## Cool Mist Humidifier User Manual

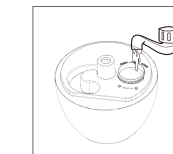

### Product Overview

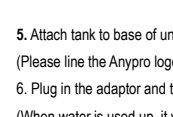

### Using your humidifier

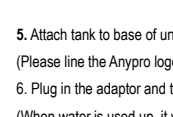

1. Separate the tank from the base of the unit.

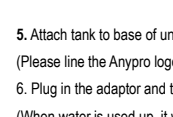

2. Flip over water tank and open the tank lid, turning it to the left.

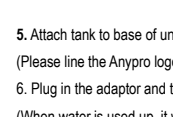

3. Pour cool, clean water directly into the tank.  
(Works best with purified or distilled water)

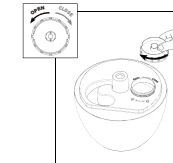

4. Close the tank lid, turning it to the right.  
It is important to FIRMLY secure cap after filling the tank with water.

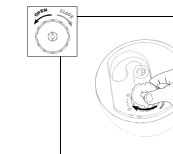

5. Attach tank to base of unit.  
(Please line the Anypro logo with power dial.)

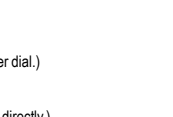

6. Plug in the adaptor and turn it on.  
(When water is used up, it will shut off directly.)

7. Rotate Dial A to turn the air humidifier on or off.

8. Flip over water tank and open the tank lid, turning it to the left.

9. Close the tank lid, turning it to the right.  
It is important to FIRMLY secure cap after filling the tank with water.

### Functions and features

#### A) Power on/off

Rotate Dial A to turn the air humidifier on or off.

#### B) Power & Waterless Indicator

The indicator light B will be green when the power is on. When the unit is low on water, the indicator B turns red, and the night light will shut off. Simply add more water to continue use. Unit will automatically resume generating mist output when water tank is refilled, but the night light won't automatically resume light on.

#### C) LED light control

The night light C can be controlled only when power is on.

- Press once: Night light ON and cycle through the colors changing automatically with 5s interval between two colors.
- Press twice: Night light is fixed on.
- Press three times: Night light OFF.

#### D) Mist Control

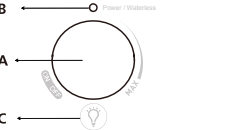

The mist outlet can be selected through 360 degrees by turning the spout and spray volume or amount of mist that is produced by the unit can be adjusted based on need by turning dial.

#### E) Aroma Drawer

The aroma drawer is for adding aroma oil for aromatherapy. **PLEASE DO NOT** put the aroma oil directly into the water tank or the water base of the humidifier, or it may cause corrosion to the product components, which may result in danger.

#### F) Antimicrobial materials

The entire water tank and the base of the unit is added antibacterial material, which can greatly reduce the bacteria and moss growth.

### Maintaining your humidifier

- Please clean the humidifier once a week for extending the lifespan.
- **Inside the base of the unit.** Pour excess water out of the unit. Wash out the unit with fresh water, using the cleaning brush and a soft cloth as needed. **Do not submerge the base of the unit into water, or allow water to enter inside the dry air exhaust port of the unit.**
- **Water tank.** Empty water tank. Remove mist nozzle and clean the mist tube with fresh water and a light brush (bottle cleaning brush is recommended).
- **Outer surface of the unit.** Wipe the surface of the unit with a soft, damp cloth if needed. If you notice an accumulation of water during usage, reduce humidity and dry outer surface with a cloth

#### Storage

- Follow the Cleaning and Descaling instructions when the humidifier will be stored at the end of the season.
- Dry the humidifier completely before storing. **DO NOT** store with water inside the Base or Water Tank.
- Pack the unit in its original carton and store in a cool, dry location.

#### Specifications

Product Name	CF-2530A Ultrasonic Humidifier
Input	AC 100-240V, 50 / 60 Hz
Wattage	25W
Water capacity	3.5L
Mist volume	250ml/h
Dimension	229(L)*220(W)*252 (H) mm
Mist coverage	30-40m <sup>2</sup>

### Troubleshooting guide

PROBLEM	SOLUTION
Water vapor and humidity are not produced.	Power plug: Unplug and then try again. Power failure: When power is returned, try again. Tank installation: Make sure the tank is correctly attached. The surface of the ultrasonic disk is dirty: Clean ultrasonic disk.
Air blows but water vapor is not produced.	Excessive water: Remove a certain amount of water from the tank. Detergent residue and/or oil ingredients from cosmetics, etc may be in tank; wash out tank and try again. The surface of the ultrasonic disk is dirty: Clean ultrasonic disk. If you use hard water, replace with softer water.
Humidity level is low.	The surface of the ultrasonic disk is dirty: Clean ultrasonic disk. The water in the unit is too cold: Replace with cool, but not cold, water.
The humidity has a bad smell.	Poor maintenance or dirty water: Clean the product thoroughly, and fill it with fresh water.
White dust is forming on nearby furniture.	Hard water may deposit a certain kind of dust. Dust in the air also settles because of added humidity in the room. Use distilled water if this becomes a nuisance. -Or use our matched Decalcification Filter.
Unit has stopped working.	No or low water. Unplug unit and refill tank.

Water is accumulating outside of unit or area surrounding unit.	Saturation of humidity. Lower mist control setting. Unit not level and water is accumulating. Unplug and place on level surface. Point spray away from objects. Raise unit on a water-resistant level surface 2-3 feet off of floor.
Water dripping when refilling.	Water remaining on bottom of tank. Wipe tank or tilt to drain before transporting.
Increased noise level.	Unit must be placed on a flat, level, hard surface. Make sure it is NOT placed on a soft or absorbent surface.
Red light on power dial.	Indicates low water. Unplug and refill tank.

#### Attention

1. Don't disassemble.
2. Don't add water via mist outlet.
3. Water temperature should be under 40°C.
4. Don't add any chemicals into water, including essential oils.
5. Do not clean the unit or water tank with detergents or cleaning chemicals of any kind.
6. Clean the ultrasonic disk with the brush only. No other cleaning tool should be used. **BRUSH ONLY.**
