screen to complete the set up and register the device. The directions will be different, depending on the device you want to control.
   - If the external device does not respond after being registered, register it again using its model number.
   - You must leave the IR extender in place so that it faces the external device to be able to control the device.

Controlling an External Device with the TV Remote

During the universal remote set up process, the TV registers the connector (source) the external device is connected to. To control a registered external device with your TV's remote, select the external device on the Source List.

1. Press the **SOURCE** button on your remote.
2. Select the source (connector) the device is connected to (HDMI1, HDMI2, etc.). If the external device is a Blu-ray player, home theater, or similar kind of device, the external device’s home screen or menu appears on the TV screen. If the external device is a set-top-box, a channel appears on the screen.
3. Aim the remote at the IR sensor on the TV to control the device.
Universal Remote Features

1. Press **SOURCE** to display the **Source** list.

2. Select **Universal Remote Setup** from the top of the screen. This initiates the universal remote setup process.

3. Select an external registered device on the **Universal Remote Setup** screen. The following options are available:

   - **Use with Set-Top Box**
     
     Listen to the audio from a set-top box through the home theater that is connected to the TV.
     
     This is available only if you have selected a set-top-box in Step 3 and you have a home theater connected to the TV.

   - **Use with Blu-ray player**
     
     Listen to the audio from a Blu-ray player through the home theater that is connected to the TV.
     
     This is available only if you have selected a Blu-ray player in Step 3 and you have a home theater connected to the TV.

   - **Use with Home Theater**
     
     Listen to the audio from an external device through the connected home theater.
     
     This is available only if you have selected a set-top-box or Blu-ray player in Step 3 and you have a home theater connected to the TV.

   - **Source Setup**
     
     Change the TV’s input source of your selected external device.

   - **Synced TV power**
     
     When set to On, the connected set-top-box turns off when you turn the TV off.
     
     This is available only if you have selected a set-top-box in Step 3. You can only sync TV power to a set-top-box.

   - **Rename**
     
     Rename the registered external device. The name can be up to 15 characters long.

   - **Delete**
     
     Remove the external device from the list of registered devices. The device is de-registered and you will no longer be able to control it with the Universal Remote function.
Controlling the TV with a Keyboard

Connecting a Keyboard

Connecting a USB Keyboard
Plug the keyboard cable into the TV’s USB port. A connection message appears on the screen.

Using the Keyboard
Use the following remote features with the USB keyboard connected to the TV.
- Arrow Keys (moving the focus), Windows Key (MENU Button), Menu List Key (TOOLS Button), Enter Key (Select/run item), ESC (RETURN Button), Number Keys (Number Buttons)
- F1 (A), F2 (B), F3 (C), F4 (D), F5 (E), F6 (SOURCE Button), F7 (CH List), F8 (Button), F9/F10 (Volume Buttons), F11 / F12 (Channel Buttons)
- Page Up/Page Down: Scroll web browser pages up/down.

Changing Keyboards
Select System > Device Manager > Keyboard Settings > Select Keyboard. Designate which keyboard to use.

Certain models do not support USB HID class keyboards.
Input Languages, Keyboard Type, and Switch Language Key

Select System > Device Manager > Keyboard Settings > Keyboard Options. The following options are available:

- **Keyboard Language**
  
  If the keyboard supports multiple languages, choose the language you want to use from the displayed list.

- **Keyboard Type**
  
  Match the Keyboard Type to the language selected in Keyboard Language.
  
  The Keyboard Type list varies depending on which language was selected under Keyboard Language.

- **Switch Input Language**
  
  If the keyboard supports multiple languages, choose the key you want to use to switch between languages.

Controlling the TV with a Mouse

**MENU** > System > Device Manager > Mouse Settings

Connecting a mouse makes it easy to control most of the functions on the TV.

Certain models do not support USB HID class mice.

Connecting a Mouse

Connecting a USB Mouse

Plug the mouse cable into the TV's USB port. A connection message appears on the screen.
Using the Mouse

Once a USB mouse is connected to the TV, a pointer appears on the TV’s screen. You can use this pointer to control the TV in the same way you use a pointer on a computer.

- **Selecting and Running an Item**
  Left-click using the mouse.

- **Showing Tools Buttons**
  Right-clicking displays the Tools buttons on the screen so that you can easily use the TV’s functions.
  
  
  The Tools buttons may vary depending on the function you are using.

- **Scrolling the TV Menu or Screen**
  Move the mouse wheel up or down. This scrolls the TV menu or screen up/down.

- **Exiting the TV Menu or Feature**
  Click the X button. This closes the menu.
  
  
  The X button appears on the TV menu when a mouse is being used. Left-clicking once while using a feature displays the X button on the current screen.

Changing Mice  

Select **System** > **Device Manager** > **Mouse Settings** > **Select Mouse**, Designate which mouse to use.

Only one mouse can be used at a time.

Changing Mouse Buttons and Pointer Speed  

Select **System** > **Device Manager** > **Mouse Settings** > **Mouse Options**, The following options are available:

- **Primary Button**
  Choose which button (left or right) to use to select and run items.

- **Pointer Speed**
  Adjust the movement speed of the pointer that appears on the screen.
Entering Text Using the On-Screen QWERTY Keypad

A QWERTY keypad appears when you need to enter text (entering the network password, logging into your Samsung account, etc.), allowing you to enter text using your remote control.

Using Additional Functions

Select 🛠 on the QWERTY keyboard screen. The following options are available:

- **Recommended text**
  
  Enable/disable the Recommended Text feature. Enabling the Recommended text feature allows you to quickly enter text starting with the characters you typed in by displaying recommended words. To enter the word "Internet," for example, all you have to do is enter "In" and select the word "Internet" from the list of recommended words. The word is memorized so that you can enter the same text again more easily.

- **Reset recommended text data**
  
  Delete both the recommended words and the memorized words to clear the list.

- **Predict Next Letter**
  
  Enable/disable the Text Prediction feature. Enabling the Text Prediction feature eliminates the need to find and select individual character keys. To enter the word "Internet," for example, select "I". A predicted word will then appear next to the I key. Simply select the predicted word to enter "Internet".

  This feature is limited to words that have previously been added to the dictionary.
Establishing a Wired Internet Connection

Connecting the TV to the Internet gives you access to online services and SMART features, and lets you update the TV's software quickly and easily through the Internet.

Using Cat 7 LAN Cables

We recommend using Cat 7 LAN cables to link your TV to the Internet Access Points.

⚠️ The TV will not be able to connect to the Internet if the network speed is below 10Mbps.

There are three ways to connect the TV to your Internet Access Points. Using Cat 7 cables, connect the TV to the Access Points as shown in one of the following illustrations.

- External Modem

- ① IP Router + ② External Modem
Connecting to a Wired Internet Network Automatically

**MENU > Network > Network Settings Try Now**

Automatically connect to an available network.

1. Set the **Network type** to **Wired**, and then select **Connect**.

2. The TV attempts to connect to an available network. Once it is successful, you will see a confirmation message. Select **OK**. If the attempt fails, try again, or connect manually.
Connecting to a Wired Internet Network Manually

**MENU > Network > Network Settings**

With networks that require a static IP address, you will need to enter the IP address, subnet mask, gateway, and DNS values manually to connect to the network. To get these values, contact your Internet Service Provider (ISP).

⚠️ Refer to the "Dynamic versus Static IP Addresses" section for more information on dynamic IP and static IP addresses.

1. Set the **Network type** to **Wired**, and then select **Connect**.

2. Select **Stop** when the TV attempts to connect to the network. Once the network connection has been interrupted, select **IP Settings**.
3. In the IP Settings screen, set IP Setting to Enter Manually.

4. Select IP Address. When the IP Address entry window appears, enter three digits into each field on the IP Address line. If the value has less than three digits, add leading zeroes. For example, to enter 10, enter 010. After three digits have been entered in a field, the highlight automatically jumps to the next field.

   Enter numbers by pressing the number buttons. After you have filled in all four fields, press the OK button again.

5. Repeat the process for Subnet Mask, Gateway, and DNS Server.

6. When done, select OK.

7. The TV attempts to connect to the network again using the settings you entered. Once it has established the connection, it displays a confirmation message. Select OK.

   The network connection speed may differ depending on the DNS server settings.
   For details on the DNS server settings, contact your Internet service provider (ISP).
Establishing a Wireless Internet Connection

Connecting the TV to the Internet gives you access to online services and SMART features, and lets you update the TV’s software quickly and easily through the Internet.

Connecting to a Wireless Internet Network Automatically

**MENU > Network > Network Settings**

Connect the TV to the Internet via a wireless router. Make sure you have the wireless router’s SSID (name) and password settings before attempting to connect. The password can be found on the wireless router’s configuration screen.

1. On the **Network Settings** screen, set **Network type** to **Wireless**. The TV automatically displays a list of available wireless networks.

2. Select a network. If the network you want doesn’t appear in the list, select **Add Network**, and enter the network’s SSID (name) manually.

3. Using the on-screen keyboard that appears, enter the password. When finished, select **Done**. If the selected network is not security-enabled, the TV will by-pass the on-screen keyboard and attempt to connect right away.
   - To select a character on the on-screen keyboard, highlight the character and then select it. Select **Caps** to view capital letters. Select the 123#& key to view additional characters.
   - To view the password as you enter it, select **Show Password**.

4. The TV attempts to connect to the network. Once a connection is established, the TV displays a confirmation message. Select **OK**. If the attempt fails, try again or connect manually.
Connecting to a Wireless Internet Network Manually

With networks that require a static IP address, you will need to enter the IP address, subnet mask, gateway, and DNS values manually to connect to the network. To get the IP address, subnet mask, gateway and DNS values, contact your Internet Service Provider (ISP).

ги Refer to the “Dynamic versus Static IP Addresses” section for more information on dynamic IP and static IP addresses.

2. Select a network. If the network you want doesn’t appear in the list, select Add Network, and enter the network’s SSID (name) manually.

3. Using the on-screen keyboard that appears, enter the password. When finished, select Done. If the selected network is not security-enabled, the TV will by-pass the on-screen keyboard and attempt to connect right away.
   - To select a character on the on-screen keyboard, highlight the character and then select it. Select Caps to view capital letters. Select the 123#& key to view additional characters.
   - To view the security password as you enter it, select Show Password.

4. Select Stop when the TV attempts to connect to the network. Once the network connection has been interrupted, select IP Settings.
5. In the IP Settings screen, set **IP Setting** to **Enter Manually**.

![IP Settings screen](image)

6. Select **IP Address**. When the IP Address entry window appears, enter three digits into each field on the IP Address line. If the value has less than three digits, add leading zeroes. For example, to enter 10, enter 010. After three digits have been entered in a field, the highlight automatically jumps to the next field.

   ![Enter numbers by pressing the number buttons](image)

7. Repeat the process for **Subnet Mask**, **Gateway**, and **DNS Server**.

8. When done, select **OK**.

9. The TV attempts to connect to the network again using the entered settings. Once it has established the connection, it displays a confirmation message. Select **OK**.

   ![Network connection speeds may differ depending on the DNS server settings](image)

   ![For details on the correct DNS server settings, contact your Internet service provider (ISP).](image)

### Connecting to a Wireless Internet Network with WPS

**MENU > Network > Network Settings**

If the router has a WPS push button, you can use it to connect the TV to the router automatically. WPS automatically configures the SSID and WPA key settings.

- **Your router must support WPS to use the WPS functionality.**

1. On the **Network Settings** screen, set **Network type** to **Wireless**. The TV automatically displays a list of available wireless networks.

2. Select **WPS (PBC)**, and then press the router’s WPS or PBC button within two minutes.

3. The TV automatically acquires the SSID and password settings, and then connects to the network. Once a connection is established, the TV displays a connection message. Select **OK**.
Troubleshooting Internet Connectivity Issues

If you are not able to connect the TV to the Internet, read the information below.

Troubleshooting Wired Internet Connectivity Issues

No network cable found

Make sure the network cable is plugged in. If it is connected, make sure the router is turned on. If it is on, try turning if off and on again.

IP auto setting failed

Do the following or configure the IP Settings manually.

1. Ensure that the DHCP server is enabled on the router and reset the router.
2. If this does not work, contact your Internet Service Provider for more information.

Unable to connect to the network

Do the following:

1. Check all IP Settings.
2. Ensure that the DHCP server is enabled on the router. Then, unplug the router and plug it back in.
3. If this does not work, contact your Internet Service Provider for more information.

Connected to a local network, but not to the Internet

1. Make sure that the Internet LAN cable is connected to the router’s external LAN port.
2. Check the DNS values in IP Settings.
3. If the problem persists, contact your Internet Service Provider.
Network setup is complete, but unable to connect to the Internet. If the problem persists, contact your Internet Service Provider.

Troubleshooting Wireless Internet Connectivity Issues

Wireless network connection failed. Selected wireless router not found. Go to Network Settings and select the correct router.

Unable to connect to a wireless router
Check the following:
1. Check if the router is turned on. If it is, turn it off and on again.
2. Enter the correct password if required.

IP auto setting failed
Do the following or configure the IP Settings manually.
1. Make sure that the DHCP server is enabled on the router. Then, unplug the router and plug it back in.
2. Enter the correct password if required.
3. If this does not work, contact your Internet Service Provider for more information.

Unable to connect to the network
Do the following:
1. Check all IP Settings.
2. Enter the correct password if required.
3. If this does not work, contact your Internet Service Provider for more information.
Connected to a local network, but not to the Internet

1. Make sure that the Internet LAN cable is connected to the router’s external LAN port.
2. Check the DNS values in IP Settings.
3. If the problem persists, contact your Internet Service Provider.

Network setup is complete, but unable to connect to the Internet

If the problem persists, contact your Internet Service Provider.

Checking the Internet Connection Status

MENU > Network > Network Status

Your TV’s menu may differ from the image above, depending on the model.

View the current network and Internet status.
With Smart Hub, you can surf the web and download apps.

Some of the Smart Hub services are for pay services. To use a for pay service, you must have an account with the service provider or a Samsung Apps TV account. Refer to the "Using Smart Hub with a Samsung Account" section for more information.

The TV must be connected to the Internet to access Smart Hub.

Some Smart Hub features may not be available depending on the service provider, language, or region.

To use Smart Hub, you must agree to the end user agreement and privacy policy. Otherwise, you will not be able to access the features and services associated with them. You can view the entire text of the Terms & Policy by navigating to Smart Hub > Terms & Policy. If you want to stop using Smart Hub, you can cancel the agreement.

Smart Hub service outages can be caused by disruptions in your Internet service.

Testing Smart Hub connections

If Smart Hub is not functioning, navigate to Support > Self Diagnosis > Smart Hub Connection Test. Diagnose the problem by checking the internet connection, your ISP, the Samsung server and the Samsung Apps panels.

After completing the test, if Smart Hub continues to have problems, contact your Internet Service Provider or a Samsung Contact Center.
Opening the First Screen

Press the \button while watching TV to open the First Screen.
On the First Screen, search through favorite apps, channels, or sources and access previously run or frequently used functions.

Setting your favorite item

1. Press the \button to open the First Screen, and move to a desired item.
2. Press and hold the button. The Options menu appears.
3. In the Options menu, select Add to Favorites to add the selected item to the favorite list, which will move top of the list.
   ⚠️ To delete a favorite item, select it, and then press and hold the button to display the context menu. Then, select Remove from Favorites.

Deleting browsing history

1. Press the \button to open the First Screen, and select Clear All. You will be asked to confirm your selection.
2. Select OK on the screen. Your browsing history is deleted completely.
   ⚠️ However, the Favorites list items will not be deleted.
   ⚠️ You can also delete your browsing history by selecting Clear All in the Smart Hub > First Screen Settings menu.
Moving to the Panel Screen
Press the button to open the First Screen, and select the Panel icon. On the Panel screen for each service panel, the following are available:

- SAMSUNG APPS
  You can enjoy a variety of free and for pay news, sports, weather, and gaming apps on the TV as you would on a smart phone or tablet.

Using the Smart Hub Tutorial

MENU > Support > Smart Hub Tutorial
Select Support > Smart Hub Tutorial. The tutorial introduces you to the basics of using Smart Hub and the Smart Hub panels.

Resetting Smart Hub

MENU > Smart Features > Smart Hub Reset
Smart Hub Reset lets you remove all Samsung accounts and everything linked to them, including apps, from the TV. To access Smart Hub Reset, you must enter your Smart Hub password.

To use Smart Hub again fully after resetting it, you must agree to the terms and conditions again.

Open the System menu, choose Setup, and then follow the initial setup procedure.
Creating a Samsung Account

Some of the Smart Hub services are for pay services. To use a for pay service, you must have an account with the service provider or a Samsung Apps TV account (a Samsung account). You can create a Samsung account using your email address as your ID.

To create a Samsung account, you must agree to the Samsung account end user agreement and privacy policy. Otherwise, you cannot create a Samsung account. You can view the entire content of the agreement by navigating to Smart Hub > Samsung Account > Terms and Conditions, Privacy Policy.

You can also create a Samsung account at http://content.samsung.com. Once you have an account, you can use the same ID on both the TV and the Samsung website.
Creating a Samsung Account Using the Create Samsung Account Menu

1. Press the **MENU** button on your remote, and then select **Smart Hub > Samsung Account > Create Account > Create Samsung Account**. The Terms and Conditions screen appears.

2. Press the ⬅ button to agree to the Terms and Conditions, and then press ⬅ button again.

   If you want to review the Terms and Conditions, select the View Details button.

3. Select the Email field. The keyboard pop-up appears. Enter your e-mail address. Use the directional keys to move from character to character, and then press the ⬅ button to select a character. Select the **Caps** button on the left to enter capital letters. Select the 123#& button to view and select additional symbols. Select `.com` at the bottom of the keyboard to enter .com.

4. When finished, select **Done** on the keyboard. The **Create Account** screen reappears.

5. Enter a password, your first name, and last name in the same fashion.

   If you want your account to be password protected, select "Password (Security: High)" in the field below the Password field. If you don’t, select "No password required". You still need to create a password, however. Other functions in your account require that you enter a password.

   Leave "Sign me in automatically" checked if you want the TV to log you in to your account automatically when you turn the TV on.

6. Select the Date of Birth field, and then select numbers pressing the up or down directional buttons, or, on a standard remote, using the number pad. Move from month to day to year by pressing the left or right directional buttons. Press the **RETURN** button on the remote when done.

7. After you have finished with all the fields, select **Next**. The Image Selection screen appears.

8. Select an image to use to identify your account. The Account Created screen appears. Press the ⬅ button. You are signed in to your Samsung account.

   If you have an existing account saved on the TV, you must be logged out of the account to create new accounts on the TV.
Creating a Samsung Account using a Facebook Account

If you have a Facebook account, you can use the account to create a Samsung account.

1. Press the MENU button on your remote, select Smart Hub > Samsung Account, And then select Log In. The Sign In screen appears.

2. Select , and then select Create with Facebook on the Sign In screen.

3. Enter your Facebook ID and password and select Sign In.

4. The Terms and Conditions screen appears.

5. Press the button to agree to the Terms and Conditions, and then press the button again.

6. Follow the directions on the Create Account screen to create a Samsung account.

7. Once a Samsung account is created, you are automatically signed in.

* If you create a Samsung account using your Facebook account, they are automatically linked.

Signing in to a Samsung Account

MENU > Smart Hub > Samsung Account > Log In

1. Press the MENU button on your remote, and then select Smart Hub > Samsung Account > Log In.

2. On the Log In screen, select your account, And then select Sign In on the Sign In screen.

3. If you don’t need to enter a password, login proceeds. If you need to enter a password, the on-screen keyboard appears. Enter your password. When finished, select Done.
Linking Your Samsung Account to External Service Accounts

Linking your Samsung account to an external service accounts lets you automatically log in to the linked account when you log into your Samsung account. For example, you can download the Facebook application which lets you access Facebook from your TV and then link your Facebook account to your Samsung account. Logging into your Samsung account then automatically logs you into your Facebook account as well and lets you access it directly from the TV.

To use Link Service Accounts, you must first log into your Samsung account.

Linking a Service Account

1. Log in to your Samsung Account.
2. Navigate to Smart Hub > Samsung Account, and then select Link Service Accounts. The accounts you can link to your Samsung account are displayed.
3. Select an account from the list. The Link to other accounts window appears on the screen.
4. Enter the current ID and password of the account to log in and select OK.
5. When the login is complete, the account is linked to the Samsung account.

Disconnecting a Linked Account

1. Navigate to Smart Hub > Samsung Account, select Link Service Accounts. Select an account to unlink.
2. A confirmation dialog box appears. Select Yes to unlink the account.
Changing and Adding Information to a Samsung Account

Using the Samsung Account menu, you can manage your Samsung account.

To change the account information, you must be logged in to your Samsung account.

1. Navigate to Smart Hub > Samsung Account, and then select Edit Profile. The keyboard appears.
2. Enter your password, and then select Done. The Edit Profile screen appears.

The Edit Profile screen lets you do the following:

- **Change Your Profile Image**
  Select Edit Profile Picture to change your profile image.

- **Choose a Samsung Account Sign-in Method**
  Select Sign-in Method and choose a sign-in method from the drop down that appears.

- **Turn Auto Login On or Off**
  Select Sign me in automatically. Auto Login automatically logs you in to your Samsung account when you turn the TV on. A check mark indicates that Auto Login is on.

- **Enter Basic User Information**
  You can enter your first name, last name, and date of birth.

- **Add a Credit Card to Your Samsung Account**
  Select Add Card to add a credit card to your Samsung Account. Adding a credit card to your account makes it easier to purchase online movies and TV shows. Follow the easy directions on the screen.

- **Subscribe to the Samsung e-Newsletter**
  You can receive emails containing information about Samsung products, new service announcements, special offers, and events.

Deleting a Samsung Account from the TV

Navigate to Smart Hub > Samsung Account and select Remove Accounts from TV. The account and password information for the currently signed in account is deleted from the TV. The account information for any external accounts linked to the signed in account is also deleted from the TV.

Only the information for the current signed in account is deleted. Account information for all other accounts saved on the TV remain.
Using the SAMSUNG APPS Panel

Smart Hub offers a variety of free news, sports, weather, and gaming apps you can install directly to and enjoy on your TV. The first line on the screen contains apps recommended by Samsung. These apps were automatically downloaded to your TV when you set up Smart Hub. The lines of apps below the first line contain some apps that were automatically downloaded to your TV and other apps you have selected and downloaded.

Your TV must be connected to the Internet for you to use SAMSUNG APPS.

When Smart Hub is launched for the first time, the default apps are automatically installed. The default apps may differ depending on the region.
Using Supported Features via the Pop-Up Menu - Downloaded Apps

Move the focus to an app in the second row or below, and then press and hold the button. The Tools menu appears displaying the following functions.

- **Move**
  Lets you relocate an app on the screen.

- **Delete**
  Lets you remove a selected app from your TV.

- **Multi Delete**
  Lets you remove multiple apps from the TV.

- **View Details**
  Displays detailed information about a selected app.

- **Change View**
  Lets you change how the apps are sorted on the screen, by Custom or Most Played.

- **Lock/Unlock**
  Lets you lock or unlock an app.

- **Update Apps**
  Displays a list of apps that have updates available. You can select which apps to update.
Using Supported Features via the Pop-Up Menu - Recommended Apps

Move the focus to a recommended app in the top row, and then press and hold the button. A drop down list appears with the following functions.

- **View Details**
  Displays detailed information for a selected app.

- **Update Apps**
  Lets you update the apps when updates are available.

- **Lock/Unlock**
  Lets you lock or unlock an app.

Installing an App

Quick Installation

1. On the SAMSUNG APPS screen, select Most Popular, What's new, or Categories.
   - Most Popular and What's new show the most popular and new Samsung apps, respectively. To view the entire app list by genre, select Categories. When the Categories screen appears, select a category icon to view the apps in that category.

2. Move the focus to an app, and then press and hold the button. A pop-up menu appears.

3. On the pop-up menu, select Download.
   - Most apps are free to install.
   - While an app is being installed, the progress bar appears at the bottom of the app icon so that you can monitor the progress of the installation.

4. The selected app is installed on the TV.
   - You can view installed apps on the SAMSUNG APPS screen.
Installing an App from the Detailed App Information Screen

1. On the SAMSUNG APPS screen, select Most Popular, What's new, or Categories.

   - The Most Popular and What's new show the most popular and new Samsung apps, respectively. To view the entire app list by genre, select Categories. When the Categories screen appears, select a category icon to view the apps in that category.

2. Select an app from the list. Detailed information about your selection appears on the screen.

3. Select Download to install the selected app on the TV.

   - Most apps are free to install.
   - While an app is being installed, the progress bar appears at the bottom of the app icon so that you can monitor the progress of the installation.

4. When the installation is complete, the Download button changes to Open.

   - You can view installed apps on the SAMSUNG APPS screen.

Additional Notes

- When the TV's internal memory is insufficient, you can install an app on a USB device.
- You can view icons for the apps saved on the USB device on the Apps screen only when the device is connected to the TV. You can use an app installed on a USB device only when the USB device is connected to the TV. If the USB device is disconnected while the app is running, the app is terminated.
- You can use the app installed on the USB device on a PC or another TV.

Launching an App

Select an app on the SAMSUNG APPS screen, and then press the © button. You can also start an app from its Detail screen.
Using the e-Manual

Launching the e-Manual

MENU > Support > e-Manual

The embedded e-manual contains information about your TV’s key features.

- Alternatively, you can download a copy of the e-manual from Samsung’s website, and read it on your computer or print it out.
- Words in yellow (e.g., Picture Mode) indicate a menu item and bold words in white (e.g., Smart Hub) indicate remote control buttons.
- Arrows are used to indicate the menu path. (Example: MENU > Picture > Picture Mode)

1. Press the E-MANUAL button on the remote. You can also select Support > e-Manual in the TV’s menu.
2. Select a category from the left side of the screen. Once a selection has been made, the contents of the selected category appears on the right side of the screen.
3. Select an item from the list. This opens the e-manual on the corresponding page.

If a description doesn't fit on a single screen...

- Position the focus on the page to display ▲ / ▼ on the screen. Press the ▲ or ▼ buttons to scroll the page up and down.

Additional e-Manual Features

Loading Pages using Keywords

Select Search to bring up the search screen. Enter a search term, and then select Done. Select an item from the search results to load the corresponding page.

Loading Pages from the Index Page

Select Index to bring up the index screen. Select a topic from the list to navigate to the relevant page.
Using History to Load Previously Read Pages

Select Opened page. A list of previously read pages is shown. Select a page. The e-Manual jumps to the selected page.

Accessing the Menu from the e-Manual

Select (Try Now) from the right side of a feature-description page to access the corresponding menu item and try out the feature right away. If you want to read the e-Manual entry on a specific screen menu feature:

– Press the e-Manual button on the remote to load the corresponding e-Manual page.

錾 The e-Manual cannot be accessed from some menu screens.

Loading Reference Pages

Select (Link) from the right side of a feature-description page to access the corresponding reference page.

Updating the e-Manual to the Latest Version

You can update the e-Manual in the same way you update apps,

1. Press the button to open the First Screen, and then select the Panel icon. The Panel screen appears.

2. Go to the SAMSUNG APPS screen and the highlight the e-Manual.

3. Press and hold the button. The Tools menu appears,

4. Select Update Apps from the Tools menu. A popup window appears.

5. Select e-Manual in the popup window, and then select Update.

Configuring Auto Update

MENU > Smart Hub > Apps Settings

To update the e-Manual automatically, navigate to the Smart Hub > Apps Settings menu, and then set the Auto Update option to On. The e-manual is updated automatically when an update becomes available.
Using Web Browser

Web Browser is an Internet browsing app.

 возможности на клавиатуре и мыши для более удобного просмотра веб-страниц.

The browsing page may differ from that on a PC.

Browsing Methods

Web Browser provides two browsing methods: Pointer Browsing and Link Browsing. Pointer Browsing enables you to move the pointer for selection while Link Browsing allows using the direction arrows to move the focus.

The default browsing method of Web Browser is Pointer Browsing. To enable Link Browsing, select the icon.

Command and Status Bar at a Glance

Open the Web Browser to display the command and status bar at the top of the screen. The following items are available:

- Back
  Move to the previous page.

- Forward
  Move to the next page.

- Bookmarks & History
  Move to the Bookmarks & History screen. On this screen, add the current page to Bookmarks, or move, edit, or delete a bookmarked page. Easily access visited pages by navigating the History screen.
• **Home Page**
  Move to the main screen.

• **Address Bar**
  Check the address of the current page, or enter a web page address to move to the page.

• **Refresh / Stop**
  Reload the current page or stop reloading the current page.

• **Add to Bookmarks**
  Add the current page to Bookmarks.

• **Search**
  Make a keyword search using the user-specified search engine.

  To change the search engine, select the icon and then select a search engine in the Search Engine Settings.

• **Zoom**
  Zoom in or out of the current web page.

• **PIP**
  Use Web Browser while watching a TV program on the same screen.

• **Link Browsing / Pointer Browsing**
  Select one from two browsing methods supported by Web Browser.

• **Setting**
  Configure the Web Browser settings. For more information, refer to "Browsing Preferences".

• **Close**
  Exit Web Browser.

• **New Tab**
  Open a new tab.
Browsing Preferences

Select the item on the screen. Configure the browsing settings to your needs or convenience.

Some items may not be available depending on the web page. Unavailable items are grayed out.

- **Approved Sites**
  
  To prevent children from accessing inappropriate web pages, limit access to pre-registered web pages.

  You will be asked to enter a password when selecting Approved Sites. Enter the password. The default password is 0000.

  **Approved Sites feature**: Enable/disable the Approved Sites feature.

  **Reset password for Approved Sites**: Change the password.

  **Add current site**: Add the current web page to Approved Sites.

  **Manage Approved Sites**: Enter the address of the web page that you want to add to Approved Sites, or select one from the list and delete it.

  Enabling the Approved Sites feature with no web page listed will restrict access to any web page.

- **Private Browsing On / Private Browsing Off**
  
  Enable/disable the Private Browsing feature. Enabling Private Browsing will not save the browsing history.

  When enabling Private Browsing, the icon appears at the start of the address bar.

- **Set Search Engine**
  
  Set the default search engine from the list.
• **Web Browser Settings**

  Configure the Web Browser Settings, such as browsing behaviors or security.

  **Set as Homepage:** Select a web page and set it as the homepage.

  **Pop-up Block:** Block or unblock pop-up windows.

  **Page Block:** Block or unblock pages such as commercial pages. Manage a list of pages to block by entering the address of a web page.

  **General:** Delete browsing history or Internet usage information, or reset Web Browser, Use Privacy Browsing to restrict access by malicious codes or phishing sites.

  **Encoding:** Set the encoding to Auto, or select an encoding method from the list.

  **Pointer:** Adjust the pointer speed in Pointer Browsing mode, or change the link access method.

  **Browser Information:** Check the current version of Web Browser.

• **Help**

  This will familiarize yourself with the basics of Web Browser.
Relocating an App on the Apps Screen.

1. On the SAMSUNG APPS screen, select to the app you want to move.
2. Press and hold the button. A pop-up menu appears.
3. On the pop-up menu, select **Move**.
   
   You may be asked to change the view to Custom.
4. Highlight an app you want to move. Move the app to a desired location using the arrows buttons.
5. When the app is in its new location, press the button.
   
   You cannot move Recommended Apps.

Deleting an App from the TV

If an app is deleted, the data related to the app is also deleted.

Deleting an App

1. On the SAMSUNG APPS screen, move to the app you want to remove.
2. Press and hold the button. A pop-up menu appears.
3. On the pop-up menu, select **Delete**. A removal confirmation window appears.
4. Select **Yes**. The selected app is deleted.
Removing Multiple Apps
1. On the SAMSUNG APPS screen, move to an app you want to remove.
2. Press and hold the button. A pop-up menu appears.
3. On the pop-up menu, select Multi Delete. A check box appears on the app icons.
4. Select all the apps you want to delete. A check mark appears on each app you select. When done, select Delete at the bottom of the page. A removal confirmation window appears.
5. Select Yes. The selected apps are deleted.

Rating/Reviewing an App
On the detailed app information screen, you can rate an app or send a review to the app developer.

To rate or review an app, you must log into your Samsung account. You can only rate or review with a TV purchasing apps and games.

Updating Apps
1. On the SAMSUNG APPS screen, select an app.
2. Press and hold the button. A pop-up menu appears.
3. On the pop-up menu, select Update Apps. A pop-up window listing all the apps with available updates.
4. Select the apps you want to update, and then select Update. All the selected apps are updated to the latest version.

You can choose all the apps listed in the Update window at once by selecting Select All.

Setting Auto App Update
To update apps automatically, navigate to Smart Hub > Apps Settings and set Auto Update to On. The apps will then be updated automatically when an update becomes available.
Using Other App Features and Functions

You can configure additional app features and functions.

Setting Push Notification

The Push notification function lets publishers of some apps installed on the TV send alarm messages containing news about their apps, modification information, etc. The messages are displayed on your screen as you watch TV.

1. Navigate to Smart Hub > Apps Settings > Push Notification Settings, and then set Push Notification to On.

2. On the Push Notification screen, select the apps you want push notifications for.

   The Push Notification app lists only the apps that support Push Notification Settings.

Using Channel Bound Apps.

A Channel-Bound App is an app that is linked to a particular channel. These apps provide services for or information about programs on the linked channel while you are watching the programs.

Navigate to Smart Hub > Apps Settings and set Channel-Bound Apps to On.

You can use this feature only when an app supporting Channel-Bound Apps is installed on the TV.
Using the Multimedia (Playing Photos, Videos, and Music)

You cannot play media content if the content is not supported by the TV. For more information, refer to "Read Before Playing Photo, Video, or Music Files".

Backup important files before connecting a USB device. Samsung is not responsible for damaged or lost files.

Playing Media Content Saved on a USB Device

1. To use the multimedia function, press the KEYPAD button, and then select Media Play or press the SOURCE button. The USB devices connected to the TV are listed.

2. Select the device you want to access. The folders and files in the selected USB are listed.

3. Select the media content you want to play from the list. The media content plays.

   Alternatively, navigate to the media content you want to play, and then press the ▶ button to play the content.

4. To exit, press the ■ button or RETURN button.

   If you connect a USB device to the TV while watching the TV, a pop-up window appears on the screen so that you can easily navigate the folders and files of the USB device.

   Alternatively, if you select a USB device on the Source screen, a pop-up window appears on the screen displaying the folders and files of the USB device.

Safely Removing a USB Device

1. Press the SOURCE button. The Source screen appears.

2. Navigate to the USB device you want to remove. Press and hold the button. An options list window appears.

3. Select Remove USB in the list.
Playing Multimedia Content Saved on a Computer/Mobile Device

Allowing Connections with a Computer/Mobile Device

To play multimedia content located on a computer or mobile device on the TV, you need to:

- First, establish the connection to the computer or device.
- Then, allow the connection with the computer/mobile device on the TV.

For information about establishing connections, see the "Connecting to a Computer" and "Connecting To a Mobile Device" sections.

To allow a connection with a computer or mobile device, follow these steps:

1. Navigate to Network > Multimedia Device Settings. The devices connected to the TV are listed.
2. Allow the connection with the device you want to connect to the TV. You can only play media files from devices that have been allowed to connect to the TV.

   If a computer or mobile device asks that it be allowed to connect, the connection allowance confirmation window appears on the TV so that you can easily connect it.

When Connected Through DLNA Using Your Home Network

To connect a computer through DLNA using your home network, refer to the "Connecting to a Computer" section.

To connect a mobile device through DLNA using your home network, refer to the "Connecting To a Mobile Device" section.

You may experience compatibility issues when attempting to play media files via a third-party DLNA server.

The content shared by a computer or a mobile device may not play depending on the encoding type and file format of the content. In addition, some functions may not be available.

The multimedia content may not play smoothly depending on the network status. If this occurs, transfer the content to a USB storage device, and then play content from the device.

1. Navigate to Network > Multimedia Device Settings. The devices connected to the TV are listed.
2. Select a device connected through DLNA using your home network, the folders and files shared by the selected device are listed.
3. Select the media content you want to play from the list, The media content plays.

   Alternatively, move to the media content you want to play, and then press the ▶ button to play the content.
When Connected Through Samsung Link

- To connect a computer through Samsung Link, refer to the "Connecting to a Computer" section.
- To connect a mobile device through Samsung Link, refer to the "Connecting To a Mobile Device" section.
- The content shared by a computer or a mobile device may not play depending on the encoding type and file format of the content. In addition, some functions may not be available.
- The multimedia content may not play smoothly depending on the network status. If this occurs, transfer the content to a USB storage device, and then play content from the device.

1. Navigate to the Smart Hub > Samsung Account menu, and then select Log In to sign in to your Samsung account.
2. Select Multimedia Device Settings from the Network menu. The devices connected to the TV are listed.
3. Select a device connected through Samsung Link. The folders and files shared by the selected device are listed.
4. Select the media content you want to play from the list. The media content plays.

   Alternatively, move to the media content you want to play, and then press the ▶ button to play the content.
Playing Photos
You can play photos saved on USB device. [Try Now]

Buttons and Functions Available While Viewing Photos
The TV displays the buttons below when you press the [ ] button while viewing photos from a multimedia source. The playback buttons disappear if the RETURN button is pressed.

- **Pause / Play**
  
  Start or stop the slideshow. Using slideshow, you can play all the photos in a folder one by one.

- **Previous / Next**
  
  View the previous or the next photo.

- **Settings**
  
  The following functions are available when you select the Settings button.

<table>
<thead>

Playing Videos

You can play Videos saved on USB device.

Buttons and Functions Available While Viewing Videos

The TV displays the buttons listed below when you press the button while viewing videos from a multimedia source. The playback buttons disappear if the button is pressed.

- **Pause / Play**
  
  Pause or play the video.

  When the video is paused, you can use the following functions. The TV does not play audio when the video is paused or when you are using the Step or Slow Motion functions described below.

  - **Step**: Whenever you press the button, it scans the paused video one frame at a time.
  
  - **Slow Motion**: Select the button to play the video in slow playback speed (1/8, 1/4, 1/2).

- **Rewind / Fast Forward**

  Rewind or fast forward the video.

- **Previous / Next**

  Select the button twice to play the previous video. Selecting once starts the current video from the beginning.

  To play the next video, select the button.
Settings

The following functions are available when you select the Settings button.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
</table>
| Select Scene     | **Thumbnails**: Select a scene and play the video from the scene.  
|                  | · **Thumbnails** is not available if 1) the thumbnail of the video is not extracted yet, 2) the video contains audio only or 3) the video play time is shorter than 60 seconds,  
|                  | **Chapter Titles**: Select and play another video in the same folder.  
|                  | **Time Bar**: You can use the < and > buttons to scan through the file in 10-second intervals or enter a specific time value to jump to that point in the video. |
| Subtitle         | Control the subtitles of the video.  
|                  | · **Language**: Turn the subtitles on or off.  
|                  | · **Sync**: When the video and the subtitles are not synchronized, you can adjust the synchronization.  
|                  | · **Reset Sync**: Reset the subtitle synchronization adjustment to 0.  
|                  | · **Size**: Choose the font size for the subtitles.  
|                  | · **Encoding**: If the subtitles are not working, you can change the encoding language.                                                      |
| Repeat           | Set the repeat mode. **Repeat One** repeats the current video only. **Repeat All** repeats all videos contained in the folder.             |
| Picture Size     | Change the picture size. The supported video sizes are determined by the video content.                                                      |

</table>
Digital Broadcast Information at a Glance

The Guide provides an overview of each digital channel’s program lineup. You can check the program schedules and set up a Schedule Viewing.

Press the GUIDE button on the remote to launch the Guide.

The information in the Guide is for digital channels only. Analog channels are not supported.

Using the Guide

To access the Guide functions, press and hold the button. A popup window listing the following functions appears.

Channel Filter

Channel filter lets you filter the channels in the Guide by the following categories: Added Ch, and Favorites 1 - Favorites 5.

Navigating the Program Schedule

You can move the Guide by 2 hours in either direction each time you press the ‹ or › button. You can only view programs scheduled after the current time.

Schedule Manager

This displays the schedule manager. For information about the Schedule Manager, see “Setting Up a Schedule Viewing”.

Edit Favorite Channels

Edit favorites lets you designate a channel you have selected in the Guide as a favorite.

To use Edit Favorite Channels:

1. Highlight a channel you want to add to your favorites in the Guide.
2. Press the TOOLS button. The Guide functions pop-up window appears.
4. Select the Favorites list you want to put the channel into.
Viewing Detailed Information

You can view detailed information about a selected program. The program information may differ depending on the broadcast signal and may not be available at all for certain programs.

- Select a current program on another channel, and then View Details to Watch the program.
- Select an upcoming program, and then select View Details to set up a Schedule Viewing.

For more information about watching or Schedule Viewing refer to “Setting Up a Schedule Viewing”.

Checking Current Program Info

To get information about a show, press INFO on your remote.

To view the program info, you must first set the TV’s clock. Go to Clock (System > Time > Clock).

The program information may vary depending on the type of incoming signal and may not be available at all for certain programs.

Use the < and > buttons to view information about upcoming programs. Select a program to set up a Schedule Viewing for that program.

For more information on Schedule Viewing, refer to "Setting Up a Schedule Viewing".

Changing the broadcast signal

MENU > Broadcasting > Antenna Try Now

You can choose the appropriate DTV mode for your viewing environment. Choose Air or Cable. Air is suitable for homes equipped with a separate, over-the-air antenna. Cable is suitable for homes that have subscribed to a local cable-service or satellite-service provider.

Do not use this function if your TV is connected to a cable or satellite box.

Digital Channel Signal Info and Strength

MENU > Support > Self Diagnosis > Signal Information Try Now

Select Support > Self Diagnosis > Signal Information. This displays the digital channel’s signal information and strength.

If your TV is attached to a separate, over-the-air antenna, you can use the signal strength information to adjust the antenna for increased signal strength and improved HD channel reception.

Signal information is only available for digital channels.
Setting Up a Schedule Viewing

Configure the TV to show a specific channel or program at a specific time and date. The $\square$ icon appears next to programs that have been configured for a Schedule Viewing.

To set up a Schedule Viewing, you must first set the TV's clock. Go to Clock (System > Time > Clock).

It is not possible to make a viewing schedule for a program that is currently on air.

Digital Channel Schedule Viewing

You can set up Schedule Viewing for programs on digital channels on the following screens:

- The Guide Screen
- The Program Info Screen

The Guide Screen

To set up a scheduled viewing on the Guide screen, follow these steps:

1. Press the GUIDE button on your remote.
2. On the Guide screen, use your remote control to highlight, and then select a program you would like to view.
3. On the Information Screen that appears, select Schedule Viewing. The program is scheduled for viewing. The Guide screen re-appears.
The Program Info Screen

To set up a Schedule Viewing on the INFO screen, follow these steps:

1. Change the channel to the channel that will be broadcasting the program you want to schedule.
2. Press the INFO button.
3. Move right to see program information for later broadcasts. The program information for the programs that will be broadcast later on that channel is displayed on the screen.
4. Highlight and then select the program you want to schedule. The Information screen appears.
5. Select Schedule Viewing. The program is scheduled for viewing. Press the RETURN button on your remote.

Analog Channel Schedule Viewing

MENU > Broadcasting > Schedule Manager

When you set up a scheduled viewing for an analog channel, you need to know the channel, day or days of the week the program is airing, and the time the program is airing.

To set up a schedule viewing for an analog station, follow these steps:

1. Press the MENU button, and then select Broadcasting > Schedule Manager.
2. On the Schedule Manager screen, select Schedule. The Schedule Viewing screen appears.
3. On the Schedule Viewing screen, select the Antenna connection (Air or Cable), and then move to the Channel field.

If you only receive your TV broadcasts through Air or Cable, the Antenna connection field displays only Air or only Cable.

4. Highlight the Channel field, and then select it. Scroll it up or down, find the desired channel, and then select it. Move to the Repeat field.
5. Highlight the Repeat field, and then select it. Select Once, Manual, Sat~Sun, Mon~Fri, or Everyday. If you select manual, you must also highlight and select the days you want.
6. Move to the Time field, and then select it. Set the hours by using the Up/Down directional buttons to move the numbers up or down. Do the same for the am/pm and minutes fields.
7. When done entering the time, press RETURN.
8. Select OK at the bottom of the Schedule Viewing screen.
Canceling a Schedule Viewing

To cancel a specific scheduled viewing, follow these steps:
1. Press the MENU button, and then select Broadcasting > Schedule Manager.
2. On the Scheduled screen, select the scheduled viewing. A pop-up menu appears.
3. Select Delete to cancel.
4. Select Yes on the "Remove this show" pop-up. The scheduled viewing is removed.

Editing a Schedule Viewing

To edit the time, days, or channel of a Schedule Viewing, follow these steps:
1. Press the MENU button, and then select Broadcasting > Schedule Manager.
2. On the Scheduled screen, select the scheduled viewing. A pop-up menu appears.
3. Select Edit.
4. Change the time, days, or channel in the way described in Analog Channel Schedule Viewing. Select OK when done.
Using the Channel List

Press and hold the GUIDE button while watching TV to bring up the Channel List and change the channel or check programs on other digital channels.

Select a channel from the Channel List to jump to it right away. To quickly scroll through the list, use the channel up/down buttons. This moves the focus one page at a time.

The Channel List screen contains the following icons:
- : An analog channel
- : A favorite channel
- : A locked channel

Using Options

Press the button, and then select Options. The following options are available:

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Antenna</td>
<td>Choose Air or Cable as the DTV mode. Air is suitable for homes equipped with separate, over-the-air antennas. Cable is suitable for homes that subscribe to a local cable-service or satellite-service provider.</td>
</tr>
<tr>
<td>Genre</td>
<td>Sort the list so that it includes channels of a selected genre only. You can only use Genre if you have set the channel mode in the Channel List to Added Ch. and only if the added channels contain genre information.</td>
</tr>
<tr>
<td>Edit Favorites</td>
<td>Designate favorite channels. Refer to the &quot;Creating a Personal Favorites List&quot; section for more information.</td>
</tr>
</tbody>
</table>

Viewing the Added Channels or Favorites Lists

In the Channel List, press the button, and then select Added Ch. or Favorites. Favorites will only appear if you have registered at least one favorite channel. For more information, refer to "Creating a Personal Favorites List".
Registering, Removing, and Editing Channels

MENU > Broadcasting > Edit Channel

Remove channels from the index of channels, restore removed channels, and rename analog channels.

The Edit Channel screen icons indicate the following:

- ● A: An analog channel
- ● 🧡: A favorite channel
- ● ⛔️: A locked channel

Registering and Removing Channels

MENU > Broadcasting > Edit Channel

Removing Registered Channels

Removing a registered channel from the channel index removes it from the list of channels you can access using the CH.LIST buttons on your remote.

1. Move the highlight to a channel, and then select it to remove it. Repeat to select additional channels.
2. To unselect a channel, move the highlight to the channel, and then select it.
3. To select all channels, select Options, and then select Select All from the list. You can also select Deselect All.
4. After you have made your selections, select Delete.
Adding Back Removed Channels

You restore channels to the index of channels by adding them back. Removed channels are displayed in gray in the All list only. In addition, the Add option is only available for removed channels.

1. Select Options to display a list of options. Select Category from the list, and then select All.
2. Move the highlight to a channel you want to add. Repeat to select additional channels.
3. To unselect a channel, move the highlight to the channel, and then select it.
4. To select all channels, select Options, and then select Select All from the list. You can also select Deselect All.
5. After you have made your selections, select Add.

Editing Registered Channels

MENU > Broadcasting > Edit Channel

Select Options at the bottom left of the screen to access the following options. The available options may vary depending on the broadcast signal.

- **Select All**
  Selects all channels displayed on the Edit Channel screen.

- **Antenna**
  Choose Air or Cable as the DTV mode.

- **Category**
  Channels stored in the TV are grouped into the following categories: All and Added Ch.

- **Edit Favorites**
  Designate favorite channels. For more information, refer to "Creating a Personal Favorites List".

- **Rename Channel**
  Rename analog channels. The new name can be up to 5 characters long.

- **Information**
  View detailed information about the current program.
Program Rating Lock

MENU > Broadcasting > Program Rating Lock

The Program Rating Lock feature lets you block programs based on their ratings. This is useful for controlling what children watch on TV. Program Rating Lock does not block programs originating from external sources, such as Blu-ray players, DVD players, or USB files.

Every time you access the Program Rating Lock feature, you must enter the security PIN. You must also enter this PIN to watch a blocked program. The default PIN is 0000. To change the PIN, go to System > Change PIN.

The Program Rating Lock is available only in TV mode.

Blocking Programs Using the TV Rating

To block content, select a rating category to lock. All programs at that level and higher are blocked and require the PIN to watch. To unblock a category, select the lock icon. To unblock all the categories in a row, select the lock under ALL.

Categories on the left:
- TV-Y: Young children
- TV-Y7: Children 7 and over
- TV-G: General audience
- TV-PG: Parental guidance
- TV-14: Viewers 14 and over
- TV-MA: Mature audience

Categories on the top:
- ALL: Lock all TV ratings.
- FV: Fantasy violence
- V: Violence
- S: Sexual situations
- L: Adult Language
- D: Sexually Suggestive Dialog
Blocking based on Movie Rating (MPAA)

Block movies based on their MPAA rating. This applies to all material with supplied ratings in the USA.

From the MPAA:
“The Motion Picture Association of America (MPAA) has implemented a rating system that provides parents or guardians with advanced information on which films are appropriate for children.”

Select a lock beside one of the rating categories to block that category and all higher categories. To unblock a category, select the lock icon.

- **G**: General audience (no restrictions).
- **PG**: Parental guidance suggested.
- **PG-13**: Parents strongly cautioned.
- **R**: Restricted. Children under 17 should be accompanied by an adult.
- **NC-17**: No children under age 17.
- **X**: Adults only.
- **NR**: Not rated.

Blocking Based on Canadian English Rating

Block material based on its English Canadian rating. This applies to all rated material viewed on English-Canadian TV channels.

Select a lock beside one of the rating categories to block that category and all higher categories. To unblock a category, select the lock icon.

- **C**: Programming intended for children under age 8
- **C8+**: Programming generally considered acceptable for children 8 years and over to watch on their own
- **G**: General programming, suitable for all audiences.
- **PG**: Parental Guidance
- **14+**: Programming containing themes or content which may not be suitable for viewers under the age of 14
- **18+**: Adult programming
Blocking Based on Canadian French Rating

Block material based on its French Canadian rating. This applies to all rated material viewed on French-Canadian TV channels.

Select a lock beside one of the rating categories to block that category and all higher categories. To unblock a category, select the lock icon.

**G**: General

**8 ans+**: Programming acceptable for children 8 years and over to watch on their own

**13 ans+**: Programming that may not be suitable for children under the age of 13

**16 ans+**: Programming not suitable for children under the age of 16

**18 ans+**: Programming restricted to adults

Blocking Based on Downloadable U.S. Rating

Block material based on its **Downloadable U.S. Rating**. This rating system only applies to material originating from US DTV channels.

Parental restriction information is automatically downloaded while you watch DTV channels. This download may take several seconds. If the information is unavailable from the broadcasting station, the **Downloadable U.S. Rating** menu is deactivated.

Parental restriction levels differ depending on the broadcasting station. The default menu name and the **Downloadable U.S. Rating** name changes depending on the downloaded information.

Even when the on-screen display is set to another language, the **Downloadable U.S. Rating** menu appears only in English.

Select a lock beside one of the rating categories to block that category and all higher categories. To unblock a category, select the lock icon.

Watching Blocked / Restricted Programs

To watch a blocked program, enter the PIN when requested.

When initially showing a restricted program or movie, the screen is blank because the **Program Rating Lock** blocks it. Enter the PIN to unblock the program when a message appears requesting the code.
Creating a Personal Favorites List

You can designate frequently watched channels as favorite channels. Favorite channels are highlighted in the Edit Channel and Channel List screens with the ❤ symbol. You can create up to 5 favorite channel lists.

Registering Channels as a Favorites

Registering the Current Channel as a Favorite

To register the current channel as a favorite:

1. While watching a TV channel, press the TOOLS button.
2. Select Edit Favorites from the list.
3. In the popup window that appears, select the Favorites lists you want, and then select OK.
   - You can select more than one Favorites list.
4. Select OK again. The TV has added the current channel to the Favorites list(s) you selected.
Registering Multiple Channels as Favorites

To register multiple channels as favorites at the same time:

1. Press the MENU button, and then select Broadcasting > Edit Favorites.
2. Select the channels that you want to add to your Favorites list(s) from the list in the screen.
3. Select Change Fav. on the screen.
4. Press the button repeatedly on the standard remote to cycle through the Favorites list until the list you want appears.
5. Select Add on the screen. The TV adds the channels you selected to the Favorites list you chose.

Selecting from Favorite List Channels Only

To flip through Favorite list channels only and select a channel using the channel up/down buttons:

You can select a Favorites list only if it contains at least one favorite channel.

1. Press the MENU button, and then select Broadcasting > Channel List. The Channel List appears.
2. Press the button. A Favorites list appears.
3. Press the or button to view other Favorites list.
4. Highlight a channel from the selected Favorites list using the channel up/down buttons, and then select it. The channel changes.
Editing a Favorites List

MENU > Broadcasting > Edit Favorites

You can rename and edit Favorites lists.

Edit Favorites Screen Menu Items

Select Options on the Edit Favorites screen to access the following options:

- **Copy to Favorites**
  Copy channels from one favorite channels list to another. Refer to the "Copying Channels from One Favorites list to Another" section for more information.
  
  You can use Copy to Favorites only if you have registered one or more channels to at least one Favorites list.

- **Rename Favorites**
  Rename an existing favorite channels list. Refer to the "Renaming a Favorites List" section for more information.
  
  You can use Rename only if you have registered one or more channels to at least one Favorites list.

- **Antenna**
  Choose between Air and Cable.

- **Edit Channel**
  Lets you manage the channels saved on the TV. For more information, refer to "Registering, Removing, and Editing Channels".

- **Information**
  View detailed information about the current program.
Removing Registered Channels from a Favorites List

To remove channels from a favorite list:
1. Select Change Fav.
2. Press the E button repeatedly to change the Favorites list on the screen to the Favorites list you want to use.
3. Select the channels you want to remove from the selected Favorites list.
4. Select Delete. The channels are removed.

Rearranging a Favorites List

To rearrange the order of the channels in a favorite channels list:
1. Select Change Fav, at the screen.
2. Press the E button repeatedly to change the Favorites list displayed to the Favorites list you want to use.
3. In the selected Favorites list, choose the channels you want to rearrange.
   
   The TV will move the channels you selected as a group and rearrange them so they are displayed one after another in their new location.
4. Select Change order. The Change Order highlight appears highlighting the channel you chose that is closest to the top of the screen.
5. Press the ^/ button to relocate the channels you selected. Press the E button to set the channels into their new location in the list.
Renaming a Favorites List

To rename an existing favorite channels list:
1. Select Options on the screen. A list of Options appears,
2. Select Rename Favorites from the list. A popup window appears,
3. In the popup window, select the Favorites list whose name you want to change. The on-screen keyboard appears,
4. On the keyboard, select the Clear button on the right. The current name displayed in the text entry field disappears,
5. Using the keyboard, enter a new name. The new name can be up to 20 characters long,
6. When finished, select Done. The list of favorite lists appears displaying the renamed list. Select OK.

Copying Channels from One Favorites list to Another

To copy channels from one favorite channels list to another:
1. Select Change Fav.
2. Press the E button repeatedly to change the displayed Favorites list to the Favorites list that contains the channels you want to copy.
3. Select Options on the screen. A list of Options appears,
4. Select Copy to Favorites from the list. A popup window appears,
   ✍️ Copy to Favorites is only available if there are channels in at least one Favorites list,
5. In the popup list, select the Favorites lists you want to copy the selected channels to.
6. When done, select OK. The TV copies the channels. Select OK again.
Making Sports Programs More Realistic with Soccer Mode

MENU > System > Soccer Mode
This function is not available in the U.S.A and Canada.

Enabling Soccer Mode

MENU > System > Soccer Mode > Soccer Mode
Go to System > Soccer Mode and then set Soccer Mode to On. The picture and sound modes of the TV are automatically optimized for sports events.

- Enabling Soccer Mode changes the Picture Mode to Stadium and the Sound Mode to Stadium, and disables some Picture and Sound menus.
- Press the button to turn Soccer Mode on or off.
- A (Zoom): Pause playback and divide the picture into 9 parts. Select a part to zoom it in.
TV-Viewing Support Features

Showing Captions

MENU > System > Accessibility > Caption

You can watch TV broadcasts with captions.

Even if enabled, captions will not be displayed by programs that do not support captions.

Enabling Captions

Select System > Accessibility > Caption

The TV cannot control or modify DVD or Blu-ray subtitles. To control DVD or Blu-ray subtitles, use the subtitle feature of the DVD or Blu-ray player and the player's remote control.

Selecting the Caption Language

Select System > Accessibility > Caption > Caption Mode to display a list of subtitle modes. The list of modes may vary depending on the broadcast.

- Default / CC1 ~ CC4 / Text1 ~ Text4
  (Analog channels only) The analog caption function operates in either analog TV channel mode or when a signal is supplied from an external device to the TV. (Depending on the broadcast signal, the analog caption function may or may not work with digital channels.)

- Default / Service1 ~ Service6 / CC1 ~ CC4 / Text1 ~ Text4
  (Digital channels only) The digital caption function works with digital channels. Service1 - Service6 may not be available in digital caption mode depending on the broadcast.
Changing the Font Color, Caption Size, and Font Opacity

Change the font color, background color, and size settings.

Select System > Accessibility > Caption > Digital Caption Options and then choose the setting to change.

- **Size**
  Use to change the font size. Size is not supported by analog channels.

- **Font Style**
  Choose the font style for the subtitles.

- **Font Color**
  Use to change the font color.

- **Background Color**
  Use to change the caption’s background color.

- **Window Color**
  Use to select the color of the digital caption window.

- **Font Opacity**
  Use to change the caption’s opacity.

- **Background Opacity**
  Use to change the background’s opacity.

- **Window Opacity**
  Use to select the transparency level of the digital caption window.

- **Edge Type**
  Use to select outline type of the digital captions.

- **Edge Color**
  Use to select the color outline of the digital captions.

- **Return to Default**
  This restores all caption display options to Default. Setting to Default applies the TV station’s transmitted settings.

⚠ The foreground and background color and opacity settings cannot be the same.
Enabling the Audio Guide for the Video Description

**MENU > System > Accessibility > Video Description (Try Now)**

Select **System > Accessibility > Video Description**, Activates the audio guide for the visually impaired. This function is only available with broadcasts that provide this service.

### PIP Broadcast Viewing

**MENU > Picture > PIP (Try Now)**

Use the PIP ("Picture-In-Picture") function to watch TV in a small window within the main screen while also watching content from a DVD player, Blu-ray player, computer, or a different external device on the main screen.

Select **Picture > PIP** to display the PIP settings screen. The PIP settings screen contains the following options:

- **PIP Setting**
  Activates/deactivates PIP.

- **Antenna**
  Choose **Air** or **Cable** as the digital channel mode.

- **Channel**
  Select the PIP sub-picture channel.

- **Size**
  Select the PIP sub-picture size.

- **Position**
  Select the PIP sub-picture position.

- **Select Sound**
  Select the audio source.

Choose a broadcast.

⚠️ You cannot use PIP while using **Smart Hub** or the **3D** function. (Applies in countries or for models supporting 3D.)

⚠️ Turning off the TV automatically disables PIP.

⚠️ Playing a game or using the karaoke feature on the main screen can result in lower PIP picture quality.

⚠️ For PIP to work, the main screen's source must be Component or HDMI and the input resolution must be less Full HD (FHD - 1080p). The PIP sub-screen supports digital channels only.
Scanning for Available Channels

Automatically scans and indexes all channels received through the TV’s antenna input connector.

- Do not use this function if your TV is connected to a cable or satellite box.
- If the TV has saved channels, Auto Program deletes the existing list, and then saves the newly scanned channels.

1. Select Broadcasting > Auto Program.

2. Select Start when prompted. This initiates the Auto Program function. The process can take up to 30 minutes to complete.

Selecting the Broadcast Audio Language

Configure the program's audio language. Audio Options functions differently for analog and digital channels.

- Press the INFO button to view the current broadcast’s audio signal information.

Selecting the Broadcast Audio Language (Digital)

- Selecting a Language
  
  Select Audio Options > Preferred Language, and then choose a language. Digital broadcasts contain audio signals in multiple languages. Digital programs that include the language you selected in Preferred Language are automatically played using that language. If the language you selected is not supported by the broadcast signal, the TV will use the default audio language broadcast by the TV station.
Selecting the Broadcast Audio Language (Analog)

- **Listening to Multi-Track Sound**
  
  Select **Audio Options > Multi-Track Sound**, Configure the audio for the current broadcast. **Multi-Track Sound** can be set to mono or stereo, depending on the broadcast signal or program. However, this option is automatically set to mono if the broadcast signal or program does not support stereo.

  - Press the **INFO** button to view the current broadcast’s audio signal information.
  - While watching TV, press the **TOOLS** button, and then select **Multi-Track Sound**.

Fine-Tuning the Screen

**MENU > Broadcasting > Channel Settings > Fine Tune**

- Available for analog broadcasts only.

  Analog pictures can become shaky and full of noise. If this happens, you can fine-tune the signal and/or reduce noise to clear up the picture.

  1. Select **Broadcasting > Channel Settings > Fine Tune**. An adjustment bar appears on the screen.
  2. Press the ‹ or › button to make adjustments. Select **Save** or **Close** to apply the new setting. Select **Reset** to reset the Fine-Tune operation.

Remove Scrambled Channels

**MENU > Broadcasting > Channel Settings > Clear Scrambled Channel**

Remove scrambled channels from your auto-programed channel list.
Choosing the Right Picture Mode for the Viewing Environment

**MENU > Picture > Picture Mode**

The following picture modes utilize different contrast and brightness settings to provide the best viewing experience for the environment.

- **Dynamic**
  If the ambient lighting is too bright and makes the screen blurry, use this mode to make the picture clearer.

- **Standard**
  This is the default mode suitable for most environments.

- **Natural**
  This mode is useful for reducing eye strain.

- **Movie**
  Appropriate for darkened rooms, for watching movies, and when experiencing eye fatigue. Darkens the screen and reduces glare.

- **Entertain**
  Sharpens images for a more dynamic viewing experience.

Some options may not be supported depending on the model or country.

Navigate to **Edit Name**, if you use the PC setting for PC or DVI PC, you can only available Standard and Entertain.

This mode is only available when you use a PC setting for PC or DVI PC on Edit Name.
Adjusting the Picture Quality for Each Picture Mode

**MENU > Picture**

Select one of the settings below from the Picture menu to display the slide bar for the selected setting. Adjust the value by pressing the < or > button on your remote. Choose a different setting by pressing the ▲ or ▼ button. Adjusted values are applied to the current source and picture mode.

⚠️ The Color and Tint (G/R) settings cannot be adjusted when the TV is connected to a computer via an HDMI to DVI cable.

Choose a **Picture Mode** - Dynamic, Standard, Natural, Movie - and then adjust the settings.

- **Backlight** Try Now
  
  Adjusts the brightness of individual pixels. Decreasing the brightness reduces power consumption.

- **Contrast** Try Now
  
  Adjusts the screen contrast.

- **Brightness** Try Now
  
  Adjusts the overall brightness.

- **Sharpness** Try Now
  
  Sharpens or dulls the edges of objects.

- **Color** Try Now
  
  Adjusts the overall color saturation.

- **Tint (G/R)** Try Now
  
  Adjusts the ratio of green to red. Increase the green value to saturate the greens and the red value to saturate the reds.

⚠️ Adjusted values are saved by the TV for the current source and picture mode, and remain in effect each time the source and picture mode is selected. Consequently, the TV can have different picture settings for each external source.
Applying the Current Picture Settings to Other Input Sources

MENU > Picture > Apply Picture Mode

You can apply the picture quality setting that you configured for the TV to all external devices connected to the TV or to the current source only.

To apply the setting to all external devices connected to the TV, select All Sources. To apply the setting to the current input only, select Current Source.

Fine-Tuning Each Picture Mode (Advanced Settings)

MENU > Picture > Advanced Settings

Select Picture > Advanced Settings to fine-tune how images are displayed on the TV screen for each Picture Mode.

Advanced Settings is only available when the Picture Mode is set to Standard or Movie.

When the TV is connected to a computer via an HDMI-DVI cable, only White Balance and Gamma can be adjusted.

Choose a Picture Mode and then adjust the settings.

- **Dynamic Contrast**
  
  Automatically adjusts the screen contrast. Use this option to achieve the optimal contrast setting.

- **Black Tone**
  
  Adjusts the black color depth.

- **Flesh Tone**
  
  Darkens or lightens skin tones.

- **RGB Only Mode**
  
  Adjusts the red, green, and blue levels individually.
• **Color Space**

For the LED 5300, 5200, 5100, 4300 and 4200 series models, **Custom** is not supported.

Adjusts the range of colors (the color space) that the TV can display. **Auto** automatically adjusts the color space depending on the input signal. **Native** applies a range that is wider than the input signal. **Custom** allows you to adjust the color space manually.

• **White Balance**

  - For the LED 5300, 5200, 5100, 4300 and 4200 series models

You can adjust the color temperature of the picture to make white objects look white and the overall picture appear natural. You can adjust each of the 3 color’s luminosity with the offset menu and the brightness with the gain menu. To restore the default values, select **Reset**.

  - For the LED 6100 series and higher

You can adjust the color temperature of the picture to make white objects look white and the overall picture appear natural.

  2 Point: Lets you adjust red, green, and blue luminosity with the offset menu and brightness with the gain menu. To restore the default values, select **Reset**.

  10 Point: Divides red, green, and blue into 10 sections each, and lets you modify the white balance by adjusting the brightness of each section. Select the section to adjust in the **Level** field.

  ⚠️ You can use the **10 Point** function only when the **Picture Mode** is set to **Movie**. Some external devices may not support this function.

• **Gamma**

  Adjusts the primary color intensity.

• **Motion Lighting**

  Adjusts the brightness in response to on-screen movements to reduce power consumption.

  ⚠️ This feature is only available when the **Picture Mode** is set to **Standard** and is not available in 3D mode. (Applies in countries or for models supporting 3D.)

  ⚠️ Adjusting the **Contrast**, **Brightness**, and other picture quality settings deactivates **Motion Lighting**.
Adjusting the Picture for Easier Viewing (Picture Options)

MENU > Picture > Picture Options

Select Picture > Picture Options to make additional adjustments for a better viewing experience.

When the TV is connected to a computer via an HDMI-DVI cable, only Color Tone can be adjusted.

Choose a Picture Mode and then adjust the settings.

- **Color Tone**
  
  Adjusts the color tone. The setting is applied on an individual Picture Mode basis. When you select a new Picture Mode, the TV applies the Color Tone you selected for that mode automatically.

  If the Picture Mode is set to Dynamic, you will only be able to choose Cool or Standard.

- **Digital Clean View**
  
  Reduces static and ghosting caused by a weak signal. Selecting Auto Visualization displays the signal strength on the screen. Green indicates the best possible signal.

  This function is only available for analog channels.

- **MPEG Noise Filter**
  
  Reduces MPEG noise and improves video quality.

- **HDMI Black Level**
  
  Some external devices connected to the TV via an HDMI cable can have issues such as low black level, low contrast, and dull colors. Use HDMI Black Level to adjust the black level to compensate.

  This is only available when the Input Signal, connected to the TV via an HDMI connector, is set to RGB444.
• **Film Mode (Try Now)**

Optimizes the picture quality for movies. Select this mode for watching movies.

💡 This feature is only available when you are watching a TV broadcast or when the input signal is AV, Component (480i, 1080i), or HDMI (1080i).

• **Auto Motion Plus**

This function is only available with the LED 6100 series and higher.

Removes blurring and judder from scenes with rapid movement. If you select **Custom**, you can configure Blur Reduction and Judder Reduction manually and set **LED Clear Motion** on for a sharper LED image.

💡 If you have **Auto Motion Plus** on, and then bring up the **INFO** screen, the **INFO** screen displays the resolution and frequency of the incoming video signal (60Hz). This frequency is not the same as the frequency of the picture the TV is displaying when **Auto Motion Plus** is on.

💡 If **LED Clear Motion** is **On** and the TV is receiving a 60Hz video signal, the screen may flicker.

💡 When **LED Clear Motion** is set to **On**, the screen is darker than usual.

• **LED Clear Motion**

This function is only available for the LED 5300, 5200, 5100, 4300 and 4200 series.

Removes drag from fast scenes with a lot of movement to provide a clear picture.
Viewing in 3D

3D is not available in the U.S.A. and Canada and is only available on LED 6200 series TVs or higher. The 3D option lets you view 3D media content and broadcasts. You will need to wear Samsung 3D Active Glasses to play 3D content. IR-type Samsung 3D Active Glasses and third-party 3D glasses are not supported.

Carefully read the health and safety information concerning 3D viewing before viewing 3D content. Refer to the "3D Precautions" section for more information.

Whether 3D video is displayed in true HD is usually determined by the quality and format of the video.

Starting 3D

1. Press the 3D button on your remote control or select the 3D On-Screen Remote.
2. Play 3D content.
3. Put on the Samsung 3D glasses, and then turn the glasses on. 3D viewing is enabled.

The ideal viewing distance is three times the height of the screen or more. 3D images may not appear if you do not adhere to the recommended viewing angle or distance.

The 3D feature may not work properly if there is another 3D product or an electronic device running nearby. If there is a problem, keep other electronic devices as far away as possible from the 3D Active Glasses.

The left and right 3D images may initially overlap when the TV is turned on. It takes a moment for the display to optimize and the overlapping to stop.

There are several restrictions when using 3D TV:

- Launching Smart Hub automatically disables 3D mode.
- PIP cannot be used.
- Certain Picture options are disabled.
Changing the 3D Mode

**MENU > Picture > 3D > 3D Mode**

1. Press the 3D button on your remote to start the 3D function, and then select **3D Mode** under Picture > 3D.

2. Choose from the 3D modes that appear on the screen. The supported 3D Modes may vary depending on the 3D content.

   3D Mode is automatically configured for most 3D content.

The following 3D Modes are available. However, mode availability may vary depending on the 3D content’s format.

The supported resolutions vary for each mode. Refer to the “Supported Resolutions for 3D Modes” section for more information.

- **Off** (Off)
  Deactivates 3D viewing.

- **(Normal)**
  Converts normal images to 3D images.

  Some formats do not support this mode.

- **(L/R)**
  Splits a single image into left and right overlapping images to create the 3D effect.

- **(T/B)**
  Splits a single image into top and bottom overlapping images to create the 3D effect.
Adjusting the 3D Effect

MENU > Picture > 3D

Configure the viewpoint, depth, and other 3D settings for a custom viewing experience.

All 3D effects with the exception of **3D Auto View** can only be used while watching 3D content.

- **Adjusting the 3D Viewpoint**
  
  Select **Picture > 3D > 3D Perspective**. Use the adjustment bar shown on the screen to adjust the viewpoint.

- **Adjusting the 3D Depth**
  
  Select **Picture > 3D > Depth**. Use the adjustment bar shown on the screen to adjust the depth.

  This option cannot be used if 3D mode is set to (L/R) or (T/B).

- **Reversing the Left/Right 3D Images**
  
  Select **Picture > 3D > L/R Change**. Use to reverse the left and right images.

- **Displaying 3D Content in 2D**
  
  Select **Picture > 3D > 3D → 2D**. Use to enable 2D viewing of 3D content.

  This function is not available if 3D mode is set to (Normal) or (Off).

- **Adjusting 3D Brightness**
  
  Select **Picture > 3D > 3D Light Control**. Adjust the 3D brightness level. If the screen is too dark, select **High**.
Picture Support Functions

PIP Broadcast Viewing

MENU > Picture > PIP Try Now

Watch video from an external device such as a Blu-ray player on the main screen while viewing a TV broadcast in a picture-in-picture window.

Select Picture > PIP to display the PIP settings window. The PIP settings window contains the following options:

- **PIP**
  Activates/deactivates PIP.

- **Antenna**
  Choose Air or Cable as the input source for the PIP sub-picture window.

- **Channel**
  Selects the PIP sub-picture channel.

- **Size**
  Selects the PIP sub-picture size.

- **Position**
  Selects the PIP sub-picture position.

- **Select Sound**
  Selects the audio source.

Choose a broadcast.

- PIP cannot be used while Smart Hub or 3D is active. (Applies in countries or for models supporting 3D.)
- Turning off the TV automatically disables PIP.
- Playing a game or using the karaoke feature on the main screen can result in a lower PIP picture quality.
- For PIP to work, the main screen’s source must be Component or HDMI and the input resolution must be less than FHD (Full HD). The PIP sub-screen supports digital channels only.
Changing the Picture Size and Position

Choosing the Right Screen Size

**MENU > Picture > Picture Size > Picture Size**

Most TV programs and videos are displayed in full screen, but some programs and videos are displayed in sizes that are larger or smaller. You can change the screen size for such programs and videos so that the picture fits the screen better.

> Supported screen sizes vary depending on the input signal. Refer to the "Picture Sizes and Input Signals" section for more information about supported screen sizes.

- **16:9**
  Set the picture to the 16:9 wide-screen format.

- **Zoom1**
  Magnify 16:9 pictures vertically. A magnified picture can be moved up and down.

- **Zoom2**
  Magnify Zoom1 picture even more. A magnified picture can be moved up and down.

- **Wide Fit**
  Enlarge the aspect ratio of the picture so it fits the entire screen. Enjoy 4:3 images as undistorted 16:9 images.

- **4:3**
  Sets the picture to basic 4:3 mode.

- **Screen Fit**
  Displays the full image without any cutoff.

- **Smart View 1**
  Reduces a 16:9 picture by 50%.

- **Smart View 2**
  Reduces a 16:9 picture by 25%.
Adjusting the Screen Position

Adjusts the screen position.

This option is only available with Size set to Zoom1, Zoom2, Wide Fit, or Screen Fit. When the TV is tuned to a digital channel, the screen position cannot be adjusted if the Picture Size is set to Screen Fit.

1. To adjust the screen's position, select Picture > Picture Size > Position. A popup window appears.

2. Select Position again from the popup window.

3. Press the <, >, or > button to move the screen. When done, select Position and then Close. Select Reset to reset the screen position.

Listening to Audio Only with the Screen Turned Off (Picture Off)

Turns off the screen and plays audio through the speakers only. To turn the screen back on, press any button other than the power and volume buttons.

Resetting the Picture Mode Settings

Use this option to reset the current Picture Mode to its factory settings. This does not affect the settings of other Picture Modes.
Changing the Sound Mode and Using Sound Effects

Choosing the Right Sound Mode for the Environment

Sound modes apply preset adjustments to the sound output, optimized for different viewing and listening circumstances.

The sound modes cannot be used when you are listening to audio through external speakers.

- **Standard**
  This is the normal sound mode.

- **Music**
  This mode emphasizes normal music instead of voices.

- **Movie**
  This mode is calibrated to provide the best sound for movies.

- **Clear Voice**
  This mode emphasizes voices.

- **Amplify**
  This mode increases the overall intensity of high-frequency sounds for a better listening experience. It is designed for hearing-impaired listeners.

Using Sound Effects

Use sound effects to alter how the TV projects sound.

Sound effects can only be used if the **Sound Mode** is set to **Standard**.

The sound effects cannot be used when you are listening to audio through external speakers.

Choose a **Sound Effect** and then adjust the settings.

- **DTS TruSurround HD**
  Produces sound that will make you feel like you are sitting in a movie theater or concert hall.

- **DTS TruDialog**
  Increases voice intensity to make dialog clearer.

- **Equalizer**
  Lets you adjust the speaker balance and make bandwidth adjustments. Select **Reset** to reset the settings.
Sound Support Functions

Selecting Speakers

**MENU > Sound > Speaker Settings > TV Sound Output**

TV Sound Output lets you choose which speakers the TV uses for audio output. Select **Sound > Speaker Settings > TV Sound Output**, and then select the speakers from the list. To listen to audio through the TV’s speakers and the speakers of a connected AV receiver or home theater simultaneously, select **TV Speaker**. If this causes an echo effect, choose any speaker option other than **TV Speaker** to mute the TV speakers, or turn off the receiver or home theater.

> Using external speakers alone disables the volume button and the mute function. In addition, certain **Sound** options are also disabled.

- **TV Speaker**
  
  Listen to the TV’s audio through the TV’s internal speakers.

- **Audio Out**
  
  Listen to the TV’s audio through headphones or through the speakers of a device connected to the TV via a digital optical cable.

Designating the TV's Installation Type

**MENU > Sound > Speaker Settings > TV Installation Type**

Specify the TV’s installation type. Choose between **Wall Mount** and **Stand** to optimize the TV’s sound automatically.
Enabling Digital Audio Output

This Smart TV is SPDIF-enabled. The Sony Philips Digital Interface (SPDIF) provides digital audio output to speakers and various digital devices, including A/V Receivers and home theaters.

- **Audio Format**
  Selects the Digital Audio output (SPDIF) format. The available Digital Audio output (SPDIF) formats may vary depending on the input source.

- **Audio Delay**
  This setting helps correct timing mismatches between the audio and video tracks when you are watching TV and listening to audio through a digital audio device. Enabling the feature displays a slide bar that you can use to adjust the delay by up to 250ms.

- **Dolby Digital Comp**
  Set Dolby Digital compression mode.

- **Auto Volume**
  When you change channels, video sources, or content, **Auto Volume** automatically adjusts the TV’s volume level so that the volume level remains the same for all sources. For example, if you switch from a streaming video application to a Blu-ray player or a favorite TV channel, **Auto Volume** can modify the volume up to 12db to equalize the sound.

  The **Auto Volume** function has two settings: **Normal** and **Night**. **Normal** applies a normal level of volume adjustment. **Night** applies a slightly lower volume level and is ideal for late-night TV viewing. If you want to use the volume control of a connected source device to control the sound, deactivate the **Auto Volume** function. When you use the **Auto Volume** function with a source device, the device’s volume control may not function properly.

Listening to 3D Audio in 3D Mode

This function is not available in the U.S.A and Canada.

This function is only available for the LED 6200 series models.

3D audio technology provides immersive sound that matches the pop-up effect of 3D video by using perspective in the audio depth control.

* This function is only available in 3D mode.

Resetting All Sound Settings

Use to reset all sound settings to the factory defaults.
Setting the Time and Using the Timer

Setting the Current Time

**MENU > System > Time > Clock**

Set the clock manually or automatically.

To view the time after the clock is set, press the **INFO** button on your remote.

* The clock must be reset every time the power is disconnected.

Setting the Clock using Digital Broadcast Info

**MENU > System > Time > Clock > Clock Mode**

Set **Clock Mode** to **Auto**. The TV automatically downloads the correct time from a digital channel. To enable this option, the TV’s Antenna jack must be connected to either an antenna or a cable output and must be receiving digital broadcasts. The accuracy of the time information received may vary depending on the channel and signal. If your TV is connected to a set-top-box or satellite box using HDMI or Component connections, you must set the time manually.

If the Clock is Wrong in Auto Mode...

**MENU > System > Time > Clock > Time Offset**

If the time the TV sets automatically is incorrect, you can offset the clock in 1-hour increments by as much as -/+ 12 hours. Select **System > Time > Clock > Time Offset**, and then offset the clock to the correct time.

* Time Offset adjusts the time through a network connection and is only available if the **Clock Mode** is set to **Auto** and the TV is connected to the Internet through a local area network.

* Time Offset adjusts the time if the TV fails to receive time information through normal digital broadcast signals.
Setting the Clock Manually

MENU > System > Time > Clock > Clock Set Try Now

To enter the time and date manually, follow these steps.

1. Set Clock Mode to Manual, and then select Clock Set.

2. Select Date. The date entry pop-up appears.

3. Use the ↑ and ↓ buttons to change the month. When done, move to the date field and then the year field and set them in the same fashion. When done, press the RETURN button on your remote.

4. Select the Time field. Use the ↑ and ↓ buttons to set the hour.

5. When done, move to the minutes field and then the am/pm field and set them in the same fashion. When done, press the RETURN button on your remote.

Using the Timers

Using the Sleep Timer

MENU > System > Time > Sleep Timer Try Now

This function automatically shuts off the TV after a preconfigured period of time. Select System > Time > Sleep Timer. You can set the timer up to 180 minutes in 30-minute increments.
Turning On the TV using On Timer

Set the **On Timer** so that the TV turns on automatically at a chosen time. You can set up three separate **On Timer** configurations concurrently: **On Timer 1**, **On Timer 2**, and **On Timer 3**. The On Timer is only available if the **Clock** has been set.

- **Setup**
  Select **Off**, **Once**, **Everyday**, **Mon~Fri**, **Sat~Sun**, or **Manual**. If you select **Manual**, you can select the days you want the **On Timer** to turn on the TV by highlighting each day, and then selecting it.

- **Time**
  Set the time that the TV turns on automatically. See "Setting the Clock Manually" for time setting instructions.

- **Volume**
  Specify the volume the TV will set itself to when it turns on.

- **Source**
  Select a signal source from the list. This is the source the TV will access when it turns on. If you want to use a USB device, that USB device must be connected to the TV before you start the On Timer set up. To play back media from an HDMI or Component source such as a DVD player, Blu-ray player, or set-top-box, you must leave the device on. It must be on and playing when the TV turns on.

- **Antenna**
  If you have set the **Source** to **TV**, select a broadcast signal source, **Air** or **Cable**.

- **Channel**
  If you have set the **Source** to **TV**, select a channel.

- **Music / Photo**
  If you have set the **Source** to **USB**, specify a USB device folder containing music files in the music field and/or a folder containing photos in the photo field. If you select a folder that contains music files and a folder that contains photo files, the TV plays the music files and displays the photos at the same time.
To select (for example) a music folder, follow these steps:

1. Select the music field. The music screen appears.

2. If you have no folders in the USB drive and all your music files are in the root directory, highlight, and then select the Select button. The USB drive is selected and the On Timer screen reappears displaying the name of the USB drive in the music field.

3. If you have folders with music on the USB drive, press the E button. The TV displays all the folders on the drive.

4. Scroll the list of folders until the folder you want appears. Move the highlight to the Select button to the right of the folder. Press the E button. The On Timer screen reappears displaying the folder name in the music field.

   If the folder you choose has sub-folders, you can select a sub-folder in the same fashion.

5. If you want, select a photo folder in the same way. Start by selecting the photo field.

   This feature will not function properly if the selected USB device does not contain media files or a folder has not been specified.

   The slideshow will not start if there is only one image file on the USB device.

   Folders with long names cannot be selected.

   Always use different folder names for multiple USB devices.

   Use a USB memory stick or multi-card reader. The On Timer may not work with certain battery-powered USB devices, MP3 players, or PMPs because the TV may take too long to recognize the device.

Turning Off the TV Using the Off Timer

MENU > System > Time > Off Timer (Try Now)

Set the Off Timer to turn the TV off automatically at a specific time. You can set up three separate Off Timer configurations concurrently: Off Timer 1, Off Timer 2, and Off Timer 3. The Off Timer is available only if the Clock has been set.

- **Setup**
  
  Select Off, Once, Everyday, Mon~Fri, Sat~Sun, or Manual. If you select Manual, you can select the days you want the Off Timer to turn off the TV by highlighting each day, and then selecting it.

- **Time**
  
  Set the time that the TV turns off automatically.
Using the Screen Burn Protection and Energy Saving Features

Preventing Screen Burn

**MENU > System > Auto Protection Time**

Still images can leave burned-in after-images on the screen if left on the screen for a long period of time. Use Screen Burn Protection to protect the screen. Select **System > Auto Protection Time** and then choose a time setting from the list. If a still image is shown on the screen for longer than the time you selected, the TV will automatically activate the Screen Burn Protection function to prevent burnt-in after-images.

Using Energy Saving Features

**MENU > System > Eco Solution**

Eco Solution adjusts the TV's brightness level and prevents overheating to reduce overall power consumption.

- **Energy Saving**
  
  Select a brightness setting from the list to reduce the TV's power consumption.

- **Eco Sensor**
  
  Automatically adjusts the TV's brightness level based on the ambient light level to reduce the TV's power consumption. If the Eco Sensor has adjusted the screen's brightness level, you can manually adjust the screen's minimum brightness level by adjusting the **Min, Backlight** or **Min Cell Light** (in applicable models). Changing the **Backlight** or **Min Cell Light** setting (in applicable models) while **Eco Sensor** is running automatically disables **Eco Sensor**.

  📝 This function is not available for the LED 4500 series models.

  📝 When the **Eco Sensor** is set to **On**, the screen is darker than usual.

- **No Signal Power Off**

  Select a time from the list. If no signal is received for the specified duration, the TV will automatically cut off the power to reduce power consumption.

- **Auto Power Off**

  If the TV remains on for four hours without any user input, the TV will automatically turn off to prevent overheating.
Updating the TV’s Software

View your TV’s software version and update it if necessary.

The TV is set to update software automatically via the internet by default. If you don’t want to update it automatically, set Auto Update (Support > Software Update > Auto Update) to Off.

⚠️ DO NOT turn off the TV’s power until the update is complete. The TV will turn off and on automatically after completing the software update. All video and audio settings return to the default settings after a software update.

Update now

Update now lets you update your TV’s software in three ways:

- Online, by downloading the update from the Internet directly to your TV.
- Manually, using a USB flash drive.
- Automatically (Auto Update), while the TV is in Standby Mode.

Each method is explained below.

Online

To update your TV using the Online method, follow these steps:

1. Make sure that your TV is connected to your local network and the Internet. The connection can be wired or wireless.
2. All video and audio settings return to their default settings after a software update. We recommend you record your current settings now so you can easily re-establish your settings when the update is complete.
3. Press the MENU button, and then select Support > Software Update > Update now. The Update now pop-up appears.
4. The TV searches on line for the latest software version for your TV.
5. If it does not find an update, the “No new updates” pop-up appears. Press the EXIT button to exit.
6. If the TV finds a new version, the Update Request pop-up appears.
7. Select OK. The TV updates the software, turns off, and then turns on automatically.

📝 Do not turn off the TV during the Software Update. It may cause the TV to malfunction.
Manually, Using a USB Flash Drive

To update your TV using the Manual method, follow these steps:

1. All video and audio settings return to their default settings after a software update. We recommend you record your current settings so you can easily re-establish these settings when the update is complete.

2. On a computer, visit www.samsung.com.

3. Select GET SUPPORT > Get Downloads.

4. Enter the product’s model number into the search field. As you enter the model number, a drop down will display products that match the model number.

5. Click your product’s model number in the drop down list.

6. On the page that appears, scroll down to and then click Downloads.

7. Click Firmware in the center of the page.

8. Click the ZIP button in the File column.

9. Click Send in the first pop-up that appears.

10. Click Save in the second pop-up to download, and then save the firmware file to your computer.

11. Unzip the zip archive to your computer, You should have a single folder with the same name as the zip file.

12. Copy the folder to a USB flash drive.

13. Insert the USB flash drive into a USB port of the TV.

14. In the TV’s menu, go to Support > Software Update > Update now. The TV searches for the software on the USB drive. When it finds the software, the Update Request pop-up appears.

15. Select OK. The TV updates the software, turns off, and then turns back on automatically.

Do not turn off the TV during the Software Update. It may cause the TV to malfunction.
Enabling Automatic Software Updates

MENU > Support > Software Update > Auto Update

If the TV is connected to the Internet, it can be updated via Auto Update while watching the TV. When the Background upgrade completed, the update will be applied the next time the TV is used.

This option requires an Internet connection.

If you agree to the Smart Hub terms and conditions, Auto Update will be set to On automatically. If you don't want the TV's software updated automatically, set Auto Update (Support > Software Update > Auto Update) to Off.

Protecting the TV from Hacking and malicious code

MENU > System > Smart Security

When the TV is connected to the Internet, it is vulnerable to hacks and malicious code. Smart Security protects the TV and storage media connected to the TV from such threats.

Navigate to System > Smart Security and set Smart Security to On.

Checking the TV and Connected Storage Media

MENU > System > Smart Security > Scan

Navigate to System > Smart Security and select Scan. This scans the TV and connected media for the presence of malicious code. If no malicious code is detected, a notification window appears on the screen.
If malicious code is detected...

If malicious code is found, the results of the scan will appear on the screen. This result window displays all malicious code found, and provides options to either quarantine the code or allow it to function.

1. Select all the malicious code you want to quarantine or allow.

2. Select Block or Allow. This moves the selected malicious code to the Isolated List or Allowed List.

The Isolated List displays all quarantined and blocked malicious code. You can also relocate codes from this list to the Allowed List.

The Allowed List displays all allowed malicious code. You can also relocate codes from this list to the Isolated List.

Automatically Scanning when the TV is Powered On

Navigate to System > Smart Security > Settings > Auto Scan

This automatically scans the TV and connected storage media when the TV is powered on.

Automatically Adding malicious code to the Blocked List

Navigate to System > Smart Security > Settings > Move to Isolated List automatically

Malicious code found during the scanning process is automatically added to the Blocked List.
Using Other Functions

Setting Up a Password

MENU > System > Change PIN

Set a PIN (Personal Identification Number) to lock channels, reset the TV, and change the TV settings.

1. Select System > Change PIN. The PIN input window appears.
2. Enter a PIN. The default PIN is 0000.
3. Enter a new PIN and then enter it again to confirm it. The PIN change is complete.

If you forget your PIN, you can reset it using your remote control. With the TV turned on, press the following buttons on the remote to reset the PIN to 0000: MUTE → + → RETURN → - → RETURN → + → RETURN. “+” is the Volume Up button, “-” is the Volume Down button.

Changing the Menu Language

MENU > System > Menu Language

Use this option to change the menu language. Select System > Menu Language, and then choose a language from the list.

Checking Notifications

MENU > System > Notifications

Select Notifications from the System menu to view the list of event messages generated by the TV. Notifications appear on the screen when events such as an update release for an app or Samsung Account login/logout occurs.

Select Delete All to delete all notifications.
Select Service Notice to check the SMART TV service notifications in a web browser.

Adjusting the Menu Transparency

MENU > System > Accessibility > Menu Transparency

Navigate to System > Accessibility and adjust the opacity level and the menu’s transparency.

When the High Contrast (System > Accessibility > High Contrast) setting is set to On, the menu display is automatically set to opaque and you cannot change the Menu Transparency settings.
White Text on Black Background (High Contrast)

Navigate to System > Accessibility and set High Contrast to On. This option changes major service screens to white text on a black background or changes the transparent TV menus to opaque so that text can be read more easily.

Expanding the Smart Hub's Focus Area

Navigate to System > Accessibility and set Enlarge to On. This zooms in the focused item when you use Smart Hub and makes the item larger.

Locking/Unlocking the Panel Keys

Use to lock and unlock the TV's front panel buttons (menu, channel, and volume) and the control stick on the back of the TV. Select System > General > Panel Lock and lock/unlock the keys.

Showing/Hiding the Samsung Logo while Booting

Use to enable or disable the Samsung logo display that appears when the TV starts up.

Enabling Game Mode

Game Mode optimizes the TV's settings for playing video games on a gaming console such as PlayStation™ or Xbox™.

- Game Mode cannot be used for normal TV viewing.
- Connect the gaming console before enabling Game Mode. Otherwise, the picture quality may suffer.
- The screen may shake a little.
- Enabling Game Mode automatically sets the Picture Mode to Standard and the Sound Mode to Movie.
- To use a different external device, first disconnect the game console and disable Game Mode.
Enjoying Rich Colors and Superior Picture Quality (BD Wise)

**MENU > System > General > BD Wise**

This function is only available for the LED 6100, 6200 series models.

Connecting a Samsung DVD player, Blu-ray player, or home theater system that supports BD Wise enables the richest colors and best possible picture quality. Enabling BD Wise automatically optimizes the TV’s resolution.

This feature is only available when the external device is connected via an HDMI cable.

Registering the TV as a DivX-Certified Device (To Watch For Pay DivX Movies)

**MENU > System > DivX® Video On Demand**

To watch DivX DRM protected movies on the TV, you must register the TV as a DivX certified device.

DRM stands for Digital Rights Management and is a technical security mechanism to protect the copyright of the content provider.

You can watch movies that you have free DivX movies without registration.

Visit the DivX website (http://www.divx.com) and log into your user account before registering the TV as a DivX-certified device. If you do not have an account, please create one.

1. Select **System > DivX® Video On Demand**, A window with a registration code appears on the screen.

2. Visit the DivX website on a computer, and then click [Register Your Device] under [Support] in the top menu.

3. Enter the registration code shown on the TV’s screen in the [Enter your registration code] field.

4. Enter the TV’s name in the [Name your device] field, and then click [NEXT].

5. Click [DOWNLOAD], and then save the [device_name.divx] file.

6. Transfer the [device_name.divx] file from the computer onto a USB device, and then plug the USB device into the TV.

7. Run the [device_name.divx] file on the TV to register the TV as a DivX-certified device.
Restoring the TV to the Factory Settings

This option restores all TV settings (excluding the Internet and network settings) to the factory defaults.

2. Enter the Security PIN, and then select Yes. All settings are then reset. The TV turns off and on again automatically, and then displays the Setup screen.

For more information on Setup, refer to the user manual that came with the TV.

Using the TV as a Display Model (exclusively for retail stores)

Select Support > Use Mode > Store Demo. This turns the TV into a display model for use in a retail environment.

For all other uses, select Home Use.

Store Demo should be used in retail environments only. With Store Demo, certain functions are disabled and the TV automatically resets itself after a certain amount of time.
Getting Support

The TV has several built-in systems designed for user and TV system support.

Support through Remote Management

MENU > Support > Remote Management (Try Now)

If you need assistance with your TV, you can use this feature to let Samsung Electronics diagnose your TV remotely. You will need to read and agree to the service agreement before using this feature. A Samsung Electronics technician will then diagnose, repair, and update your TV remotely. These features are only available when your TV is connected to the Internet.

Getting Remote Support

Samsung Remote Support service offers you one-on-one support with a Samsung Technician who can remotely:

- **Diagnose** your TV
- **Adjust the TV settings** for you
- **Reset your TV** to its factory settings.
- **Install recommended firmware updates**

How Does it Work?

Having a Samsung Tech service your TV remotely is easy.

Call the Samsung Contact Center and ask for remote support.

Open the menu on your TV and go to the Support section.

Select Remote Management, and then read and agree to the service agreements. When the PIN screen appears, provide the PIN number to the agent.

The agent accesses your TV.
Finding the Information You Need for Service

MENU > Support > Contact Samsung Try Now

Use this option to display the address of the Samsung website, the call center phone number, your TV’s model number, your TV’s software version, the Smart Hub info, and other information you may need to get service support from a Samsung call agent or the Samsung website.

Requesting support

MENU > Support > Request Support

When you are using the Smart TV during difficulties, you can request service support.

1. Navigate to Support > Request Support. A pop-up window appears.
3. Write your Name and Phone Number.
4. After selecting the category of the problem, select Send.

It is only available when connected to the internet. After checking the network connection status, request service support.

It is only available when you agree to the Terms and Conditions.

You can select up to 3 categories.

If an error occurred, retry the request after confirming your Name, Phone Number and Problem. If you leave an entry blank, or write incorrect information, the support request may fail.
There is a problem with the picture

Testing the Picture

Before you review the list of problems and solutions below, use Picture Test to determine if the problem is caused by the TV. The Picture Test displays a high definition picture you can examine for flaws or faults. If the test picture does not appear or there is noise or distortion, the TV may have a problem. Contact Samsung’s Call Center for assistance. If the test picture is displayed properly, there may be a problem with an external device. Please check the connections. If the problem persists, check the signal strength or refer to the external device’s user manual.

<table>
<thead>
<tr>
<th>The Problem</th>
<th>Try this!</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Flickering and Dimming</strong></td>
<td>If your Samsung Television is flickering or dimming sporadically, you may need to disable some of the energy efficiency features. Disable Energy Saving (System &gt; Eco Solution &gt; Energy Saving) or Eco Sensor (System &gt; Eco Solution &gt; Eco Sensor).</td>
</tr>
</tbody>
</table>
| **Component Connections/Screen Color** | If the color on your Samsung television screen is not correct or the black and white colors are off, run Picture Test (Support > Self Diagnosis > Picture Test). If the test results indicate that the problem is not caused by the TV, do the following:  
  ● Confirm that the TV’s video input connectors are connected to the correct external device video output connectors.  
  ● Check the other connections as well. If the TV is connected to an external device via a component cable, confirm that the Pb, Pr, and Y jacks are plugged into their proper connectors. |
| **Screen Brightness**                | If the colors on your Samsung TV are correct but just a little too dark or bright, try adjusting the following settings first.  
  ● Go to the Picture menu and adjust the Backlight/Cell Light (available on different models) Contrast, Brightness, Sharpness, Color, and Tint (G/R) settings.                                                                 |
| **Ghosting, Blurring, or Juddering** | If you notice ghosting or blurring on the screen, use the Auto Motion Plus option (Picture > Picture Options > Auto Motion Plus) to resolve the issue.  
  🚫 For the LED 5300, 5200, 5100, 4300 and 4200 series models, you can resolve this issue by using LED Clear Motion (Picture > Picture Options > LED Clear Motion).                                                                 |
<p>| <strong>Unwanted Powering Off</strong>            | If your Samsung TV appears to turn off by itself, try disabling some of the TV's energy efficiency features. See if Sleep Timer (System &gt; Time &gt; Sleep Timer) has been enabled. The Sleep Timer automatically turns the TV off after a specified period of time. If the Sleep Timer has not been enabled, see if No Signal Power Off (System &gt; Eco Solution &gt; No Signal Power Off) or Auto Power Off (System &gt; Eco Solution &gt; Auto Power Off) has been enabled and disable them. |</p>
<table>
<thead>
<tr>
<th>The Problem</th>

<tbody>
<tr>
<td>Problems Powering On</td>
<td>When the TV is turned on, the remote control receiver flashes 5 times before the screen turns on. If you are having problems powering on your Samsung television, there are a number of things to check before calling the service department. Confirm that the TV’s power cord is connected correctly at both ends and that the remote control is operating normally. Make sure that the antenna cable or cable TV cable is firmly connected. If you have a cable/satellite box confirm that it is plugged in and turned on.</td>
</tr>
<tr>
<td>Unable to find a Channel</td>
<td>If your TV is not connected to a cable box or satellite box, run Setup (System &gt; Setup) or Auto Program (Broadcasting &gt; Auto Program).</td>
</tr>
</tbody>
</table>
| The TV image does not look as good as it did in the store. | Store displays are all tuned to digital, HD (high definition) channels. If you have an analog cable/set top box, upgrade to a digital set top box. Use HDMI or Component cables to deliver HD (high definition) picture quality. Many HD channels are upscaled from SD (Standard Definition) content. Look for a channel that is broadcasting true HD content.  
  • Cable/Satellite Subscribers: Try HD channels from the channel lineup.  
  • Air/Cable Antenna Connection: Try HD channels after running the Auto Program function.  
  Adjust the cable/satellite box’s video output resolution to 1080i or 720p. |
| The picture is distorted.                        | The compression of video content may cause picture distortions, especially in fast moving pictures from sports programs and action movies. A weak or bad quality signal can cause picture distortions. This is not an issue with the TV. Mobile phones used close to the TV (within 3.2 ft) may cause noise in analog and digital channels. |
| The color is wrong or missing.                  | If you’re using a Component connection, make sure that the Component cables are connected to the correct jacks. Incorrect or loose connections may cause color problems or a blank screen.                                                                                   |
| The color is poor or the picture is not bright enough. | Go to the Picture menu and then adjust the Picture Mode, Brightness, Sharpness, and Color settings. See if Energy Saving (System > Eco Solution > Energy Saving) has been enabled. Try resetting the picture. (Picture > Picture Reset) |
| There is a dotted line on the edge of the screen. | If the Picture Size has been set to Screen Fit, change the setting to 16:9. Change the cable/satellite box resolution.                                                                                                                                             |
| The picture is black and white.                 | If you are using AV composite input, connect the video cable (yellow) to the TV’s green component jack.                                                                                                                                                         |
I can't hear the sound clearly

Testing the Sound

Before you review the list of problems and solutions below, make sure that the **TV Sound Output** menu item is set to **TV Speaker**, and then listen to the speakers again. If the TV still does not play audio, run the **Sound Test**. The **Sound Test** uses a built-in melody to check for sound problems. If the TV does not play sound during the Sound Test, or the sound is distorted, there may be a problem with the TV. Contact Samsung’s Call Center for assistance. If the TV plays the Sound Test melody without distortion, there may be a problem with an external device. Please check the connections. If the problem persists, refer to the external device’s user manual.

<table>
<thead>

</thead>
<tbody>
<tr>
<td>There is no sound or the sound is too low at maximum volume.</td>
<td>Check the volume control of the device (cable/satellite box, DVD, Blu-ray, etc.) connected to your TV.</td>
</tr>
</tbody>
</table>
| The picture is good but there is no sound.      | Set **Sound > Speaker Settings > TV Sound Output** to **TV Speaker**. If you are using an external device, check the device’s audio output option. (For example, you may need to change your cable box’s audio option to HDMI if the box connected to your TV is using an HDMI cable.)  
To listen to the computer sound, connect the external speaker to the computer’s audio output connector.  
If your TV has a headphone jack, make sure there is nothing plugged into it.  
Reboot the connected device by disconnecting and then reconnecting the device’s power cable. |
| The speakers are making an odd sound.           | Make sure that the audio cable is connected to the correct audio output connector on the external device.  
For antenna or cable connections, check the signal information. A low signal level may cause sound distortions.  
Run **Sound Test (Support > Self Diagnosis > Sound Test)**.                                                                                     |
I can't see 3D images clearly.

Testing 3D Picture Quality

To test 3D picture quality, you must be wearing 3D glasses and the glasses and the TV must be paired.

3D is not available in the U.S.A. and Canada and is only available on LED 6200 series TVs or higher.

Before you review the list of problems and solutions below, use 3D Picture Test to determine if the problem is caused by the TV. The 3D Picture Test displays a high definition picture you can examine for flaws or faults. If the test picture does not appear or there is noise or distortion, the TV may have a problem. Contact Samsung’s Call Center for assistance. If the test picture is displayed properly, there may be a problem with an external device. Please check the connections. If the problem persists, check the signal strength or refer to the external device’s user manual.

<tr>
<td>The TV is making a humming noise.</td>
<td>Your TV utilizes high-speed switching circuits and high levels of electrical current. Depending on the TV's brightness level, the TV may seem slightly noisier than a conventional TV. Your TV has undergone strict quality control procedures that meet our demanding performance and reliability requirements. Some noise coming from the TV is considered normal and is not an acceptable cause for an exchange or refund.</td>
</tr>
</tbody>
</table>
Read Before Using 3D Viewing Mode

3D is not available in the U.S.A. and Canada and is only available on LED 6200 series TVs or higher.

3D Precautions

⚠️ Warning

- When viewing a 3D video under a fluorescent lamp (50 Hz - 60 Hz) or 3-wavelength lamp, you may notice a small amount of screen flickering.
  
  🔄 If this occurs, dim or turn off the light.

- Switching the input mode while watching a 3D movie may disable the 3D function on the TV.

  🔄 As a result, the 3D glasses may not function and the movie may not be displayed properly.

- Ensure you are within the working distance of the glasses when you view a 3D video.

  🔄 The images may not be viewable in 3D if you move outside of the working distance for 3 seconds.

  🔄 If the 3D glasses are moved outside of their working distance, the signal from the TV will disconnect and the glasses’ 3D function will turn off after several seconds. When this happens, the red LED will turn on for 3 seconds.

- If you lie on your side while watching TV with 3D active glasses, the picture may appear dark or may not be visible. The actual 3D effect may be experienced differently depending on the viewer. The 3D effect may not be visible if the visual ability of your left eye differs greatly from the visual ability of your right eye.

- If a part of the 3D glasses or lenses is defective or damaged, it cannot be repaired and the glasses should be replaced. If the glasses stop working within the warranty period, the glasses can be repaired or replaced for free. If the glasses have been damaged due to the fault of the customer or the warranty period has expired, a new pair of glasses will have to be purchased.

- The 3D glasses may not work properly due to interference from other 3D products or electronic devices that operate on the 2.4GHz frequency such as a microwave oven or Internet AP. If the 3D function malfunctions due to interference, please move all other electronic or wireless communication devices as far away from the glasses and the TV as possible.

- The vividness of the image may appear degraded if you view 3D video in a place that is exposed to direct sunlight or illumination.

- The 3D glasses may malfunction if there is an electric field or metallic object such as a steel plate nearby. Keep the glasses as far away as possible from electric fields and metallic objects.

- With SSG-3570 model glasses, the glasses may power off if you remain stationary while viewing 3D video for an extended period of time.

- With SSG-3570 model glasses, if the 3D glasses do not function immediately after you put them on when the TV is in 3D mode, take them off and then put them back on.
Caution

IMPORTANT HEALTH AND SAFETY INFORMATION FOR 3D IMAGES. READ THE FOLLOWING CAUTIONS BEFORE YOU OR YOUR CHILD USE THE 3D FUNCTION.

- Adults should frequently check on children who are using the 3D function. If there are any complaints of tired eyes, headaches, dizziness, or nausea, stop the child from viewing the 3D TV and ensure that they rest.

- Do not use the 3D glasses for other purposes such as general wear, sunglasses, protective goggles, etc.

- Some viewers may experience discomfort such as dizziness, nausea, and headaches while viewing 3D TV. If you experience any of these symptoms, stop viewing the 3D TV, remove the 3D glasses, and rest for awhile.

- Watching 3D pictures for an extended period of time may cause eye strain. If you experience any eye strain, stop viewing the 3D TV, remove the 3D glasses, and rest for awhile.

- Do not use the 3D function or 3D glasses while walking or moving around. Using the 3D function or 3D Active Glasses while moving around may result in injury from running into objects, tripping, and/or falling.

- Do not sleep with the 3D glasses on. You can damage or break the temples.

- The temples on your 3D glasses are not foldable. Forcing the temples to fold will damage the 3D glasses.

- If you have SSG-3570 model 3D glasses, do not shake them repeatedly. Shaking the glasses will power them on and can cause the battery to discharge faster than it would normally.

- If you have SSG-5100GB or SSG-5150GB model glasses, there is a danger of explosion if the battery is replaced with the wrong type of battery.

- If you have SSG-5100GB or SSG-5150GB model glasses, make sure to replace the battery with the same type of battery.
Safety Precautions

Please read the following safety instructions to ensure your personal safety, prevent property damage, and ensure the proper use of the product.

- Do not place the product in a location exposed to direct sunlight, heat, fire, or water. Exposure may result in a product malfunction or fire.
- Do not apply force to the lenses of the 3D glasses. Do not drop or bend the product. Applying force, dropping, or bending may result in a 3D glasses malfunction.
- Keep the components of the 3D glasses out of reach of children. Especially, ensure children do not swallow any of the components. If your child swallows a component, consult your doctor immediately.
- When cleaning the product, do not spray water or cleaner directly onto the surface of the product. Spraying water or cleaner directly onto the glasses may result in fire or electric shock, damage to the product’s surface, or cause the indicator labels on the product’s surface to come loose.
- Do not apply chemicals containing alcohol, solvent, or surfactant such as wax, benzene, thinner, pesticide, air freshener, lubricant, or cleaner to the product. These chemicals may cause the product’s exterior to be discolored or cracked, or labels or instructions to be removed. Use only a soft cloth such as superfine fibers or cotton flannels for cleaning the product as the surface or the lenses easily crack. Because the product can be easily scratched with foreign substances, make sure to dust off the cloth before using.
- Do not disassemble, or attempt to repair or modify your 3D active glasses by yourself.
- Be careful not to let the temple ends of the 3D active glasses harm your eye.
- Do not sleep with the 3D glasses on. You can break the arms.
- Use your hands to put on or remove the 3D glasses.
- For SSG-5100 and SSG-5150GB model glasses, use only the specified standard batteries. When replacing the battery, insert the battery so that its polarity (+, -) is correct. Failing to do so may damage the battery or result in fire, personal injury, or environmental damage caused by liquid leaking from the battery.
- For SSG-5100 and SSG-5150GB model glasses, keep used batteries out of the reach of children so that they do not accidently swallow them. If your child swallows a battery, consult your doctor immediately.
- Swallowing the cylindrical (button type) battery can cause serious damage to your internal organs. If a button type battery is swallowed, contact a doctor immediately.
Supported Resolutions for 3D Modes

3D is not available in the U.S.A. and Canada and is only available on LED 6200 series TVs or higher. These specifications apply to the 16:9 display ratio only.

**HDMI**

- 3D Mode: 🎭 (L/R), 🎭 (T/B)

</tbody>
</table>

**Videos/Photos**

Refer to the "Read Before Playing Photo, Video, or Music Files" section.

**Computer via HDMI Cable**

The optimal resolution for computers connected to the TV via an HDMI cable is 1920 x 1080. If you select another resolution, the TV may not display 3D images correctly and may not be able to display the computer video in full screen.
Read Before Using Apps

- Due to the product characteristics featured on the Samsung Smart Hub, as well as limitations in available content, certain features, applications, and services may not be available on all devices or in all territories. Some Smart Hub features may also require additional peripheral devices or membership fees. Visit http://www.samsung.com for more information on specific device information and content availability. Services and content availability are subject to change without prior notice.

- Samsung Electronics takes no legal responsibility whatsoever for any interruption of app services caused by the service provider for any reason.

- Application services may be provided in English only and available content may vary depending on the area.

- For more information about applications, visit the applicable service provider’s website.

- An unstable Internet connection may cause delays or interruptions. In addition, applications may terminate automatically depending on the network environment. If this occurs, check your Internet connection and try again.

- Application services and updates may become unavailable.

- Application content is subject to change by the service provider without prior notice.

- Specific services may vary depending on the version of the application installed on the TV.

- An application’s functionality may change in future versions of the application. If this occurs, run the application's tutorial or visit the service provider’s website.

- Depending on the service provider’s policies, certain applications may not support multitasking.
Read Before Using the Web Browser

- Select **Web Browser**. The browsing screen may differ from the one on your computer.
- The web browser is not compatible with Java applications.
- You cannot download files. If you attempt to download a file, you will receive an error message instead.
- The web browser may not be able to access certain websites.
- Playing Flash videos is not supported.
- E-commerce for online purchases is not supported.
- With websites that have scrollable windows, scrolling a window can result in corrupted characters.
- ActiveX is not supported.
- Certain options are not accessible in Link Browsing mode. (Switch to Pointer Browsing to activate those options.)
- Only a limited number of fonts are supported. Certain symbols and characters may not be displayed properly.
- The response to remote commands and the resulting on-screen display may be delayed while a webpage is loading.
- Loading a webpage may be delayed or suspended completely with certain operating systems.
- The copy and paste operations are not supported.
- When composing an email or a simple message, certain functions such as the font size and color selection may not be available.
- There is a limit to the number of bookmarks and the size of the log file that can be saved.
- The number of windows that can be opened concurrently varies depending on the search conditions and the TV model.
- The web browsing speed will vary depending on the network environment.
- Embedded videos can play with a picture-in-picture (PIP) at the same time.
- The web browser supports .mp3 audio files only.
- The web browser supports a specific file format for importing and exporting bookmarks. (Compatible Format: Netscape-bookmarkfile-1)
- The folder tree information is not included when importing and exporting bookmarks.
- Exporting bookmarks to a USB device connected to the TV saves the bookmarks under a folder named "Samsung SmartTV Bookmark".
- If the Clock (System > Time > Clock) has not been set, the browsing history will not be saved.
- The browsing history is saved from latest to oldest, with the oldest entries being overwritten first.
- Video sources from PC-optimized streaming service providers may not play properly on our proprietary web browser.
- Using the on-screen QWERTY keyboard automatically disables PIP. (Except when entering a URL.)
Read Before Playing Photo, Video, or Music Files

Photo, Video, and Music File Use Limitations

- The TV supports MSC (Mass Storage Class) USB devices only. MSC is a class designation for mass storage devices. Types of MSC devices include flash card readers, and digital cameras. (USB hubs are not supported.) These kinds of devices must be connected directly to the TV’s USB port. The TV may not be able to recognize the USB device or read the files on the device if it is connected to the TV via a USB extension cable. Do not disconnect the USB device while transferring files.

- Certain digital cameras and audio devices may not be compatible with the TV.

- A USB device that requires high power (more than 500mA or 5V) may not be supported. The TV does not support HDDs (Hard Disk Drives) connected to the USB port.

- The TV supports the FAT, exFAT, and NTFS file systems.

- After sorting files in the Folder view mode, the TV can display up to 1000 files per folder. If the USB device contains more than 8,000 files and folders, however, some files and folders might not be accessible.

- The PTP (pier to pier) connection mode is available only for digital cameras. If you connect a smartphone or tablet to the TV using PTP mode, the TV will not recognize it.

Other Restrictions

- Codecs may not function properly if there is a problem with the content.
- Video content does not play or does not play correctly if there is an error in the content or container.
- Sound or video may not work if they have standard bit rates/frame rates above the TV’s compatibility ratings.
- If the Index Table is has an error, the Seek (Jump) function will not work.
- When playing video over a network connection, the video may not play smoothly because of data transmission speeds.
- Some USB/digital camera devices may not be compatible with the TV.
- The menu display is delayed when transmitting at or higher than 10Mbps.

Video Decoders

- Supports up to H.264, Level 4.1 (does not support FMO/ASO/RS)
- VC1 AP L4 is not supported.
- GMC 2 or above is not supported.

Audio Decoders

- WMA 10 Pro supports up to 5.1 channels. Supports up to the M2 profile. WMA lossless audio is not supported.
- WMA 10 pro M3 is not supported.
- QCELP and AMR NB/WB are not supported.
- Vorbis is supported for up to 2 channels.
- Dolby Digital Plus is supported for up to 5.1 channels.
- The DTS LBR codec is only available for MKV / MP4 / TS containers.

</tr>
</tbody>
</table>

The Picture Size setting is applied to the current source. The applied Picture Size will remain in effect whenever you select that source unless you change it.

Installing an Anti-Theft Lock

An anti-theft lock is a physical device that can be used to protect the TV against theft. Look for the lock slot on the back of the TV. The slot has a icon next to it. To use the lock, wrap the lock cable around an object that is too heavy to carry and then thread it through the TV’s lock slot. The lock is sold separately.

The method of using an anti-theft lock may differ for each TV model. Refer to the lock’s user manual for more information.

Availability depends on the model.
Wireless Internet Precautions

- This TV supports the IEEE 802.11a/b/g/n communication protocols, Samsung recommends using IEEE 802.11n. Video files stored on a device connected to the TV via DLNA may not play back smoothly.

- To use wireless Internet, the TV must be connected to a wireless router or modem. If the wireless router supports DHCP, the TV can use a DHCP or static IP address to connect to the wireless network.

- Select a channel that is not currently in use for the wireless router. If the channel set for the wireless router is currently being used by another device, the result is usually interference and/or a communications failure.

- Most wireless networks have an optional security system. To enable a wireless network’s security system, you need to create a password using characters and numbers. This password is then needed to connect to a security-enabled AP.

Wireless Security Protocols

The TV only supports the following wireless network security protocols,

- Authentication Modes: WEP, WPAPSK, WPA2PSK

- Encryption Types: WEP, TKIP, AES

In compliance with the newest Wi-Fi certification specifications, Samsung TVs do not support WEP or TKIP security encryption in networks running in the 802.11n mode.

If the wireless router supports WPS (Wi-Fi Protected Setup), you can connect the TV to your network using PBC (Push Button Configuration) or a PIN (Personal Identification Number). WPS automatically configures the SSID and WPA key settings.

The TV cannot connect to non-certified wireless routers.
Read Before Connecting a Computer (Supported Resolutions)

LED 5300, 5200, 5100, 6100 and 6200 series

When you connect your TV to a computer, set the computer’s video card to one of the standard resolutions listed in the tables below or on the next page. The TV will automatically adjust to the resolution you choose. Note that the optimal and recommended resolution is 1920 x1080.

Choosing a resolution not included in the tables can result in a blank screen or just the power indicator turning on.

Refer to the user manual of your graphics card for compatible resolutions.

LED 4500, 4300 and 4200 series

After connecting a computer to the TV, set the screen resolution for the TV on the computer. The optimal resolution is 1366 x 768 @ 60 Hz. If it is set to any other than in the table below, the TV may display nothing. Set the resolution properly, referring to the user guide of the computer or its graphic card.

DivX Certified® to play DivX® video up to HD 1080p, including premium content.
ABOUT DIVX VIDEO: DivX® is a digital video format created by DivX, LLC, a subsidiary of Rovi Corporation. This is an official DivX Certified® device that has passed rigorous testing to verify that it plays DivX video. Visit divx.com for more information and software tools to convert your files into DivX videos.
ABOUT DIVX VIDEO-ON-DEMAND: This DivX Certified® device must be registered in order to play purchased DivX Video-on-Demand (VOD) movies. To obtain your registration code, locate the DivX VOD section in your device setup menu. Go to vod.divx.com for more information on how to complete your registration.
DivX®, DivX Certified® and associated logos are trademarks of Rovi Corporation or its subsidiaries and are used under license.

Glossary

- **480i/480p/720p/1080i/1080p**
  Generally refers to the number of effective scanning lines that determines the screen’s resolution. There are two scanning methods: interlaced and progressive.
  - **Scanning**
    Sequential projection of pixels to form images. The higher the number of pixels, the clearer and more vivid the images.
  - **Progressive**
    A sequential scanning method that scans every line, one after another.
  - **Interlaced**
    A staggered scanning method that scans every other line until the end of the screen and then fills in the remaining lines.
Example) If the number of horizontal scan lines is 480i
Scans 240 lines from start to finish and then scans the remaining 240 lines for a total of 480 lines.
* General differences between 480i and 480p are as follows:

<table>
<thead>
<tr>
<th></th>
<th>480i</th>
<th>480p</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horizontal Frequency</td>
<td>15.75Khz</td>
<td>31.5Khz</td>
</tr>
<tr>
<td>FPS</td>
<td>30</td>
<td>60</td>
</tr>
<tr>
<td>Lines on Screen</td>
<td>480</td>
<td>480</td>
</tr>
</tbody>
</table>

- **DVI (Digital Visual Interface)**
  Connecting the TV’s DVI connector to a computer’s DVI connector via an HDMI-to-DVI cable lets you use the TV as a computer monitor. However, HDMI-to-DVI cables deliver video signals only. You must connect a set of speakers to the computer using a separate cable to hear the computer’s audio.

- **HDMI (High Definition Multimedia Interface)**
  HDMI is a method of transmitting both video and audio signals via a single cable.
• Dynamic versus Static IP Addresses

If the network requires a dynamic IP address, use an ADSL modem or router that supports the Dynamic Host Configuration Protocol (DHCP). Modems and routers that support DHCP automatically provide the IP address, subnet mask, gateway and DNS values the TV needs to access the Internet, so they do not have to be entered manually. Most home networks use a dynamic IP address.

If the network requires a static IP address, enter the IP address, subnet mask, gateway, and DNS values manually when setting up the network connection. To get the IP address, subnet mask, gateway and DNS values, contact your Internet Service Provider (ISP).

If the network requires a static IP address, use an ADSL modem that supports DHCP. ADSL modems that support DHCP also allow static IP addresses.

• Ethernet

Ethernet is a LAN (Local Area Network) that uses coaxial cables standardized by the IEEE.

• Component Connection

Component connections are mostly used for game consoles and transmit the video signal by splitting it into a luminance signal (Y) and two color signals (Pb and Pr). The connector is marked as [Component IN]_(Pr, Pb, Y) on the back of the TV. On some devices, it is sometimes marked as Cr, Cb, Y. Cb and Cr are the digital conversions of the Pb and Pr signals.

The connectors are normally color-coded red (R), blue (B), and green (G) and offer the best picture quality possible for an analog connection.
